Insurance & Pensions Commission

27 October 2025

Hon. Prof. M. Ncube
Minister of Finance, Economic Development and Investment Promotion
6th Floor Block B
Mgandani Dlodlo Building
Corner Samora Machel Avenue/ Simon Muzenda
Harare

Dear Honorable Minister,

SUBMISSION OF THE 2024 ANNUAL REPORT PRODUCED IN TERMS OF SECTION 53 OF THE PENSIONS AND PROVIDENT FUNDS *[CHAPTER 24:32]*

I have the honor to submit, in terms of section 53 of the Pension and Provident Funds Act *[Chapter 24:32]*, the Commissioner's report for the year ended 31 December 2024. The report has been compiled from returns lodged with the Commission in terms of the Pension and Provident Funds Act *[Chapter 24:32]*.

Yours sincerely

Grace Muradzikwa
COMMISSIONER OF INSURANCE, PENSION AND PROVIDENT FUNDS

Acknowledgements

The Commission would like to thank the Ministry of Finance, Economic Development, and Investment Promotion, as well as the Board and staff, for their contributions and support in regulating and supervising the private occupational pensions industry. Additionally, we appreciate the cooperation and support of the pensions industry in the production of this report.

1. Disclaimer

i. This report has been prepared by the Insurance and Pensions Commission (IPEC) solely for informational purposes of the pension sector stakeholders. It may not be reproduced, redistributed, communicated to a third party, or relied upon by any other person for any other purpose without the Commission's prior written consent.

ii. The Commission does not accept any liability if this report is used for any purposes other than the above-mentioned intended purpose.

iii. This report relates to the operations of private occupational pension funds and pension fund administrators that submitted their 31 December 2024 audited financial statements to IPEC.

iv. Ecomed and Econet Preservation had not submitted their audited reports by the date this report was produced. Twenty entities were exempt from submitting the 2024 reports.

v. The statistics in this report were based on the International Accounting Standard 26 (IAS 26)-Accounting and Reporting by Retirement Benefit Plans.

vi. All ZWG amounts are expressed in nominal terms, except where specifically stated to be in real terms.

vii. All monetary figures are in ZWG unless stated otherwise.

viii. The conversion of ZWG income and expenses was done using the average exchange rate of ZWG18.0133 for the year, and the assets and liabilities were converted to United States Dollars (US$) using the closing interbank rate of ZWG25.7985.

ix. Apart from the foreign currency business section, the amounts in this report are presented as US dollar equivalents, meaning they are not purely in US$.

What is the Insurance and Pensions Commission?

The Insurance and Pensions Commission (IPEC) is an independent statutory body established in terms of the Insurance and Pensions Commission Act [Chapter 24:21] with a mandate to regulate and supervise the insurance and private pension funds activities in Zimbabwe.

Vision

A safe, vibrant and sustainable insurance and pensions industry by 2025.

Mission

To regulate, supervise and develop the insurance and pensions industry for the protection of policyholders and pension scheme members through regulatory excellence.

Core Values

The organisational culture at IPEC is shaped by the following shared core values:

i. **Professionalism:** We are professional in the way we conduct ourselves and carry out our business.

ii. **Accountability**: We shall endeavour to conduct ourselves and operate business transparently while exercising prudence in the use of public resources entrusted to IPEC.

iii. **Fairness:** We shall develop and apply rules, regulations and procedures equitably among all clients and stakeholders.

iv. **Integrity:** We are fair, ethical and honest in our dealings with all our stakeholders, we apply agreed policies equally to all and maintain the highest personal, professional and ethical conduct.

v. **Excellence:** We are exemplary in the way we do our business. We strive to exceed expectations by upholding the utmost quality standards in carrying out our work. The Commissioner and all staff have a unity of purpose in the core values that they each uphold, as individuals and as a team.

2. Terms of Reference

The following Acts and their respective regulations guide the activities of the Commission:
- Insurance and Pensions Commission Act [Chapter 24:21]
- Pension and Provident Funds Act [Chapter 24:32]
- Insurance Act [Chapter 24:07]
- Money Laundering and Proceeds of Crime Act [Chapter 09:24]
- Finance Act [Chapter 23:04]
- Exchange Control Act [Chapter 22:05]
- Income Tax Act [Chapter 23:06]
- Administration of Estates Act [Chapter 6:01]
- Public Entities and Corporate Governance Act [Chapter 10:31]
- Public Finance Management Act [Chapter 22:19]
- Public Procurement and Disposal of Public Assets Act [Chapter 22:23]

IPEC's Programmes and Outcomes

Programme	Weight	Outcomes	Weight
Policy and Governance	20%	Improved Organisational Performance & Image	20%
Industry Regulation, Supervision and Protection	70%	Improved Pension and Insurance Benefits	10%
		Improved Industry Compliance	30%
		Improved Industry and Soundness & Resilience	30%
Industry Development	10%	Increased Industry Growth	10%

3. Definition of Terms

Insured Fund – These are funds whose contributions are used to purchase assets, which are registered in the name of the insurer managing the fund, not the pension fund itself. Self-Administered Funds – For this report, self-administered funds are those pension funds managed by fund administrators or insurers, with their assets registered in the respective names of the funds.

Stand-Alone Funds – These are self-managed funds that own and oversee their own administrative structures, employing their own staff for fund management.

Inactive Fund – A fund that is not receiving contributions from the sponsoring employer(s) and/or members of the fund or a fund that is in paid-up status or undergoing dissolution.

Active Member – A member who actively contributes in accordance with the fund rules, including those on an agreed contribution holiday.

Beneficiary – A person other than a contributing member of a fund who is entitled, in accordance with the fund's rules, to receive benefits from the fund upon the occurrence of a specific event and whose entitlement arises due to a relationship with the contributing member.

Deferred Pensioner – A member who is no longer eligible to make contributions to the fund on account of having left the employment of the participating employer(s) or who has ceased contributing to the fund before the date of entitlement to benefits specified in the rules of the fund and whose benefits are preserved within the fund until the member attains the retirement age.

Members with Unclaimed Benefits – Members of a fund who have not claimed their benefits when they were entitled to receive such benefits and cannot be located by the fund.

Pensioner – A person receiving pension benefits from a pension fund.

Pension Fund Member – in relation to a fund, means any person who is a member of that fund in terms of the rules thereof.

Suspended Pensioner – A pensioner whose pension benefits are withheld by the pension fund on account of not providing proof of existence.

Surplus/Deficit – For this report, it indicates that the fund has more assets than liabilities, and vice versa for a deficit.

Contribution Arrears – these are contributions which have fallen due to the fund but have not yet been remitted by the sponsoring employer.

4. Executive Summary

4.1. A total of 967 private occupational pension schemes were reported as at 31 December 2024, against 965 reported in the prior year. The marginal net increase was attributable to new registrations, mergers and dissolutions which occurred during the year.

4.2. The funds were administered under eight life assurers, five independent fund administrators and 14 in-house administrators of stand-alone pension funds.

4.3. Fund membership, excluding beneficiaries, increased by 4% to 977,423 from the 940,712 reported as at 31 December 2023.

4.4. The increase in principal members mainly resulted from new entrants under the recently registered schemes.

4.5. As at 31 December 2024, the number of beneficiaries declined to 23,428 from 26,597 in 2023. Consequently, the total industry membership, including beneficiaries, reached 1,000,851.

4.6. The total industry membership, excluding beneficiaries, translated to a pension coverage ratio of 24% of Zimbabwe's estimated workforce[1] of 4 million as at 31 December 2024.

4.7. The pensions industry asset base was valued at US$2.54 billion (ZWG65.53 billion) for 2024, compared to US$2.65 billion reported in 2023. The decline was due to exchange rate fluctuations. The US dollar equivalents were calculated using the closing rates for the respective periods.

4.8. Ecomed, Evolution Pension Fund and Econet Preservation had not submitted their audited reports by the time this report was produced, and twenty entities were exempt from submitting the 2024 reports because they were either troubled or awaiting dissolution.

4.9. The industry asset base of US$2.54 billion translates to average assets per member of US$2,599 in US$ terms. In 2023, the average assets per member were US$2,821.

[1] https://www.zimstat.co.zw/wp-content/uploads/Macro/Labor-force/2024_Third_Quarter_QLFS_Report.pdf - Fourth Quarter Data not available.

4.10. Pension penetration, defined as the percentage of industry assets relative to the country's estimated GDP[2], was 7.96% as of 31 December 2024, down from 10.06% on 31 December 2023. The change in the pension penetration was attributed to the rebasing of the GDP that was done by Zimstats.

4.11. Total income was equivalent to US$2.41 billion (ZWG43.50 billion), mainly driven by revaluation gains, which constituted 58% of the industry's total revenue.

4.12. Total expenditure for the period under review was US$734 million (ZWG 13.22 billion). Of this, 68% was incurred towards pension benefits.

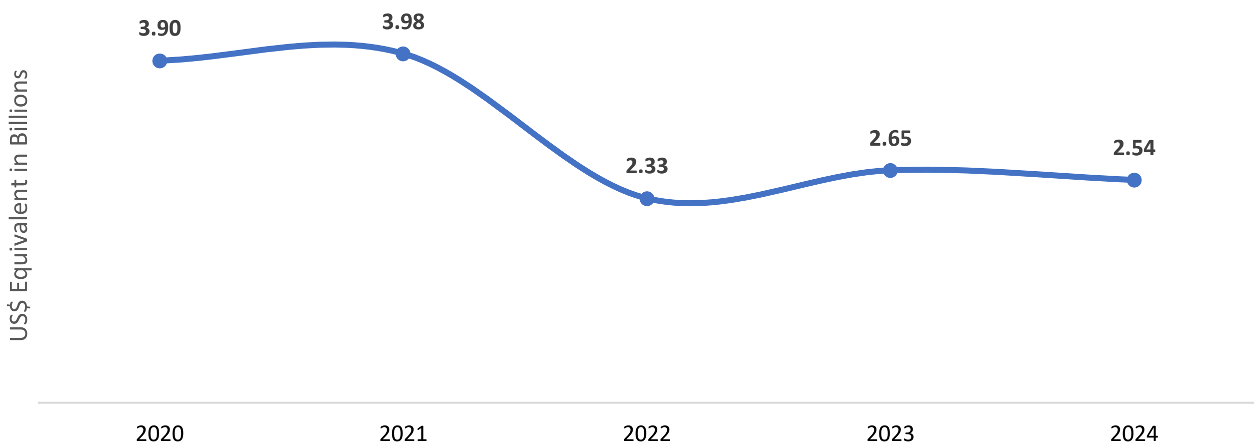
Five-Year Asset Trend



5. Overview of the Macro-Economic Environment

5.1. December 2024 saw the economy experiencing inflation and exchange rate stability. This stability was attributed to the Reserve Bank of Zimbabwe's tight monetary policy stance, which was maintained during the quarter and included upward reviews of the Bank Policy Rate and statutory reserve requirements.

5.2. Greater exchange rate flexibility in the interbank market, anchored by tight monetary conditions, also contributed. Strategic foreign exchange interventions by the Reserve Bank helped clear the market and ensured smooth foreign exchange flow.

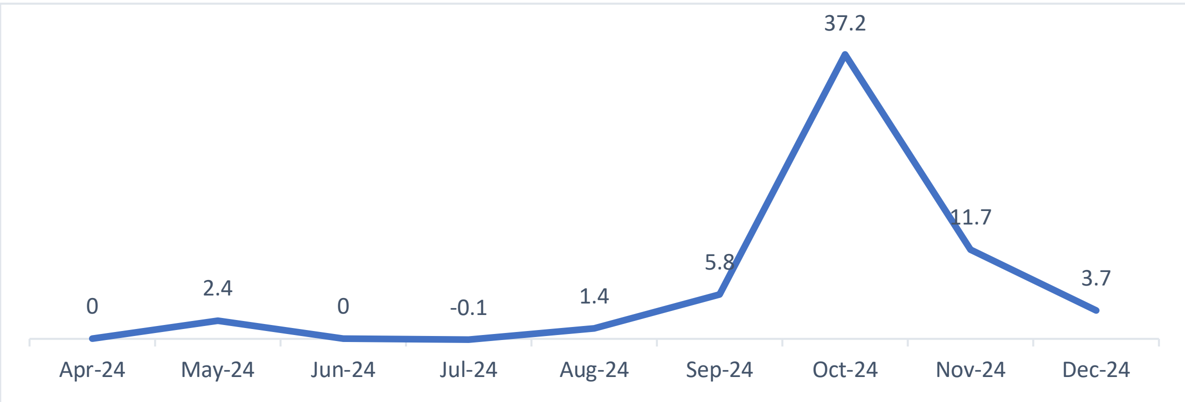
5.3. However, this tight monetary policy led to some temporary liquidity challenges, which the Reserve Bank addressed through an intra-day facility for banks and planned disbursements under the Targeted Finance Facility (TFF).

Inflation Developments:

5.4. The monthly ZWG inflation moderated in December 2024 due to tight monetary conditions.

5.5. The data below showed a downward trend in inflation.

Figure 1: Inflation Rate (% Monthly)



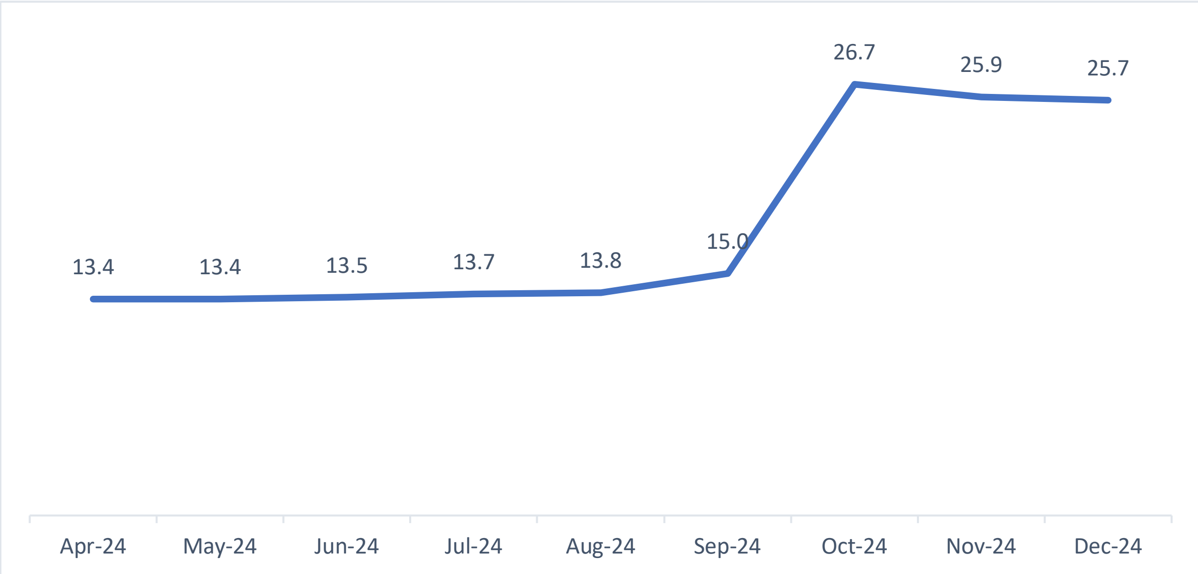
Source: RBZ

Exchange Rate Developments:

5.6. The stability of the exchange rate was reflected in the narrowing of exchange rate premiums. The Reserve Bank deepened the Willing Buyer, Willing Seller (WBWS) principle for the foreign exchange interbank market to enhance price discovery and market efficiency.

5.7. The figure below shows the data.

Figure 2: Exchange Rates in 2024



Source: RBZ

Stock Market Development

(a) Zimbabwe Stock Exchange (ZSE)

5.8. The introduction of the ZWG currency in 2024 significantly influenced the Zimbabwe Stock Exchange (ZSE) performance between April and December 2024, resulting in these key trends:

- **Market Capitalisation:** The market capitalisation of the ZSE increased steadily from ZIG28.6 billion in April to ZWG66. 24 billion in December 2024.
- **Turnover:** The turnover on the ZSE also showed significant growth, from ZWG16.6 million in April to ZWG225.4 million in December 2024.
- **All-Share Index:** The All-Share Index, a key indicator of overall market performance, experienced a period of growth followed by a decline. The data indicated significant volatility in the ZSE All-Share Index during the period from April to December 2024.

(b) The Victoria Falls Stock Exchange Market (VFEX)

Information on specific VFEX performance in Q4 2024 is provided below as follows:

- **Market Capitalisation:** The market capitalisation of the VFEX increased from US$1.207 billion in December 2023 to US$1.279 billion in December 2024.
- **Turnover:** The turnover on the VFEX also showed significant growth, from US$4.821 million in December 2023 to US$19.704 million in December 2024.

6. Regulatory Developments

6.1. A total of nine fund applications were received for registration during the year. Of these, five were fully registered, with two undergoing name changes, and two did not submit complete information to the Commission to enable registration. The list of funds that were fully registered during the year under review is shown in the table below.

Table 1: Fully Registered Funds

Name of Fund	Administrator	Application Description	Registration Date
Bubi RDC Provident Fund	Old Mutual	Full Fund	19 February 2024
Contact Family Counselling Centre Provident Fund	Old Mutual	Full Fund	14 February 2024
Donhodzo Micro Pension Fund	Comarton	Full Fund	12 June 2024
Medical and Allied Industry Pension and Provident Fund	First Mutual	Full Fund	27 September 2024
Africa University Provident Fund	Old Mutual	Full Fund	18 December 2024

7. Capacitation of the Industry

7.1. The following regulatory Circulars were issued in 2024.

Table 2: Circulars Issued During the Year

Circular	Issue date	Content
Circular 1 of 2024	25 January 2024	Sectoral risk assessment to inform Zimbabwe's 3rd money laundering national risk assessment.
Circular 2 of 2024	30 January 2024	Actuarial Society of Zimbabwe Guidance note for S.I. 162 of 2024.
Circular 8 of 2024	10 May 2024	Guideline on 2024 Currency Changes.
Circular 10 of 2024	17 June 2024	IPEC AML/CFT/CPF Industry Training Calendar.

Circular	Issue date	Content
Circular 11 of 2024	27 June 2024	Amendments to Circular 8 - Guideline on 2024 Currency Changes.
Circular 12 of 2024	02 July 2024	Guideline for Funds on Conducting Annual General Meetings.
Circular 13 of 2024	12 July 2024	Financial Intelligence Unit Directive on High-Risk Jurisdictions and Countries under Increased Monitoring for Terrorist Financing and Proliferation Financing of Weapons of Mass Destruction.
Circular 14 of 2024	05 September 2024	Financial Intelligence Unit Directive on Implementation of Targeted Financial Sanctions.
Circular 15 of 2024	12 November 2024	Standard for the Establishment and Registration of Pension and Provident Funds.
Circular 16 of 2024	24 October 2024	Financial Intelligence Unit Directive on Civil and Administrative Penalties on Infringement of the Money Laundering and Proceeds of Crime (MLPC) Act.
Circular 17 of 2024	12 November 2024	Call to Update Institutional Risk Assessments.
Circular 18 of 2024	27 November 2024	Insurance and Pensions Commission Transition to Risk-Based Supervision.
Circular 19 of 2024	27 November 2024	Amendment to the Risk Management and Corporate Governance Guideline for Pension Funds.

Circular	Issue date	Content
Circular 20 of 2024	14 November 2024	Amendments to the Treating Customers Fairly Framework.
Circular 21 of 2024	21 November 2024	Invitation to Participate in Digital Transformation Assessment.
Circular 22 of 2024	18 November 2024	Registration of Financial Statements Preparers with the Public Accountants and Auditors Board.
Circular 23 of 2024	12 December 2024	Implementation Plan for the Zimbabwe Mortality Tables: Key requirements and timelines.
Circular 24 of 2024	12 December 2024	Zimbabwe Integrating Capital and Risk Programme (ZICARP) Reporting Requirements.
Circular 26 of 2024	12 December 2024	Issuance of a Draft Market Conduct Framework for the Insurance and Pension Industry.

8. Architecture of the Pensions Industry

8.1. There were 967 registered occupational pension funds as at 31 December 2024, compared to 965 funds as at 31 December 2023. Of these 967 funds, 489 were active, representing 50.6% of the industry's funds. The remaining 478 funds were either inactive, having been paid up or undergoing dissolution.

8.2. The table below shows the total number of funds and membership across the three pension fund administration models.

Table 3: Pension Fund and Membership Statistics

	Number of Pension Funds as at 31 December…		Total Membership as at 31 December…	
Administration Model	**2024**	**2023**	**2024**	**2023**
Insured	799	800	368,941	365,877
Self- Administered	154	151	166,569	156,614
Stand-Alone	14	14	441,913	418,221
Total	**967**	**965**	**977,423**	**940,712**

Note: The membership in the table above does not include beneficiaries.

Membership

8.3. Membership increased by 1.05%, taking the total number of principal members in the pensions sector to 977,423 as at 31 December 2024. This increase was driven by new entrants reported across all administrators during the review period.

8.4. The breakdown of membership as at 31 December 2024 and 31 December 2023 is shown in the table below.

Table 4: Membership Breakdown

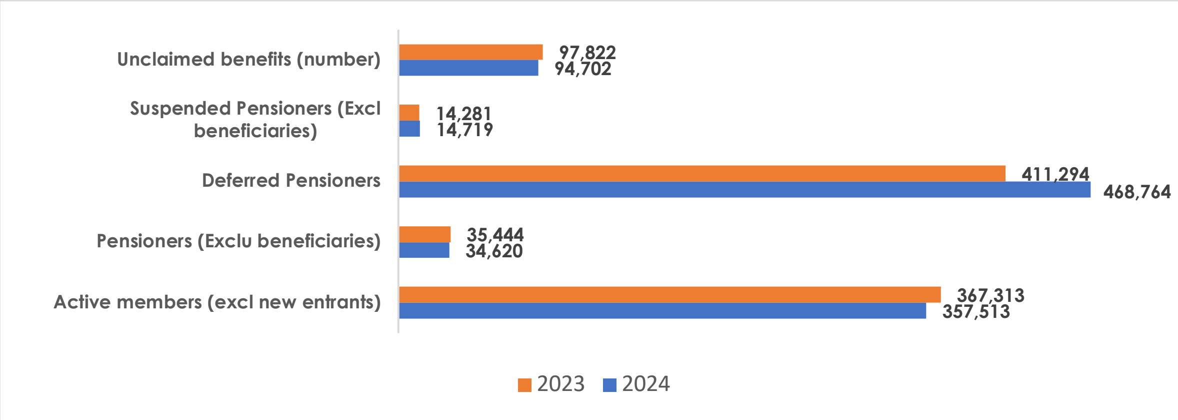
Membership Class	Membership as at 31 December…	
	2024	**2023**
New Entrants	7,105	14,558
Active members (excluding new entrants)	357,513	367,313
Pensioners (Excluding beneficiaries)	34,620	35,444
Deferred Pensioners	468,764	411,294
Suspended Pensioners (Excluding beneficiaries)	14,719	14,281
Unclaimed benefits (number)	94,702	97,822
Total Members, excluding beneficiaries	**977,423**	**940,712**
Total Number of beneficiaries	23,428	26,597
Total members, including beneficiaries	**1,000,851**	**967,309**

8.5. Members with unclaimed benefits fell from 97,822 to 94,702 during the review period. This decrease was mainly due to the strategic transfer of members' unclaimed benefits to the Guardian Fund, thereby encouraging more transparent fund management.

8.6. The Commission continues to remind the industry to surrender unclaimed benefits that are over five years to the Guardian Fund as mandated by the Estate Administration Act [Chapter 6:01] under the Master of the High Court.

8.7. Pensioners receiving benefits constituted 4% of the total industry membership, as shown in the distribution of membership by status as at 31 December 2024, as shown in the figure below.

Figure 3: Distribution by Membership Status



9. Key Performance Indicators

9.1. The key performance indicators of the industry are shown in the table below.

Table 5: Key Industry Performance Highlights

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Funds	Total 2024
Number of Funds	799	154	14	967
Members excl. beneficiaries	368,941	166,569	441,913	977,423
Total Income (in ZWG millions)	6,148.35	13,905.37	23,447.49	43,501.21
Employer/ Employee Contributions (in ZWG millions)	813.98	1,630.23	1,628.51	4,072.71
Contributions / Total Income	13.24%	11.72%	6.95%	9.36%
Rental Income (in ZWG millions)	261.03	159.67	596.23	1,016.94

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Funds	Total 2024
Investment Income (in ZWG millions)	5,155.98	14,734.39	21,240.18	41,130.55
Investment Income over Total Assets	28%	76.33%	76.91%	62.77%
Total Expenditure (in ZWG millions)	783.79	2,027.98	10,408.01	13,219.78
Total Benefits Incurred (in ZWG millions)	492.07	962.19	7,589.43	9,043.69
Total Benefits per Pensioner (in ZWG)	42,343	100,689	265,848	408,881
Expenses/ Contributions Received	3.88%	1.58%	60.91%	18.58%
Expenses/ Total Assets (inactive and mature funds)	0.35%	0.57%	12.16%	6.34%
Administrative Expenses (in ZWG millions)	127.90	940.07	2,332.98	3,400.95
Expenses/ Total Income	2%	7%	10%	8%
Increase/ Decrease in Net Assets (in ZWG millions)	5,364.57	11,877.39	13,039.48	30,281.44
Total Assets (in ZWG millions)	18,605.29	19,302.81	27,617.65	65,525.75
Percentage of Total Assets	28.39%	29.46%	42.15%	100.00%
Prescribed Assets (in ZWG millions)	2,146.30	3,041.86	1,549.60	6,737.75
Prescribed Assets Ratio	11.54%	15.76%	5.61%	10.28%
Contribution Arrears (in ZWG millions)	124.93	413.48	1,239.39	1,777.80

10. Assets

10.1. The industry had an asset base of US$2.54 billion (ZWG65.53 billion) as at 31 December 2024.

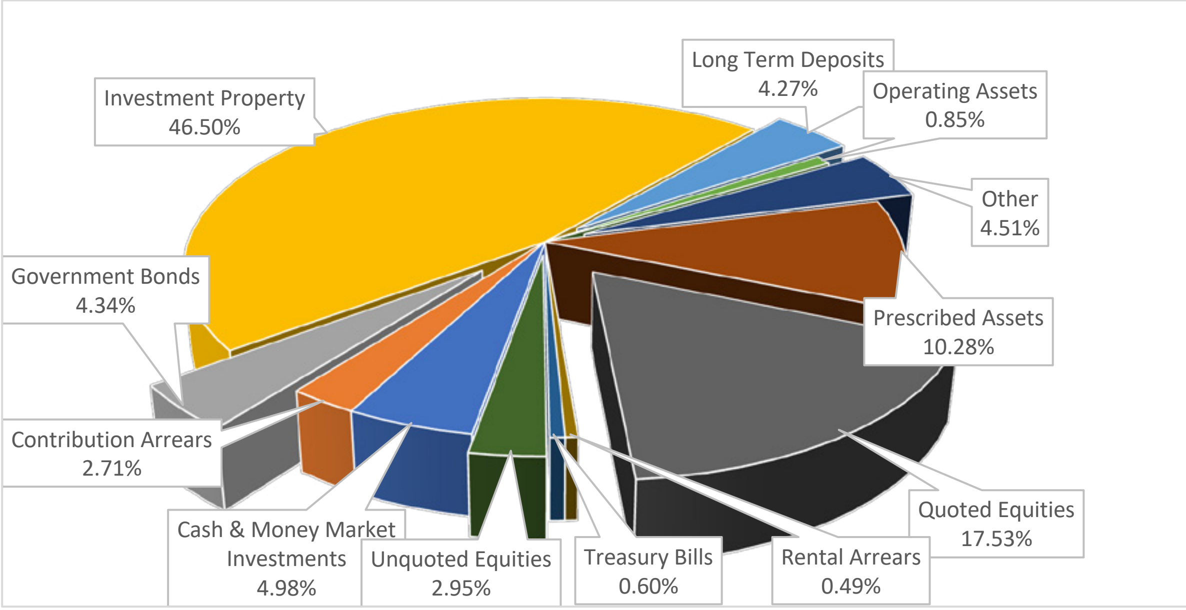
10.2. The industry experienced a 4.15% decrease in assets from the previous year's total of US$2.65 billion. This decline was due to exchange rate fluctuations, which have affected asset valuations.

10.3. Ecomed, Evolution Pension Fund and Econet Preservation had not submitted audited financial statements at the time the report was drafted, and twenty pension funds were exempt from submitting their 2024 audited financial statements because they were troubled or awaiting dissolution. Non-compliant entities faced regulatory sanctions.

10.4. The total industry's asset base translated to a penetration ratio of 7.96% of the GDP compared to 10.06% reported in the previous year. This decline was due to the rebasing exercise conducted by Zimstats on the GDP.

10.5. The total assets of the industry were invested as depicted in the figure below.

Figure 4: Distribution of Industry Assets



10.6. Pension industry assets were heavily concentrated in two primary classes: investment property and quoted equities, indicating the industry's strategic focus, while also raising concerns about diversification and risk exposure.

10.7. Investments in quoted equities amounted to US$445.12 million (ZWG11.48 billion), reflecting an increase of 4.52% from US$425.89 million reported at the same time last year. Quoted equities accounted for 17.53% of total assets, a slight increase from 16% reported on 31 December 2023.

10.8. Property investments - including property-linked units (REITS) - which were valued at US$1.18 billion, experienced a more notable decline, falling from 56% to 46.50% of total assets. Investment properties were valued at equivalent US$1.50 billion.

10.9. Contribution arrears for the year ending 31 December 2024 were US$68.91 million (ZWG1.78 billion), accounting for 2.71% of the industry's total asset base, up from 2.63% reported in the previous year. This increase reflects the persistent difficulties that fund sponsors face in making timely contributions.

10.10. Arrears relating to Stand-alone funds made up the largest share of the industry's arrears, reaching US$48.04 million (ZWG 1.24 billion). This represented a slight drop of 0.6 % points from the 70.6% reported the previous year. The Commission encouraged funds to stick to their established payment plans.

10.11. In response to the increase in contribution arrears, the Commission engaged defaulting employers, in line with Section 16 of the Pensions and Provident Funds Act [Chapter 24:32], before invoking garnishing powers.

10.12. As at 31 December 2024, the prescribed asset investments stood at US$261.2 million (ZWG6.74 billion), representing a ratio of 10.28% of total assets, up from 7.8% in the previous year. Although there was an improvement, the compliance level was still substantially below the regulatory minimum of 20%. The increase in prescribed asset investments was also due to fair value gains in gold-backed instruments with prescribed asset status. To meet the minimum threshold, the industry must invest in a wide array of assets that have conferred prescribed asset status.

10.13. The industry had invested in 1,972 coins of various denominations worth US$5.24 million (ZWG134.73 million) as at 31 December 2024. This was a decrease of 1.52% from 1,995 coins reported on 31 December 2023. Gold coin investments provide an alternative store of value for pension funds.

10.14. The table below shows the industry's investment in gold coins.

Table 6: Gold Coin Investments

Denomination	Total
0.1 Oz	20
0.25 Oz	33
0.5 Oz	46
1 Oz	1,873
Denomination	**Total**
Number of Coins	**1,972**
Value of Gold Coins (ZWG billions)	**134.73**

10.15. The industry also invested in 12.92 million milligrams of gold-backed digital tokens, which were valued at US$1.14 million (ZWG5.69 million) at 31 December 2024.

Table 7: Gold-Backed Digital Tokens

	Value (ZWG millions)	Tokens held (MG in millions)
Total	**5.69**	**12.92**

10.16. The following instruments were accorded prescribed asset status during the review period.

Table 8: Approved Prescribed Assets & Industry Uptake During the Year 2024

10.17. Despite the increase in available prescribed assets, the industry's investment stayed below the 20% minimum threshold. This shortfall mainly results from the perceived lower returns of these assets compared to the more resilient performance of equities and investment properties. Contributing factors also include limited net investible income and the time-consuming nature of switching assets. The Commission continues to promote investments across a broad range of assets that have been granted a prescribed asset status.

11. Liabilities

11.1. Liabilities totalled US$2.6 billion (ZWG$67.02 billion) as at 31 December 2024, with reserves and liabilities due to members amounting to US$2.51 billion (ZW$64.68 billion), equivalent to 96.51% of the total liabilities.

11.2. There was an increase in unclaimed benefits, from US$8.9 million to US$9.07 million (ZWG234 million). This increase was mainly due to the revaluation of supporting assets. Funds were urged to comply with regulations and transfer any unclaimed benefits that have been held for more than five years to the Guardian Fund as stipulated in the Administration of Estates Act.

11.3. As at 31 December 2024, the industry had outstanding pension benefits of US$111 million (ZWL$2.86 billion), with 98% of these benefits being held by insured pension funds.

12. Earnings

12.1. Total income for the year was US$2.41 billion (ZWG43.50 billion), representing a decrease of 41% over the US$4.1 billion reported the previous year.

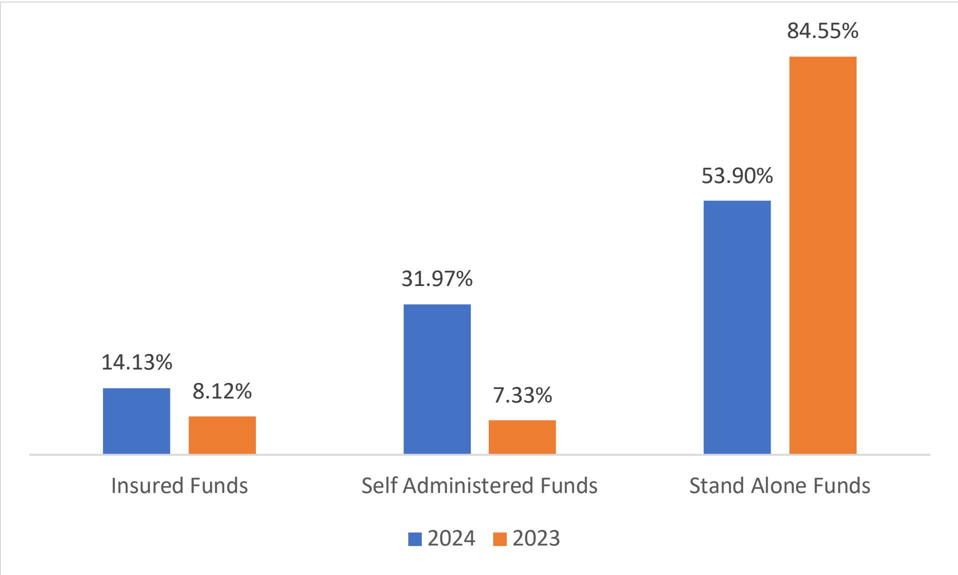
12.2. The primary source of income was from investment activities, which accounted for 94.55% of total revenue. Within the investment activities, there were fair value adjustments equivalent to 53%, representing unrealised income.

12.3. Revenue generated from membership activities was US$268.36 million (ZWG4.83 billion) against related membership expenditure of US$502.1

million (ZWG9 billion), resulting in a loss of US$233.7 million (ZWG4.21 billion) on membership activities.

12.4. US$156.64 million, 58%, of revenue from membership activities was received as cash in 2024.

Figure 5: Total Income by Administration model for the Years 2024 and 2023

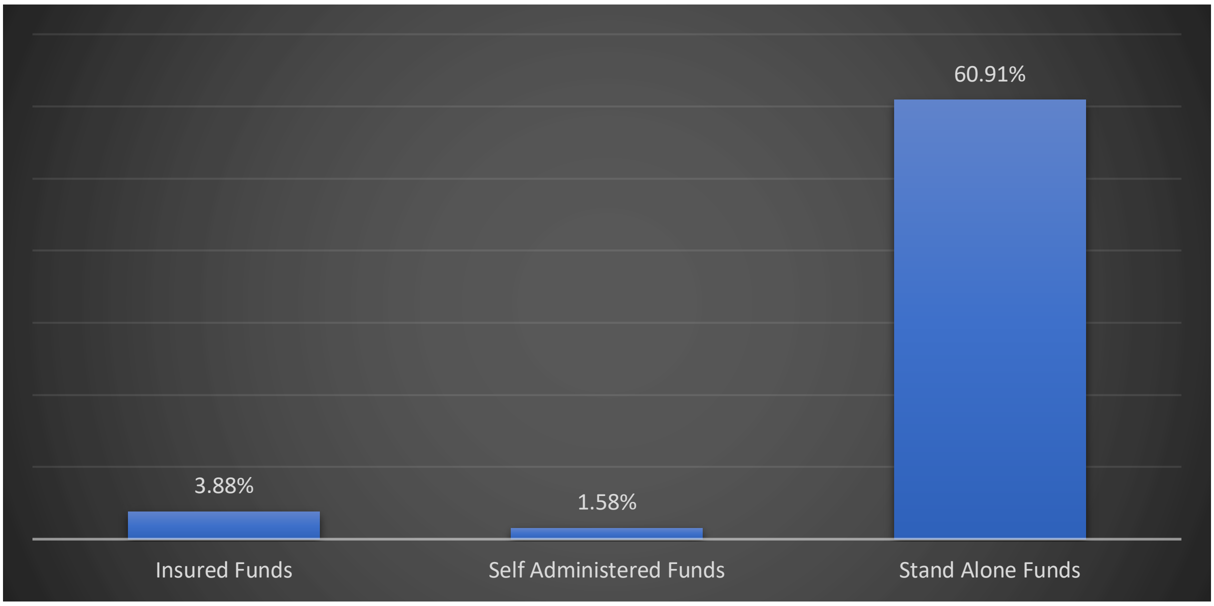


12.5. Standalone funds, characterised by a small number of large funds, achieved the highest income performance. Self-administered funds followed this performance. Standalone funds contributed 53.90% of the total industry income, while insured and self-administered funds contributed 14.13% and 31.97%, respectively.

12.6. Total expenditure excluding benefits amounted to US$231.84 million (ZWG4.18 billion), from US$34.8 million reported in 2023. The major driver of expenditure was administrative expenses, which amounted to US$188.80 million (ZWG3.4 billion). The Stand-alone sector contributed the highest figure of total spending within the industry, with 79%, compared to the self-administered and insured sectors, which reported 15% and 6%, respectively.

12.7. The ratio of administration expenses to income is shown in the graph below.

Figure 6: Administration Expenses to Contributions



12.8. Of the total other expenses, administration expenses were the highest with 47%, other expenses 36% and 8% for staff costs. Industry is being reminded to disclose what "other" expenses are in the audited financial statements.

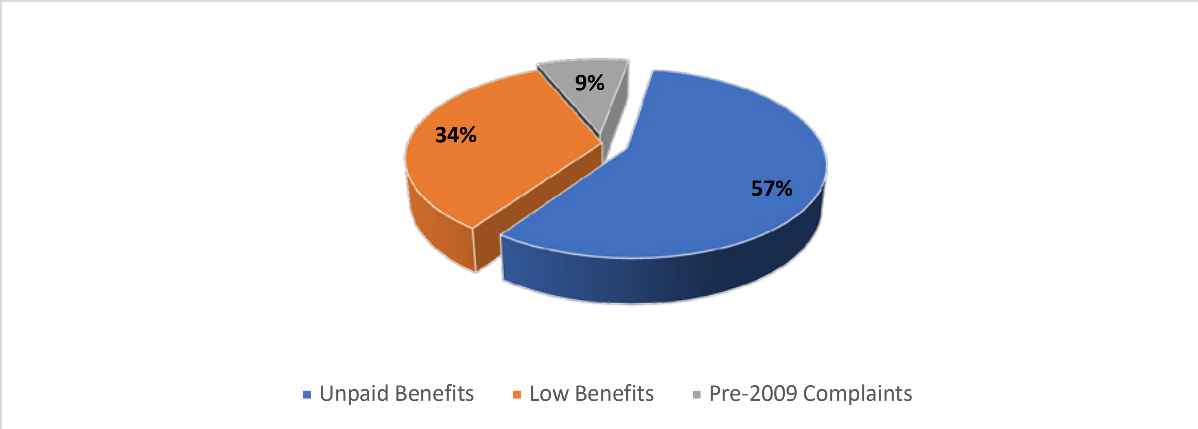
12.9. The Commission continues to monitor these ratios to ensure compliance with the Expense Framework.

13. Complaints Handling

13.1. In 2024, the Commission received a total of 343 complaints. Of these, 271 were successfully resolved, resulting in a robust overall resolution rate of approximately 79% for the year. The remaining 72 complaints, which are 21%, were carried forward.

13.2. The nature of the complaints brought to the Commission primarily related to three categories, unpaid Benefits, low Benefits and Pre-2009 Compensation Issues, as shown in the figure below.

Figure 7: Complaints by Nature

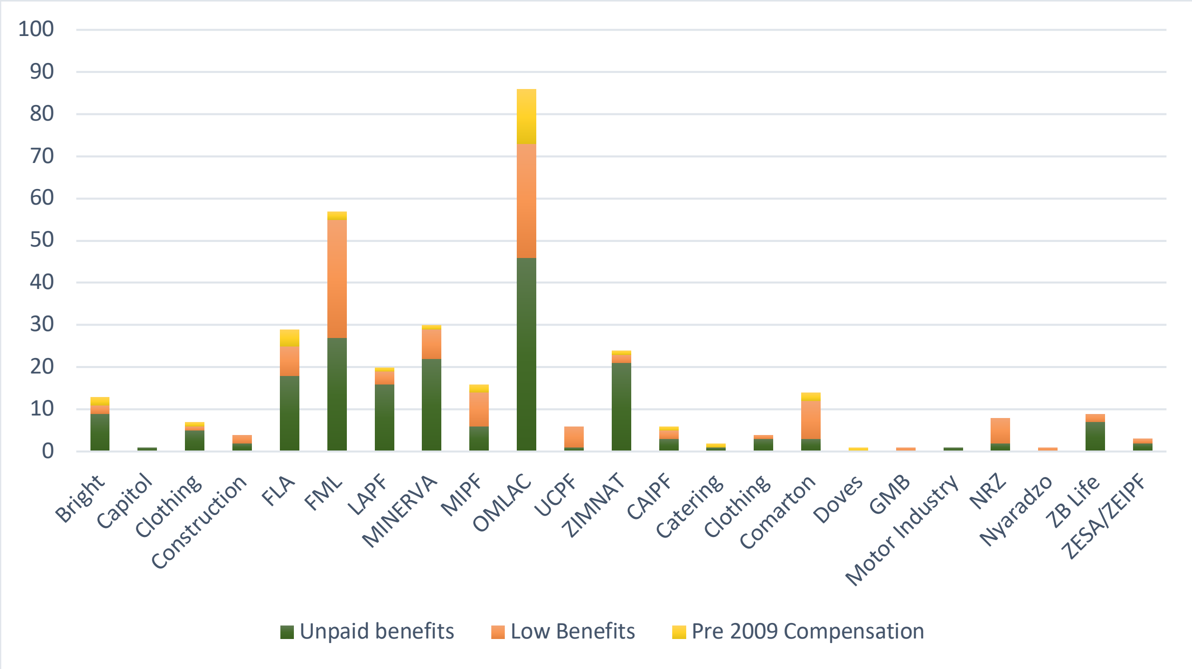


13.3. The greater proportion of complaints received for the year (191 cases) related to unpaid benefits. Of these, 111 complaints involved two specific Life Assurers, OMLAC and FML.

13.4. The high number of unpaid benefits complaints was primarily attributed to systemic issues, including a lack of claimant knowledge regarding claims processes, non-submission of certificates of existence, unfunded pension liabilities, and delays by administrators in processing correctly submitted pension benefit claims.

13.5. The distribution of complaints across various entities is detailed in the figure below.

Figure 8: Complaints by Entity



13.6. All 72 unresolved complaints for 2024 were classified as complex. These complaints were solely related to pre-2009 compensation queries and 2019 loss of value queries.

13.7. These issues remain difficult to resolve, as the relevant industry stakeholders have not yet finalised the comprehensive compensation exercise related to both the pre-2009 and 2019 losses. The Commission is making every effort to resolve the pre-2009 compensation matters and is actively collaborating with relevant entities and the government.

14. Challenges in the Pensions Industry

14.1. The Impact of Economic Volatility

The Commission has observed how periods of hyperinflation and currency instability have tragically eroded the value of pension savings. This has led to a heartbreaking situation where the retirement benefits received by pensioners are often inadequate to meet their basic needs. The constant challenge of preserving the real value of contributions in a volatile currency environment is the single greatest obstacle facing the industry. The Commission was encouraged by the inflation and exchange rate that were witnessed at the end of 2024.

14.2. Inadequate Pension Benefits

The most evident and distressing challenge is the inadequacy of benefits paid to pensioners. Due to a combination of factors, especially the ongoing impacts of inflation and currency depreciation, the value of decades of contributions has diminished. This has led to a situation where benefits fall short of reasonable expectations, and many pensioners struggle to afford essentials. The Commission continues its efforts to restore confidence in the sector by participating in various forums, promoting investments in value-preserving assets, enabling offshore investments, and overseeing expenses through the Expense Framework to ensure more funds benefit members.

14.3. Contributions Arrears

IPEC has noted that many employers, in a challenging economic climate, struggle to consistently remit pension contributions. This not only weakens the financial position of the funds but also creates a significant gap in the retirement savings for pensioners. The Commission continues to engage defaulting sponsoring employers to develop a payment plan for remitting the remaining arrears to the pension fund. Failure to comply will result in the Commission garnishing the bank accounts of the non-compliant entities.

14.4. Declining Contributions

Employers are not reviewing pensionable salaries, which is why pension contributions are declining. The contributions are based on basic wages, but employers aren't adjusting these in line with inflation. Instead, they're paying more in allowances that are not pensionable, resulting in lower contributions to the pension fund and a decline in members' overall contributions.

14.5. Non-compliance with Regulatory Requirements

While a robust regulatory framework is in place, the Commission has observed instances of non-compliance with set rules. This includes failures to submit timely and accurate reports, meet prescribed asset ratios in a meaningful way, and remit contributions on time. Such non-compliance undermines the stability of the entire system. We are therefore continuing to impose stringent regulatory sanctions to ensure immediate and firm enforcement of compliance.

14.6. Lack of Sound Governance on the Board of Funds

It has been noted that some boards of fund members lack the necessary specialised skills, experience, and independence to effectively manage millions of dollars in assets on behalf of their members. This can lead to suboptimal investment decisions, inefficient management, and a failure to protect the funds from undue influence.

14.7. Lack of Data Integrity

The integrity of member data is paramount to the fairness and accuracy of pension calculations. The Commission has seen a prevalent issue of poor data management, which leads to administrative inefficiencies, a high number of unclaimed benefits, and difficulties in tracing beneficiaries. This not only erodes confidence but also causes unnecessary hardship and delays for pensioners.

14.8. High Licence Fees

The cost of modern and efficient pension administration systems is a significant burden, particularly in the current economic climate. High licence fees for this technology can strain the financial resources of pension funds, diverting funds that could otherwise be used to improve member benefits or reduce administrative costs. This creates a barrier to adopting the very systems needed to improve data integrity and overall efficiency.

14.9. The Strategic Way Forward

For the year ended 2024, the Commission pursued a strategic and comprehensive agenda aimed at stabilising the pensions industry amidst challenging economic conditions. The core focus was to restore public trust, ensure financial resilience, and modernise the sector for the benefit of all pension fund members.

14.9.1. Strengthening Financial and Regulatory Oversight

14.9.1.1. There was a focus on developing a risk-based supervision blueprint to consolidate efforts made over the years. This involved developing dashboards, such as the growth and compliance dashboards, to monitor funds' financial health in real-time, allowing us to identify and address emerging risks before they became systemic.

14.9.1.2. The Commission took a firm stance on non-compliance and was enforcing mandatory regulations, prescribed asset ratios, to ensure funds were invested in a manner that preserved value and contributed to national development.

14.9.1.3. The governance standards were tightened by conducting rigorous "fitness and probity" tests for all new and existing board members and executives. The Commission also instituted mandatory continuous professional development programs to equip fund leadership with the necessary skills to navigate the volatile economic landscape.

14.9.1.4. The Commission embarked on a sector-wide data clean-up initiative to address the widespread problem of poor data integrity. This was a crucial step towards accurately calculating benefits and reducing the high number of unclaimed benefits, which has been a significant source of public distrust.

14.9.1.5. In response to persistent inflationary pressures, the industry was encouraged to invest in value-preserving instruments. This included directing funds towards a broader range of assets, such as gold-backed instruments and real estate investment trusts (REITs), to hedge against currency depreciation.

14.10. **Concluding Remarks**

14.10.1.1. 2024 was a year of deliberate action for the Commission. We focused on building a stronger regulatory environment, promoting better governance, encouraging innovative investments, and, most crucially, rebuilding public trust in the pension system. We believe these measures have laid a solid foundation for the industry's recovery, paving the way for a more secure retirement for all Zimbabweans.
