DISCLAIMER

This report including enclosures and attachments, has been prepared by the Insurance and Pensions Commission (IPEC) solely for informative purposes to the pension industry stakeholders, and may not be reproduced, redistributed, communicated to a third party or relied upon by any other person for any other purpose without the Commission's prior written consent. The Commission does not accept any liability, if this report is used for any other purposes other than the above-mentioned intended purpose.

This report highlights major developments in the pension industry and does not cover the public-sector pension scheme and the National Social Security Authority (NSSA). The report is based on unaudited financial statements of insured, stand-alone self-administered funds, as well as self-administered funds under insurers and professional fund administrators.

Table of CONTENTS

1. Executive Summary

1.1 The number of registered funds in the pensions industry stood at 976 as at 30 June 2021 compared to 960 funds reported as at 30 June 2020. The slight increase in the number of funds was due to new funds registered during the period under review.

1.2 The Commission is still concerned with the high number of inactive funds which constitute 37% of the total funds. As such, work is underway to resolve them in line with the Framework for Resolution of Troubled Entities.

1.3 Notwithstanding the increase in the number of registered funds, total membership, excluding beneficiaries was 889,103, having slightly decreased by 0.4% from 892,240 as at 30 June 2020. The decrease in membership arises from the increased full commutation of pension benefits by fund members due to economic hardships currently experienced in the country.

1.4 The total asset base for the industry, in nominal terms, increased by 198.72% from ZW$66.41 billion as at 30 June 2020 to ZW$198.38 billion as at 30 June 2021. This growth was against the June 2021 annual inflation rate of 106.6%, implying a real growth in the industry's asset base.

1.5 The increase in the asset base was mainly due to the revaluation of investment property and quoted equities, which constituted 78.9% of total industry assets.

1.6 Whilst the value of prescribed assets, in nominal terms, increased by 52.33% to ZW$7.19 billion from ZW$4.72 billion reported as at 30 June 2020, compliance was still low at 3.62% against the regulatory minimum of 20%.

1.7 Total income for the industry as at 30 June 2021 was ZW$54.59 billion compared to ZW$29.55 billion reported in the same period in 2020. The income was mainly driven by fair value gains, interest from investments and contributions which respectively constituted 44%, 19% and 10% of total income.

1.8 Total industry expenditures for the period under review amounted to ZW$5.26 billion, of which ZW$3.37 billion (64.12%) went towards benefit payments.

1.9 Total administrative expenses amounted to ZW$1.89 billion and was mainly driven by investment management fee (23.33%), administration fees (21.37%), staff costs (11.37%).

2. The Insurance and Pensions Commission at a Glance

2.1 The Insurance and Pensions Commission (IPEC) is a statutory body mandated to regulate, supervise, and develop the insurance and pensions industry for the protection of policyholders and pension scheme members in Zimbabwe. This report outlines industry developments and IPEC's various activities in the pensions industry consistent with its statutory mandate for the quarter ending 30 June 2021.

3. Terms of Reference

3.1 The activities of the Commission are guided by the following Acts and the respective Regulations: -

- Insurance and Pensions Commission Act *[Chapter 24:21];*
- Pension and Provident Funds Act *[Chapter 24:09]*;
- Insurance Act *[Chapter 24:07];*
- Money Laundering and Proceeds of Crime Act *[Chapter 09:24];*
- Finance Act *[Chapter 23:04];*
- Public Entities and Corporate Governance Act *[Chapter 10:31];* and
- Public Finance Management Act *[Chapter 22:19]*.

4. Economic Developments

4.1. COVID-19 Updates

4.1.1. Globally, COVID-19 incidences remain very high, with the cumulative number of cases exceeding 180 million and the number of deaths nearly 4 million as at 30 June 2021(WHO, 2021).

4.1.2. The battle to contain COVID-19 pandemic is still ongoing with vaccines continuously being administered to various population groups. According to the IMF (2021), as of the end of June 2021, about 3 billion doses had been administered worldwide, nearly 75 percent of those are in advanced economies and China.

4.1.3. In low-income countries, less than 1% of the population had received one dose. This indicates that the rollout of vaccines is highly unequal and skewed towards advanced economies. Procurement and logistical hurdles continue to cripple vaccination efforts at global level. This leads to a slower pace of vaccination than anticipated.

4.1.4. As at 30 June 2021, Zimbabwe had 49,864 confirmed cases, 39,121 recoveries and 1,789 deaths. A total of 777,161 people had been vaccinated against COVID-19. The second quarter national recovery rate was 78%, 16 percentage points lower than the end of first quarter recovery rate of 94%.

Covid-19 Impact on Businesses at Global and National Level

The COVID-19 pandemic has accelerated digital transformation across the board, with businesses adjusting operations to cope with lockdowns, restricted movement of staff and supply interruptions.

4.1.5. The pandemic continues to have a dampening effect on tourism-reliant economies and is further exacerbating domestic challenges in low-income countries. Covid-19 related controls continue to disrupt business operations due to reduction in operating hours, constrained investment, and disrupted schooling.

4.1.6. In Zimbabwe, total tourist arrivals declined by 90% to 65,882 recorded in the first quarter of 2021 compared to the 639,356 arrivals registered in the corresponding period in 2020. All the provinces in the country suffered declines in the average hotel occupancies ranging from 5% to 25%, with no region recording average room occupancies exceeding 25%. Victoria Falls , a prime tourist destination in the country, recorded the worst decline of 28% followed by Bulawayo which had 19%. Thus, tourism sector players are operating below full capacity, and some have retrenched part of their workforce as a way of cutting operating costs.

4.1.7. The pandemic also impacted the real estate sector in which the insurance and pensions industry is significantly invested, as remote working becomes the new normal. Working from home reduced the demand for office space in the real estate sector leading to low turnover based rentals for retail properties.

4.1.8. However, the Confederation of Zimbabwe Industries anticipates the manufacturing sector's capacity utilisation to increase to 61% in 2021 from 47% in 2020, on the backdrop of increased COVID-19 vaccination drive amidst other factors such as exchange and price stability.

Covid-19 Impact on Pensions Industry.

4.1.9. The pensions industry was not spared from Covid 19 induced challenges as some pension funds requested extension of deadlines for submission of quarterly reports. Consequently, this has resulted in the late production and distribution of reports.

4.1.10. Furthermore, as the Covid 19 related restrictions persist, employers have continued to face hardships resulting in retrenchments of employees. The ripple effect has been an increase in applications for full commutations, particularly by retrenched individuals, for the purpose of settling mortgage repayments and education requirements.

4.1.11. Application for paid up status (exemptions from contribution remittances) particularly by some employers engaged in the tourism and educational sectors, which have been hard hit by Covid 19 restrictions as highlighted above.

4.1.12. Increased exposure to cyber security risk due to increased migration to IT in communicating has also presented risks to the industry, pointing to the need for the Commission to provide guidance on how to manage cyber-security risks. Thus, the Commission is in the process of developing guidelines on cyber risk.

Regulatory Responses to Covid-19

4.1.13. The Commission continues to facilitate remote working for staff, enhance offsite monitoring, and conduct virtual meetings and workshops with the objective of ensuring business continuity. The Regulator has been actively monitoring the implementation of business continuity plans to ensure that insurance companies and pension funds continue to offer uninterrupted service delivery in the face of Covid-19.

4.1.14. In addition, the Commission has extended regulatory relief measures, allowing for flexibility on statutory deadlines. Risk monitoring of supervised entities continues to be enhanced, particularly on their solvency and liquidity conditions in light of the pandemic.

4.1.15. IPEC has also been advocating for enhanced consumer protection and support of policyholders or pension members adversely affected by the Covid-19 pandemic. The Commission has also been encouraging the regulated entities to strengthen their cybersecurity measures and is in the process of developing a framework for guiding industry in the area.

4.2. Global and Regional Growth Prospects

4.2.1. The world economy is experiencing an exceptionally strong but uneven recovery. The IMF projects the global economy to grow by 6.0% in 2021 and 4.9% in 2022. The IMF projected growth rates are more optimistic when compared to those of the World Bank of 5.6% in 2021 and 4.3% in 2022. The growth forecasts, however, could be undermined by the inefficacy of Covid-19 vaccines being rolled out against the emerging variants, and delays in vaccinations.

4.2.2. The revised growth rates for advanced economies were forecast to reach 5.6% in 2021 and 4.4% in 2022 (IMF, 2021). The growth prospects are being driven by fiscal support and monetary accommodation in the United States and countries within the Euro area. However, vaccine hesitancy and global spill-overs may undermine advanced economies GDP growth in 2021 and 2022 by about 0.75 percentage points.

4.2.3. The emerging markets and developing economies (EMDEs) growth is expected to reach 6.3% in 2021 and 5.2% in 2022 (IMF 2021). The improvement in external demand and higher commodity prices lift the overall aggregate activity in EMDEs. However, the rate of growth is low because of the resurgence of new COVID-19 cases, lagging vaccination, and partial withdrawal of macroeconomic policy support. Table 1 summarizes the global economic outlook projections.

Table 1: World Economic Outlook Projections

	2020	2021*	2022*
World Output	-3.3	6.0	4.9
Advanced Economies	-4.7	5.6	4.4
USA	-3.5	7.0	4.9
Euro Area	-6.6	4.6	4.3
Emerging Markets and Developing countries	-2.2	6.3	5.2
China	2.3	8.1	5.7
Sub-Saharan Africa	-1.9	3.4	4.1
Nigeria	-1.8	2.5	2.6
South Africa	- 7.0	4.0	2.2
Zimbabwe	-4.1	7.8	5.4

Source: July 2021 World Economic Outlook Update, IMF. * Projections

4.2.4. Economic activity in Sub-Saharan Africa is expected to expand by 3.4% in 2021 and 4.1% in 2022. Positive spill-over effects from strengthening global activity, improved international control of COVID-19, and strong domestic activity in agricultural commodity exports are expected to drive the growth.

4.2.5. Nonetheless, the recovery is rather slow compared to the rest of the world in 2021 and is anticipated to remain fragile due to subdued capital inflows into the region and uncertainty concerning the course of the pandemic.

4.2.6. Tourism based countries were the most affected due to subdued tourist inflows. For example, significant declines were experienced in international tourists' arrivals in countries such as Namibia (-87%), South Africa (-73%) and Zimbabwe (-90%) during the first quarter of 2021 compared to similar period in 2020 (Zimbabwe Tourism Authority, 2021).

4.3. Domestic Economic Performance

4.3.1. The Ministry of Finance and Economic development projects growth of 7.8% in 2021 and 5.4% in 2022. The forecast growth rates are underpinned by:-

(i) post Covid-19 recovery.

(ii) firming international mineral prices.

(iii) resumption of global economic activity.

(iv) good agricultural season.

(v) domestication of value chains.

(vi) enhanced revenue collection among others.

4.3.2. The 2021 growth projection is premised on the revised sectorial growth projections: agriculture, hunting and fishing and forestry (34.0%), mining and quarrying (2.0%), electricity (13.9%), manufacturing (7.0%), construction (7.7%), accommodation and food services (6.4%), transportation and storage (4.9%), finance and insurance (4.5%), and real estate activities (1.1%).

4.3.3. The International Monetary Fund projected a 6% growth rate for Zimbabwe in 2021. Thus, almost doubling its economic growth forecast for the country when compared to 3.1% projected in April 2021. The World Bank[1] projected lower economic growth rates for the country of 3.9% in 2021 and 5.1% in 2022.

4.4. Exchange Rate Movements

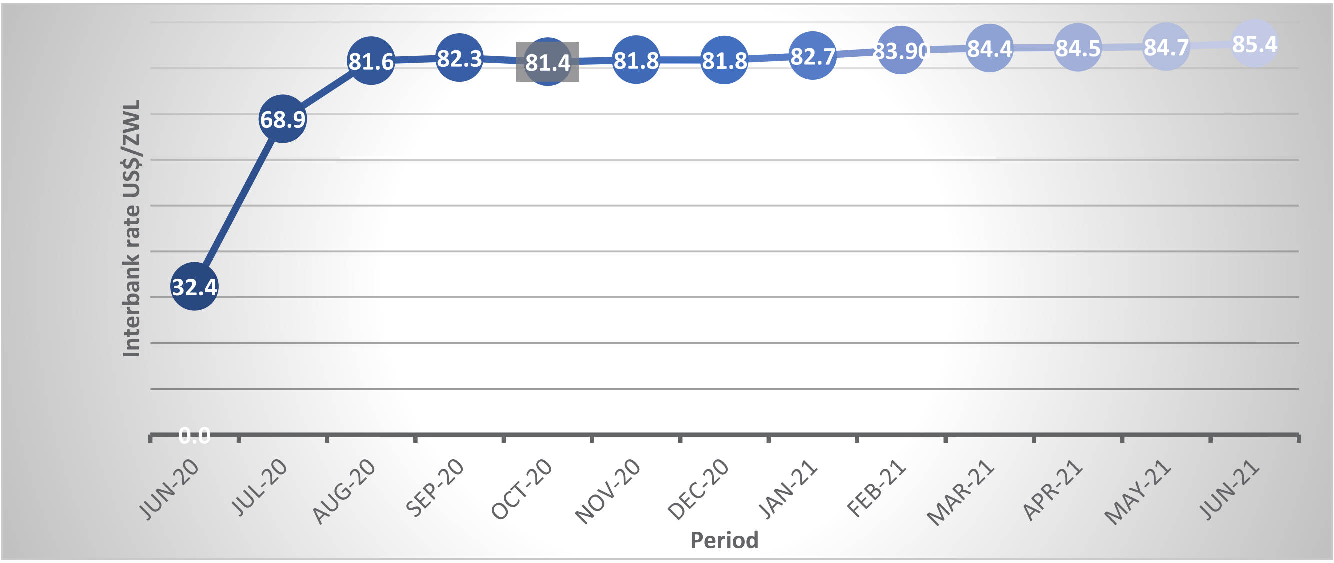
4.4.1. The Zimbabwe dollar traded steadily against the US dollar during the second quarter. It depreciated marginally by 1.2%, from a rate of ZW$84.4 per US$1 on 1 April 2021 to ZW$85.4 per US$1 as at 30 June 2021.

4.4.2. The monetary targeting framework has helped to contain money supply growth, which in turn has stabilised the exchange rate and eased inflationary pressures in the economy.

1 Zimbabwe Economic Update, June 2021 : Overcoming Economic Challenges, Natural Disasters, and the Pandemic - Social and Economic Impacts.

4.4.3. The exchange rate stability enables the industry to make long-term investment decisions, allows for the efficient allocation of resources, improves economic growth predictability, and ensures local currency value preservation. The interbank exchange rate movements during the period June 2020 to June 2021are illustrated in Figure 1.

Figure 1: Interbank Exchange Rate June 2020 to June 2021 (US$/ZW$) – End of Period



Source: Reserve Bank of Zimbabwe

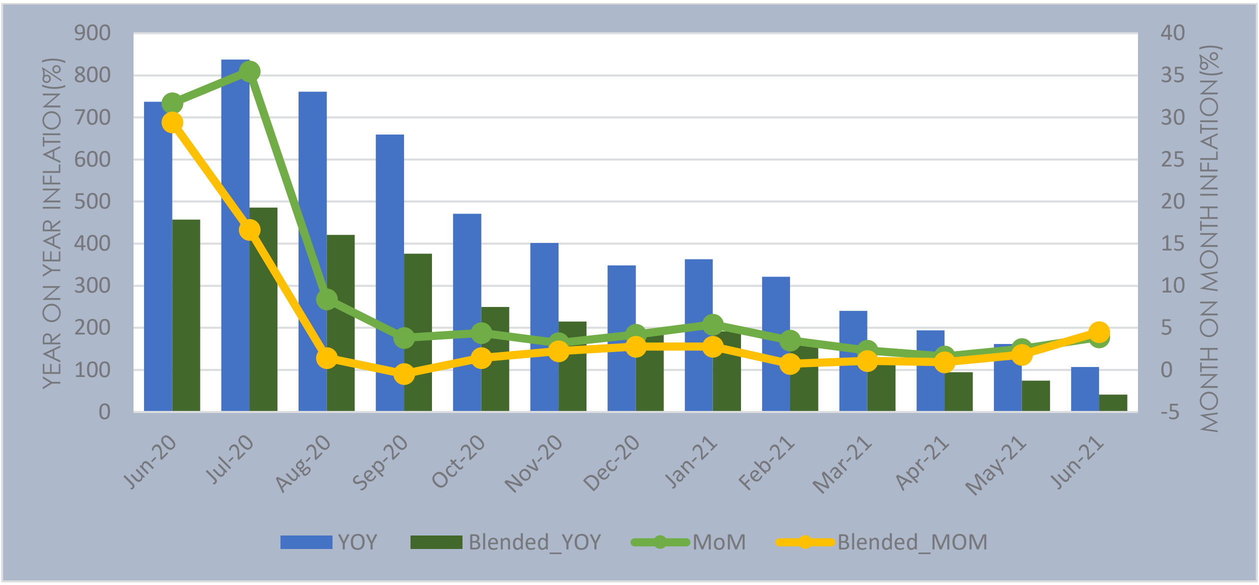
Inflation Developments

4.4.4. The annual headline inflation stood at 106.6% in June 2021, down from 194.1% registered in April 2021, supported by a conservative monetary policy, prudent fiscal policy, and stable exchange rate.

4.4.5. The annual blended inflation was also on the negative trend during the quarter under review, registering a rate of 40.9% in June 2021, which is 53.8 percentage points lower than the rate of April 2021 of 94.7%. The annual inflation is expected to decline to levels between 22% and 35% by December 2021 (Ministry of Finance and Economic Development, 2021)

4.4.6. The month-on-month inflation rate increased from 1.6% in April 2021 to 3.9% in June 2021 driven by the increase in food, non-food, and non-alcoholic beverages inflation. The month-on-month food and non-alcoholic beverages inflation rate stood at 3.21% in June 2021, gaining 2.26 percentage points on the May 2021 rate of 0.95% while the month-on-month non-food inflation rate stood at 4.38%, gaining 0.63 percentage points on the May 2021 rate of 3.75%. Figure 2 illustrates the inflation profile for the period of June 2020 to June 2021.

Figure 2: Inflation Profile (%), June 2020 - June 2021



Source: Zimbabwe National Statistics Agency

4.4.7. The high levels of inflation have impacted on investment asset mix of regulated entities. Asset managers tend to reduce investments in fixed income instruments because they yield negative real returns. Thus, the regulated entities have to be active in creating assets which meet prescribed asset requirements whilst offering good returns.

4.5. Zimbabwe Stock Exchange Performance Highlights

4.5.1. The Zimbabwe Stock Exchange (ZSE), which is a major investment destination for insurance companies and pension funds exhibited a bullish trend as equities continued to benefit from inflation hedge attractiveness during the period under review.

4.5.2. Currency depreciation and uncertainties posed by the pandemic on the economy continue to favour equities. Equities remain a better choice of investment for investors holding the local currency. The increase in liquidity also continues to drive gains on the market.

4.5.3. The second quarter of 2021 saw the equities market performing strongly, resulting in all major indices registering gains. The All-Share and Top-10 indices registered increases of 39.8% and 22.2% to close at 6,194.88 and 3,154.44 points, respectively, during the quarter. The volume of shares traded increased by 63.89% to ZW$45.71 million in the second quarter of 2021. Table 2 shows the changes in the key stock market indicators.

Table 2: Changes in the Key Stock Market Indicators

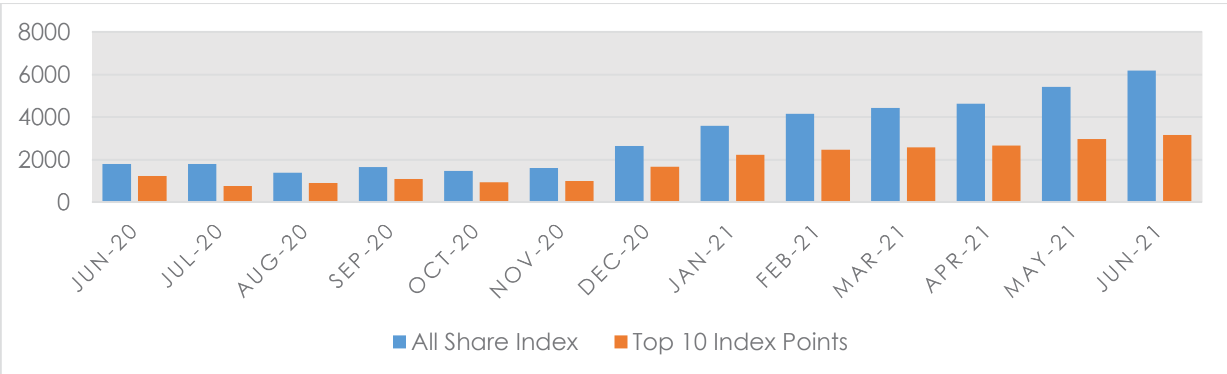
ZSE Indicator	Mar-2021	June-2021	Change (%)
All share index (points)	4432.50	6194.88	39.8
Top 10 Index (points)	2580.33	3154.44	22.2
Medium Cap Index (points)	10487.48	17293.13	64.9
Small Cap Index (points)	47327.53	201439.50	325.6
Mining Index (points)	5532.09	6308.43	14.03
Volume of shares traded (ZW$ million)	27.89	45.71	63.89
Market turnover (ZW$ million)	463.29	743.61	60.51

Source: Zimbabwe Stock Exchange (ZSE)

4.5.4. As shown in Table 2 above, the All-Share Index and Top 10 Index registered gains during the quarter under review.

4.5.5. Figure 3 illustrates the performance of these two indices between June 2020 and June 2021.

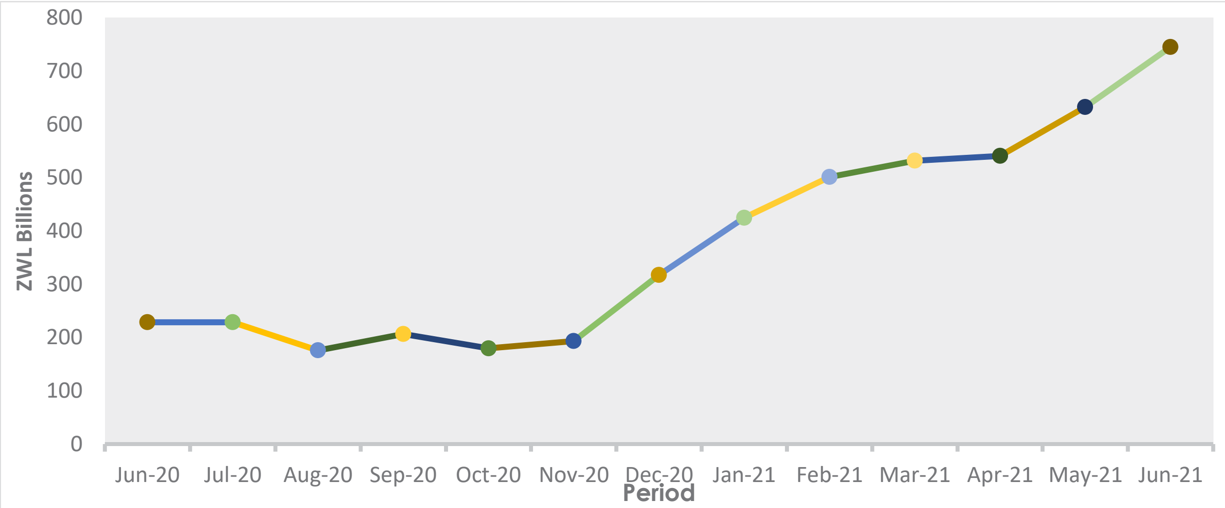
Figure 3: All-Share and Top 10 Indices Performance



Source: Zimbabwe Stock Exchange

4.5.6. Market capitalisation increased by 40.15% during the quarter under review. The increase in market capitalisation emanated from a rise in share prices. Figure 4 illustrates market capitalisation developments for the period June 2020 to June 2021.

Figure 4: Daily Market Capitalisation in ZW$ Billions



Source: Zimbabwe Stock Exchange

4.6. Victoria Falls Stock Exchange (VFEX) Performance Highlights

SeedCo International was the only counter trading at the Victoria Falls Stock Exchange during the quarter under review. As at 30 June 2021, the counter registered US$30,958.50 worth of trades, with a cumulative volume of trades of 119,982 shares. The total capitalisation stood at US$ 61,047,642.10 and five trades were recorded during the quarter. Padenga Holdings Limited was in the process of listing on VFEX.

4.7. Money Market Developments

Savings Deposit Rates

4.7.1. Whilst the annual inflation rate declined to 106.64% as at 30 June 2021, nominal interest rates for local currency-denominated instruments were below 15%. Resultantly, real returns were negative during the entire quarter under review, albeit at lower levels when compared to the previous quarter.

4.7.2. The average nominal savings deposit rates marginally increased from 4.04% as at 1st of April 2021 to 4.24% as at 25 June 2021, with an end of quarter real return of -50%. The one-month nominal deposit rate increased from a maximum of 10.83% as at 1 April 2021 to 10.72 % as at 25 June 2021, translating to an end of quarter real return of -46%.

4.7.3. The three-month nominal deposit rate decreased from a maximum of 11.80% as at 1st of April 2021 to 11.72% as at 25 June 2021, giving an end of quarter real return of -46%.

5. Regulatory Developments for the Period Ending 30 June 2021

Re-registration of Funds

There was notable increase in the number of re-registered funds from 679 reported as at 31 March 2021 to 864 funds as at 30 June 2021. The Commission is working with life companies to ensure that the remaining funds are registered, and the exercise finalised by 30 September 2021.

5.1. Prescribed Assets

During the quarter under review, the following prescribed assets were approved:-

Project	Amount	Purpose
Sahwira Agriculture	US$20 million	Capital expenditure and working capital financing for crop production
Mangwana Capital	US$2.5 billion	To finance productive sectors of the economy through equity with bias towards export-oriented ventures
Murombedzi Solar Project	US$8 million	Solar power generation
CICADA Pvt Ltd	ZW$300 million	2021 Winter Wheat Production
Agribank/AMA Agro Bills	ZW$100 million	Horticulture and oil seed production
Tynwald Land Development	US$11.5 million	Development of stands and commercial centre
Sakubva	US$5.29 million	Sakubva Urban Renewal
CBZ/AMA Bills	ZW$20 billion	Procurement of grain for the 2020/2021 marketing season.

Of the approved applications since January 2021, the insurance and pensions industry participated in three instruments, where their participation ranged from less than 1 % to about 60% of the mobilised resources.

To this end, the industry is required to subscribe to those assets where all due processes have been finalised by the issuers.

5.2. Circulars and Statutory Instruments

For the quarter under review the Commission issued and or/drafted the following circulars and Statutory Instruments:-

6. Key Circulars Issued and Statutory Instruments Drafted

Document	Release Date	Content
Circular 16 of 2021	28 April 2021	Call for Information on Status of Ownership of Property for Self-Administered Funds. This follows problems being encountered in dissolution of pension funds whose properties are not registered in the names of respective funds.
Circular 20 of 2021	4 June 2021	Guidelines on First Time Adoption of IFRS reporting which encompasses hyperinflation reporting.
Circular 25 of 2021	21 July 2021	Review of the minimum pension from ZWL500 to $3 000 per month. This is a stop gap measure while awaiting gazetting of the SI on Amendment of Pension and Provident Funds Regulations.
Draft S I		Amendment of the Pension and Provident Funds Regulations, 1991, to align them with the Act and to address gaps identified in the implementation of the current legislation

6.1. Capacitation of the Industry

6.1.1 The Commission continued to capacitate individual funds on a need basis on various issues including e-filing of returns, filing of applications for registration, and interpretation of the Guidance Paper, among others.

6.1.2 In view of the increased focus on AML/CFT issues, the Commission conducted a workshop on Risk Based Approach on AML/CFT matters, which was well attended by the industry. In the last half of the year, the Commission will focus more on raising AML/CFT issues as this was a deficient area for the insurance and pensions industry as observed by the Mutual Evaluation conducted on Zimbabwe.

AML/CFT Onsite Inspections

6.1.3 In line with its mandate of being a competent supervisory authority of the industry, the Commission conducted customised onsite inspections on two life companies. While one of the entities met most of the requirements, the other one had major deficiencies which the entity will be addressing through guidance from the Commission.

6.2. Pensions Complaints handled

6.2.1 During the quarter-ended 30 June 2021, the Commission received 90 pension-related complaints, out of which 38 were resolved while 10 were still under investigation. The remaining 42 complaints related to the implementation of the Commission of Inquiry recommendation on compensation.

6.2.2 Those under investigation related to unremitted contributions, additional information required from pensioners and investigations by pension funds on payments made through cheques submitted to members' former employers.

6.2.3 The bulk of cases that remain outstanding relate to non-remittance of contributions by employers and low values at conversion in 2009.

6.2.4 Table 3 below shows the complaints handled during the review period:

Table 3: Nature of Complaints

Nature of Complaints	Number of Complaints
Low pension values	42
Non-payment of benefits	24
Late payment of benefits	18
Unremitted contributions	6
Total	**90**

6.2.5 Ongoing engagements with sponsoring employers and Government is expected to address the issue of outstanding contributions whilst the Commission is working flat out with key stakeholders to facilitate compensation for 2009.

6.2.6 On non-payment and late payment of benefits, the Commission continues to encourage pension funds to pay benefits as they fall due.

6.2.7 It was also noted that some of the causes for non-payment and late payment of benefits had to do with arrear contributions, where sponsoring employers have not been remitting contributions, some from as way back as 2009.

6.2.8 The Commission continues to encourage pension funds to follow up on payment plans agreed with sponsoring employers who have outstanding contributions in line with the requirements of the Guidance Paper.

6.2.9 Trustees should ensure that annual benefit statements are submitted to members so that they are aware of their benefits status and contribution arrears, if any.

7. Industry Overview

7.1. The key performance indicators for the pensions industry as at 30 June 2021 are depicted in Table 4 below: -

Table 4: Key Highlights of the Pensions Industry as at 30 June 2021

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Self-Administered Funds	Total
Number of Funds	789	172	15	976
Active funds	461	138	15	614
Members (Excluding Beneficiaries)	357,614	118,738	412,751	889,103
Share of total membership	40%	13%	46%	100.00%
Total Income ($billion)	12.42	25.07	17.10	54.59
Total Contributions ($billion)	0.80	1.97	2.81	5.58
Investment Income ($billion)	10.97	22.55	13.91	47.44
Investment Income over total assets	21.73%	33.79%	17.15%	23.91%
Total Expenditure ($billion)	1.43	1.96	1.87	5.26
Total Benefits Incurred ($billion)	1.10	1.46	0.81	3.37
pension benefits per pensioner	26,167.43	31,398.11	15,523.62	19,578.18
Expenses/Contributions	40.02%	24.80%	25.82%	27.50%
Expenses/Total Income	2.59%	1.95%	4.24%	2.81%
Total Assets ($billion)	50.51	66.74	81.13	198.38
Total Assets per member	140,834	544,236	186,992	216,771
Percentage of Total Assets	25.46%	33.64%	40.90%	100.00%
Prescribed Assets ($billion)	2.95	3.51	0.73	7.19
Prescribed Assets Ratio	5.84%	5.25%	0.91%	3.62%
Contribution Arrears ($billion)	0.16	0.38	2.52	3.05

Notes:

1. Total membership excludes fund beneficiaries (spouse and children of the deceased members).
2. Total Investment income is made up of rental income, dividends, interest on investments, profit on disposal of assets and fair value gains.
3. Total Expenditure for the industry includes benefits paid, transfer to reserves, revaluation losses and provisions.
4. Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation losses.

7.2. As shown in Table 4, there were 976 registered occupational pension funds as at 30 June 2021, compared to 960 funds reported as at 30 June 2020.

7.3. The increase was on account of new funds registrations during the period under review.

7.4. Of these 976 registered funds, 614 were active, thus constituting 62.91% of the industry funds.

Membership

The industry's total membership, excluding beneficiaries declined from 892,240 to 889,103 as at 30 June 2021. The decline was largely attributable to members who exited the funds through full commutations.

7.5. The breakdown of membership as at 30 June 2021 and comparative period is shown in Table 5 below: -

Table 5: Breakdown in Membership

	Membership as at …	
Membership Class	**30 June 2021**	**30 June 2020**
New Entrants	7,068	5,817
Actives excluding new entrants	314,121	317,081
Pensioners	34,450	37,903
Deferred Pensioners	360,602	361,952
Suspended Pensioners	12,112	16,660
Unclaimed Benefits	160,750	152,827
Total Membership (excluding beneficiaries)	889,103	892,240
Beneficiaries	26,072	14,007
Total Membership (including beneficiaries)	915,175	906,247
Exits	4,578	3,255

7.6. As shown in Table 5 above, there was a decline in active members, by 1,709, from 322,898 to 321,189 as at 30 June 2021. This decline is attributed to viability challenges faced by sponsoring employers, which resulted in most funds applying for paid-up status or being dissolved.

7.7. There was a decline in the number pensioners from 37 903 to 34 450 of pensioners. The decline in pensioners is mainly attributed to members getting their full benefits through commutation applications.

7.8. There was a slight increase of 5.18% in members with unclaimed benefits, to 160,750 from 152,827 as at 30 June 2020 notwithstanding the Commission's awareness initiatives to reduce incidences of unclaimed benefits. Assets supporting unclaimed benefits stood at ZW$1.09 billion.

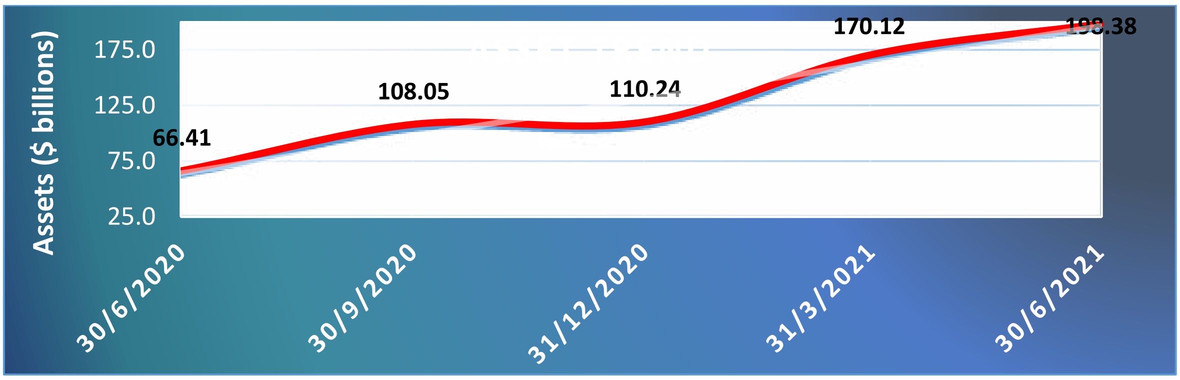
Asset Quality

7.9. The industry's asset base grew in nominal terms by 198.72% to ZW$198.38billion from ZW$66.41 billion recorded in June 2020. Furthermore, the industry's asset base grew by 100% in USD terms to US$2.32 billion from US$1.16 billion for the period under review. This points to price discovery on real assets following the 2019 currency reforms.

7.10. The industry's asset base of ZW$198.38 billion translates to a pension penetration rate of 18.53%, expressed as a percentage of the GDP[2], indicating the size of the industry relative to the national output. In addition, the pensions industry's share of ZSE's market capitalisation as at 30 June 2021 was 11.06% implying that the industry remains critical to the development of the country's stock market.

7.11. The figure below shows the industry asset base trend from 30 June 2020 to 30 June 2021: -

***Figure 5*: Trend in Industry Assets Growth**



The increase in the asset base was mainly driven by investment properties, quoted and unquoted equities which had a combined share of 86.70% of the industry's total assets.

---

2 This is 2020 GDP as reflected in the 2021 National Budget Statement

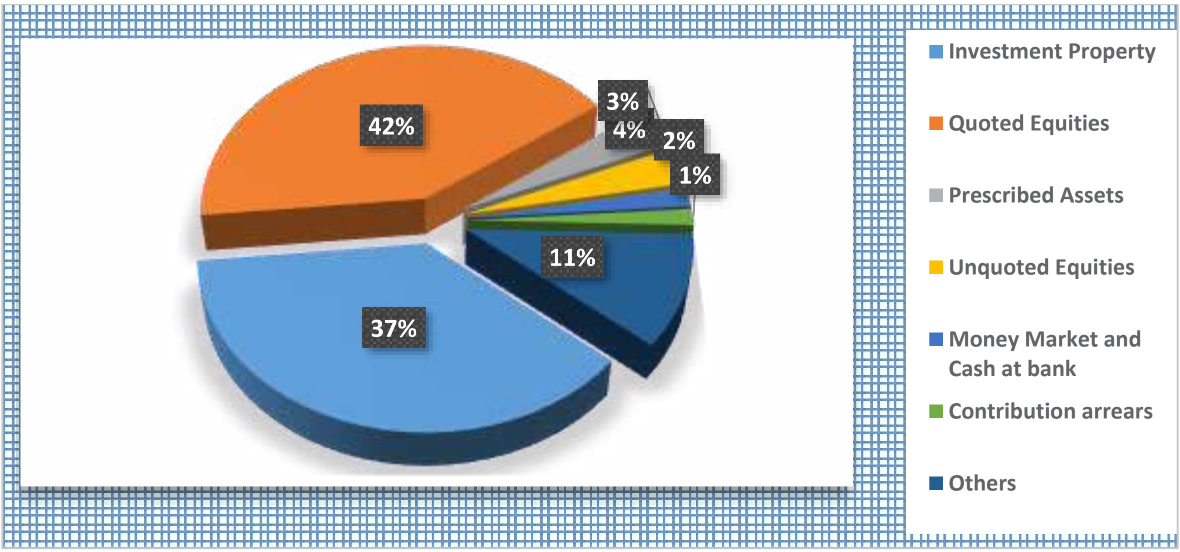
7.12. Investment property grew by 164.83%, to ZW$74.02 billion from ZW$27.95 billion as at 30 June 2020. However, its contribution to the industry's total assets declined from 42.09% to 37.31% as the industry invested in other financial instruments, which include quoted and unquoted equities, to diversify their portfolios.

7.13. Quoted and unquoted equities increased by 259.29% and 503.10%, respectively. Quoted equities increased to ZW$82.42 billion from ZW$22.94 billion while unquoted equities increased to ZW$15.56 billion from ZW$2.58 billion during the period under review. The increased proportions of both quoted and unquoted equities to total assets indicate preference for these asset classes by the industry as they seek to preserve value for pension scheme members.

7.14. Whilst there is transparency in the valuation of quoted equities, unquoted equities valuation is relatively opaque and hence the need for the industry to adopt valuation methodologies which are objective. To increase transparency, the Commission is working with other regulators and professionals to come up with valuation guidelines on unquoted equities investments.

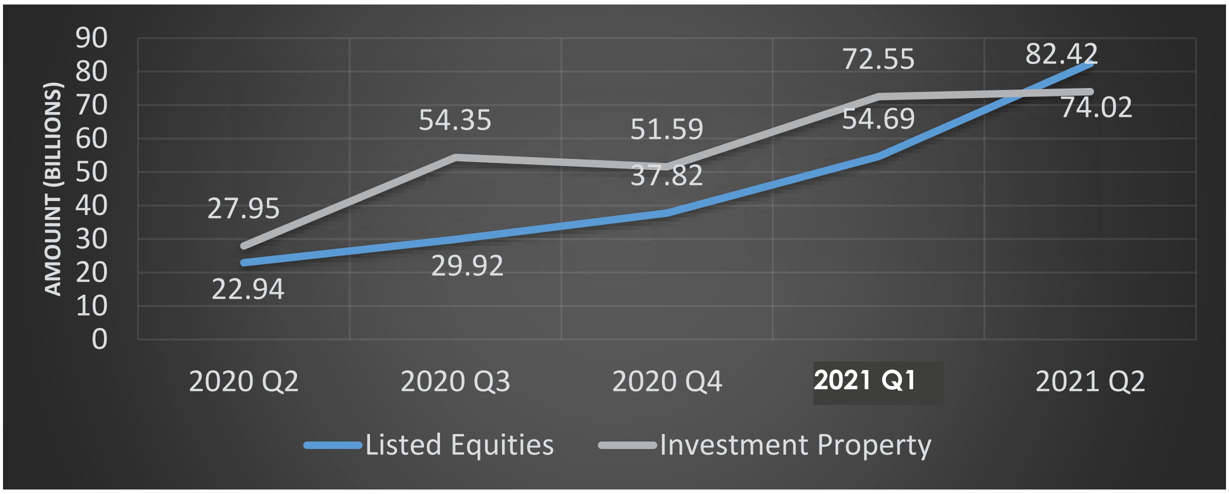
7.15. The distribution of the industry's assets as at 30 June 2021 is shown in Figure 6 below: -

***Figure 6*: Distribution of Pension Industry Assets as at 30 June 2021**



7.16. Funds' value of investments in equities and investment property in absolute terms has been on an upward trend as shown in Figure 7 below:

***Figure 7*: Listed Equities and Investment Property Trend**



7.17. Contribution arrears increased by 242.70%, to ZW$3.05 billion from ZW$0.89 billion reported as at 30 June 2020. The increase is attributed to continued non-remittance of contributions by some sponsoring employers as well as interest penalties on contribution arrears as required by the Guidance Paper.

7.18. The proportion of contribution arrears to total assets increased to 1.54% from 1.34% as at 30 June 2020.

7.19. Of the ZW$3.05 billion, 82.56%,which translates to ZW$2.52 billion, is owed to stand-alone funds. The Local Authorities Pension Fund, the Mining Industry Pension Fund and the National Railways of Zimbabwe Pension Fund constituted more than 57.10% of the industry's contribution arrears.

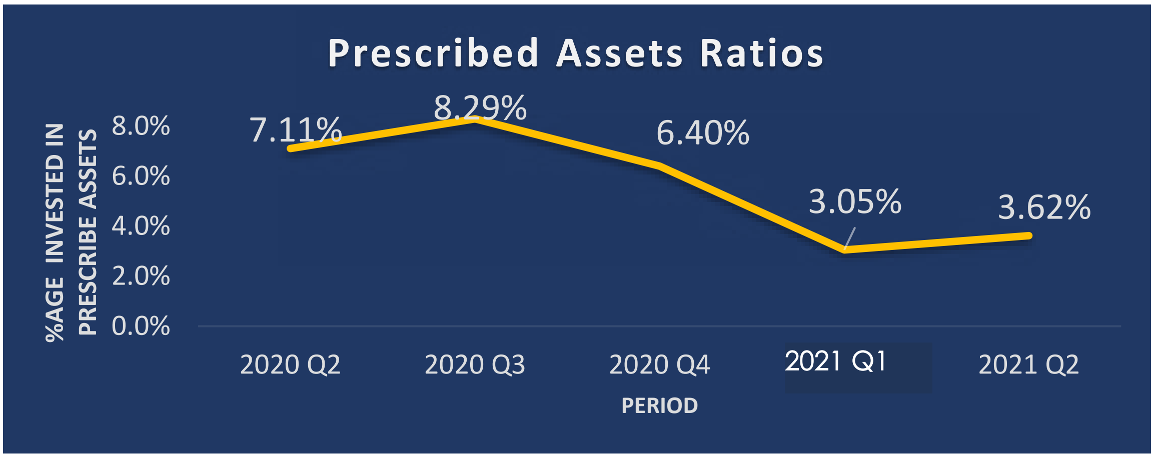
7.20. Given the increase in the proportion of contribution arrears to total assets, sponsoring employers are urged to clear these contribution arrears. The Commission will continue to engage the industry to ensure clearance of such arrears.

7.21. The total amount invested in prescribed assets increased by 52.33% to ZW$7.19 billion from ZW$4.72 billion reported in June 2020. Notwithstanding the increase in the absolute amount invested by the pensions industry in prescribed assets, compliance level remains way below the minimum prescribed ratio of 20% as shown in Table 6 below: -

Table 6: Compliance Levels for Prescribed Assets

Sector	31 March 2021		30 June 2020	
	Amount (ZW$ b)	Ratio (%)	Amount (ZW$b)	Ratio (%)
Stand-Alone Funds	0.73	0.91	0.34	1.30%
Self-Administered Funds	3.51	5.25	2.10	9.19%
Insured	2.95	5.84	2.28	13.07%
Total/Average Ratio	**7.19**	**3.62%**	**4.72**	**7.11%**

Figure 8: Prescribed Assets Compliance Level



7.22. As shown on the graph above, there was a decline in prescribed asset ratio for the pensions industry. To improve compliance levels, engagements with the industry and Government are underway to explore all the possible ways to improve prescribed assets compliance.

Unclaimed Benefits

7.23. Unclaimed benefit liabilities increased significantly by 445% from ZW$0.20 billion as at 30 June 2020 to ZW$1.09 billion.

7.24. Furthermore, there was also an increase in members with unclaimed benefits by 5.18%, to 160,750 from 152,827 reported in the same period last year. The Commission is concerned with such a high number of members with unclaimed benefits and encourages the industry to improve in their Customer Due Diligence process so that they have details before on boarding clients. Pension funds and administrators are also urged to comply with the legal requirement to remit unclaimed benefits to the Guardian Fund as well as tracing of members.

Earnings

7.25. Table 7 below indicates the key income and expenditure indicators: -

Table 7: Key Income Indicators

Indicator	June 2021 (billion)	June 2020 (billion)
Total Contributions (ZW $billion)	5.58	1.19
Investment Income (ZW $billion)	47.44	26.72
Total Income (ZW $billion)	54.59	29.55
Total Benefits (ZW $billion)	3.37	0.44
Total Expenditure (ZW $billion)	5.26	0.92
Expenses to Contribution Ratio	27.50%	27.98%
Expenses/Total Income Ratio	2.81%	1.13%
Expenses/Total Realised Income	8.43%	4.67%

7.26. The income for the period under review was mainly driven by fair value gains, interest from investments and total contributions amounting to ZW$48.94 billion. These three income streams constituted a combined 89.64% of the industry's total income.

7.27. Total expenditure increased by 471.74% from ZW$0.92 billion for the period ended 31 March 2020 to ZW$5.26 billion. The increase was mainly driven by total benefits paid, investment management expenses and administration expenses, which accounted for 64.12%, 8.37% and 7.67%, respectively.

7.28. Expenses to contributions ratio was 27.5%, whilst the expenses to total income ratio was 2.81% for the year ended 30 June 2021, compared to 27.98% and 1.13% in 2020, respectively.

7.29. Whilst the expense to total income was 2.81%, the expenses to total realised income was, however, at 8.43% as shown on Table 7 above. This implies that part of the industry's income is not realisable and cannot be used to meet the expenses and other immediate obligations.

7.30. In order to curb expenses, the Commission is working on a legal framework to regulate expenses.

7.31. Figures 9 and 10 below show the trend in expense ratios for the period 30 June 2020 to 30 June 2021: -

Figure 9 : Expenses to Contribution Ratio

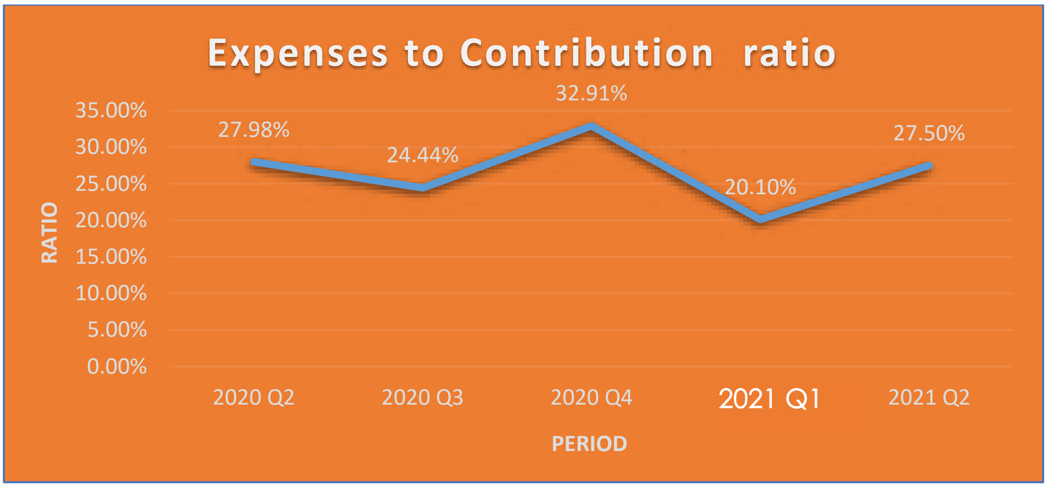


Figure 10: Expenses to Total Income Ratio

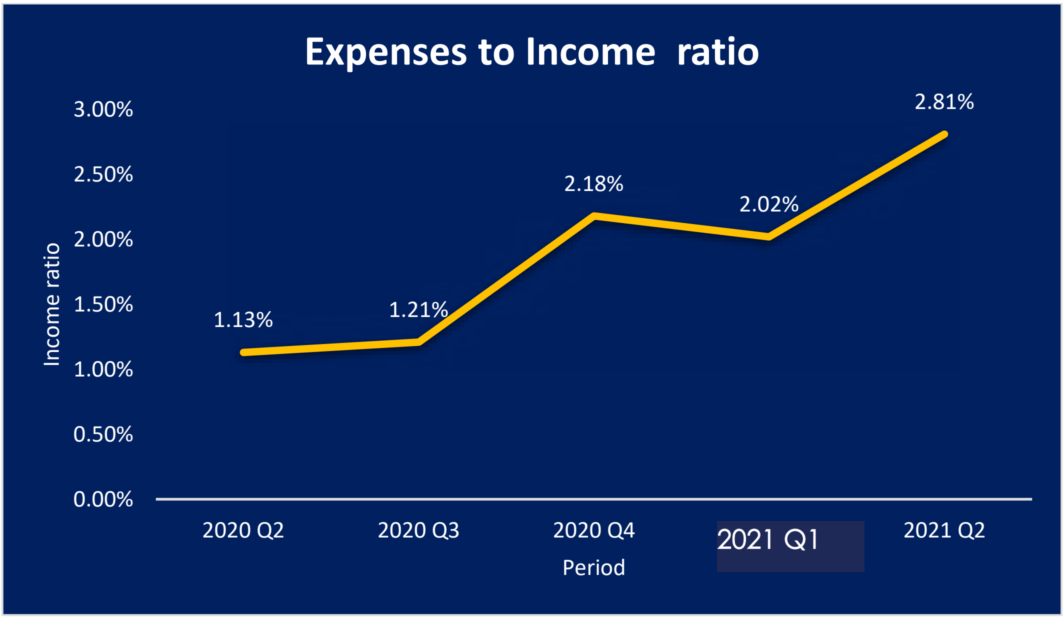


7.32. As shown on the graph above, the expenses to income ratio is on an upward trend, hence the need for the afore-mentioned regulatory intervention.

8 Insured Schemes

8.1 Sector Architecture

8.1.1 There were 6 life companies administering 789 pension funds as at 30 June 2021, increasing from 780 reported as at 30 June 2020. The increase was on account of new registrations over the period under review.

8.1.2 The distribution of the pension funds among insurers as at 30 June 2020 and 30 June 2021 is shown in Table below.

***Table 8*: Distribution of Insured Pension Funds**

Life Assurer	30 June 2021	30 June 2020
CBZ Life	6	6
Fidelity Life	38	38
First Mutual Life	129	124
Old Mutual Life	341	339
ZB Life	109	108
Zimnat Life	166	165
Total	**789**	**780**

8.1.3 It is also important to note that although there were 789 funds administered, 328 were inactive, thus constituting 41.57% of the total insured funds. The high number of inactive funds remains a concern to the Commission and various supervisory intervention measures are being explored and will be communicated to the market soon.

8.2 Membership

8.2.1 Total membership, excluding beneficiaries, for insured funds increased to 357,614 as at 30 June 2021 from 353,544 as at 30 June 2020. The membership for insured funds as at 30 June 2021 and 30 June 2020 is shown in the Table below.

Table 9: Membership Classes

	Number of members as at…	
Membership Class	**30 June 2021**	**30 June 2020**
New Entrants	2,129	2,886
Active Members (Excluding new Entrants)	96,473	102,744
Pensioners	6,721	7,565
Deferred Pensioners	235,170	230,043
Suspended Pensioners	1,494	2,308
Members with unclaimed Benefits	15,627	7,086
Total	**357,614**	**353,544**
Exits	**2,456**	**2,659**

8.2.2 The increase in total membership was mainly attributed to new members who joined either newly registered funds or transferred from other fund types to insured funds.

8.2.3 As shown in the table above, there was a decrease in the number of active members from 102,744 members as at 30 June 2020 to 96,473 members as at 30 June 2021. It was also noted that there was a 11.16% decline in pensioners, which was attributed to members who exited the funds and were paid full commutations. There was also an increase in the number of deferred members from 230,0437 as at 30 June 2020 to 235,170 as at 30 June 2021. The increase is mainly due to the preservation of benefits for members of dissolved funds who did not qualify to start receiving pensions at the dissolution.

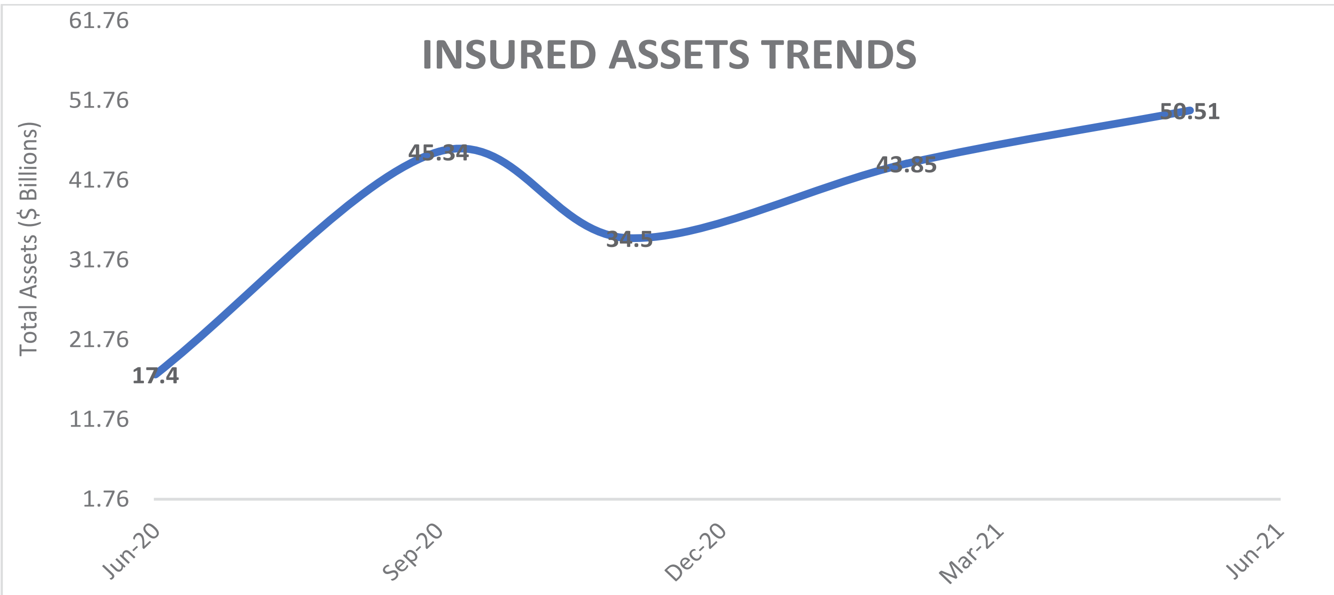
8.3 Asset Quality

8.3.1 The total asset base for insured funds was ZW$50.51 billion as at 30 June 2021, constituting 25.46% of the industry's total assets.

8.3.2 This was an increase by 189.95% from ZW$17.42 billion reported as at 30 June 2020. This was mainly due to revaluation of properties and increase in equities in line with prevailing economic environment.

8.3.3 The asset trend for insured fund assets from 30 June 2020 to 31 June 2021 is shown in figure below;

Figure 11 : Asset Trend

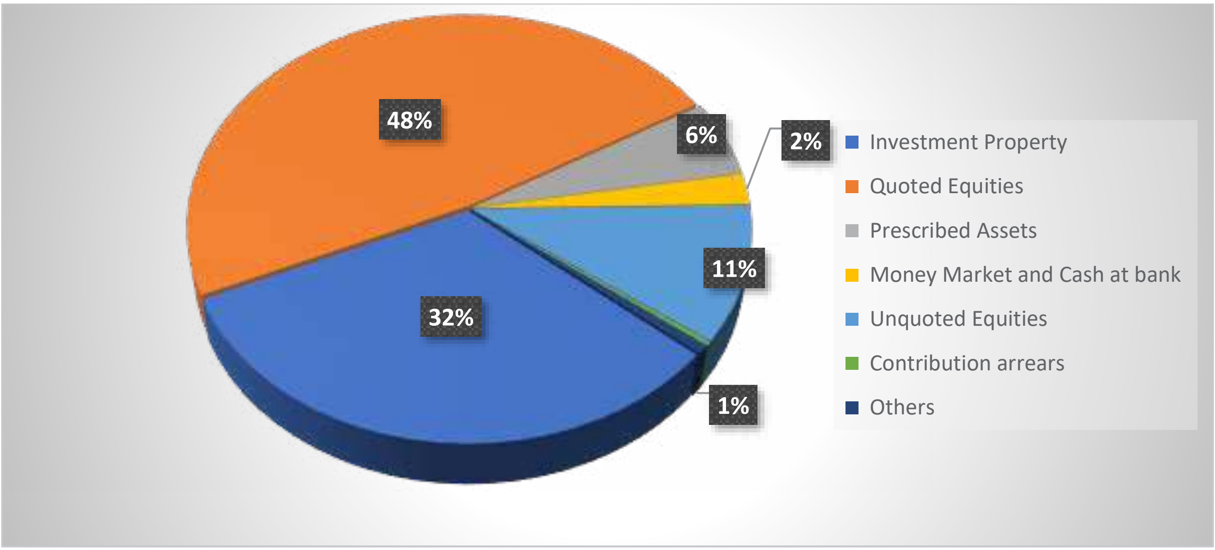


8.3.4 As shown in the figure above, the asset base for insured funds has been on an upward trajectory from 30 June 2020 mainly on account of revaluations and inflation following currency reforms.

8.3.5 The decline witnessed in the 3rd quarter of 2020 was due to the suspension of trades on three counters on the ZSE, whose share prices were reported as per suspension date. However, following regulatory Guidance by SECZ, the shares for the suspended counters are now valued at ZSE prices converted at interbank rate.

8.3.6 The composition of insured funds' investments is shown in the figure below.

Figure 12 : Composition of Insured Fund Assets as at 30 June 2021



8.3.7 Investments in prescribed assets totalling ZW$2.95 billion constituted only 5.84% of the sector's total asset base as at 31 June 2021, which is still below the minimum regulatory threshold of 20%. There was a decrease compared to the 2021 first quarter compliance ratio of 9.07%.

8.4 Earnings

8.4.1 Insured schemes reported investment income of ZW$10,97 billion for the 6 months ending 30 June 2021.

8.4.2 The ZW$10.97 billion is mainly attributed to fair value gains on equities and interest from investment totalling ZW$10.79 billion, compared to $6.6 billion in 2020.

8.4.3 Total income amounted to ZW$12.42 billion as at 30 June 2021 compared to ZW$6.95 billion during the same period in 2020.

8.4.4 Insured funds paid ZW$1.10 billion in benefits for the 6 months ended 30 June 2021, constituting 76.63 % of the sector's total expenditure of ZW$1.4 billion. The sector's administrative expenses totalled ZW$334.84 million and were driven by investment expenses totalling ZW$195.81 million.

8.4.5 Administrative expenses translated to 40.02% and 2.59% of contributions and total income respectively, as compared to 31.28% and 1.46% for 2020 second quarter.

8.5 Unclaimed Benefits

8.5.1 The value of unclaimed benefits for members under insured schemes increased to $222.32 million as at 30 June 2021, up from $102.28 million recorded in the same previous period. The increase is mainly attributed to an increase in the members with unclaimed benefits from 7 086 to 15 627.

9 Self-Administered Funds

9.1 Sector Architecture

9.1.1 There were 172 self-administered funds as at 30 June 2021, compared to 169 funds reported as at 30 June 2021. The increase was due to new funds registered during the period under review.

9.1.2 The number of self-administered pension funds per administrator as at 30 June 2021 are shown in the table below:

Table 10: Self-Administered Funds Administration

Name of Administrator	30 June 2021	30 June 2020
Professional Administrators		
Capitol Insurance Broker	1	1
Comarton Consultants	26	25
Marsh Employee Benefits	40	42
Minerva Benefit Consulting	68	63
Zimbabwe Insurance Brokers	5	5
Sub total	140	136
Life Companies		
Fidelity Life Assurance Company	1	1
First Mutual Assurance Company	5	4
Old Life Assurance Company	21	24
Nyaradzo Life Assurance		2
Zimnat Life Assurance Company		2
Sub total		33
Grand Total		169

9.1.3 As shown in the table above, 81.39% of the self-administered pension funds were administered by Fund Administrators, compared to 18.60% under the administration of Life Insurers. It is also important to note that two Fund Administrators administered 108 pension funds, accounting for 62.79% of the total number of self-administered funds.

9.2 Membership

9.2.1 There was a 1% decrease in total membership for self-administered funds from 118,738 to 119,634 members as at 30 June 2020. The membership distribution per class of membership is shown in the table below:

Distribution of Membership for Self-administered Funds

Membership class	Number of members as 30 June 2021	Number of members as at 30 June 2020
New Entrants	2161	1160
Active Members (excluding new)	68,966	65,837
Pensioners	6355	6278
Deferred Pensioners	28,574	33,186
Suspended Pensioners	3,403	3,320
Unclaimed Benefits	9,279	9,853
Total membership	118,738	119,634
Exits	1,492	217

9.2.2 As shown in table above, the number of members with unclaimed benefits decreased by 1.06% during the period under review. The decrease in unclaimed benefits was mainly due to members coming to claim their benefits due to the increased awareness of the benefits.

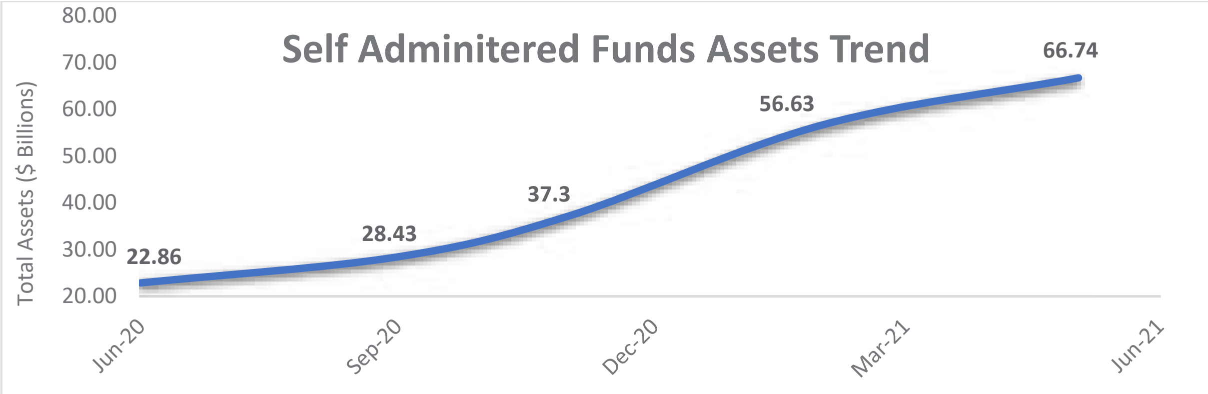
9.2.3 There was an increase in the number of pensioners which could be attributed to some members reaching retirement age, thereby becoming eligible to access their benefits. The decline in the number of deferred pensioners was due to more members exiting funds.

9.3 Asset Quality

9.3.1 The sector's asset base increased by 191.95% in nominal terms from $22.86 billion to $66.74 billion as at 30 June 2021.

9.3.2 The figure below shows the assets growth for self-administered funds: -

Figure 13: Asset Growth Trend



9.3.3 The increase in the sector's assets base was mainly driven by quoted equities and investment property, which constituted 54.91% and 22.11% of total assets, respectively.

9.3.4 Contribution arrears increased from ZW$131.97 million at 30 June 2020 to ZW$155.97 million, whilst the ratio of contribution arrears to total asset decreased from 0.45% reported 30 June 2020 to 0.31% as at 30 June 2021.

9.3.5 The increase in contribution arrears is an indication of failure by employers to remit pension contributions in time as a result of the impact of Covid 19 lockdown.

9.3.6 Investments in prescribed assets increased from $2.1 billion as at 30 June 2020 to $3.5 billion as at 30 June 2021, which translated to a prescribed asset ratio of 5,25% compared to 9.19% reported at 30 June 2020. This decline in the prescribed assets ratio is a cause of concern to the Commission given the thrust of improving compliance by the industry.

9.4 Earnings

9.4.1 The total income for the period ending 30 June 2021 was ZW$25.07 billion compared with ZW$12.6 billion reported for the January to June 2020 period. Total income was mainly driven by fair value gain and contributions which constituted 41.3% and 7.54% of total income, respectively.

9.4.2 Total expenditure was ZW$1.96 billion for the period ending 30 June 2021, which was mainly driven by benefits payments amounting to ZW$1.46 billion, thus constituting 74% of the total expenditure.

9.4.3 Administrative expenses totalled ZW$0.51 billion for the period under review and was mainly driven by investment management fees and administration fee which constituted 41.61% and 22.96% of total expenses, respectively. These expenses resulted in an average expense to contribution ratio and expense to income ratio of 24.8% and 1.95%, respectively.

9.5 Unclaimed Benefits

9.5.1 Notwithstanding a decline in the number of members with unclaimed benefits from 9 853 as at 30 June 2020 to 9 279 as at 30 June 202 under self-administered funds, the value of unclaimed benefits increased from ZW$50.68 to ZW$100.48 million. This increase is attributed to revaluation of unclaimed benefits.

10 Stand-Alone Pension Funds

10.1 Overview of Stand-Alone Funds Sector

10.1.1 The number of Stand-alone funds for the quarter ending 30 June 2021 was 14. The sector now comprises 8 defined contribution schemes, and 6, parastatal affiliated, defined benefit schemes.

10.2 Membership

10.2.1 Total membership (excluding beneficiaries) for stand-alone pension funds increased by 1.75 % from 419,974, members as at 30 June 2020, to 412,751 members as at 30 June 2021. The distribution of membership by class as at 30 June 2020 and 30 June 2021 is shown in Table below.

Table11: Membership Statistics for Stand-Alone Pension Funds as at 30 June 2021

Membership category	Q2 2021	Q2 2020
New Entrants	2,778	1,771
Active members (excluding new entrants)	148,632	148,500
Pensioners (Excluding beneficiaries)	21,374	24,060
Deferred Pensioners	96,858	98,723
Suspended Pensioners (Excluding beneficiaries)	7,215	11,032
Unclaimed benefits (number)	135,844	135,888
Total membership Excluding Beneficiaries	412,751	419,974
Beneficiaries	21,128	13,052
Total membership Including Beneficiaries	433,879	433,026

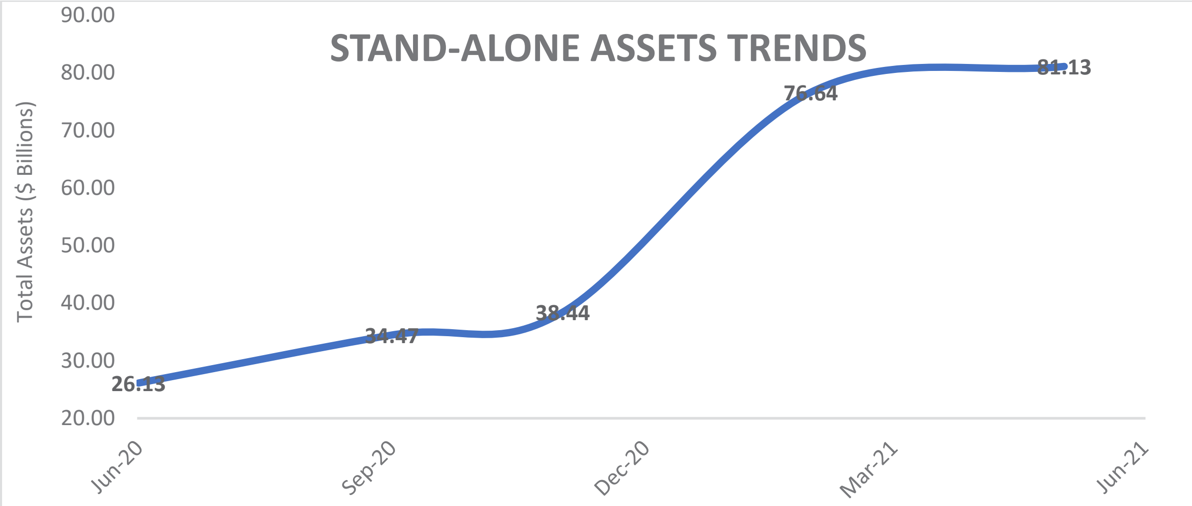
10.3 Asset Base

10.3.1 Stand-Alone pension funds' assets increased by 210.49% from $26.13 billion as at 30 June 2020 to $81.13 billion as at 30 June 2021.

10.3.2 The increase in the asset base was mainly attributed to investment property and quoted equities which increased by 212.58% and 289.82%, respectively.

10.3.3 The movements in assets for stand-alone funds is shown in Table 12 below: -

Table 12: Asset trend for Stand-Alone Funds

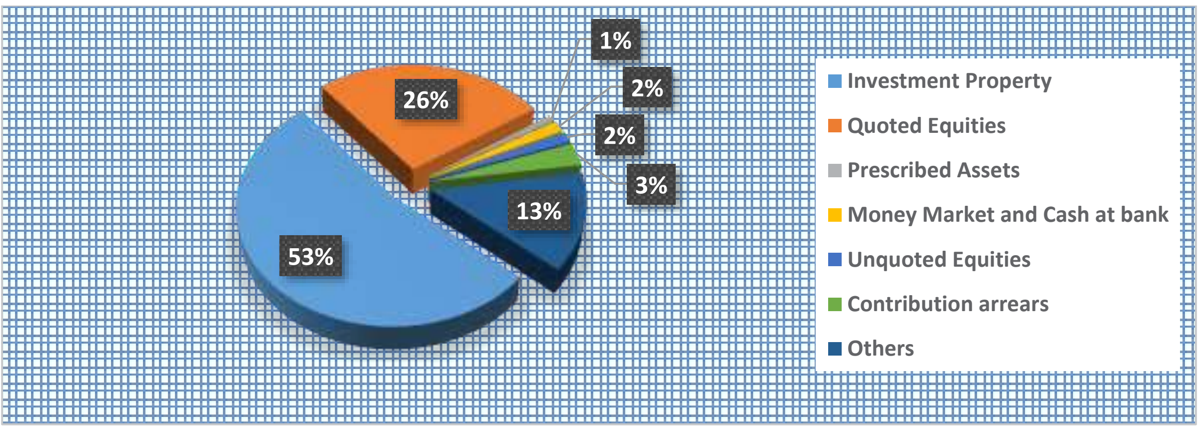


10.3.4 Investment in prescribed assets increased to ZW$734.37 million as at 30 June 2021 from ZW$340.45 million in the previous year. The share of prescribed assets to total stand-alone funds' assets declined to 0.91% from 1.30%. The compliance rate was below the minimum threshold percentage of 20%.

10.3.5 Contribution arrears increased by 270.59% to ZW$2.52 billion from ZW$0.68 billion recorded as at 30 June 2020. The proportion of contribution arrears to total assets decreased to 2.52% from 3.11% recorded in the previous year. The ratio of contribution arrears to total assets has maintained values between 2.4%-3.4% for the past five quarters. The high ratio could be attributable to interest charged on contribution arrears in line with requirements of the Guidance Paper. Theses contribution arrears remain to be higher side, thus reducing the amounts available for investment by pension funds.

10.3.6 The distribution of the assets for the stand-alone funds is shown in the Figure below:

Figure 14: Distribution of Assets for Stand Alone Funds as at 30 June 2021



10.4 Earnings

10.4.1 Stand-alone pension funds reported surplus income over expenditure of ZW$15.2, billion, for the quarter ending 30 June 2021 with fair value gains accounting for 72.29% of total income.

10.4.2 Contributions accounted for 16.43% of total income, while rental income and interest on arrears contributed 5.56% and 1.78%, respectively.

10.4.3 Total Expenditure for the period January to June 2021 amounted to ZW$1.87 billion. Of that amount, ZW$0.81 billion, accounting for 44.52%, was benefits payments.

10.4.4 Administration expenses for the period under review, which amounted to ZW$1.06 billion, were mainly driven by staff costs and property expenses that accounted for 20.92% and 14.60%, respectively.

10.4.5 Stand-alone pension funds' total expenditure amounted to ZW$ 1.87 billion for the quarter ending 30 June 2021. Pension benefits accounted for 35% of the total expenses. The administration expenses were 37.61% of contributions and 6.18% of total income, as well realised income

10.5 Liabilities

10.5.1 Arrear pension benefits increased by **156%** from ZW$46.57 million as at 30 June 2020 to ZW$119.44 million as at 30 June 2021. On the other hand, unclaimed benefits increased by 1674**%** from ZW$43.5 million as at 30 June 2020 to ZW$771.50 million as at 30 June 2021.

10.5.2 The high number of unclaimed benefits remains a great concern to the Commission and administrators are urged to improve on their Know Your Customer (KYC) requirements so that members can be conducted to get their benefits.

10.5.3 Furthermore, funds with high unclaimed benefits are urged to comply with requirement for remittance to the Guardian Fund and institute measures to trace beneficiaries

Annexure 1: Consolidated Industry Statement of Comprehensive Income for the 6 months ended 30 June 2021

	Insured Funds	Self Administered Funds	Stand Alone Funds	Total
Income				
Year to date Contributions (Including arrears)	803,321,859	1,967,288,281	2,810,509,143	5,581,119,282
Interest on contribution arrears	62,056	149,923,869	304,978,351	454,964,276
Transfer from other funds	673,784,735	200,932,880	-	874,717,615
