Disclaimer

What is the Insurance and Pensions Commission?

The Insurance and Pensions Commission (IPEC) is an independent statutory body established in terms of the Insurance and Pensions Commission Act [Chapter 24:24] with a mandate to regulate insurance and pensions activities in Zimbabwe.

Vision

A vibrant insurance and pension industry contributing towards a safe and stable financial system by 2022.

Mission

To protect the interests of policy holders and pension scheme members through effective regulation and supervision of the Insurance and Pension industry.

Values

- ✓ **Integrity**

We are ethical and honest in our dealings with all our stakeholders. In doing so, we apply agreed policies equally to all, maintain the highest personal, professional and ethical conduct.

- ✓ **Fairness**

We shall apply rules, regulations and procedures equally without fear and favour.

- ✓ **Transparency**

We disclose full information, on time, to relevant stakeholders where applicable.

- ✓ **Accountability**

We take full responsibility and are answerable for our decisions and actions.

- ✓ **Confidentiality**

We shall handle our clients and their information in confidence.

Board of Directors

1. Mrs. Lyn Mukonoweshuro (Board Chairman)
2. Mr. George Mazhude (Deputy Board Chairman)
3. Mr. Willard Manungo (Ex-Officio – Permanent Secretary – Ministry of Finance and Economic Planning)
4. Mrs. Anne Mashingaidze
5. Mr. Abednego Dube
6. Mr. Tafadzwanashe Zinyoro
7. Mrs. Mannet Senteni Mpofu (Ex-Officio – Commissioner of Insurance, Pension and Provident Funds – left the Commission on 31 January 2017 and was replaced by Mr. Tendai Karonga on 1 February 2017.

Table of Contents

Acknowledgements

I wish to express my sincere gratitude to the Ministry of Finance and Economic Planning, the Board and the Commission's staff for their contributions and invaluable support in regulating the insurance industry. In addition, my appreciation goes to the market players for their cooperation and support in producing this report.

Definition of Terms

Technical assets:	Assets that are peculiar to insurance business that include dues to the insurer from reinsurers or other insurers in respect of claims incurred and deferred acquisition costs.
Cash equivalent:	Investment securities that are short term in nature
Other assets:	Premium receivables, furniture and fittings, motor vehicles, computer equipment, staff debtors

List of Acronyms

BOP	Balance of Payment
GPW	Gross Premium Written
GDP	Gross Domestic Product
MCR	Minimum Capital Requirement
RBZ	Reserve Bank of Zimbabwe
Zimstat	Zimbabwe National Statistics Agency
ZSE	Zimbabwe Stock Exchange

Preamble

The Commissioner of Insurance is required in accordance with Section 70 of the Insurance Act [*Chapter 24:07*], to submit an annual report pertaining to the performance of the insurance industry.

This report reviews the performance of the insurance industry during the year ended 31 December 2016.

Executive Summary

1) Gross Premium Written (GPW) by the insurance industry increased by 3.02% from US$563.02 million for the year ending 31 December 2015 to US$580.03 million for the year ending 31 December 2016. The total reinsurance premium written for 2016 was US$108.49 million, thus reflecting a negative growth of 2.66% from the previous reporting year. The financial statements of industry entities are under the appendices section.

2) In terms of compliance to minimum capital requirements, 45 out of 51 operating institutions were compliant with the minimum capital requirements. Of the 6 non-complying institutions, 3 were funeral assurers, 1 non-life, 1 life and 1 non-life reinsurer.

3) There was a marginal increase in the insurance penetration ratio from 4.56% in 2015 to 4.70% during the year under review. The penetration rate, is measured as the proportion of premium underwritten in a particular year as a percentage of the Gross Domestic Product.

4) The penetration rate indicates a slow development in the insurance sector. There is a positive correlation between the insurance penetration levels and the development of the sector i.e. higher the ratio, the more developed is the sector.

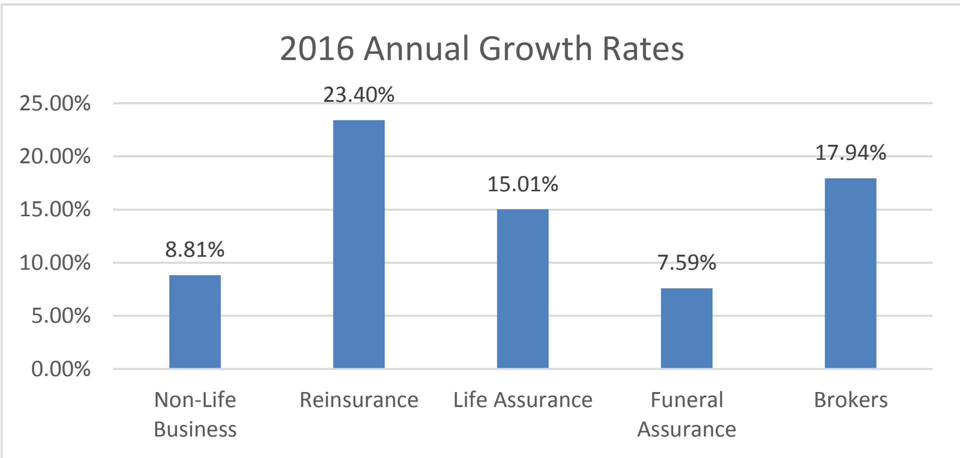
5) The upward trajectory was also registered in the industry assets albeit at a much higher level. These grew by 14.86% from US$1.828 billion as at 31 December 2015 to US$2.1 billion as at 31 December 2016. The growth in the total industry assets per class of business is shown in table 1 below:-

Table 1: Industry Asset Distribution as at 31 December 2016

Class of Business	Dec 2016	Dec 2015	Growth
Non- Life Insurance	205,506	188,858	8.81%
Reinsurers	171,825	139,241	23.40%
Life Assurance	1,615,195	1,404,440	15.01%
Funeral Assurance	57,365	53,317	7.59%
Brokers	50,171	42,541	17.94%
Total	**2,100,062**	**1,828,439**	14.86%

6) The figure 1 below shows the growth in assets for different classes of insurance business:-

Figure 1: Percentage Growth in Industry Assets per class of Business



7) Reinsurance's assets grew by 23.4%, followed by those of brokers (17.94%), Life Insurers (15%) and non-life business (8.8%).

8) The increase in total assets was on the back of the performance on the Zimbabwe Stock Exchange during the last quarter of 2016, as well property revaluations.

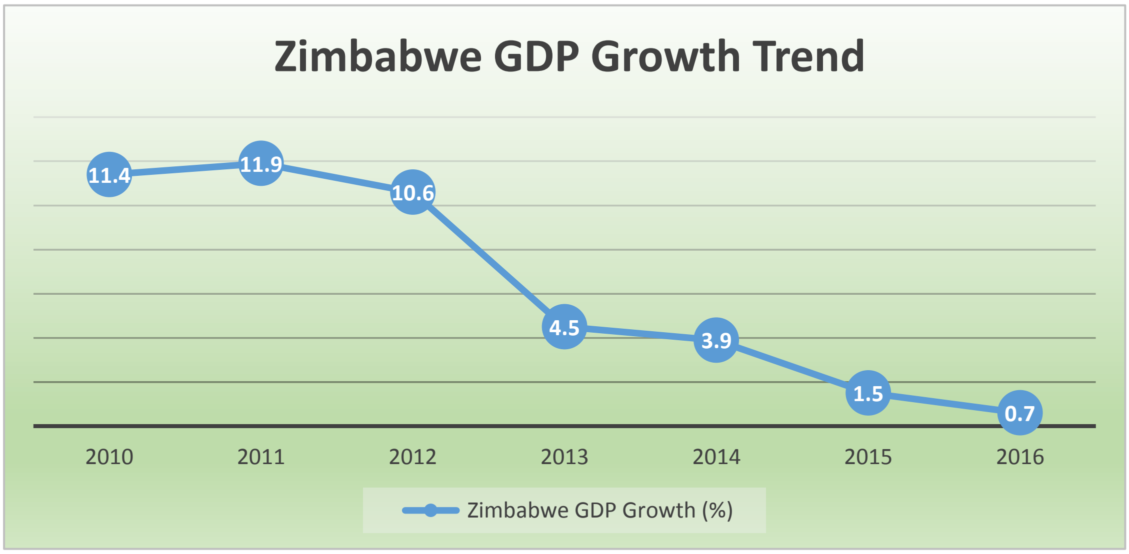
OVERVIEW OF THE MACROECONOMIC ENVIRONMENT

9) This section presents an overview of key macroeconomic fundamentals that underpin the performance of the insurance industry during the year under review. The key fundamentals include Gross Domestic Product (GDP), inflation, balance of payments, savings, interest rates, growth in the financial sector, unemployment, and investment. The above macroeconomic factors and challenges that impacted on the sector are also briefly discussed below:-

Real Gross Domestic Product

10) The Gross Domestic Product for Zimbabwe continued on a downward *trajectory since 2010 as shown in* Figure *2:-*

Figure 2: GDP Growth Trend for Zimbabwe: 2010-2016



Source: Zimstat, Zimbabwe

11) The 2016 GDP stood at US$16.29 billion, which is a 0.7% real growth from the previous year. The growth in GDP was largely driven by mining, finance and insurance and construction. The mining industry registered an 8, 2% growth whilst the growth in construction capacity was estimated at 3.5% during the year under review. Capacity utilisation in the construction sector stood around a relatively low 29% that was largely driven by housing construction in major cities and towns.

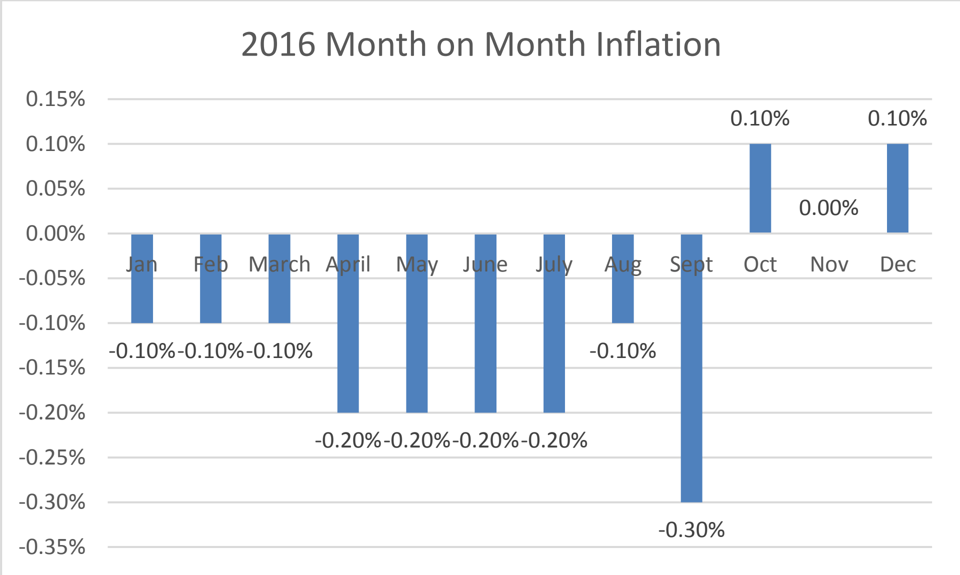
12) The manufacturing sector is estimated to have grown by a modest 0.3% but underpinned by activities in the clothing and footwear, non-metallic mineral products, foodstuffs, and transport and equipment. The weighted average capacity utilisation improved from 34.3% to 47.4% in 2016.

13) The 2016 GDP growth rate of 0.7%, which was a fall from the 1.5% registered in 2015. The fall is largely attributed to the El-Nino induced drought, which negatively affected agriculture, electricity and water.

Inflation

14) During 2016, annual inflation averaged -1.6%, compared to -2.4% in 2015, thus, signalling the end of deflation in the economy. The month-on-month inflation rate was largely in negative territory during the first three quarters of 2016 and registered positive gains in the last quarter of 2016, largely on account of increases in non-food inflation. Figure 3 shows the trend in month-on-month inflation during the year under review:-

Figure 3: Month-on-Month Inflation Trend in 2016



Source: Reserve Bank of Zimbabwe

15) Overall, inflation remained subdued owing to low disposable incomes, imported deflation induced by weak regional currencies against the US dollar, and liquidity constraints, which impacted negatively on the economy's aggregate demand.

External Position

16) The Balance of Payment (BOP) position remained precarious owing to the continued absence of balance of payments (BOP) support against the backdrop of the relatively large debt and arrears. The overall balance of payments position is estimated to have deteriorated from a deficit of US$25.8 million in 2015 to a deficit of US$176.5 million in 2016.

17) The current account deficit narrowed by about 63%, from a deficit of US$1,520.6 million in 2015 to a deficit of US$552.8 million in 2016. The deficit is a drain on liquidity. The capital account, which mainly records grants to Government mainly of a capital in nature, declined from US$398.4 million in 2015 to US$242.3 million in 2016.

18) The Government cleared arrears to the IMF's Poverty Reduction and Growth Trust amounting to US$107.9 million as part of the Lima Debt Clearance Strategy to International Financial Institutions (IFIs). The clearance of arrears to the IMF resulted in Zimbabwe being removed from remedial measures imposed by the IMF in 2001, due to overdue obligations to the Poverty Reduction and Growth Trust.

Savings and Interest rates

19) Time deposits and savings deposits in the banking sector were 26.9% and 4.7% of total banking sector deposits respectively, of which the total deposits were $5.62 billion as at December 2016.
20) The deposits rates for savings, 30-day deposits and 90-day deposits were 3.2%, 6.9% and 7.21% in January 2016, respectively. However, they gradually declined to close the year at 3.01%, 5.36% and 5.72%, respectively.

Unemployment

21) The growing informalisation of the economy has witnessed the greater percentage of the population (90%) being employed in the Micro, Small and Medium Enterprises, which traditionally do not have pension arrangements. This presents an opportunity for the introduction of micropension products that are tailored to meet the needs of the informally employed.

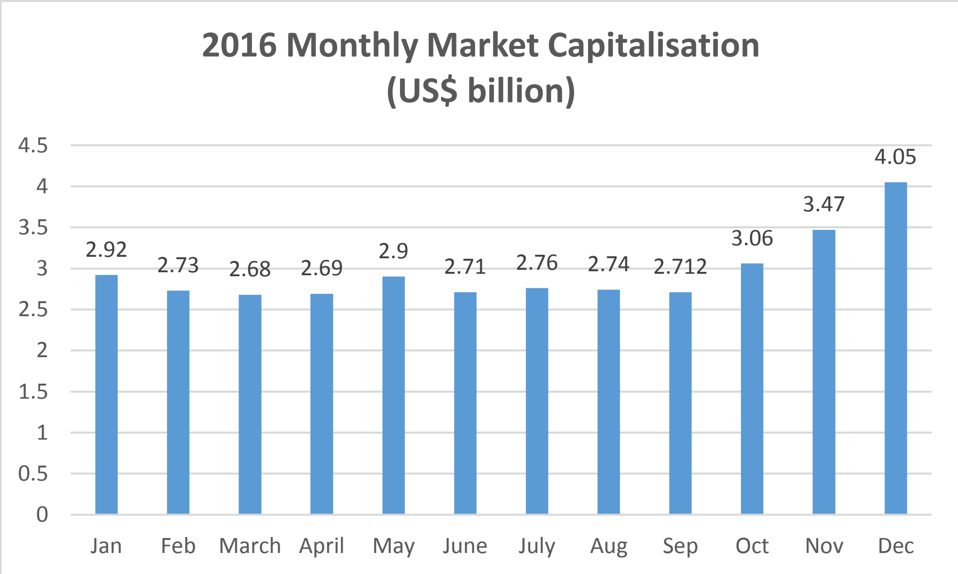
Financial sector growth

22) Growth in the financial sector, inclusive of the banking, insurance and pension, securities and micro-finance sectors, averaged 2% in 2016. The provision of innovative digital financial services that included the formally excluded segments of the population is responsible for the 2% growth.

Equities Market

The Zimbabwe Stock Exchange, which is a major investment destination for insurance companies and pension funds witnessed subdued performance during the beginning of the year and exhibited a bullish trend at the end of 2016. The total market capitalisation of the stock market by the end of 2016 increased by 30.4%, from a beginning of year opening of US$3.1 billion to US$4 billion by December 2016. Figure 4 shows the trend in ZSE market capitalisation during the year under review:-

Figure 4: ZSE monthly Market Capitalisation for 2016



Source: Zimbabwe Stock Exchange

23) The Industrial counters gained 25.8% in 2016, on a year to year basis, as the industrial index, which had opened the year at 114.85 points, recovered to an annual high of 144.53 points by end of December. The mining share index gaining 145.7% to close the year at 58.51 points.

Bond Market

24) Government securities, which dominated the bond market, in the form of Treasury bills and bonds were the main debt instrument available in the market owing to Government borrowing to support recurring budget deficits and securitisation of parastatal debts, as well as some Government arrears. The bonds were traded on the secondary market through over the counter transactions at discounts ranging from 7% for short dated paper, to 40% for long dated paper of 5 years and above.

25) However, the approval of the debt market listings requirements by the Securities and Exchange Commission of Zimbabwe is expected to pave way for formal trading of debt instruments on the Zimbabwe Stock Exchange and ensure price discovery in the trading of such securities.

Challenges

26) The following challenges have had an adverse impact on the performance of the insurance industry:-

- Low economic growth;
- Lack of fiscal space;
- the rapid growth in the fiscal deficit, which left public finances with a borrowing requirement of US$1.4 billion;
- negative balance of payment owing to poor export performance;
- limited development finance;
- increasing unemployment, which reduced household consumption by 11.8%.

Architecture of the Insurance Industry

27) As at 31 December 2016, the Zimbabwe Insurance Industry consisted of players as per table 2 below:-

Table 2: Summary of Registered Entities

Class of Business	Number of Registered Entities				
	31-Dec-12	31-Dec-13	31-Dec-14	31-Dec-15	31-Dec-16
Non- Life Insurance	28	29	25	24	20
Non- Life Reinsurance	10	10	9	9	8
Life Assurance	9	10	11	11	11
Funeral Assurance	11	9	9	9	9
Life Reassurance	2	2	2	2	3
Insurance Broking	27	29	31	30	32
Reinsurance Broking	4	4	5	6	6
Total	**91**	**93**	**92**	**91**	**89**

28) During the financial year under review, two insurance brokers namely CBZ Risk Advisory Services and Ent-wide Insurance Brokers were registered.

29) The following non-life insurance companies were deregistered:-

- Global Insurance Company;
- Heritage Insurance Company of Zimbabwe;
- Excellence Insurance Company Private Limited; and
- KMFS.

30) New Reinsurance Company was deregistered as a non-life re-assurer in 2016. The list of all operating institutions as at December 2016 is attached as part of the annexes.

Business Written

31) During the financial year under review, the aggregate gross premiums written for the insurance industry totalled US$580.03 million, of which life insurers accounted for US$325.86 million, indicating a 4.1% increase in life premiums from the amount reported in 2015. Non-life insurers accounted for US$215.73 million, up from US$213.44 million recorded in 2015.

32) Funeral assurers registered a 5.2% growth in premiums written, followed by life assurers at 4.1% and non-life business at 1.1%. The reinsurance business registered an average negative growth (-2.66%) owing to increased underwriting capacity by direct insurers.

33) The total reinsurance premium written for 2016 was US$108.49 million, thus reflecting a negative growth of 2.66% from the previous reporting year.

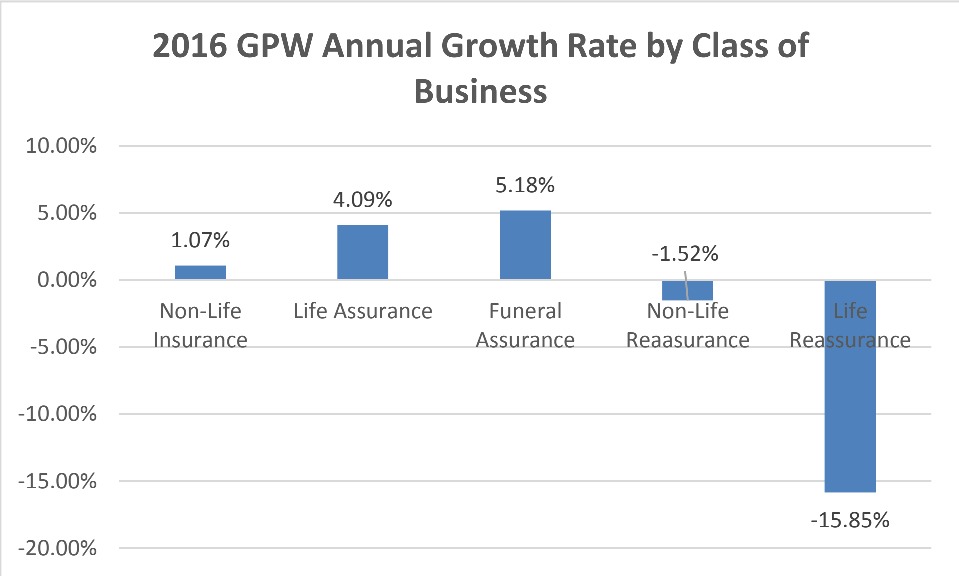
34) Table 3 summarises the percentage change in premiums written during 2016 compared to the previous year:-

Table 3: Total GPW (US$ millions)

Class of Business	2015	2016	Growth (%)
<u>Insurers;</u>	GWP	GWP	
Non- Life Insurance	213.44	215.74	1.07%
Life Assurers	313.04	325.86	4.09%
Funeral Assurers	36.54	38.43	5.18%
Total Gross Premium Written	563.02	580.03	3.02%
<u>Reinsurers;</u>			
Non-Life Reassurance	102.67	101.11	-1.52%
Life Reassurance	8.77	7.38	-15.85%
Total Reinsurance Premium	111.45	108.49	-2.66%

35) Figure 5 shows the growth in gross premiums written by different classes of insurance business in 2016:-

Figure 5: Annual Growth Rate for GPW per class of Business

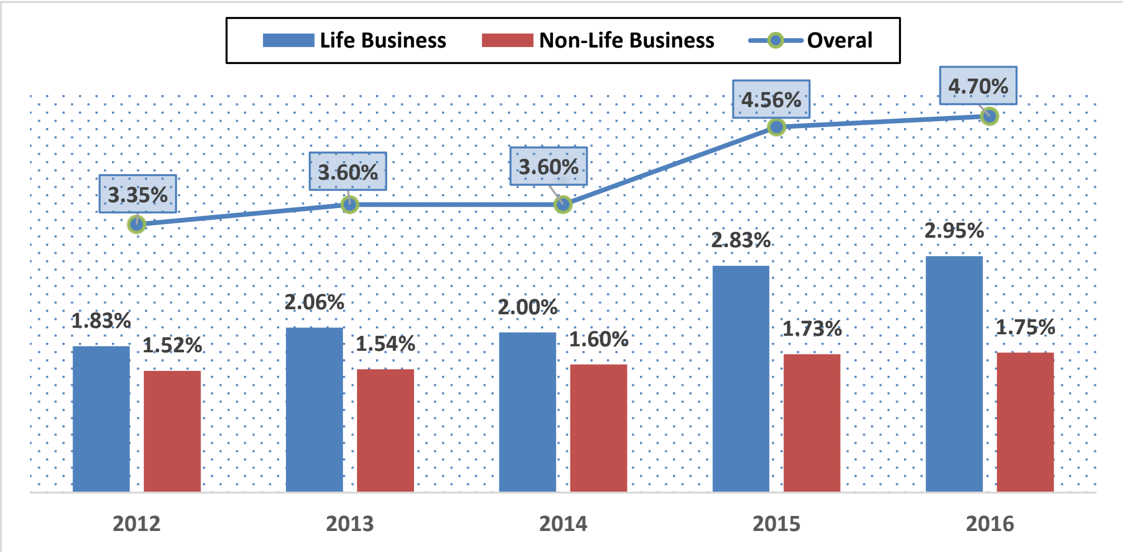


Insurance Penetration

36) The insurance sector generated total gross premiums of US$580.03 million, an increase of US$17 million from the previous year. Therefore, the insurance penetration rate marginally improved from 4.56% in 2015 to 4.7% in 2016.

37) The figure below shows the insurance penetration for the different sub-sectors of the insurance industry, as well as the overall penetration ratio for the sector.

Figure *6*: Industry Penetration Ratios



38) There has generally been a steady increase in insurance penetration from 3.35% in 2012 to 4.7% in 2016. The increase is positively correlated with the increase in GDP from US$12.5 billion in 2012 to US$15.3 billion in 2016. Table 4 shows the trend in insurance penetration relative to GDP during the period 2012 to 2016:-

Table 4: GDP and Penetration Rates

Year	GDP (Billions)	Penetration Rates (%)
2012	12.5	3.35
2013	13.2	3.6
2014	13.7	3.6
2015	14.4	4.56
2016	15.3	4.7

Capitalisation

39) The 2016 National Budget Statement pronounced the review of minimum capital requirements for insurance companies effective from 1 January 2016. However, there were delays in the development of a legal instrument to effect the new capital requirements and the industry's compliance was measured against the old minimum capital requirements.

40) The necessary legal framework to operationalise the new capital requirements was later gazetted in Statutory Instrument 95 of 2017, which became effective on the 25th of August 2017.

41) The Table below shows the status of compliance with the then prevailing minimum capital requirements during the year under review:-

Table 5: Compliance with Minimum Capital Requirements (MCR)

Class of Business	MCR (US$)	Number of Entities	Non-Compliant Entities
Non-life Insurance	1,500,000	20	1
Non-life Reinsurance	1,500,000	8	1
Life Assurance	2,000,000	11	1
Funeral Assurance	1,500,000	9	3
Life Reassurance	1,500,000	3	0
Total		**51**	**6**

42) As indicated in the table above, 45 out of 51 institutions were compliant with the minimum capital requirements. Of the 6 non-complying institutions, 3 were funeral assurers, 1 non-life, 1 life and 1 non-life reinsurer.

Assets

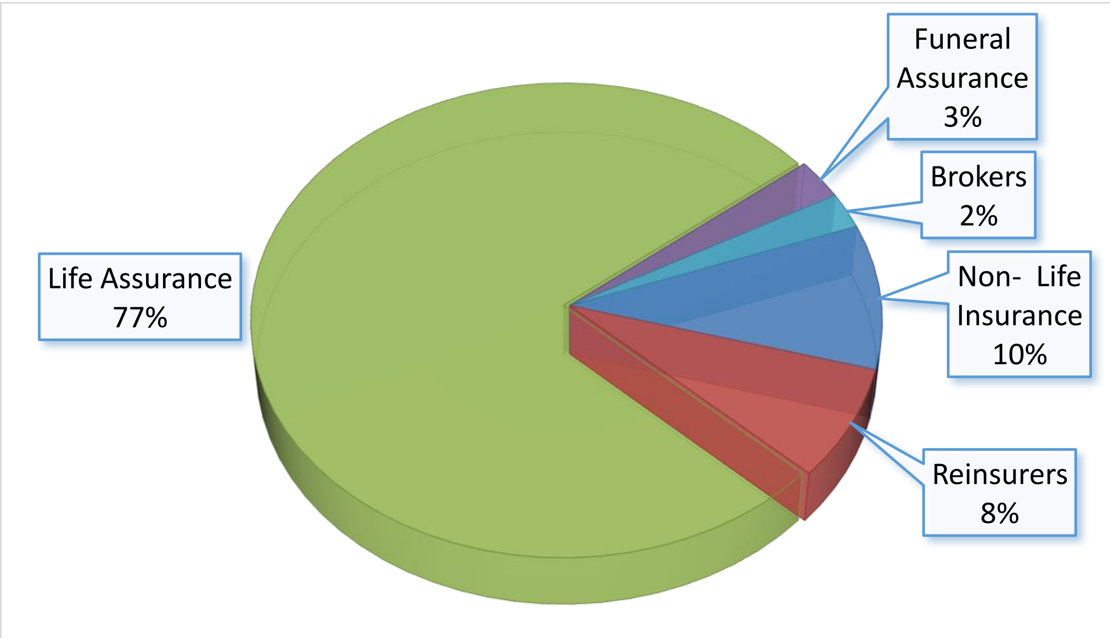
43) Total insurance assets as at 31 December 2016 were USD2.1 billion compared to USD1.828 billion as at 31 December 2015, thus translating to a 14.17% growth in the industry's combined asset base. The growth in total industry assets was largely driven by the rally in fixed properties and equities, as shown in the table below:-

Table 6: Breakdown of Total Assets

Class of Insurance Business	Assets held (US$ 000)
Non-Life (short term)	205,506
Life Insurance	1,615,195
Funeral	57,365
Re-insurance	171,825
Insurance Brokers	50,171
Total	2,100,062

44) As shown in the figure below, the life assurance sector continued to hold most of the assets within the industry, constituting about US$1.6 billion (77% of total industry assets). The other sectors within the industry share the remaining 23% of the total industry assets.

Figure 6: Insurance Industry Distribution of Assets by class of business



45) The increase in the total asset base was mainly driven by life companies. The life assurance sector continued to hold about 77% of the assets within the industry, whilst other classes of business within the insurance industry share the remaining 23% of the total industry assets.

Non-Life Companies

46) Assets held by non-life companies grew marginally from US$188 million in 2015 to US$205 million in 2016. Debtors constituted 22% of the industry total assets at the time of reporting compared to 20% from the previous reporting period. The increase in debtors was attributed to falling disposable income, company closures, and the delay by brokers to remit premiums and the insured's default in the payment of premiums.

47) The table below shows investments by non-life companies in different asset classes namely equities, bonds, money market, property and cash, among others:-

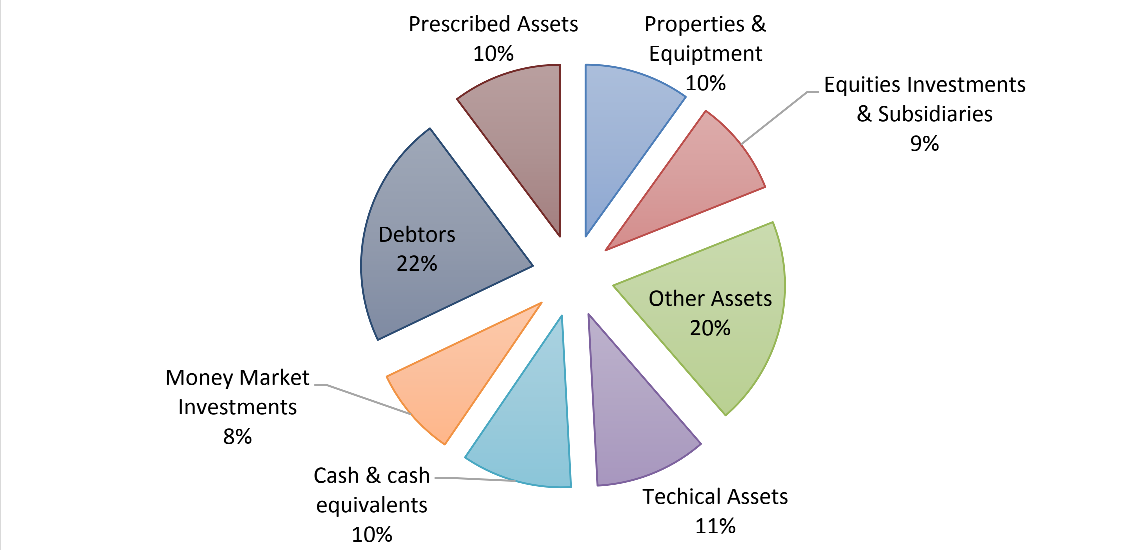
Table 7: Breakdown of Non-life Assets

Asset Class	**Amount invested (US$ 000)**
Property	20,360
Equities (listed and Unlisted)	18,654
Money Market	17,227
Prescribe Assets	21,023
Cash and Cash equivalent	21,317
Technical assets	21,618
Debtors	44,918
Other Assets	40,389
Total	**205,506**

**Other assets comprise of Premium receivables, furniture and fittings, motor vehicles, computer equipment, staff debtors.*

48) Figure 7 below shows a pictorial distribution of non-life companies' assets by class of investment:-

Figure 7: Distribution of Non-Life Assets



**Other assets comprise of Premium receivables, furniture and fittings, motor vehicles, computer equipment, staff debtors.*

Life assurers

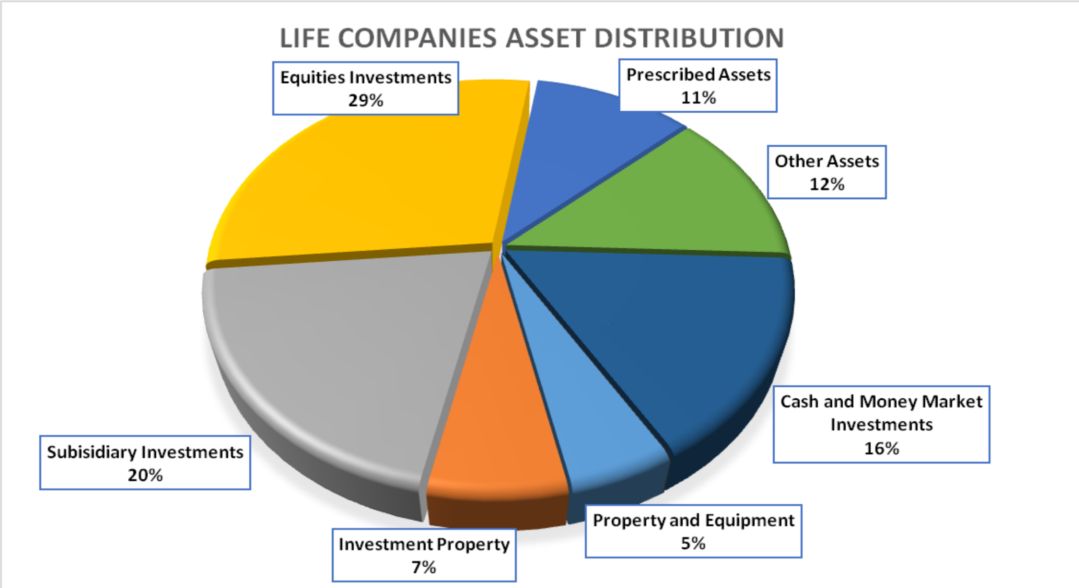
49) Listed equities, subsidiary investments and cash and money market investments constitute 65% of the life industry total assets. The composition of life companies' asset base as at 31 December 2016 is shown in the Table below:-

Table 8: Breakdown of Non-life Assets

Assets	Amount invested (US$ 000)
Property and Equipment	81,300
Investment Property	107,225
Subsidiary Investments	326,641
Equities Investments	466,482
Prescribed Assets	172,176
Other Assets	202,126
Cash and Money Market Investments	259,245
Total Assets	1,615,195

50) Assets held by life companies grew from US$1.4 billion in 2015 to US$1.6 billion in 2016 mainly due to growth in equities, investments in subsidiaries and money market investments.

Figure 8: Life Companies' Asset Distribution by Class

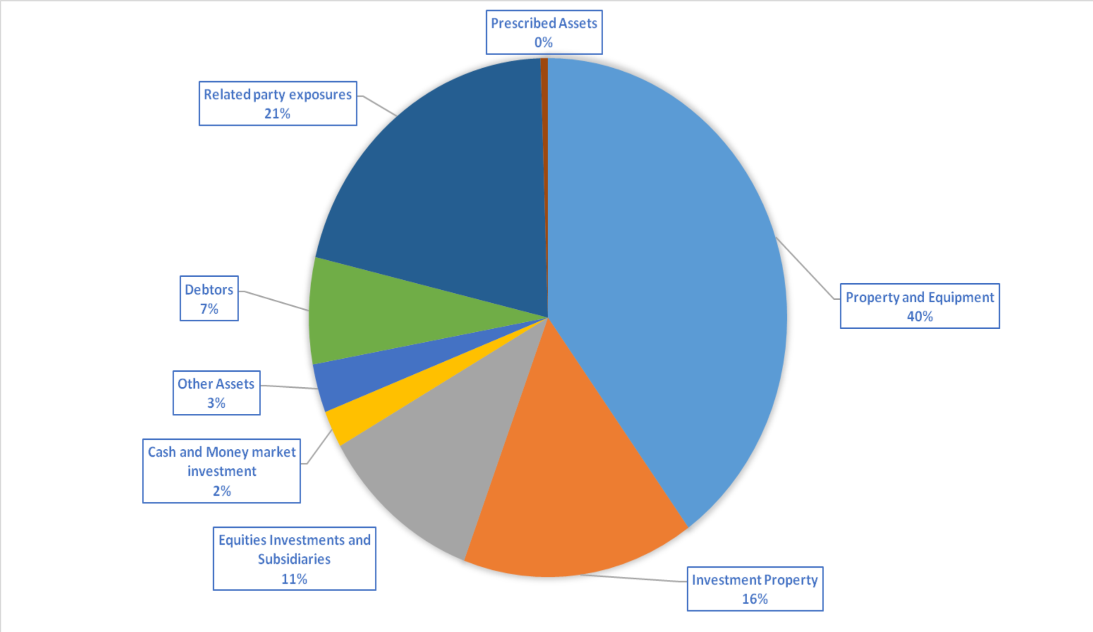


**Other assets comprise of Premium receivables, furniture and fittings, motor vehicles, computer equipment, staff debtors.*

Funeral assurers

51) The assets of funeral assurers were mainly concentrated in service equipment (40%) such as hearses, buses, refrigeration, coffins and lowering machines. About 21% of investments was in related companies, mainly funeral service subsidiaries as the industry targeted the provision of policies and funeral services under one group of companies. The pie chart below shows the Asset distribution for funeral assurers.

Figure *9:* Funeral Assurers' Asset Distribution by Class



**Other assets comprise of Premium receivables, furniture and fittings, motor vehicles, computer equipment, staff debtors.*

52) The Commission is concerned that funeral companies have less than 1% of their total assets in prescribed assets despite the availability of short term Government instruments that meet the short-term investment requirements of funeral insurance companies.

53) This is an indication that the funeral assurers were not channelling their savings towards projects of national importance. The Commission will apply the necessary regulatory measures to ensure that all insurers comply with prescribed asset requirements.

54) The Table below shows the breakdown of investments by funeral insurance companies into different asset classes:-

Table 9: Breakdown of Funeral Assets

Class of Investment	Amount invested (US$ 000)
Property and Equipment	**22,951**
Investment Property	**9,007**
Equities Investments	**6,342**
Cash and Money market investment	**1,326**
Other Assets	**1,738**
Debtors	**3,812**
Investments in Subsidiaries	**11,904**
Prescribed Assets	**285**
Total	**57,365**

**Other assets comprise of Premium receivables, furniture and fittings, motor vehicles, computer equipment, staff debtors.*

55) Assets held by funeral companies grew from US$53.3 million in 2015 to US$57.4 million in 2016 mainly due to growth in properties, and investments in subsidiaries.

Earnings

56) The life business reported US$48.7 million for the year ended 31 December 2016. Non-Life profit after tax increased by 187% from US$9.96 million for the year ended 31 December 2015 to US$28.5 million for the year ended 31 December 2016. The rise in profit after tax was on the back of an increase in investment income and underwriting profit by 42% and 96% respectively.

57) Total profit after tax for life companies increased by 148% from US$ 19.7 million for the year ended 31 December 2015 to US$48.7 million for the year ended 31 December 2016. The increase was a result of an increase in investment income from US$102.2 million to US$ 127 million, coupled with a 5% increase in retained business.

58) The funeral assurers' profit after tax also declined by 51% from USD 5.5 million for the year ended 31 December 2015 to US$2.7 million compared to US$ 4.9 million for 2016. The decline was mainly caused by Nyaradzo Funeral Company being relicensed as a life assurance company.

Financial Inclusion

59) Following the launch of the Zimbabwe National Financial Inclusion Strategy (2016 to 2020) on the 11th of March 2016, IPEC is actively participating in the Thematic Committees of the National Financial Inclusion sub-structures namely; people with disabilities, SME Finance and Development and Insurance, Pensions and Capital Markets Thematic working groups.

60) Cognisant of the role of the insurance sector in advancing the financial inclusion agenda, and in response to the recent innovations in insurance products such as Ecosure, hospital cash plans and weather-index agricultural insurance, IPEC drafted a Microinsurance framework, which was finalised in 2017.

61) The draft Microinsurance framework provides for the definition of microinsurance, requirements for regulatory approval of microinsurance products, administration of microinsurance policies, prudential licensing requirements and regulatory reporting. The insurance regulations are being amended to provide a legal basis for the registration and supervision of microinsurance.

62) The finalisation, launch and implementation of the microinsurance framework which commenced in 2017 is expected to improve the insurance penetration ratio based on our returns from the current 4.7% by a significant margin.

New Regulatory Instruments

63) The following are the major regulatory instruments that were gazetted during the year under review: -

Table 10: Statutory Instruments for 2016

Statutory Instrument	Description
SI 24 of 2016	Prescribed Assets
SI 21 of 2016	Levy Calculations
SI 23 of 2016	Application, Registration and Annual fees
Circular	**Description**
Circular 1 of 2016	Investment Guidelines on Life companies
Circular 3 of 2016	Licensing Manual for Entities in the Insurance industry
Circular 4 of 2016	Proposed microinsurance regulatory framework
Circular 6 of 2016	Guidelines on insurance products
Circular 11 of 2016	Directive on Governance and Risk Management for insurance companies

64) The above instruments were gazetted to improve the oversight function of the Commission and realise the main goal of protecting policyholders.

Industry Challenges and Regulatory Interventions

65) In addition to the high premium debtors and expense ratios mentioned above, the insurance industry faced the following other challenges:-

a) The Insurance Act is outdated and not in sync with the global trends in corporate governance, financial management and accounting and actuarial reporting best practice. The Commission has a draft Bill at the Attorney General's, which is set to address this challenge.

b) Poor corporate governance and risk management practices mainly on account of conflicted and ineffective board of directors.

c) Poor data management practices and questionable data integrity. This was characterised by players failing to correctly account for their capital. The Commission has introduced enhanced reporting requirements through statutory instrument 95 of 2017.

d) Complaints relating to failure to meet claims complaints emanating from the conversion of Zimbabwe dollar values to United States dollar values. The matter has also significantly reduced the confidence levels in the pensions industry. The Commission is eagerly awaiting the finalisation and adoption of the findings of the Commission of Inquiry into the Conversion of Insurance and Pensions Values from ZWD to USD, which was commissioned by the President of Zimbabwe.

Way Forward

66) In a bid to address the challenges identified above, the Commission is looking at implementing the following measures: -

a) Promoting the securitisation of real estate investments and the trading of such securities on the Zimbabwe Stock Exchange to enhance liquidity in the sector.

b) Strengthening corporate governance and risk management practices within the industry.
c) Enhancing regulation and supervision of the industry including the number of onsite inspections.

Conclusion

67) Despite the economic challenges, the industry showed signs of stability and resilience by recording marginal growth in premium income and growth in its asset base and penetration ratios. The Commission will continue to engage the insurance industry through the enhancement of monitoring of activities with a view to ensuring continuous compliance, industry growth and sustainability.

……………………

T. Karonga (Mr.)

Commissioner of Insurance, Pension and Provident Funds
