Disclaimer

i. This report has been prepared by the Insurance and Pensions Commission (IPEC) solely for informative purposes to the pension sector stakeholders and may not be reproduced, redistributed, communicated to a third party, or relied upon by any other person for any other purpose without the Commission's prior written consent.

ii. The Commission does not accept any liability if this report is used for any purposes other than the above-mentioned intended purpose.

iii. This report relates to the operations of private occupational pension funds as reported to IPEC in the second quarter of 2025, and the figures are based on unaudited accounts submitted by pension funds and pension fund administrators.

iv. The statistics in this report were based on the International Accounting Standard 26 (IAS 26)-Accounting and Reporting by Retirement Benefit Plans.

v. All ZWG amounts are expressed in nominal terms, except where specifically stated to be in real terms.

vi. All monetary figures are in ZWG unless stated otherwise.

vii. The income and expenses figures were compared to the same period of the prior year, as the transactions are cumulative and not directly comparable every quarter. In contrast, assets and liabilities are compared to the previous quarter, as this provides a clearer indication of the sector's performance over the two quarters.

viii. The conversion of ZWG income and expenses was done using the average exchange rate of ZWG 26.6480 for the review period, and the assets and liabilities were converted to United States Dollars (US$) using the closing interbank rate of ZWG 26.7654. The exchange rate during the quarter under review remained stable.

ix. Apart from the foreign currency business section, the amounts in this report are presented as US dollar equivalents, meaning they are not purely in US$.

1. Executive Summary

1.1. As at 30 June 2025, there were 968 registered occupational pension funds, an increase of one from the 967 as at 31 March 2025.

1.2. Out of the 968 registered funds, 479 (49%) were active and 489 (51%) were inactive. Of the 489 inactive funds, 372 (76%) were marked for dissolution.

1.3. Total membership in the pensions sector, excluding beneficiaries, increased by 0.38% to 994,572, up from 990,801 reported on 31 March 2025.

1.4. Total assets in the pensions sector grew by 6% to equivalent US$2.63 billion at the official exchange rate (ZWG 70.76 billion). This increase from US$2.48 billion, as at 31 March 2025, was primarily driven by new investments, contributions (4% of total assets), and positive fair value adjustments in investment properties and equity instruments.

1.5. As at 30 June 2025, the value of investment properties increased by 1.75%, reaching US$1.16 billion (ZWG 31.14 billion), up from US$1.14 billion in the previous quarter.

1.6. As at 30 June 2025, quoted equity investments experienced a minor decrease of 1.11%, dropping from US$465.56 million in the previous quarter to US$460.37 million. Conversely, unquoted equity investments increased by 3%, from US$105.06 million to US$108.17 million.

1.7. As at the reporting date, prescribed asset investments declined by 2%, falling from US$280 million on 31 March 2025 to US$274 million (ZWG 7.38 billion).

1.8. During the review period, pension contributions totalled US$148.35 million, reflecting an increase from US$84.98 million recorded in June 2024. Of the US$148.35 million reported, US$123.41 million, 83% was received.

1.9. As at 30 June 2025, pension contribution arrears rose by 18.84%, increasing from US$92.92 million in the previous quarter to US$110.43 million. This increase includes both current period arrears and interest earned by sponsoring employers on the outstanding balances. The Commission is still working with sponsoring employers who have arrears to clear the outstanding contributions.

1.10. For the six months ended 30 June 2025, total income was US$295.47 million (ZWG 7.87 billion), a 78.74% decrease from the US$1.39 billion recorded in the same period of the previous year. The substantial decline in fair value gains and other income is mainly due to exchange rate stability during the reporting period.

1.11. The total expenditure for the period amounted to US$98.23 million (ZWG 2.62 billion), with 28% allocated to administrative expenses and 72% dedicated to member benefits. In comparison, the same period in the previous year recorded a total expenditure of US$41 million, of which 60% was allocated to benefit payments.

2. About the Commission

Overview

2.1. The Insurance and Pensions Commission (IPEC) is a statutory body mandated to regulate, supervise, and develop the insurance and pensions sector for the protection of policyholders and pension scheme members in Zimbabwe.

2.2. This report outlines pensions sector developments and IPEC's supervisory activities in the pensions sector for the six months ended 30 June 2025, consistent with its statutory mandate.

2.3. The activities of the Commission are guided by the following Acts and their respective regulations:

- Insurance and Pensions Commission Act [*Chapter 24:21*]
- Pensions and Provident Fund Act [*Chapter 24:32*]
- Insurance Act [*Chapter 24:07*]
- Money Laundering and Proceeds of Crime Act [*Chapter 09:24*]
- Finance Act [*Chapter 23:04*]
- Public Entities and Corporate Governance Act [*Chapter 10:31*]
- Public Finance Management Act [*Chapter 22:19;*] and
- Public Procurement and Disposal of Public Assets Act [*Chapter 22:23*]
- Administration of Estates Act [*Chapter 6:01*].

3. Key Performance Indicators

3.1. The key performance indicators for the pensions sector as at 30 June 2025 are shown in the table below.

Table 1: Key Performance Indicators

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Self-Administered Funds	Total Q2 2025
Number of Funds	798	156	14	968
DB	21	9	4	34

Prescribed Assets Ratio	10.69%	14.09%	7.92%	10.43%
Contribution Arrears (Million ZWG)	358	511	2,106	2,976

Notes:

**Total investment income is made up of rental income, dividends, interest on investments, profit on disposal of assets and fair value gains.*

***Total expenditure for the sector includes benefits paid, transfer to reserves, revaluation losses and provisions.*

****Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation losses.*

4. Economic Overview

4.1. Domestic Outlook

4.1.1. The second quarter of 2025 was marked by a sustained path of macroeconomic stability, characterised by continued disinflation, a stable exchange rate, and strong foreign currency inflows.

4.1.2. This trajectory was underpinned by tight monetary policies from the Reserve Bank of Zimbabwe (RBZ), improved electricity generation at Kariba Hydro-Power Station, and robust agricultural recovery.

4.1.3. The Government remains committed to advancing structural reforms and strengthening fiscal discipline. The efforts will consolidate the macroeconomic stability achieved so far and foster a more predictable environment, which is essential for sustaining economic growth in the second half of the year.

4.1.4. The economic growth is expected to broaden the revenue base, improve coverage, and reduce systemic risk. With a consolidated fiscal position and enhanced access to private sector credit, confidence in long-term financial instruments, such as life insurance, continues to strengthen.

4.2. Global Outlook

4.2.1. During the first half of 2025, global economic performance was shaped by a mix of recovery momentum and emerging risks. According to the Mid-Term Budget, global economic growth is now projected at 2.8%, down from the 3.2% forecast made in October 2024.

4.2.2. This downward revision is a result of the anticipated increases in trade tariffs and geopolitical tensions in Europe and the Middle East.

4.2.3. Sub-Saharan Africa's economic momentum has softened, with growth now projected at 3.8%, down from an earlier estimate of 4.2% in October 2024.

4.2.4. In a similar trend, the Southern African Development Community (SADC) is expected to grow by just 2.8% in 2025, revised downward from the earlier projection of 3.3%.

4.2.5. These revisions highlight the region's vulnerability to both global shocks and internal structural challenges, reinforcing the urgency for policy resilience and investment in climate-resilient growth strategies.

4.3. Domestic Macro-Prudential Analysis

4.3.1. During the second quarter of 2025, the economy recorded steady macroeconomic gains, largely attributed to the impact of sustained policy reforms and structural adjustments implemented over the past year.

4.3.2. A significant development during the period was the completion of the GDP rebasing exercise by ZIMSTAT, which revised the size of the economy from US$35.2 billion in 2024 to approximately US$45.7 billion. This upward revision also raised GDP per capita to above US$3,000, thereby reinforcing Zimbabwe's progression towards upper-middle-income status by 2030.

4.3.3. Key aspect of the rebasing exercise highlighted the significant and growing role of the informal sector, which now accounts for an estimated 76% of the national economy. This structural reality underscores the need for policies that formalise economic activities, improve revenue collection, and extend social protections to this large segment of the workforce.

4.3.4. The revised sectoral composition of the economy reflects increased diversification, with manufacturing (15.3%), mining and quarrying (14.5%), financial and insurance services (10.8%), and agriculture (9.3%) emerging as the leading contributors to national output.

4.3.5. This structural shift is indicative of improved formality in economic activity and the growing importance of value-added sectors, which collectively enhance the country's productive capacity and fiscal planning framework.

4.3.6. Furthermore, the overall stability achieved in the second quarter was supported by the continuation of tight monetary and fiscal coordination, which created a conducive environment for sustained growth and investment.

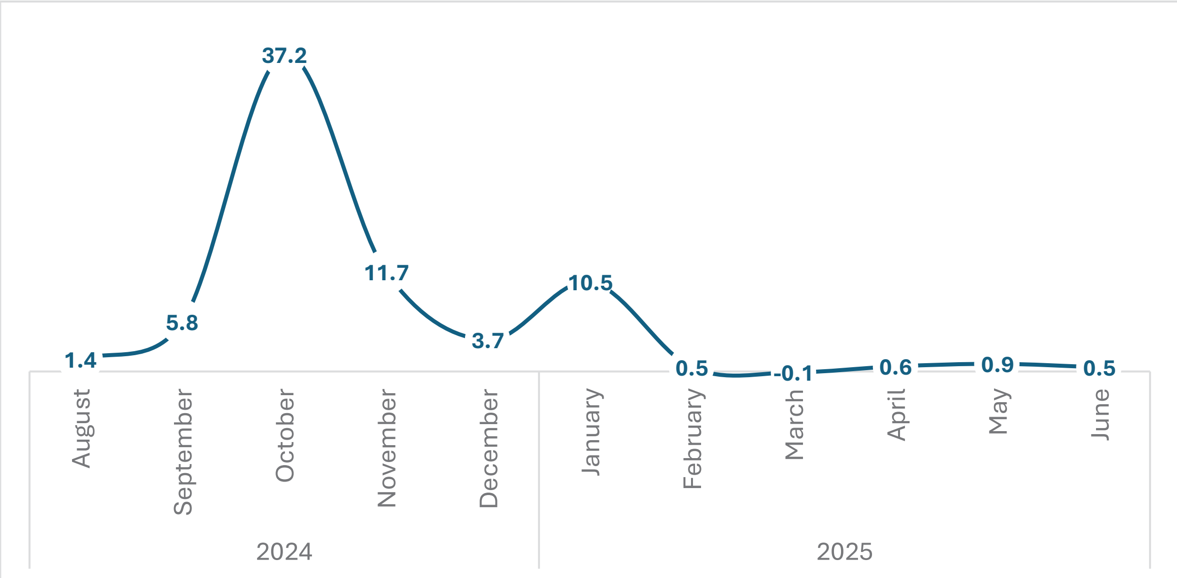
4.4. Inflation Developments

4.4.1. During the first half of 2025, the country experienced relative stability in monthly inflation trends.

4.4.2. Month-on-month inflation, measured in ZWG, averaged around 0.5%, reflecting the effectiveness of the Reserve Bank of Zimbabwe's tight monetary policy stance.

4.4.3. However, on a year-on-year basis, inflation rose from 85.7% in April to 92.5% in June 2025, a trend largely attributed to the statistical base effect stemming from currency reforms implemented in 2024. This elevated annual inflation is expected to moderate significantly at the beginning of October 2025, as the base effect subsides and the monetary discipline is maintained.

Figure 1: Percentage Monthly Inflation Rates



4.5. **Exchange Rate Developments**

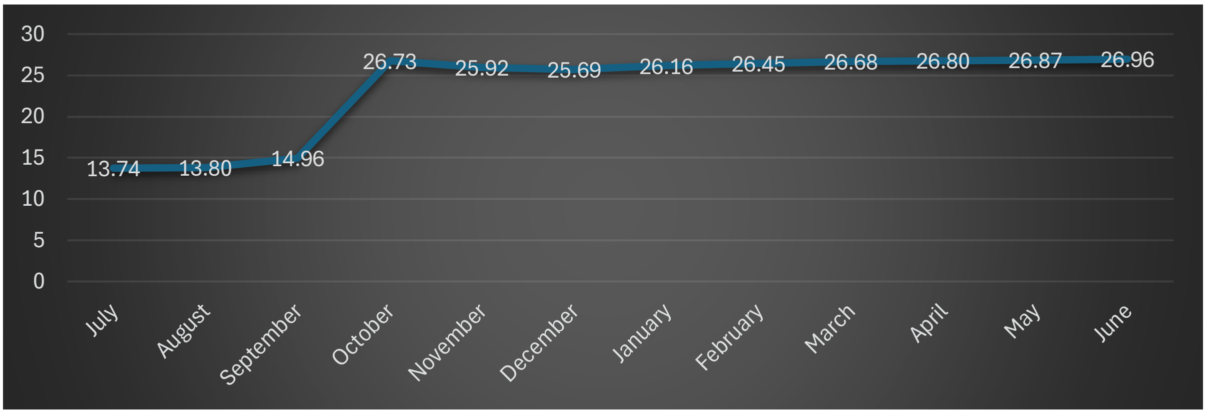
4.5.1. The observed inflation stability during the period under review was strongly supported by a stable exchange rate.

4.5.2. The interbank rate on the Willing Buyer Willing Seller (WBWS) on the foreign exchange market averaged US$1: ZWG26.66 throughout the six months of the year.

4.5.3. This sustained exchange rate stability was a direct outcome of foreign exchange market reforms and strategic interventions by RBZ, which helped narrow the parallel market premium and improved price discovery.

4.5.4. The consistent performance of the exchange rate played a critical role in anchoring inflation expectations and maintaining macroeconomic stability.

Figure 2: Average Interbank Rate



4.6. **Zimbabwe Stock Exchange (ZSE)**

4.6.1. The performance of the ZSE during the period spanning April to June 2025 reflected improved investor sentiment and increased trading activity, partly driven by macroeconomic stability and the continued consolidation of the ZWG currency. The following key developments evidenced this:

4.6.1.1. The aggregate market capitalisation of the ZSE increased from ZWG 58.41 billion in April to ZWG 60.97 billion in June 2025, indicating renewed interest in equities and improved confidence in local asset valuations.

4.6.1.2. Turnover on the Zimbabwe Stock Exchange (ZSE) continued an upward trajectory in the second quarter of 2025, recording a total of ZWG 1.40 billion, up from ZWG 951.29 million in Q1. This growth in trading activity reflects improved investor sentiment, increased liquidity, and sectoral rotation among institutional investors.

4.6.1.3. The ZSE All-Share Index continued to exhibit volatility over the period, reflecting investor responses to evolving economic fundamentals, exchange rate movements, and company-specific disclosures.

4.7. **Victoria Falls Stock Exchange Market (VFEX)**

4.7.1. The performance of the VFEX during the second quarter of 2025 exhibited signs of contraction, reflective of both global and domestic market conditions, as well as investor sentiment following monetary tightening and exchange rate adjustments.

4.7.2. The VFEX recorded a decline in market capitalisation to US$1.25 billion by June 2025, down from US$1.33 billion in Q1. This movement aligns with broader capital market trends as acknowledged by the 2025 Mid-Term Budget, where investor risk appetite appeared to moderate in response to a more stable ZWG exchange rate, declining inflation, and cautious reallocation of capital by institutional investors.

4.7.3. During the second quarter of 2025, total turnover on the VFEX amounted to US$14.83 million, reflecting subdued trading activity compared to the US$58.5 million recorded in Q1 of 2025. The total volume traded stood at 72.67 million shares, indicating a marginal increase in transactions but lower value trades, consistent with prevailing investor caution and sectoral rebalancing.

4.7.4. The low activity on VFEX reflects the tighter financial conditions highlighted in the Budget Review, including lower budget deficits and improved debt levels.

4.7.5. Although VFEX is still important for US$ investments and foreign listings, the Q2 performance shows the need for stronger coordination in capital markets, clear fiscal policies, and stable exchange rates to attract more investors.

5. Regulatory Developments

5.1. During the six months ended 30 June 2025, the Commission issued ten (10) circulars to the pensions sector, aimed at sharing key information and offering regulatory guidance.

5.2. The following table shows the circulars released to the pensions sector during the first half of 2025.

Table 2: Circulars Issued for the Six Months Ended 30 June 2025

Circular	Issue date	Content
Circular 1 of 2025	1 February 2025	Pension Funds Reporting Requirements.
Circular 2 of 2025	15 February 2025	Submission of Quarterly Levy Computations and Due Dates.
Circular 4 of 2025	7 February 2025	2025 IPEC AML/CFT/CPF Industry Training Calendar.
Circular 6 of 2025	24 February 2025	Engagement with the Consultant on Financial Sector Development Policy.
Circular 7 of 2025	07 March 2025	Invitation to Participate in Digital Transformation Assessment.
Circular 8 of 2025	27 March 2025	2024 Financial Reporting.
Circular 9 of 2025	28 March 2025	Directive on Revised Statutory Reporting Deadlines.

Circular	Issue date	Content
Circular 10 of 2025	28 March 2025	Market Conduct Framework for The Insurance and Pensions Industry.

Prescribed Assets Applications

5.3. In the first half of the year, the Minister of Finance, Economic Development and Investment Promotion granted prescribed asset status to eleven applications.

5.4. The following table presents the instruments approved during the period ending 30 June 2025.

Table 3: Approved Prescribed Asset Instruments for the Review Period

Issuer	Amount (millions)	Currency	Purpose	Date Approved
AFC Agrobills	33.6	US$	Agriculture-Winter Cropping	15 January 2025
Zimgold Commercial Paper	10.0	US$	Working Capital	17 January 2025
Willowmead Bio Pvt Ltd	2.0	US$	Establishment of a Cannabidiol Extraction and Processing Plant	4 February 2025
Agrowth Debenture	7.5	US$	Agriculture	20 February 2025
OMLAC DREIT	109.3	US$	Developmental REIT	13 March 2025
Vakayi Capital	10.0	US$	Private Equity Fund	17 March 2025
Zimbabwe Women Microfinance Bank	10.0	US$	Bank Recapitalisation	24 March 2025
Empower Bank Housing bills	14.4	US$	Housing Bills	24 March 2025
Gutu Solar	3.77	US$	Solar Project	2 April 2025
Solar Century	7.99	US$	Solar Project	30 April 2025
Frontier Convertible Debenture	40.00	US$	Development of Highland Park Phase 2	5 June 2025

5.5. Projects granted prescribed asset status offer valuable opportunities for portfolio diversification, while encouraging investments that support national development and align with the objectives of the National Development Strategy 1 (NDS1). Therefore, the Commission urges pension funds to comply with the regulatory minimum threshold of 20% of total assets.

6. Registered Pension Funds

6.1. There were 968 registered occupational pension funds, compared to 967 in the previous quarter.

6.2. Out of a total of 968 funds, 479 were active, accounting for 49% of the sector. The remaining 489 were inactive, having either been paid up or earmarked for dissolution. Of these 968 funds, 34 operated as defined benefit schemes, 3 were hybrid schemes, and 931 were designed as defined contribution schemes.

6.3. As at the reporting date, the sector consisted of 954 funds that had outsourced their fund administration services. Of these, 798 were insured funds, 156 were self-administered, and the remaining 14 operated as standalone entities.

6.4. As at 30 June 2025, there were 14 registered fund administrators. Of these, five (5) were independent, while the remaining nine (9) were registered life assurance companies engaged in fund administration.

6.5. The table below details the allocation of pension funds under the management of each respective administrator.

Table 4: Distribution of Funds Administered by Type of Administration Model

Name of Administrator	30 June 2025		31 March 2025	
	Insured funds	Self-Administered funds	Insured funds	Self-Administered funds
CBZ Life	6	-	6	-
Fidelity Life	37	1	37	1
First Mutual Life	134	7	134	7
Old Mutual Life	346	19	347	19
Nyaradzo Life	-	4	-	3

Zimbabwe Insurance Brokers	-	4	-	4
Stand-alone[1]	-	14	-	14
Total	**798**	**170**	**799**	**169**

[1]Refer to Annexure 7 for the comprehensive schedule of Stand-alone funds

Fund Registrations

6.6. One pension fund, namely, RIMCA Super Pension Fund, was registered as a self-administered fund during the quarter under review.

6.7. Sponsors and administrators of pension schemes are required to ensure that all funds are appropriately registered with the Insurance and Pensions Commission and hold a valid registration certificate. Registration must be completed before remitting contributions and starting any administrative activities or operations. Moreover, each fund must be reported on, regardless of its status or condition.

Membership

6.8. The table below shows the sector's membership as at 30 June 2025 and 31 March 2025, respectively.

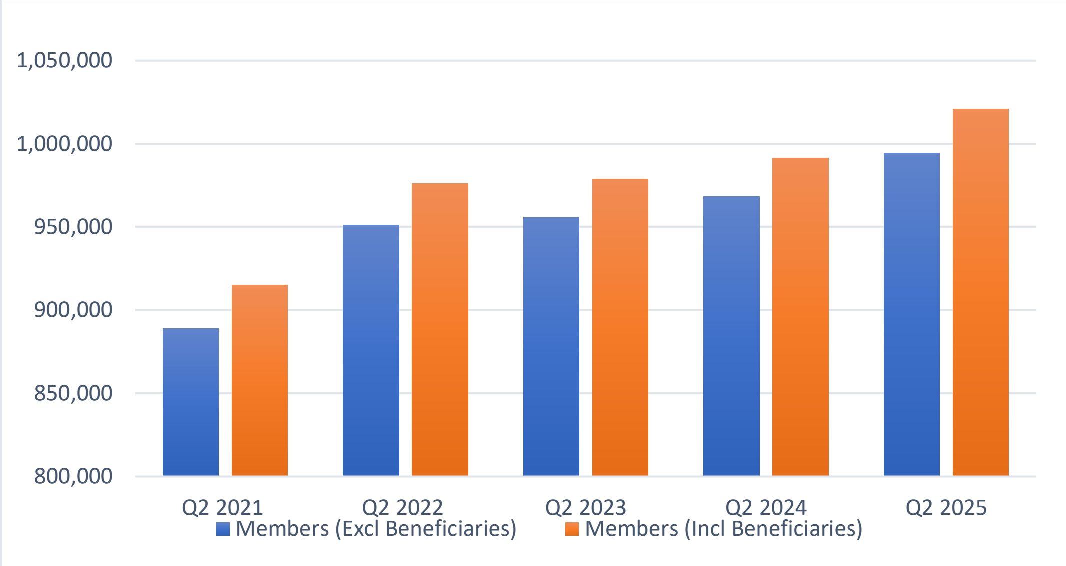
Table 5: Membership Categories as at 30 June 2025 and 31 March 2025

Membership Class	Insured Funds	Self -Self-Administered Funds	Stand-Alone Funds	Total Q2 2025	Total Q1 2025
New Entrants	1,760	7,950	2,347	12,057	8,042
Active members (excl. new entrants)	103,548	105,585	150,955	360,088	353,607
Pensioners (excl. beneficiaries)	6,922	5,008	23,217	35,147	35,399
Deferred Pensioners	239,589	47,013	185,011	471,613	479,470
Suspended Pensioners (excl. beneficiaries)	4,449	4,382	6,482	15,313	14,668
Unclaimed benefits (number)	11,853	5,877	82,624	100,354	99,615
Total Members excluding beneficiaries	**368,121**	**175,815**	**450,636**	**994,572**	**990,801**
Total Number of beneficiaries	**1,589**	**4,409**	**20,475**	**26,473**	**26,401**
Total members, including beneficiaries	**369,710**	**180,224**	**471,111**	**1,021,045**	**1,017,211**
Total Number of Exits	**1,612**	**3,702**	**1,175**	**6,489**	**7,931**

6.9. There was a marginal increase of 0.38% in total membership (including beneficiaries) from 1,017,211 to 1,021,045. This increase was mainly attributed to new entrants.

6.10. The membership trend for the past five years is shown below.

Figure 3: Trend in Membership



6.11. The Commission has observed a gradual rise in pension fund membership in recent years, mainly due to new entrants.

7. Assets

7.1. As at 30 June 2025, total assets increased by 6%, reaching US$2.63 billion (ZWG 70.76 billion), up from US$2.48 billion recorded on 31 March 2025. This growth was mainly driven by new investments, which accounted for 4% of total assets, and fair value adjustments.

7.2. As at 30 June 2025, the value of investment properties stood at US$1.16 billion (ZWG 31.14 billion), accounting for 44.09% of total assets. Investment property increased from US$1.14 billion recorded in the prior quarter.

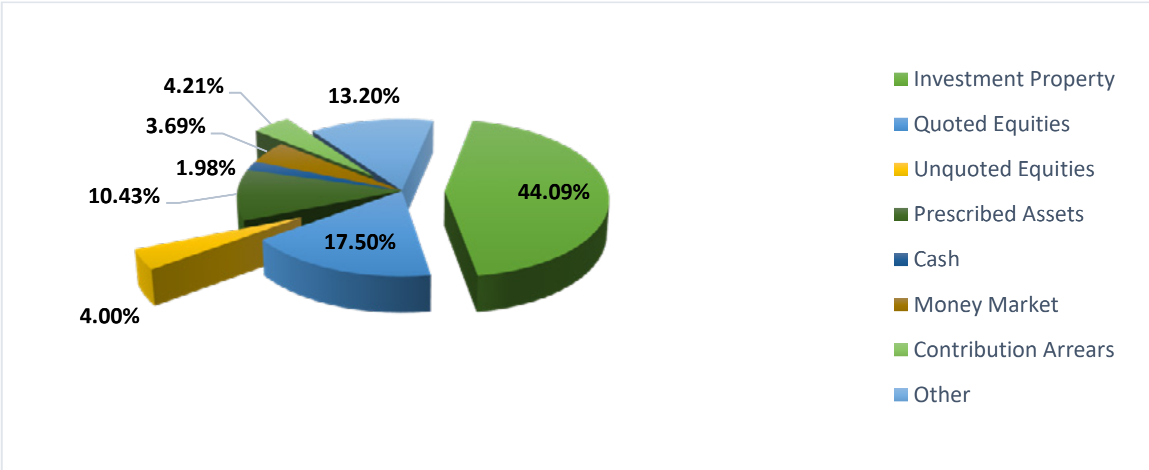
7.3. As at 30 June 2025, quoted equities registered a slight decrease of 1.11%, decreasing to US$460.37 million (ZWG12.31 billion) from US$465.56 million reported on 31 March 2025. The asset class's contribution to total assets also declined to 17.50% from 18.77% in the previous quarter. The decline was driven by a fall in listed equity holdings by the industry.

7.4. As at 30 June 2025, contribution arrears totalled US$110.43 million (ZWG 2.98 billion), accounting for 4.21% of the sector's total assets. This marks an 18.84% increase from the previous quarter's figure of US$92.92 million, when arrears represented 3.75% of total assets.

7.5. The increase in contribution arrears highlights the continued delay by the fund's sponsoring employers to remit pension contributions to their respective pension funds. In response, the Commission is engaging with defaulting employers, in line with Section 16 of the Pensions and Provident Funds Act [Chapter 24:32], before invoking garnishing powers.

7.6. The sector's asset composition is illustrated in the figure below.

Figure 4: Asset Composition

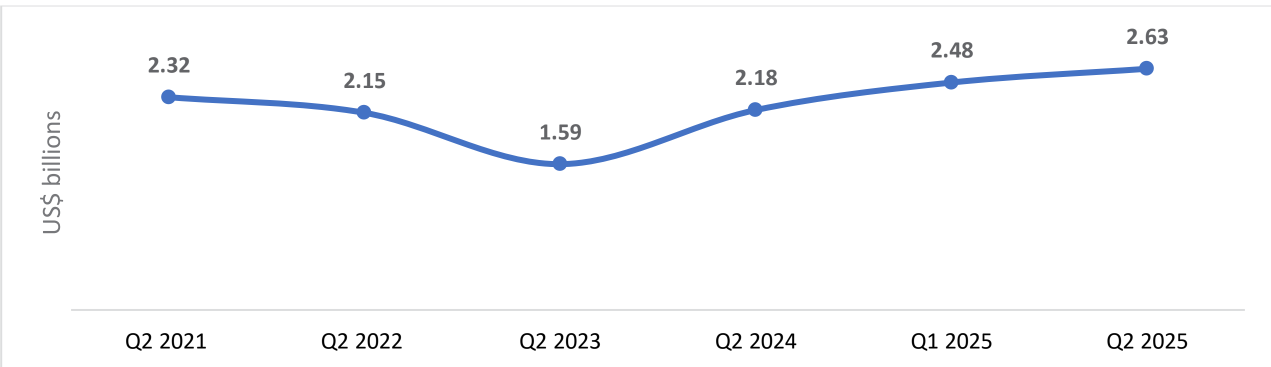


7.7. The pension sector's assets were concentrated in investment properties, quoted equities, and prescribed assets, which together made up 72% of the total asset portfolio.

7.8. Investments in unquoted equities increased by 3% to US$108.17 million (ZWG 2.91 billion) during the quarter under review from US$105.06 million reported in the last quarter. This resulted in a marginal decrease in the proportion of unquoted equities to total assets from 4.24% to 4.00%.

7.9. The five-year asset trend is depicted in the diagram below.

Figure 5: Trend in Assets (US$ Equivalent)



7.10. The figure above highlights the trend in assets over the five years, with Q2 2023 showing a downtrend affected mainly by the deterioration of the local currency on the official exchange platform. The other years reflect an uptrend following the exchange rate stability, particularly after the introduction of the ZWG and the recent liberalisation to a market-driven exchange rate system following the promulgation of S.I. 34 of 2025.

7.11. Prescribed assets decreased by 2%, from US$280 million as at 31 March 2025 to US$274 million as at the reporting date.

7.12. At the reporting date, prescribed assets investments were 10.43% against a minimum of 20%. To meet the required minimum threshold, the sector is encouraged to invest in a range of instruments accorded prescribed asset status.

7.13. The number of gold coins, of varying denominations, held by the pensions sector remained unchanged from the last quarter. However, the value of these coins increased by 7%, rising from ZWG164.55 million as at 31 March 2025 to ZWG176.46 million as at 30 June 2025. Gains in the gold price drove the increase.

7.14. The tables below illustrate the gold-backed investments by the sector.

Table 6: Gold Coin Investments

Denomination	Insured	Self Admin	Standalone	Total
0.1Oz	0	2	18	20
0.25Oz	0	1	32	33
0.5Oz	9	35	2	46
1Oz	55	1,406	412	1,873
Number of coins	**64**	**1,444**	**464**	**1,972**
Value (ZWG millions)	**5.51**	**131.81**	**39.14**	**176.46**

Table 7: Gold-Backed Digital Tokens

Sector	Value (ZWG millions)	Tokens held (MG in millions)
Insured	0.91	0.34
Self-Admin	29.72	11.05
Standalone	4.09	1.52
Total	**34.73**	**12.92**

8. Income

8.1. Total income for the six months ended 30 June 2025 was ZWG7.87 billion, equivalent to US$295.47 million. This represents a 78.74% decrease from the US$1.39 billion reported during the same period last year. The significant drop in fair value gains and other income categories was largely due to the stable exchange rate during the reporting quarter.

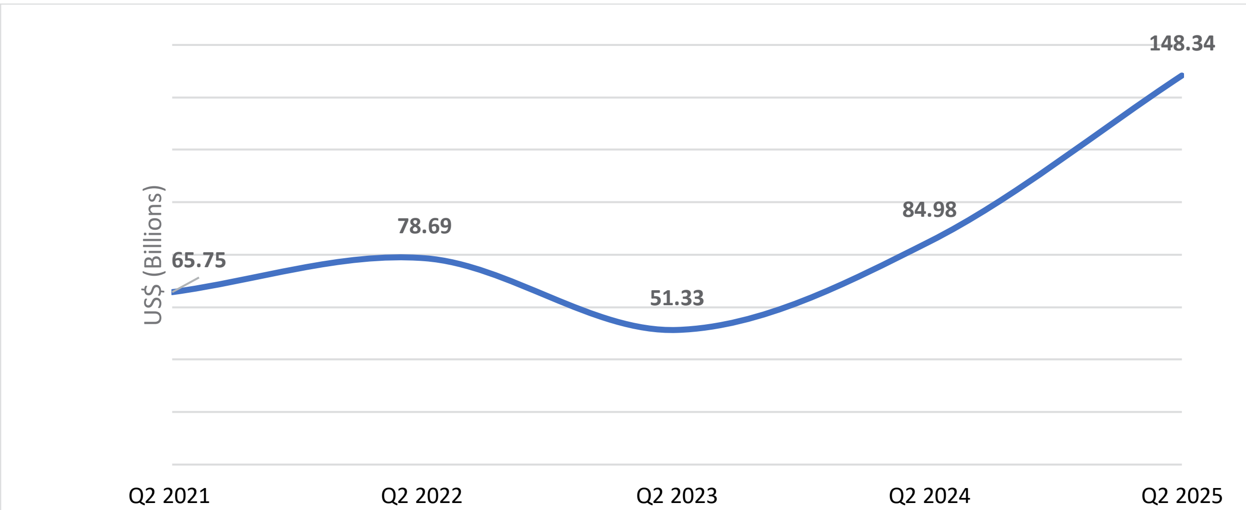
8.2. Of the total income, US$101.90 million was earned in foreign currency, accounting for 34.36% of the sector's total revenue.

8.3. The primary sources of income were contributions and fair value gains, constituting 72.98% of total revenue, amounting to US$216.50 million (ZWG 5.77 billion).

8.4. Contributions made up 50% of total income, amounting to US$148.35 million (ZWG3.95 billion). Of this total, US$123.41 million, equivalent to 83%, was actually received. The increase in contributions was partly attributed to a more stable economic environment, as well as contributions from new entrants.

8.5. The general trend in contributions is shown in the figure below.

Figure 6: Five-Year Trend in Contributions (US$ Equivalent)



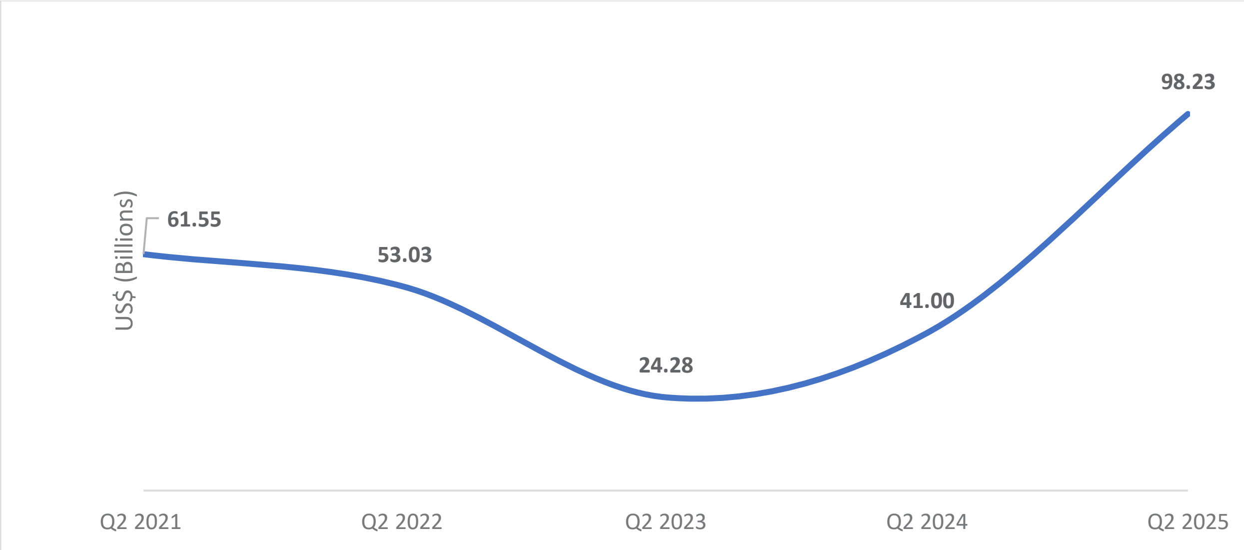
9. Expenditure

9.1. Total expenditure for the period under review was US$98.23 million (ZWG2.62 billion), up from US$41 million in the prior year. Of this amount, US$71 million (ZWG1.90 billion), representing 72% of total expenditure, was incurred on benefits payments.

9.2. Total administrative expenses amounted to US$27.02 million (ZWG720.14 million), primarily driven by administration fees, investment management fees, and staff costs, which collectively accounted for 55% of total administrative expenditure. The Commission will continue to enforce compliance with the Expenses Framework.

9.3. The trend for expenses is shown in the figure below.

Figure 7: Trend in Expenditure in US$ Equivalent



9.4. Expenditure increased steadily, as indicated by the gradient of the trendline, although there was a decline in 2023 to align with the Expenses Framework.

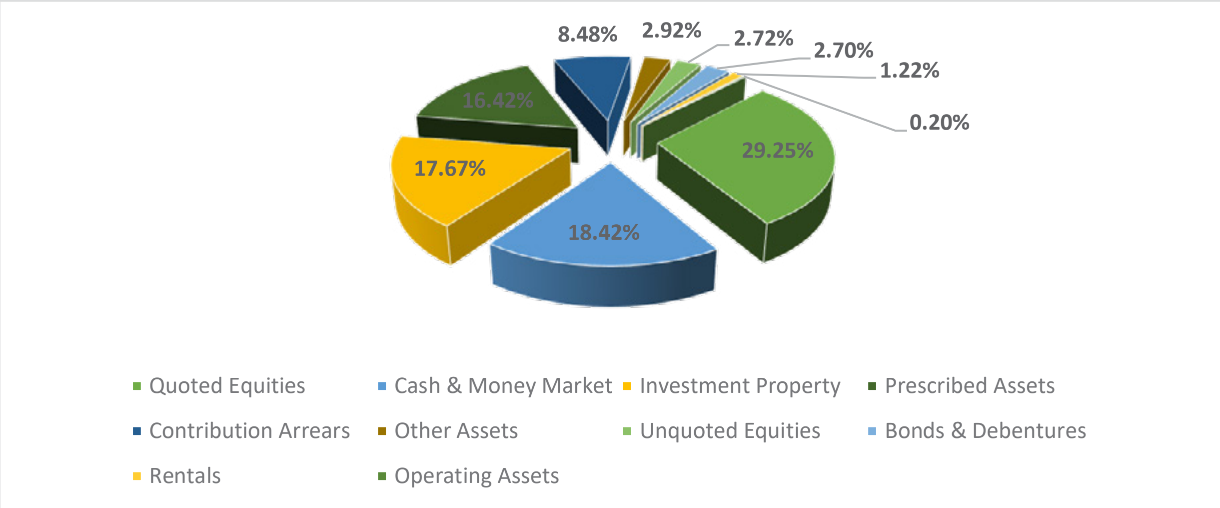
9.5. Sector expense ratios for all funds are presented in Annexure 5, as assessed against the prescribed caps in the Expense Framework. Funds with ratios that do not comply, as indicated in Annexure 5, are required to operate within the defined expense thresholds.

10. Foreign Currency Denominated Assets

10.1. Foreign currency-denominated assets increased by 5.17%, from US$653.82 million reported in the previous quarter to US$687.51 million as at 30 June 2025, representing 26.23% of the total pension sector assets. The increase arose from new acquisitions of operating and investment assets.

10.2. The table below shows the asset composition in foreign currency business.

Figure 8: Foreign Currency Assets



10.3. The holding of foreign currency-denominated assets has helped to preserve and create value for members.

10.4. Pension funds must ensure that the income from foreign currency-denominated assets is fairly distributed among members to enhance their benefits and savings.

10.5. Contribution arrears as at 30 June 2025 stood at US$58.28 million, representing 8.48% of the sector's foreign currency-denominated assets.

10.6. Contribution arrears increased by 3.72% from US$56.19 million compared to the previous quarter. Members of the Boards of Funds are urged to collaborate with sponsoring employers to address these arrears, which adversely impact members' reasonable expectations.

10.7. The increase in contribution arrears is attributable to the accrual of interest on outstanding amounts and the continued non-remittance by some employers. To safeguard the security of pension funds' assets, the Commission is actively engaging defaulting sponsoring employers to ensure remittance of outstanding contributions. Garnishing of bank accounts will be considered as a last resort in cases where employers fail to cooperate.

10.8. Boards of Funds are encouraged to establish clear contribution guidelines and work collaboratively with sponsoring employers to ensure the consistent and timely remittance of contributions, thereby safeguarding the interests of fund members.

11. Foreign Currency Income and Expenditure

11.1. Total foreign currency income for the six months reached US$137.37 million, a 34.82% increase from the US$101.90 million reported on 30 June 2024.

11.2. Total foreign currency contributions reached US$77.01 million, an increase from US$53.11 million. During the review period, these contributions represented 45% of the total foreign income.

11.3. For the first half of the year, total foreign currency benefits expenditure reached US$28.78 million, marking a 121% increase from US$13.04 million in the previous year.

11.4. Administrative expenditure accounted for 36.78% of the total spending, with 63.22% of foreign currency resources allocated to the payment of benefits, the core function of the sector.

11.5. The table below shows key forex business matrices.

Table 8: Key Indicators for Forex Business

Indicator	US$ (Millions)
Total contributions	77.01
Total income	137.37
Total benefits expenditure	28.78
Total administrative expenditure	16.74
Total expenditure	45.52
Total assets	687.51

12. Pension Fund Administrators

12.1. Total income earned by fund administrators from fund administration business was ZWG232.70million (US$8.73 million) compared to US$7.15 million as at 30 June 2024.

12.2. Of the total income earned, foreign currency income amounted to US$3.73 million, representing 43%. During the period under review, 11 out of the 14 administrators recorded US$-denominated business. One administrator has not started writing business.

12.3. Income from fund administration fees earned by administrators for services rendered was ZWG125.63 million (US$4.71 million), constituting 54% of the total income. The table below shows the sources of income earned by administrators for the period under review.

Table 9: Sources of Income for Administrators

Source of income	ZWG 'millions'	US$-(ZWG Equivalent in millions)	Combined ZWG & US$ (ZWG millions)	Percentage of total income
Admin Fees	64.19	61.44	125.63	53.99%
Commission	5.09	10.50	15.58	6.70%
Consultancy Fees	3.03	-	3.03	1.30%
Cost of Guarantee	29.23	-	29.23	12.56%
Fair value gains (losses)	2.19	0.10	2.30	0.99%
Health Fees	0.02	1.09	1.11	0.48%
Investment Income	29.02	23.31	52.33	22.49%
Rent receivable	0.31	0.12	0.43	0.18%
Sundry Income	0.15	2.92	3.06	1.32%
Total	**133.22**	**99.48**	**232.70**	**100%**

Table 10: Foreign Currency Income

Administrator	Total Income (ZWG + US$)	Total Income (US$)	US$ Converted	Proportion of Forex Component to Total Income
Old Mutual	122,417,396	1,287,789	34,317,045	28%
Minerva	49,715,188	1,250,673	33,327,986	67%
Bright Employee Benefits	14,588,835	344,464	9,179,303	63%

Grand Total	**232,698,079**	**3,733,109**	**99,480,040**	**43%**

12.4. As at 30 June 2025, the total expenditure amounted to ZWG265.46 million (US$9.97 million), resulting in a loss of US$1.24 million. This expenditure primarily included salaries, staff costs, commissions and general office running expenses.

Furthermore, the industry should consider adopting technology and AI to streamline operations, increase efficiency and reduce costs. The Commission is continuing to monitor compliance with the Expense Framework.

12.5. The table below outlines the main cost drivers and their respective proportions of the total expenses.

Table 11: Major Cost Drivers for Fund Administrators

Expense Item	Amount (ZWG)	% of Total Expenses
Salaries	124,439,706.87	46.84%
Staff Costs	26,437,224.57	9.95%
Commissions	21,920,078.23	8.25%
General office running expenses	13,906,280.20	5.23%

12.6. The following table outlines the administration fees as a percentage of each administrator's total income and specifies the proportion of these fees received in foreign currency.

Table 12: Administrators' Administration Fees

Administrator	Administration Fees			Proportion of Forex Component to Total Admin Fees
	Combined US$ + ZWG	US$	US$ Converted	
Old Mutual	49,342,067	589,644	15,712,855	32%
Zimnat	2,393,859	52,553	1,400,423	59%

Zimnat	9,792,871.82	127,986,574.69	-118,193,702.87
Total	**232,698,079.14**	**265,642,737.72**	**-32,944,658.59**

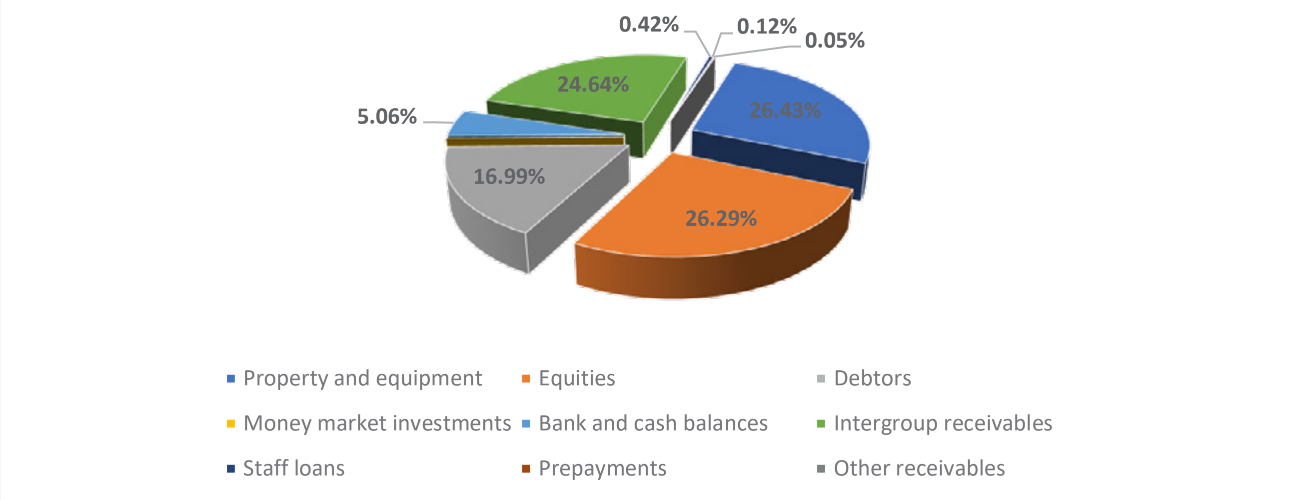
12.8. As at 30 June 2025, four administrators, namely Bright, Comarton, ZB Life and Zimnat Life, reported losses for the period as shown in the table above.

12.9. Administrators are urged to align their expenditures with prevailing revenue levels to ensure long-term financial sustainability.

12.10. Total assets for independent administrators, excluding life assurers and brokers, amounted to ZWG65.44 million (US$2.43 million). The US$-denominated assets primarily comprised property, debtors, cash, and prepayments.

12.11. The breakdown of assets for independent administrators is shown in the following figure.

Figure 9: Independent Administrators Asset Distribution



12.12. For independent administrators, property and equipment, intergroup receivables, and equities constituted the most significant asset classes, representing 77.36% of their total assets.

13. Unclaimed Benefits

13.1. Unclaimed benefit liabilities were equivalent to US$15.90 million (ZWG406.68 million) as at 30 June 2025. The increase in unclaimed benefits was mainly attributed to pension increases and bonuses awarded to members.

13.2. The number of members with unclaimed benefits increased slightly by 0.74% to 100,354 from 99,615 compared to the prior quarter. The Commission is encouraging the industry to intensify efforts to locate members and surrender unclaimed benefits that are over five years old to the Guardian Fund.

13.3. The table below shows the spread of unclaimed benefits by Administration type.

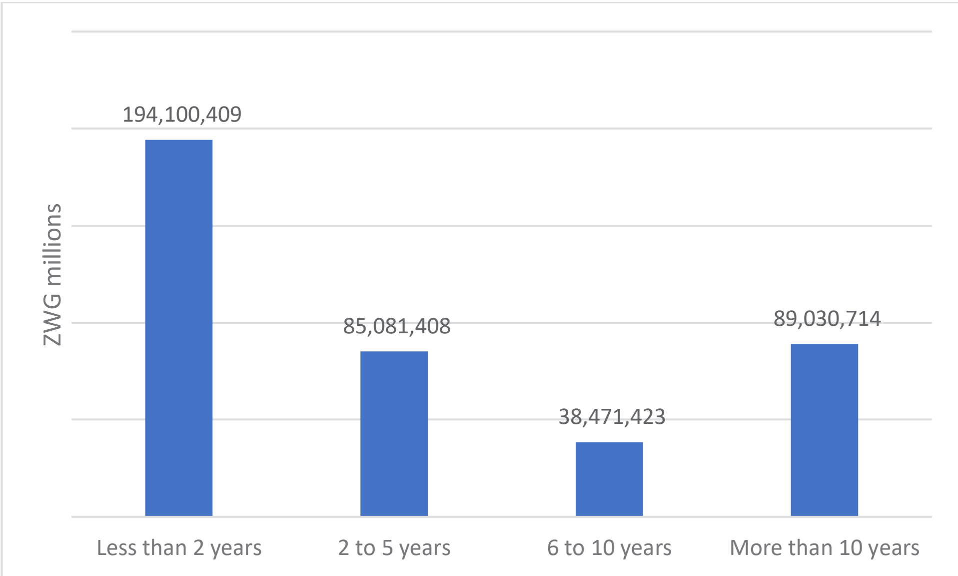
Table 14: Unclaimed Benefits by Administrators

Type of Administration	Membership	Percentage	ZWG
Insured	11,853	12.50%	147,421,297
Self-Administered	5,877	6.10%	141,103,346
Stand-Alone	82,624	81.40%	118,159,311
Total	**100,354**	**100%**	**406,683,954**

13.4. The stand-alone type of administration had the largest share of members with unclaimed benefits at 81.4%, followed by the insured at 12.5% and self-administered at 6.1%. However, when considering monetary value, the insured type represented the highest amount, followed by self-administered and then stand-alone.

13.5. Despite having the most members with unclaimed benefits, the stand-alone category revealed that the average amount owed per member was considerably lower than that of the other administration types.

Figure 10: Age Analysis of Unclaimed Benefits



13.6. Most of the unclaimed benefits fall within the 0–2-year period. However, it has been observed that administrators are not remitting unclaimed benefits that are over 5 years old, as mandated by the Estate Administration Act [Chapter 6:01] under the Master of the High Court.

13.7. The Commission is concerned about the industry's non-compliance with the Act and the ongoing difficulty in locating members who have unclaimed benefits.

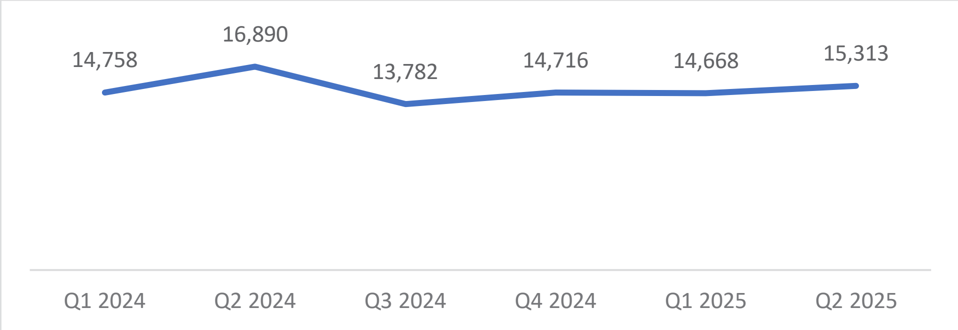
14. Suspended Pensioners

14.1. The benefits liability for suspended pensioners was approximately US$3.34 million (ZWG90 million) as at 30 June 2025.

14.2. Total number of suspended pensioners increased from 14,668 in the previous quarter to 15,313 in the period under review. This indicates a 4.40% increase in the number of suspended pensioners.

14.3. The diagram below illustrates the trend of the reported suspended pensioners from Q1 2024 to Q2 2025.

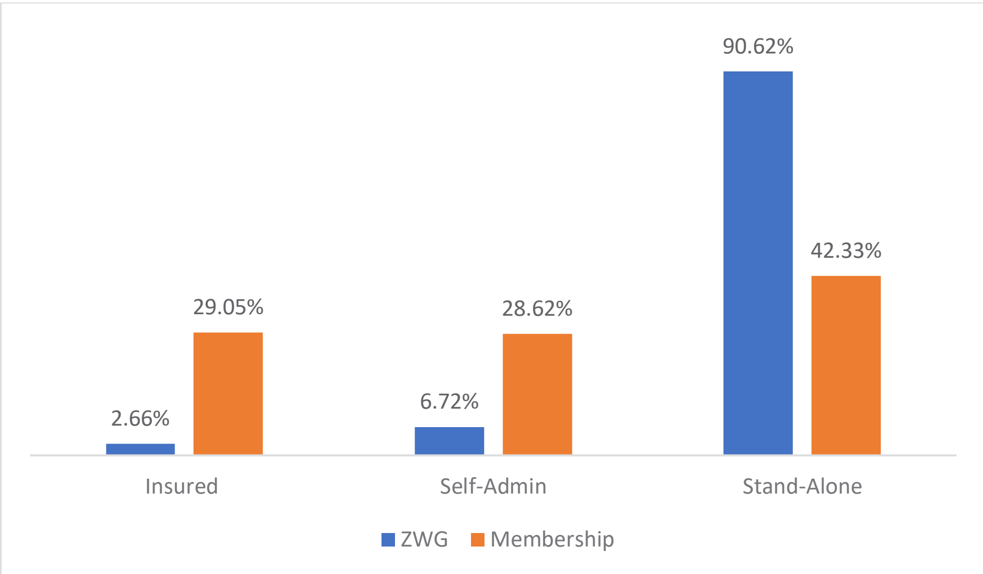
Figure 11: Suspended Pensioner Membership



Suspended Pensioners by Administration Models

14.4. The figure below shows the spread of suspended pensioners by Administration type.

Figure 12: Suspended Pensioners by Administration Models



14.5. In the distribution of suspended pensioners' liability by administration model, stand-alone funds had the most significant suspended benefit liability, equivalent to US$3.04 million (ZWG82 million), followed by insured and self-administered funds with US$0.09 million (ZWG2.4 million) and US$0.22 million (ZWG6.00 million), respectively.

14.6. The increase in suspended liability represents delayed retirement security for vulnerable populations.

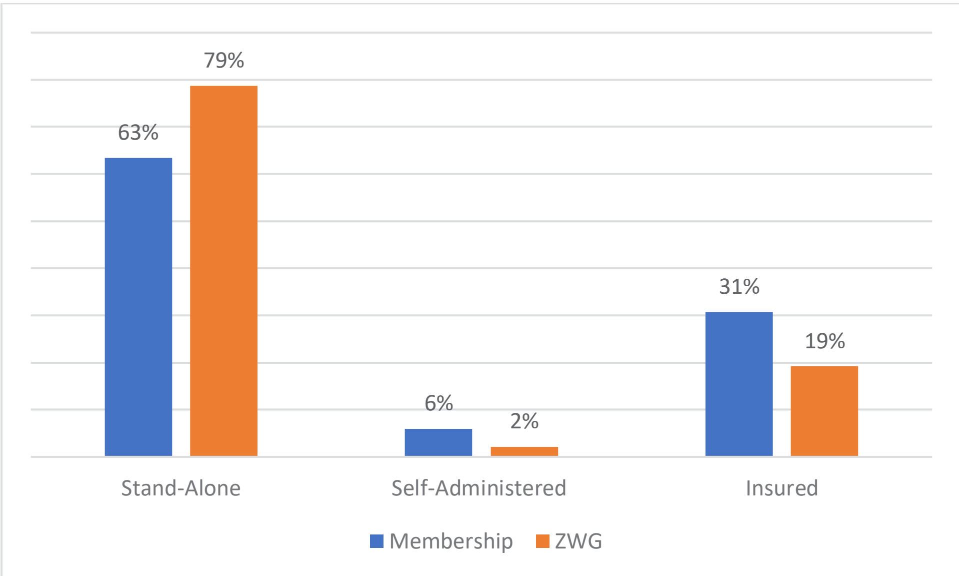
14.7. To reduce the suspended pensioners, the Commission urges administrators to leverage technology and enable pensioners to submit their Life Existence Certificates through mobile apps and web portals. Administrators should also improve their KYC and communication and support systems through holding AGMs, sending reminders to pensioners well in advance through SMS, calls and emails.

15. Non-Resident Pensioners

15.1. During the second quarter of 2025, benefits for non-resident pensioners were equivalent to US$0.55 million (ZWG14.8 million) owed to 3,025 non-resident pensioners. This represents a 16% decrease from 3,612 non-resident members reported in the last quarter.

15.2. The stand-alone model holds the largest share of the amount owed to non-resident pensioners, equivalent to US$0.43 million (ZWG$11.61 million), which represents 79% of the total. This is followed by insured funds at US$0.11 million (ZWG $2.83 million), accounting for 19%, and lastly, self-administered funds at US$0.012 million (ZWG $317.79), representing 2% as shown in the figure below.

Figure 13: Non-Resident Pensioner by Administrators Model



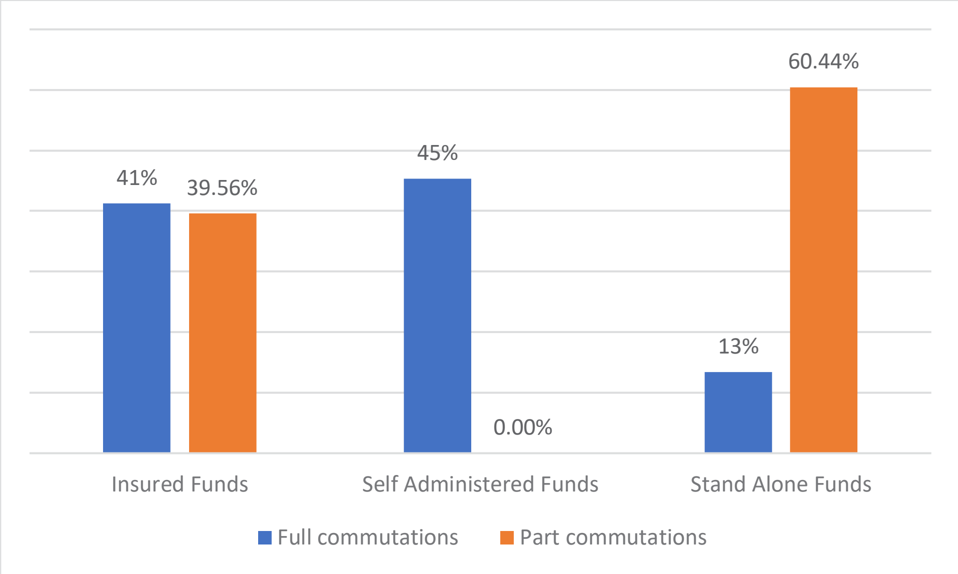
15.3. Most non-resident pensioners were reported under stand-alone funds, which represented 63% of the total non-resident pensioners, followed by insured funds at 31%, while self-administered funds made up 6%.

16. Commutations

16.1. The total amount commuted during the period under review was equivalent to US$3.79 million (ZWG$101.1 million).

16.2. Full commutations constituted the most significant portion of payments, representing 97% of the total commutations and part commutations with 3%. The sector distribution of the commutations by type is shown in the figure below.

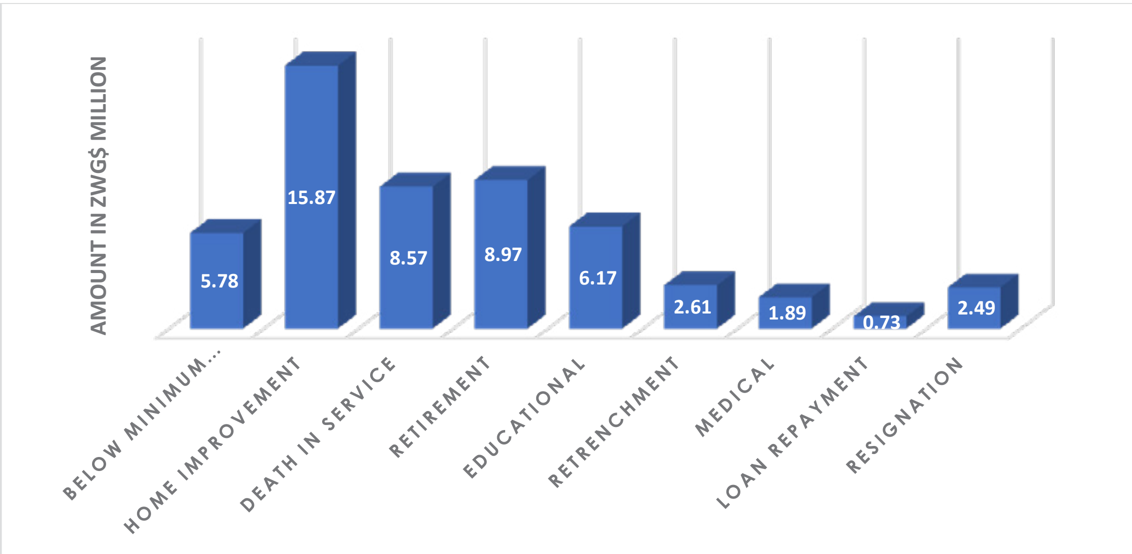
Figure 14: Commutation by Administration Model



Commutations By Purpose

16.3. The main reasons for commutations during the period under review were retirement, retrenchment, and medical fees. The figure below shows the breakdown of commutations by purpose.

Figure 15: Commutations by Type



17. Complaints

17.1. During the six months ended 30 June 2025, the Commission received a total of 118 complaints. Of these, 92 complaints were resolved, while 26 remained outstanding. The following table outlines the resolution status of both complex and non-complex complaints:

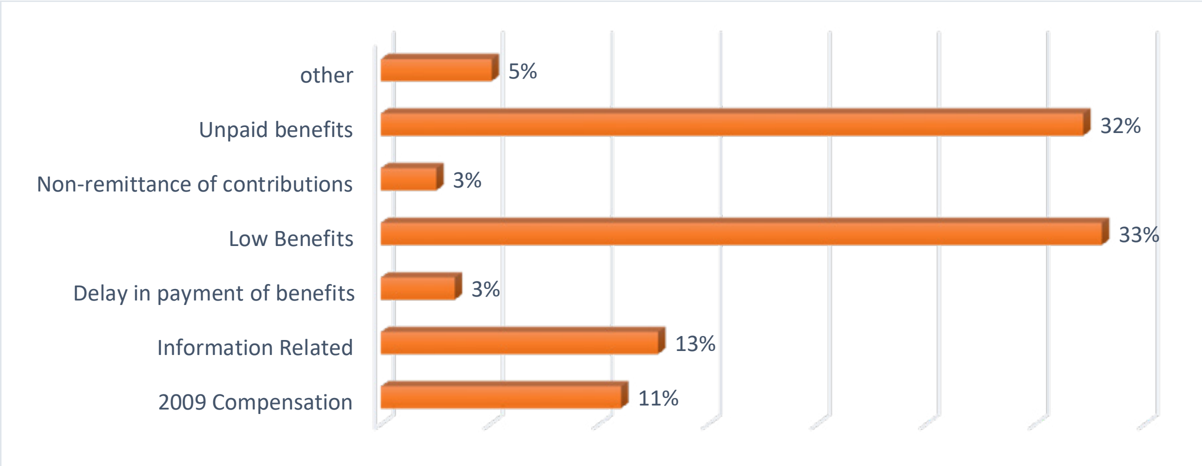
Table 15: Complaints Received, Resolved and Outstanding

Category	Complaints Received	Resolved	Outstanding
Complex	25	5	20
Non-Complex	93	87	6
Total	**118**	**92**	**26**

Nature of Complaints Received

17.2. The figure below shows the nature of complaints received.

Figure 16: Complaints by Nature



17.3. The Commission noted the low benefits paid to members constituted 33% of all complaints received, with unpaid benefits following closely at 32%.

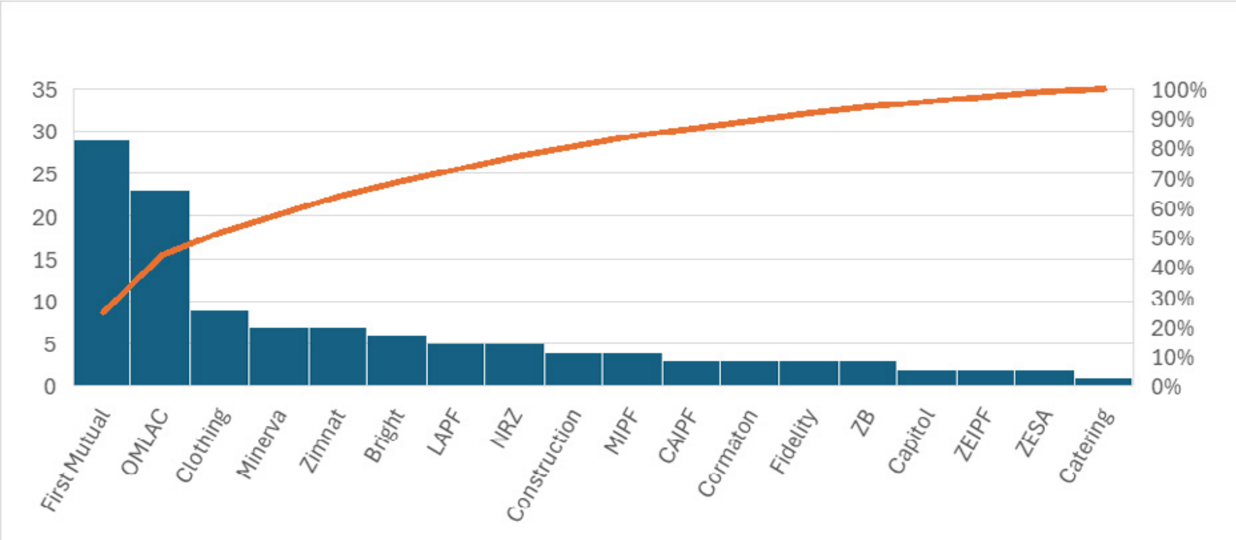
17.4. Additional contributing factors included information-related issues at 13%, concerns regarding 2009 compensation at 11%, and various other matters accounting for 5%. Furthermore, delays in payment and non-remittance each represented 3% of the total complaints.

17.5. A significant portion of the unresolved complex complaints pertained to the 2009 compensation issues. Additionally, some of the unpaid benefits were attributed to the non-remittance of contributions by sponsoring employers and members claiming non-payment of benefits when, in fact, they had been paid.

17.6. The low benefits paid were attributed to low salaries earned by members and the reduced contribution rates by both members and employers, even in light of the currency reforms.

17.7. The Commission is actively engaging the sponsoring employers to address the issue of unremitted contributions to the fund to ensure that members receive the support they are entitled to. The graph below shows the number of complaints received per entity

Figure 17: Complaints by Entity



17.8. In the half-year period ended 30 June 2025, the top three entities with the most complaints were First Mutual, Old Mutual, and the Clothing Industry Pension Fund. Notably, the number of complaints related to Old Mutual Life reflects its significant scale of operations and large customer base.

18. Anti-Money Laundering and Combating the Financing of Terrorism and Proliferation Financing

18.1. Thirteen stand-alone pension funds and three independent fund administrators submitted their Q2 2025 AML/CFT/CPF returns. One entity failed to submit its returns for the period under review and will be subject to penalties for non-compliance.

18.2. Assessment of ML, TF and PF Inherent Risks and Controls

18.2.1. Customer Risk: Three stand-alone pension funds reported identifying high-risk clients, including politically exposed persons (PEPs). Overall, the pensions sector continues to present a relatively low risk of money laundering, primarily due to the direct deduction of contributions from salaries. While simplified customer due diligence (CDD) procedures are generally appropriate, funds must apply enhanced due diligence (EDD) measures for any clients identified as high risk.

18.2.2. Fund Administrators' Responsibilities: Fund administrators managing in-house products such as preservation funds and income drawdown schemes are required to obtain and maintain comprehensive CDD information for all clients. Section 15(1)(b) of the Money Laundering and Proceeds of Crime Act [Chapter 9:24] requires that CDD be conducted for any clients making a transaction of US$5000 and above. It is commendable that several pension funds are conducting CDD on tenants of the fund properties and monitoring transactions; however, pension funds must limit the CDD to those transactions reaching the set threshold.

18.2.3. Record-Keeping Obligations: All pension funds and administrators must ensure that member and pensioner records are accurate, complete, and regularly updated. This is a critical component of ongoing due diligence and compliance with AML/CFT obligations. CDD information is maintained.

18.2.4. Geographic Risk: Two entities reported the presence of clients from domestic jurisdictions identified as high-risk. Although the sector's overall exposure to geographic risk remains low as contributions are direct deductions from payroll, these cases underscore the importance of implementing risk-based monitoring and customer due diligence processes, particularly in cases where regular and or additional voluntary contributions are paid in cash to mitigate ML risk and where there are significant pension payouts for purposes of mitigating TF risks. Four pension funds reported cash contributions during the quarter under review.

18.2.5. Product Risk: Only one pension fund reported receiving additional voluntary contributions (AVCs) beyond the mandatory payroll deductions. The AVCs, however, are also deducted directly from salaries, which helps mitigate money laundering risks.

18.3. Suspicious and Cash Transaction Reports

18.3.1. Pension funds or fund administrators did not submit any suspicious transaction reports (STRs) in the second quarter of 2025. However, three pension funds filed a total of eight Cash Transaction Reports (CTRs), with a combined value of US$40,808. This indicates some level of cash activity within the pension sector; therefore, appropriate due diligence should be carried out for cash clients.

18.3.2. Pension funds and administrators are reminded of their obligation to submit nil returns in the absence of reportable transactions, in line with the requirements set out in the FIU AML/CFT Directive 01/05/2023, issued pursuant to Section 30(6) of the MLPC Act. Adherence to these reporting obligations is critical to maintaining effective monitoring and regulatory oversight.

18.2. The pensions sector continues to pose a low money laundering risk, primarily due to payroll-deducted contributions and structured products. However, appropriate due diligence processes must be implemented for those funds that report cash contribution transactions. Overall compliance practices are improving, with notable progress in policy adoption, training, sanctions screening, and the identification of high-risk clients. Gaps remain, particularly in:

- Risk categorisation of clients,
- Maintaining accurate records,
- Ensuring smaller funds understand and meet their obligations.

18.3. Ongoing implementation of robust, risk-based controls is essential to safeguard the sector and mitigate emerging ML/TF/CPF risks.

19. Conclusion

19.1. The pensions sector is expected to be defined by a stable macroeconomic environment and evolving investment strategies. Key drivers include a projected GDP growth of 6% and relatively low inflation, creating a favourable climate for investment.

19.2. Pension funds are strategically diversifying their portfolios to preserve value against potential economic shocks. A notable trend is the increased allocation to real assets, particularly investment properties, to hedge against inflation. This shift, however, poses a liquidity risk due to the illiquid nature of property.

19.3. The Commission has approved offshore investments of up to 15% of fund values, a move that is expected to see more uptake in the coming months as funds seek to diversify and access US$-denominated returns. Investments in prescribed assets are also on the rise, driven by new acquisitions and revaluation gains, in a bid to meet regulatory requirements.

19.4. Despite the positive outlook, the sector faces challenges such as concentration risk from over-investment in property. Fund managers need to balance capital preservation with liquidity from other investments to ensure they can meet their obligations to members.

20. Annexures

Annexure 1: Consolidated Industry Statement of Comprehensive Income for the Six Months Ended 30 June 2025 - ZWG

	Insured Funds	Self-Administered Funds	Stand-Alone Funds	**Total 30 June 2025**
Income				
Year to date Contributions (Including arrears)	957,006,359	1,513,147,307	1,483,418,679	**3,953,572,345**
