PENSIONS INDUSTRY REPORT

THIRD QUARTER-ENDED 30 SEPTEMBER 2021

DISCLAIMER

This report, including enclosures and attachments, has been prepared by the Insurance and Pensions Commission (IPEC) solely for informative purposes to the pension industry stakeholders, and may not be reproduced, redistributed, communicated to a third party or relied upon by any other person for any other purpose without the Commission's prior written consent. The Commission does not accept any liability, if this report is used for any other purposes other than the above-mentioned intended purpose.

This report highlights major developments in the pension industry and does not cover the public-sector pension scheme and the National Social Security Authority (NSSA). The report is based on unaudited financial statements of insured, stand-alone self-administered funds, as well as self-administered funds under insurers and professional fund administrators.

Table of CONTENTS

ANNEXURES

1. Executive Summary

1.1. There were 982 registered occupational pension funds as at 30 September 2021, compared to 961 funds reported as at 30 September 2020.

1.2. The increase was on account of new fund registrations during the period under review.

1.3. Of these 982 registered funds, 621 were active, thus constituting 63.24% of the industry funds.

1.4. The industry's total membership, excluding beneficiaries declined from 888,690 reported as at 30 September 2020 to 887,132 as at 30 September 2021. The decline was largely attributable to members who exited the funds through full commutations.

1.5. The industry's asset base grew in nominal terms by 123.65% to ZW$241.65 billion from ZW$108.05 billion recorded in September 2020 as asset values for major asset classes adjusted in response to inflation. When applying the official exchange rate to the changes in assets trend, the industry's asset base grew by 107.52% in USD terms to US$2.76 billion from US$1.33 billion for the period under review, thus pointing to price discovery on real assets following the 2019 currency reforms. However, the extent of the real growth in asset values should be read with caution given the exchange rate distortions in the economy caused by the gap between the official exchange rate and the parallel market exchange rate.

1.6. The industry's asset base of ZW$241.65 billion translates to an average asset per member (including beneficiaries) of ZW$264,867 compared to ZW$118,147 as at 30 September 2020. Given the annual rate of inflation of 51.5% for September 2021, the 124.18% increase in average asset per member covers for inflation.

1.7. The increase in the asset base was mainly driven by quoted equities and investment properties, which had a combined share of 82.24% of the industry's total assets.

1.8. Investment property grew by 54.70%, to ZW$84.08 billion from ZW$54.35 billion as at 30 September 2020. However, its contribution to the industry's total assets declined from 50.30% to 34.79% as the industry is preferring to invest mainly in quoted equities, to improve the liquidity of their portfolios.

1.9. Quoted and unquoted equities increased by 283.36% and 59.47%, respectively.

1.10. Investments in prescribed assets by the industry stood at ZW$10.99 billion, translating to a prescribed assets ratio of 4.55%, which is way below the prescribed regulatory minimum of 20%.

1.11. Total income for the industry as at 30 September 2021 was ZW$87.25 billion compared to ZW$58.97 billion reported in the same period in 2020. The income was mainly driven by fair value gains, interest from investments and contributions, which respectively constituted 50%, 25% and 13% of total income.

1.12. Total industry expenditures for the period under review amounted to ZW$9.11 billion, of which ZW$5.89 billion (65%) went towards benefit payments.

2. The Insurance and Pensions Commission briefly

2.1. The Insurance and Pensions Commission (IPEC) is a statutory body mandated to regulate, supervise, and develop the insurance and pensions industry for the protection of policyholders and pension scheme members in Zimbabwe. This report outlines industry developments and IPEC's various activities in the pensions industry consistent with its statutory mandate for the quarter ending 30 September 2021.

3. Terms of Reference

3.1. The activities of the Commission are guided by the following Acts and the respective Regulations: -

- Insurance and Pensions Commission Act *[Chapter 24:21];*
- Pension and Provident Funds Act *[Chapter 24:09]*;
- Insurance Act *[Chapter 24:07];*
- Money Laundering and Proceeds of Crime Act *[Chapter 09:24];*
- Finance Act *[Chapter 23:04];*
- Public Entities and Corporate Governance Act *[Chapter 10:31];* and
- Public Finance Management Act *[Chapter 22:19]*.

4. Economic Development

COVID-19 Updates

4.1. The global cumulative number of Covid-19 cases stood at 233.2 million as at 30 September 2021, up from a cumulative total of 180 million cases recorded as at 30 June 2021. The death toll rose close to 5 million in the third quarter of 2021, up from 4 million recorded as at 30 June 2021(WHO, 2021).

4.2. By the end of the third quarter, about 2.5% of the Sub-Saharan population was fully vaccinated. Regrettably, this is well below the level needed to reach herd immunity and far short of vaccination rates seen in advanced economies (60%) and other emerging markets and developing economies (35%) (IMF 2021).

4.3. The IMF has a proposed plan to vaccinate at least 40% of the population in every country by the end of 2021 and 70% by mid-2022, alongside ensuring adequate diagnostics and therapeutics (Agarwal and Gopinath 2021).

4.4. The plan is jointly endorsed by the World Health Organization, the World Bank, and the World Trade Organization and is at an estimated cost of about $50 billion.

4.5. There is an urgent call for countries with high vaccination levels to donate vaccines. To reach the 40% goal by 31 December 2021, the G20/G7 countries are expected, among other measures to: (i) fulfil existing donations to COVAX of about 550 million doses, (ii) swap vaccine delivery schedules with COVAX to bring forward 400 million doses by year end, (iii) ensure AVAT can deliver over 70 million Johnson and Johnson doses also by year end and (iv)eliminate trade and regulatory barriers to trade of vaccine raw materials and finished doses as well as other Covid-19 health equipment.

4.6. Zimbabwe had a cumulative total of 130,820 Covid-19 cases as at 30 September 2021, up from 49,864 cases recorded as at 30 June 2021. A total of 2, 271, 135 people, which translate to 22.7% of the targeted population had been fully vaccinated as at 30 September 2021 and this is significantly higher than 777,161 people fully vaccinated as at 30 June 2021.

4.7. The national recovery rate at the end of the third quarter was 94%, which is16 percentage points higher than the end of the second quarter recovery rate of 78%.

Covid-19 Impact on Businesses at Global and National Level

4.8. Global tourism remains subdued, with travel restrictions depressing cross-border tourist activity. The tourism-dependent countries in the Sub-Saharan region such as Cape Verde, Mauritius, and Seychelles remain vulnerable to the international travel and tourism shocks emanating from the pandemic. In the case of Zimbabwe, however, the level of regional and domestic tourism activity is likely to improve following the relaxation of Covid-19 restrictions owing to improved vaccination levels during the quarter under review. As a result, the Victoria Falls and Kazungula border posts were re-opened, and the ban on sit-in patrons for restaurants was lifted, allowing them to re-open for fully vaccinated sit-in patrons.

4.9. Activities in sectors such as mining and agriculture were not severely affected by Covid-19 lockdown measures, as they were categorised as essential services.

4.10. The construction sector also remained strong under Covid-19, on the backdrop of Government projects such as, institutional accommodation for the public sector, roads rehabilitation programme, and dam construction.

4.11. Capacity utilisation in the manufacturing sector increased from 54% reported in the second quarter of 2021 to 58%, following the opening up of the economy owing to improved Covid-19 vaccination uptake. The increased capacity was also supported by improved access to foreign currency and output in the agricultural sector.

4.12. Covid-19 also impacted the pensions value chain in Zimbabwe as regulated entities embraced remote-working. The transition to remote-working led to the adoption of digital technologies, which increased data security and privacy risks in the pensions sector.

Global and Regional Growth Prospects

4.13. The global economic recovery has weakened, hobbled by the resurging pandemic. IMF projected the global economy to grow by 5.9% in 2021 and 4.9% in 2022, while the World Bank's global growth forecast is 2.4% in 2021 and 4.9% in 2022. The downward revision for 2021 reflects a downgrade for advanced economies and low-income countries.

4.14. The advanced economies' growth rate is forecasted to reach 5.2% in 2021 and 4.5% in 2022. The growth prospects for 2021 were revised downwards by 0.4 percentage points compared to the July 2021 forecast, at the backdrop of inventory drawdowns caused by supply chain disruptions and shortages of key manufacturing inputs.

4.15. IMF's 2021 growth forecast for the Emerging Markets and Developing Economies (EMDEs) was reviewed upwards by 0.1 percentage points from the July 2021 projections to 6.4%, attributed to improved prices for commodity exports. Table 1 below, summarises the world economic outlook projections.

Table 1: World Economic Outlook Projections

	2020	2021*	2022*
World Output	-3.3	5.9	4.9
Advanced Economies	-4.7	5.2	4.5
USA	-3.5	6.0	5.2
Euro Area	-6.6	5.0	4.3
Emerging Markets and Developing Economies	-2.2	6.4	5.1
China	2.3	8.1	5.7
Sub-Saharan Africa	-1.9	3.7	3.8
Nigeria	-1.8	2.6	2.7
South Africa	- 7.0	5.0	2.2
Zimbabwe	-4.1	5.1	3.1

Source: October 2021 World Economic Outlook Update, IMF. * Projections

4.16. Sub-Saharan Africa is set to grow by 3.7% in 2021 and 3.8% in 2022, supported by increased agricultural production, improvements in global trade, and commodity prices.

Domestic Economic Performance

4.17. The Government's growth forecast of 7.8% in 2021 and 5.4% in 2022, will be supported by:-

i. Continued stable macroeconomic environment through prudent fiscal and monetary policies;

ii. A bumper agricultural output on the back of relatively good 2020/2021 and 2021/2022 seasonal rains;

iii. A global commodity price boom; and

iv. A successful Covid-19 vaccination programme among others.

4.18. The country's efforts to stabilise the local currency, lower inflation, and contain budget deficits will also enhance domestic growth.

4.19. The IMF projects a growth rate of 5.1% in 2021 and 3.1% in 2022 for Zimbabwe, largely supported by increased agricultural output, energy production, manufacturing and construction activities. On the other hand, the World Bank forecasts a conservative growth of 2.9% in 2021 and a more significant growth of 5.1% in 2022.

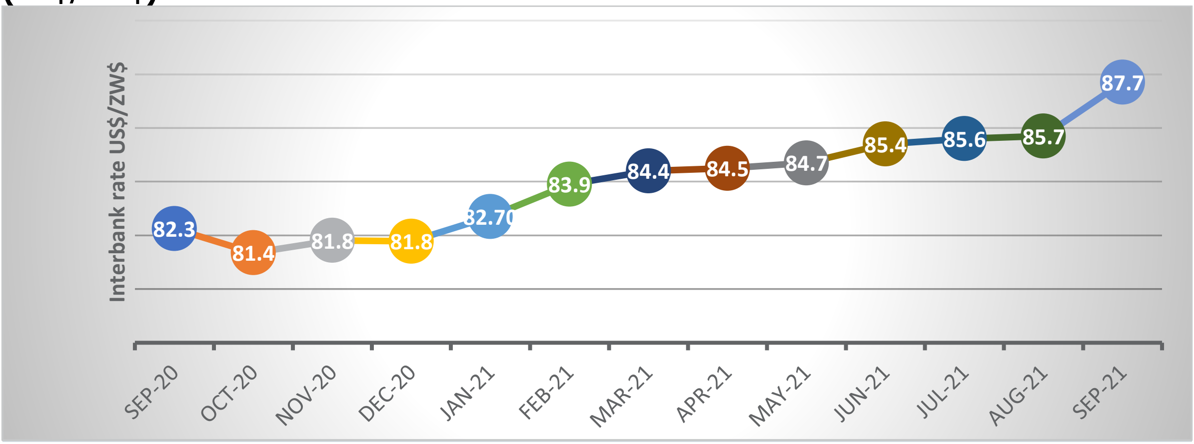
Exchange Rate Movements

4.20. The Zimbabwe dollar (ZW$) remained relatively stable against the US dollar during the third quarter, sliding by 2.7%, from an average of US$1:ZW$85.4 recorded at the end of the second quarter to US$1:ZW$87.7 recorded at the end of the third quarter of 2021.

4.21. However, the parallel market exchange rate rose from about US$1: ZW$140 as at 30 June 2021 to about US$1: ZW$160 as at 30 September 2021. The foreign currency auction system is contributing immensely to bringing transparency in the trading of foreign currency, thus fostering stability in the exchange rate and engendering price stability.

4.22. The interbank exchange rate movements during the period of September 2020 to September 2021 are illustrated in Figure 1.

Figure 1: Interbank Exchange Rate September 2020 to September 2021 (US$/ZW$) – End of Period



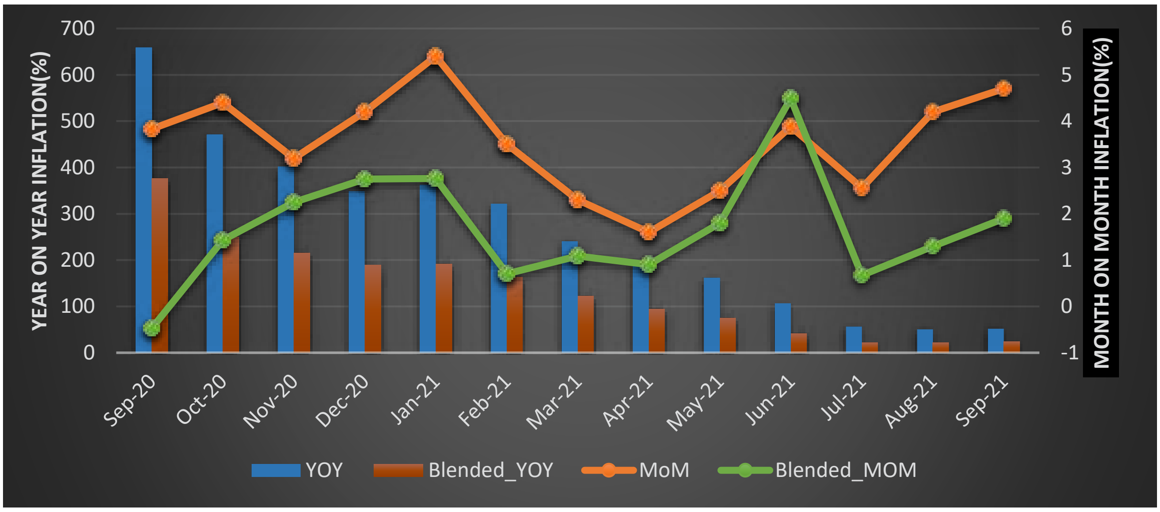
Source: Reserve Bank of Zimbabwe

Inflation Developments

4.23. According to the Zimbabwe National Statistics Agency, the annual headline inflation decelerated from 106.64% registered in June 2021 to 51.50% recorded at the end of the third quarter of 2021. A combination of tight monetary policy, non-monetisation of fiscal deficits, and fiscal policy consolidation measures implemented by the Government to date, has contributed to a sustained decline in annual inflation. Going forward, the Government seeks to ensure inflation is maintained within the SADC macroeconomic convergence benchmark of 3-7%.

4.24. The month-on-month inflation rose to 4.7% in the third quarter, from 3.88% recorded at the end of the second quarter of 2021(ZIMSTAT, 2021). The inflationary pressure emanated from an increase in international food and oil prices and indexation of prices of goods and services to parallel market exchange rates. Figure 2 illustrates the inflation profile between September 2020 and September 2021.

Figure 2: Inflation profile (%), September 2020 – September 2021



Source: Zimbabwe National Statistics Agency

4.25. The slowing down of annual inflation enhances investor confidence in the economy. The insurance and pensions industry continues to be heavily invested in investment property and quoted equities, as a way of hedging against inflation and preserving value. Therefore, the downward trend is a welcome development.

Zimbabwe Stock Exchange Performance Highlights

4.26. The Old Mutual Zimbabwe's Stock Exchange Top 10 Exchange Traded Funds (ETF) is a development that provides the platform for the insurance and pensions industry to diversify its investment portfolio. According to the rebalancing that was done by the Zimbabwe Stock Exchange on 30 September 2021, Delta Corporation Limited (21.15%) has the highest ETF weights in terms of shares that are held by the Old Mutual ZSE Top 10 ETF followed by Econet Wireless Zimbabwe Limited (19.81%), and Cassava SmarTech Zimbabwe Limited (11.98%).

4.27. Bullish sentiments characterised the Zimbabwe Stock Exchange (ZSE), during the third quarter of 2021. Resultantly, major indices increased except the mining index. The All-Share, Top 10, and Medium Cap gained 38.50%, 53.98%, and 19.12% to close at 8580.16 points, 4857.20 points, and 20599.24 points, respectively. The mining index shed 4.66% to close at 6014.53 points. The volume of shares traded increased by 51.80%, translating to an 88.68% increase in the market turnover. Table 2 shows the quarterly changes in the key stock market indicators.

Table 2: Changes in the Key Stock Market Indicators

ZSE Indicator	Jun-2021	Sept-2021	Change (%)
All-share index (points)	6194.88	8580.16	38.50 ▲
Top 10 Index (points)	3154.44	4857.20	53.98 ▲
Medium Cap Index (points)	17293.13	20599.24	19.12 ▲
Small Cap Index (points)	201439.5	254232.9	26.21 ▲
Mining Index (points)	6308.43	6 014.53	-4.66 ▼
Shares traded (million)	45.71	69.39	51.80 ▲
Market turnover (ZW$ million)	743.61	1403.07	88.68 ▲

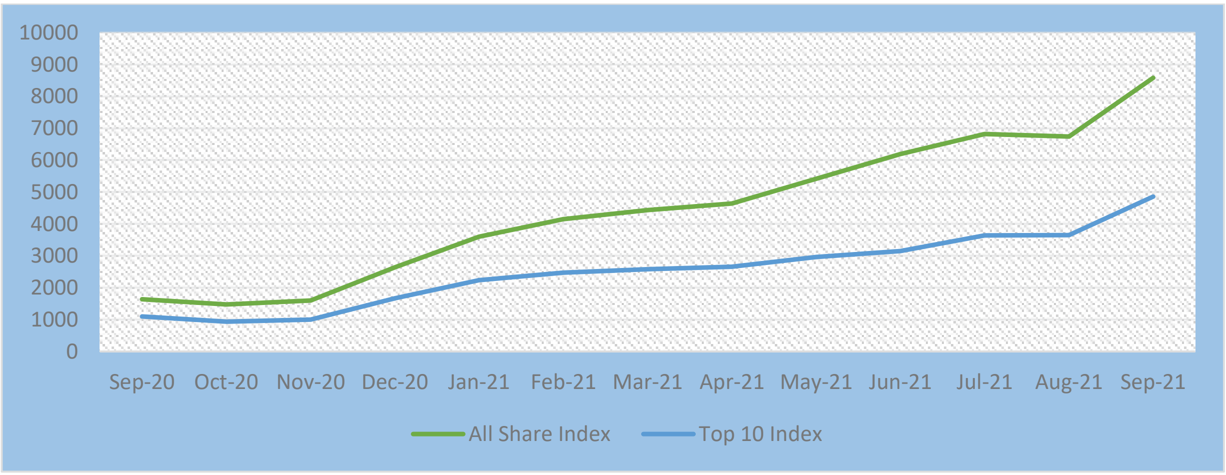
4.28. Figure 3 shows developments on the ZSE's All-Share and Top 10 indices from the end of September 2020 to the end of September 2021.

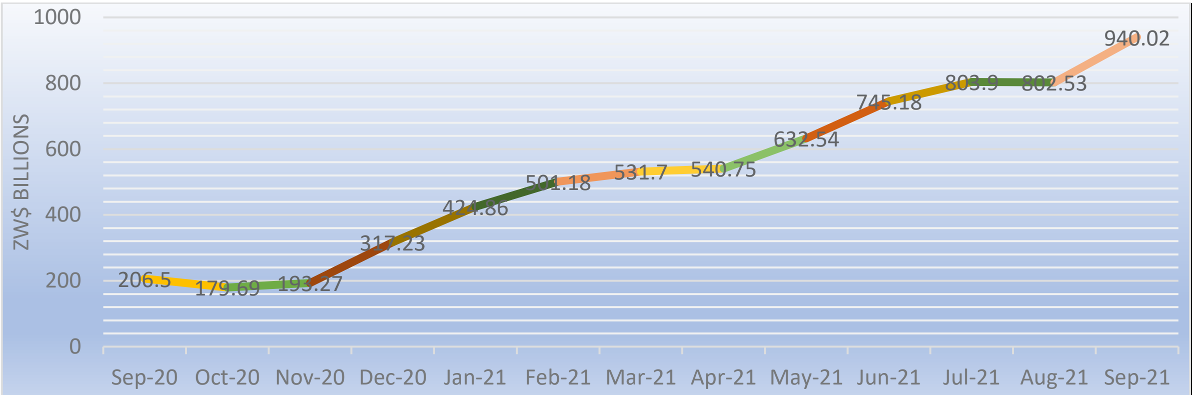
Figure 3: Zimbabwe Stock Exchange All Share and Top 10 Indices



Source: Zimbabwe Stock Exchange

4.29. The local bourse gained ZW$194.84 billion, or 26.15% worth of capitalisation to close at ZW$940.02 billion during the quarter ending September 2021, from ZW$745.18 billion recorded in the second quarter. Figure 4 shows the market capitalisation trend for the period of September 2020 to September 2021.

Figure 4: Daily Market Capitalisation in ZW$ Billions



Source: Zimbabwe Stock Exchange

Victoria Falls Stock Exchange (VFEX) Performance Highlights

4.30. A new addition Padenga Holdings has now been listed on the Victoria Falls Stock Exchange (VFEX) effective July 2021, joining Seedco International which was already trading at VFEX. As of 30 September 2021, the two counters recorded a turnover of US$473,336.01 from a cumulative volume of trades of 1,833,829 shares. During the quarter under review, the total number of trades recorded was ninety-six (96) and capitalisation was US$ 208,321,441.69.

4.31. The Victoria Falls Stock Exchange signed a strategic Memorandum of Understanding with the Dubai Gold and Commodities Exchange (DGCX) in September 2021 to strengthen bilateral cooperation around commodities trading. As part of the agreement, the DGCX will extend technical support, knowledge and skills to VFEX, with the ultimate aim of establishing an international commodities exchange in Zimbabwe.

Money Market Developments

Savings Deposit Rates

4.32. The average nominal savings deposit rates were lower than the annual inflation rate of 51.5% recorded as at 30 September 2021, implying a reduced margin of negative real returns because of falling inflation experienced during the entire quarter under review.

4.33. There was an increase in average maximum nominal savings deposit rates from 4.24% as at 1 July 2021 to 8.36% as at 24 September 2021, translating to a negative end of quarter real return of 28%. The maximum one-month nominal deposit rate increased to 12.83% as at 24 September 2021 from 10.77% as at 1 July 2021, with a negative end of quarter real return of 26%. The three-month nominal deposit rate increased to a maximum of 14.03% as at 24 September 2021, 11.72% recorded at the beginning of the quarter, translating to an end of quarter real return of -25%.

5. Regulatory Developments for the Period Ending 30 September 2021

Restructuring of the Commission

5.1. The Commission embarked on a restructuring exercise meant to align the organisational structure of its core departments with the key supervisory focus areas of prudential and market conduct supervision This was necessitated by the need to enhance focus on market conduct supervision and the fair treatment of members. In line with the restructuring of the Commission, the Pensions Department was restructured and now has 3 distinct sections. These are the Prudential Supervision section which will focus on assessing the financial soundness of pension funds and administrators; Market Conduct Supervision section that will focus on business conduct and fair treatment of policyholders and pension scheme members; and the Technical Supervision which will focus on financial analysis.

Re-registration of Funds

5.2. The Commission is pleased to advise that the re-registration of all funds was successfully completed during the period under review, hence there is now a credible register which will soon be uploaded on the Commission's website.

Prescribed Assets

5.3. During the third quarter of 2021, seven (7) applications were conferred with prescribed asset status as shown in the table below:-

Table 3: Approved Prescribed Assets

Issuer	Amount	Purpose
Zimhydro Project	US$14 million	Production of hydro-electricity at Lake Mtirikwi in Masvingo
Origen	US$5 million	Contract farming and for purchasing of grain from farmers for trading
IDBZ	US$100 million	Infrastructure development
Victory Tobacco Pvt Ltd	US$20 million	Contract farming, purchase of tobacco from contract farmers, tobacco processing and construction and installation of green leaf threshing plant
Untu Capital	US$5 million	For on-lending to MSMEs
NMB	ZWL2 billion	2021/2022 summer cropping programme
Agrowth (formerly CICADA)	ZWL650 million	2021/2022 summer cropping programme

5.4. This brought to 17 the number of approved prescribed assets since January 2021. However, of concern to the Commission is the low uptake of the assets in spite of the industry having been consulted during the design of some of the instruments.

6. Pensions Complaints Handled

6.1. During the quarter ended 30 September 2021, the Commission received a total of 103 complaints, out of which 41 were resolved, 7 were under investigation and 55 related to the slow implementation of the Justice Smith-led Commission of Inquiry recommendations.

6.2. Those under investigation related to unremitted contributions, additional information required from pensioners and investigations by pension funds on payments made through cheques submitted to members' former employers.

6.3. The bulk of cases that remain outstanding relate to non-remittance of contributions by employers and low values at conversion in 2009.

6.4. The graph below summarises the breakdown of the complaints as explained above:

Figure 5: Complaints Breakdown

6.5. The Commission noted the following as the general challenges facing the pensions industry during the quarter under review:

i. Non-payment and late payment of pension benefits.
ii. Low pension values.
iii. Contribution arrears, mostly since 2009.
iv. Treatment of contributions made between 2009 and 2018, given the change in currency in 2019.

6.6. The above challenges are summarised and depicted in the figure below:

Figure 6: Pensions Complaints

	Low pension benefits	Non- payment of benefits	Late payment	Unremitted contributions
Proportion (%)	52%	20%	18%	10%
No. of complaints	53	21	19	10

6.7. Unremitted contributions complaints constituted 10% of the complaints received in the period under review. The Commission continues to encourage pension funds to follow up on payment plans agreed with sponsoring employers who have outstanding contributions.

6.8. Trustees should ensure that annual benefit statements are submitted to members so that they are aware of their benefits status and contribution arrears, if any.

6.9. Late payment of benefits is another source of complaints, accounting for 18% while non-payment of benefit accounted for 20% of the complaints received in the second quarter of 2021

6.10. The graph above shows that 52% of the complaints related to low pension values occasioned by the currency conversion of 2009 and the change in currency in 2019. Most pensioners are following up on the Commission of Inquiry recommendations and the treatment of USD contributions between 2009 and 2019.

6.11. Other complaints related to the delays in processing of benefits by pension funds, mostly owing to inadequate information on the beneficiaries.

6.12. Pension fund members are advised to regularly update their details, particularly contact details as well as their nominated beneficiaries.

6.13. Another source of complaints related to the suspension of benefits due to non-submission of life certificates. This issue requires an industry wide approach as many beneficiaries seem not to be aware of this requirement and the pension funds and administrators are not communicating regularly on this issue.

6.14. The Commission's programme to assist members check their pension status using a search engine has been commended by members of the public as it has addressed some unanswered questions.

7. Industry Overview

7.1. The key performance indicators for the pensions industry as at 30 September 2021 are depicted in the table below: -

Table 4: Key Highlights of the Pensions Industry as at 30 September 2021

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Self-Administered Funds	Total
Number of Funds	796	171	15	982
Active funds	469	137	15	621
Members (Excluding Bebeficiaries)	353,160	119,456	414,516	887,132
Share of total membership	40%	13%	47%	100,00%
Total Income ($billion)	28.47	27.10	31.68	87.25
Total Contributions ($billion)	3.23	3.62	4.62	11.47
Rental Income ($million)	7.52	247.95	1,451.92	1,707/39
Investment Income ($billion)	24.21	22.01	26.36	72.58
Investment Income over total assets	39.43%	25.76%	27.80%	30.03%
Total Expenditure ($billion)	2.25	3.58	3.27	9.11
Total Benefits Incurred ($billion)	1.61	2.65	1.64	5.90
Pension benefits per pensioner	43,450.75	59,251.06	32,806.97	38,520.66
Expenses/Contributions	18.53%	24.70%	26.12%	23.54%
Expenses/Total Income	2.10%	3.30%	3.81%	3.10%
Total Assets ($billion)	61.40	85.45	94.81	241.65
Total Assets per member	173,385	695,882	217,713	264,867
Percentage of Total Assets	25.41%	35.36%	39.23%	100,00%
Prescribed Assets ($billion)	2.94	7.34	0.71	10.99
Prescribed Assets Ratio	4.79%	8.59%	0.74%	4.55%
Contribution Arrears ($billion)	0.26	0.54	2.58	3,38

Notes:

1. Total membership excludes fund beneficiaries (spouse and children of the deceased members).
2. Total Investment income is made up of rental income, dividends, interest on investments, profit on disposal of assets and fair value gains.
3. Total Expenditure for the industry includes benefits paid, transfer to reserves, revaluation losses and provisions.
4. Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation losses.

7.2. As shown in Table 4, there were 982 registered occupational pension funds as at 30 September 2021, compared to 961 funds reported as at 30 September 2020.

7.3. The increase was on account of new funds registrations during the period under review.

7.4. Of these 982 registered funds, 621 were active, thus constituting 63.24% of the industry funds.

7.5. In order to resolve the issue of inactive funds, the Commission issued a Directive for dissolution of inactive funds through Circular 34 of 2021. The Directive is meant to guide the industry on dissolutions to ensure orderly exit of inactive funds so that members are not prejudiced.

Membership

7.6. The industry's total membership, excluding beneficiaries declined from 888,690 reported as at 30 September 2020 to 887,132 as at 30 September 2021. The decline was largely attributable to members who exited the funds through full commutations.

7.7. The breakdown of membership as at 30 September 2021 and comparative period is shown in Table 5 below: -

Table 5: Breakdown in Membership

	Membership as at ...	
Membership Class	**30 September 2021**	**30 September 2020**
New Entrants	9,729	5,331
Actives excluding new entrants	315,356	326,956
Pensioners	33,205	35,497
Deferred Pensioners	355,831	353,526
Suspended Pensioners	11,992	12,423
Unclaimed Benefits	161,019	154,957
Total Membership (excluding beneficiaries)	887,132	888,690
Beneficiaries	25,223	25,883
Total Membership (including beneficiaries)	912,355	914,573
Exits	9,878	4,058

7.8. As shown in table 5 above, there was a decline in active members, by 11,600, from 332,287 to 325,085 as at 30 September 2021. There was also a decline in the number of pensioners from 35,497 to 33,205

7.9. This decline in the above-mentioned membership categories is mainly attributed to members exiting the fund either by retirement or by accessing full commutations.

7.10. There was a slight increase of 3.91% in members with unclaimed benefits, to 161,019 from 154,957 as at 30 September 2020 notwithstanding the Commission's awareness initiatives to reduce incidences of unclaimed benefits. The Commission urges Administrators to exercise Customer Due Diligence on and after the on-boarding of clients so that pensioners can be easily contacted when benefits fall due. All funds are required to comply with requirements for remittance of unclaimed benefits to the Guardian Fund. Benefits not yet due for remittance to the Guardian Fund should be revalued in line with revaluation gains on assets supporting such liabilities.

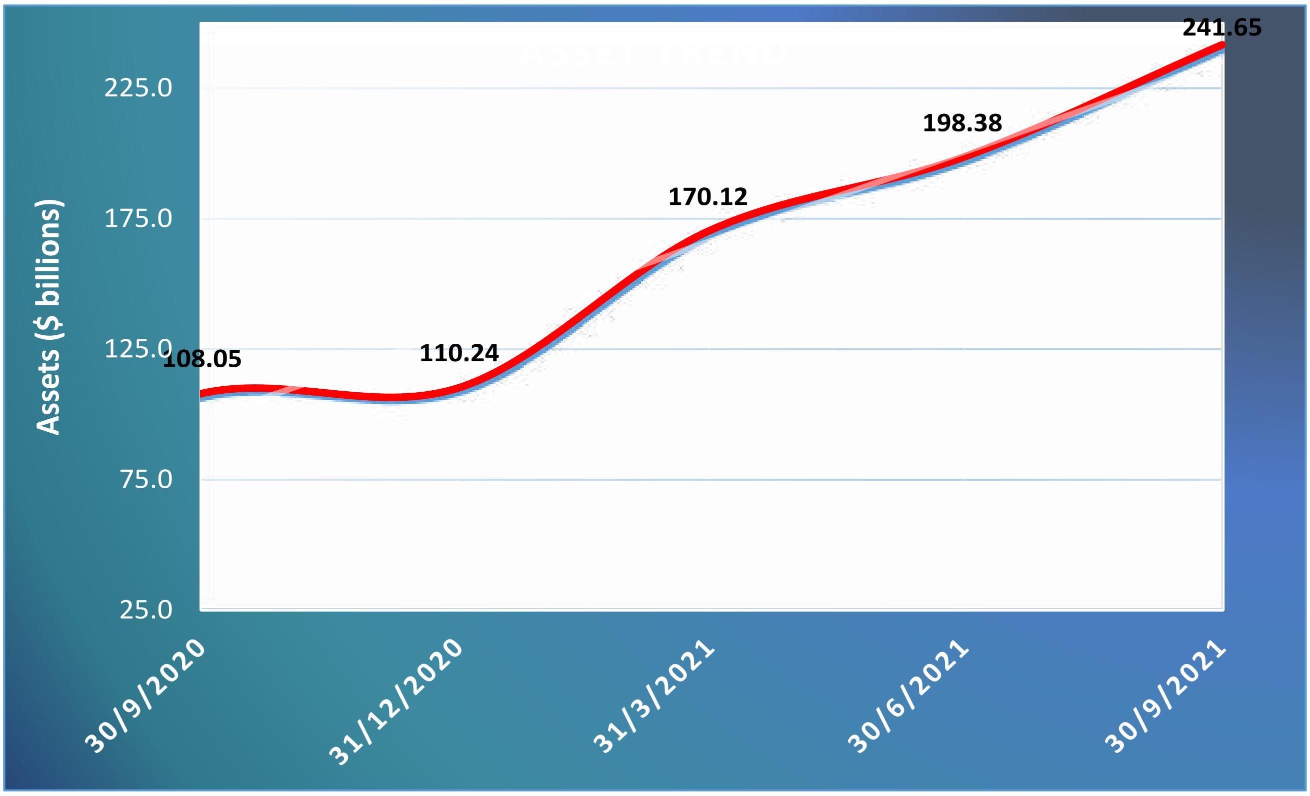
Asset Quality

7.11. The industry's asset base grew in nominal terms by 123.65% to ZW$241.65 billion from ZW$108.05 billion recorded in September 2020. When converted into US$ at official exchange rate, the industry's asset base grew by 107.52% to US$2.76 billion from US$1.33 billion for the period under review. However, the exchange rate distortion, particularly existence of alternative market, would give a different growth rate in terms asset trajectory in real terms.

7.12. The industry's asset base of ZW$241.65 billion translates to an average asset per member (including beneficiaries) of ZW$264,867 compared to ZW$118,147.

7.13. The figure below shows the industry asset base trend from 30 September 2020 to 30 September 2021: -

***Figure 7*: Trend in Industry Assets Growth**



7.14. The increase in the asset base was mainly driven by quoted equities and investment properties, which had a combined share of 82.24% of the industry's total assets.

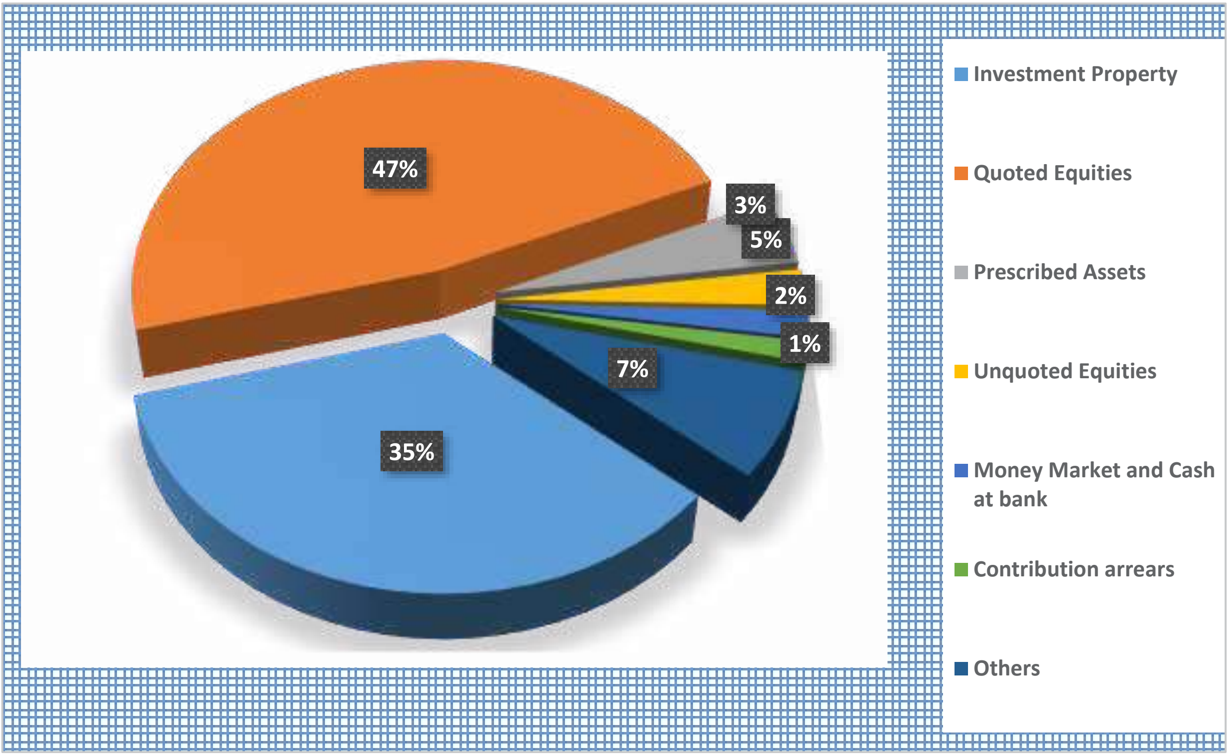
7.15. Investment property grew by 54.70%, to ZW$84.08 billion from ZW$54.35 billion as at 30 September 2020. However, its contribution to the industry's total assets declined from 50.30% to 34.79% as informed by a corresponding increase in the value of quoted equities, to improve the liquidity of the investment portfolios.

7.16. Quoted and unquoted equities increased by 283.36% and 59.47%, respectively. Quoted equities increased to ZW$114.66 billion from ZW$29.92 billion while unquoted equities increased to ZW$6.06 billion from ZW$3.80 billion during the period under review. Listed equities held by the pensions industry accounted for 12% of the ZSE market capitalisation, indicating the significant role played by the industry on the capital market.

7.17. Whilst investment in unquoted equities increased by 59.47%, its proportion to total assets declined to 2.51% from 3.52% reported as at 30 September 2020. The decline is on account of revaluation of real assets.

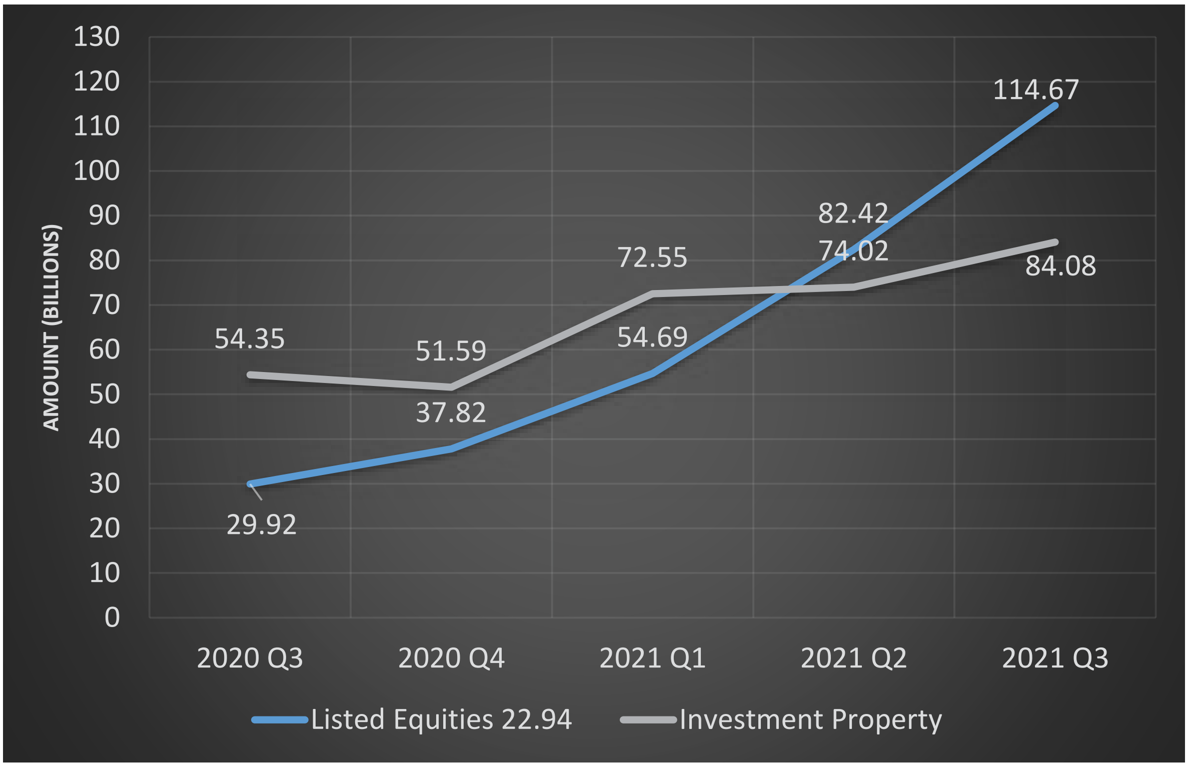
7.18. The distribution of the industry's assets as at 30 September 2021 is shown in Figure 8 below: -

***Figure 8*: Distribution of Pension Industry Assets as at 30 September 2021**



7.19. Funds' value of investments in equities and investment property in absolute terms has been on an upward trend as shown in Figure 9 below:

***Figure 9*: Listed Equities and Investment Property Trend**



7.20. Contribution arrears increased by 164.06%, to ZW$3.38 billion from ZW$1.28 billion reported as at 30 September 2020. The increase is attributed to continued non-remittance of contributions by some sponsoring employers as they faced viability challenges as well as interest penalties on contribution arrears as required by the Guidance Paper.

7.21. The proportion of contribution arrears to total assets increased to 1.40% from 1.18% as at 30 September 2020. However, there was a decline in contribution arrears from 1.54% of total assets reported in the second quarter to 1.40% of total assets in the current quarter.

7.22. Of the ZW$3.38 billion contribution arrears, 76.41%, which translates to ZW$2.58 billion, is owed to stand-alone funds. The Local Authorities Pension Fund, the Mining Industry Pension Fund and the National Railways of Zimbabwe Pension Fund constituted 79.32% of the industry's contribution arrears.

7.23. Given the increase in the contribution arrears, sponsoring employers are urged to clear these contribution arrears. Meanwhile the Commission will continue to engage the industry to ensure clearance of such arrears.

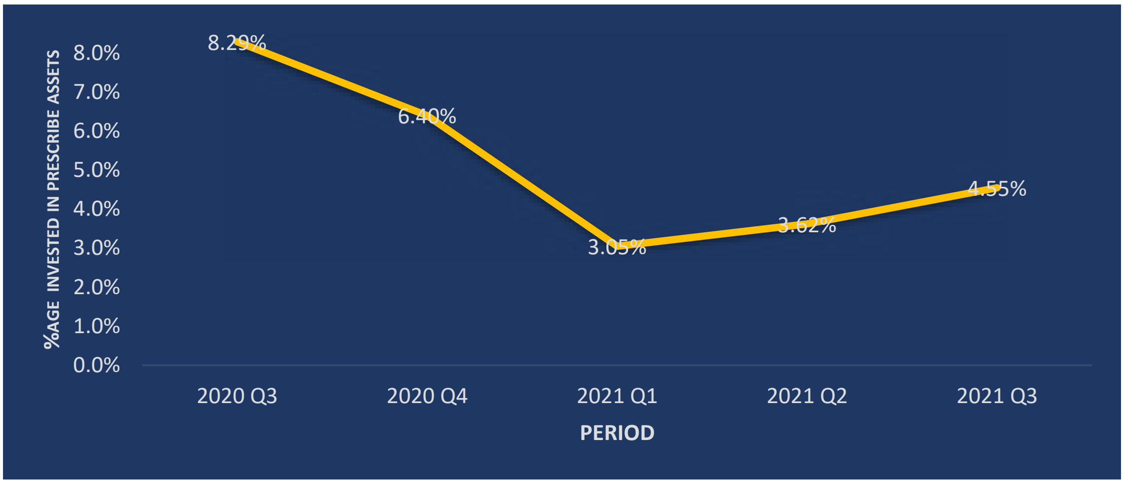
7.24. The total amount invested in prescribed assets increased by 22.66% to ZW$10.99 billion from ZW$8.96 billion reported in September 2020. Notwithstanding the increase in the absolute amount invested by the pensions industry in prescribed assets, the compliance level remains low at 4.55%, which is way below the minimum prescribed ratio of 20%.

7.25. The Table below shows the Prescribed assets compliance levels for 2020 and 2021.

Table 6: Compliance Levels for Prescribed Assets

Sector	30 September 2021		30 September 2020	
	Amount (ZW$ b)	Ratio (%)	Amount (ZW$b)	Ratio (%)
Stand-Alone Funds	0.71	0.74%	0.42	1.21%
Self-Administered Funds	7.34	8.59%	2.89	10.24%
Insured	2.94	4.79%	5.65	12.46%
Total/Average Ratio	**10.99**	**4.55%**	**8.96**	**8.29%**

Figure 10: Prescribed Assets Compliance Level



7.26. As shown on the graph above, compliance with prescribed asset requirements has been on a downward trajectory. In order to improve compliance level, various bankable projects have been accorded prescribed assets as they meet both the developmental and value preservation requirements of insurers and pension funds. The industry is urged to regularise the non-compliance position.

Unclaimed Benefits

7.27. Unclaimed benefit liabilities increased significantly by 1 175% from ZW$0.20 billion as at 30 September 2020 to ZW$2.55 billion. The increase in unclaimed benefits is mainly attributed to revaluation gains on assets supporting such liabilities.

7.28. Furthermore, there was also an increase in members with unclaimed benefits by 3.93%, to 161,019 from 154,927 reported in the same period last year. The Commission is concerned with such a high number of members with unclaimed benefits and encourages the industry to intensify efforts to locate members.

Earnings

7.29. Table 7 below indicates the key income and expenditure indicators: -

Table 7: Key Income Indicators

Indicator	September 2021 (billion)	September 2020 (billion)
Total Contributions (ZW $billion)	11.47	2.92
Investment Income (ZW $billion)	72.58	53.58
Total Income(ZW $billion)	87.25	58.97
Total Benefits (ZW $billion)	5.90	1.30
Total Expenditure (ZW $billion)	9.11	2.18
Expenses to Contribution Ratio	23.54%	24.44%
Expenses/Total Income Ratio	3.10%	1.21%
Expenses/Total Realised Income	7.34%	3.11%

7.30. The income for the period under review was mainly driven by fair value gains, interest from investments and total contributions amounting to ZW$77.48 billion. These three income streams constituted 50%, 25% and 13%, of the industry's total income, respectively.

7.31. Total expenditure increased by 317.89% from ZW$2.18 billion for the period ended 30 September 2020 to ZW$9.11 billion as at 30 September 2021. The increase was mainly driven by total benefits paid, administrator expenses and investment management expenses, which accounted for 64.76%, 8.41% and 7.37%, respectively.

7.32. Expenses to contributions ratio was 23.54%, whilst the expenses to total income ratio was 3.10% for the year ended 30 September 2021. Furthermore, expenses to realisable income also increased to 7.34% from 3.11% reported during the same period in the previous year.

7.33. The Commission is concerned with the general increase in expense ratios as they negatively impact on the amount that is available for investment, ultimately reducing the retirement benefit for members.

7.34. In order to curtail expenses, the Commission has issued a framework to regulate expenses, which will be effective from January 2022 for implementation within 6 months from the effective date.

7.35. Figures 11 and 12 below show the trend in expense ratios for the period 30 September 2020 to 30 September 2021: -

Figure 11 : Expenses to Contribution Ratio

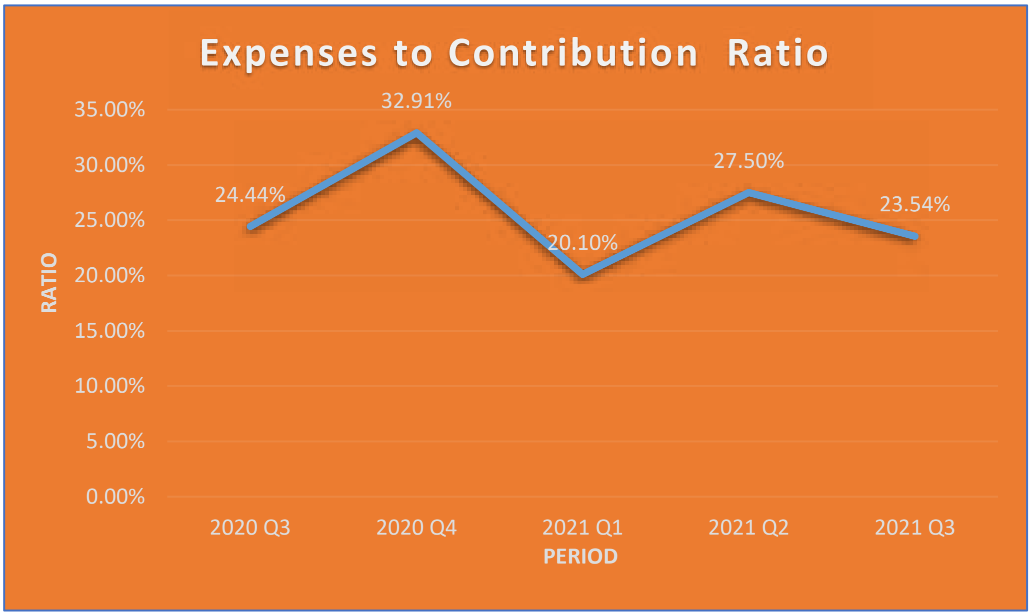


Figure 12: Expenses to Total Income Ratio

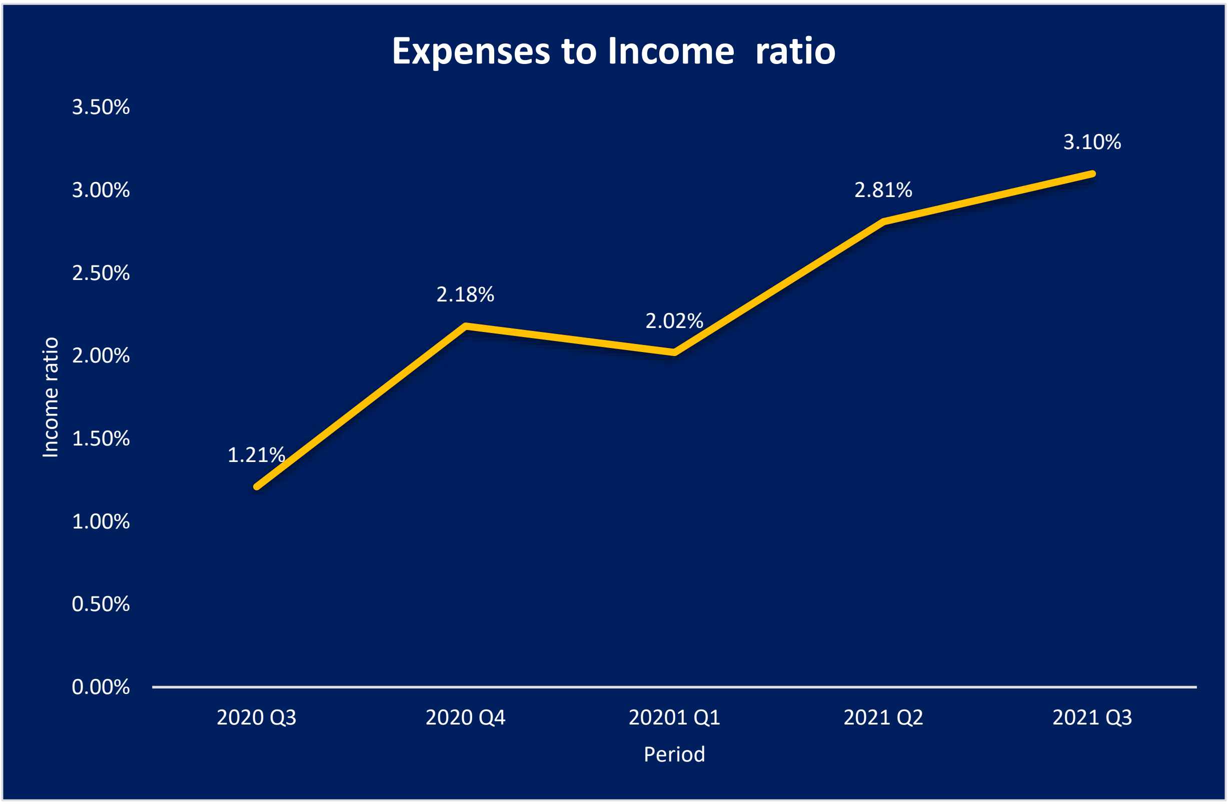


7.36. As shown on the graph above, the expenses to income ratio is on an upward trend, hence the need for the afore-mentioned regulatory intervention.

Forex Business

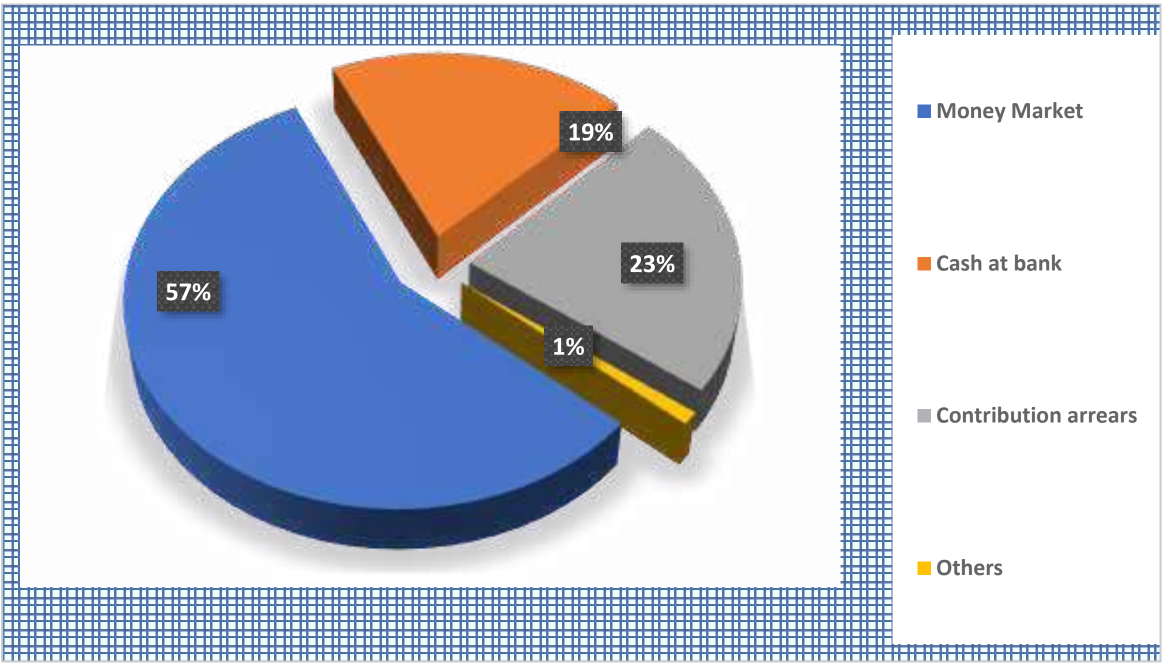
7.37. Out of the registered 982 pensions funds, 30 funds are receiving contributions in US$.

7.38. For the period January to September 2021, contributions and other foreign currency receipts by these funds amounted to US$10.65 million whilst total expenditure for the same period amounted to US$0.43 million.

7.39. The total assets for these funds stood at US$10.96 million as at 30 September 2021.

7.40. As shown in the figure below, the total foreign currency-denominated asset portfolio of these funds is mainly dominated by money market instruments (57%), with 19% being held as cash at bank.

Figure 13: Asset Distribution



7.41. This huge proportion of the funds' portfolio (19%) held as cash, remains a major concern to the Commission given that it is a cost to the fund members due to the forgone investment returns. It is also not in line with the long-term nature of the liability profile of pension funds.

7.42. In order to widen the investment options for the funds, the Commission is finalising Investment Guidelines which will also include offshore investments. Furthermore, the Commission also urges financial market players to design US$ denominated instruments which suit the investment horizon for pension funds, so that there is asset liability matching.

7.43. The huge proportion of arrears in contributions is mainly caused by one fund, with contribution arrears constituting 68% of the contribution arrears.

7.44. The Commission will engage the fund with the view to ensuring the repayment of the arrears so that members can be paid their full retirement/terminal benefits.

7.45. Total income received by the funds for the period January to September 2021 amounted to US$10.70 million. This was mainly driven by contributions, with interest from investments contributing an insignificant portion of the income in the absence of US$ denominated investment vehicles as stated earlier.

7.46. Total expenditure for this period amounted to US$0.43 million, with benefits payments and administration fees accounting for 49% and 42% of total expenditure, respectively.

8. Insured Schemes

8.1. **Sector Architecture**

8.1.1. There were 6 life companies administering 796 pension funds as at 30 September 2021, increasing from 781 reported as at 30 September 2020. The increase was due to new fund registrations during the period under review.

8.1.2. The distribution of the pension funds among insurers as at 30 September 2020 and 30 September 2021 is shown in the Table below.

Table 8: Distribution of Insured Pension Funds

Life Assurer	30 September 2021	30 September 2020
CBZ Life	6	6
Fidelity Life	38	38
First Mutual Life	130	124
Old Mutual Life	347	339
ZB Life	109	109
Zimnat Life	166	165
Total	**796**	**781**

8.1.3. It is important to note that of the 796 funds administered, only 469 were active, constituting 58.92% of the total insured funds. Inactive funds are funds which are either on paid-up status (no longer contributing) or under dissolution.

8.1.4. The high number of inactive funds, totalling 327 was attributed to viability challenges faced by the sponsoring employers, as well as loss of confidence in the pensions industry resulting in the dormancy of these funds.

8.2. Membership

8.2.1. Total membership, excluding beneficiaries, for insured funds increased to 353,160 as at 30 September 2021 from 353,927 during the comparative period in 2020. This is illustrated in the in the Table below.

Table 9: Membership Classes

	Number of members as at…	
Membership Class	**30 September 2021**	**30 September 2020**
New Entrants	3,071	1,377
Active Members (Excluding new Entrants)	94,995	106,381
Pensioners	6,958	7,545
Deferred Pensioners	230,848	226,441
Suspended Pensioners	1,430	2,330
Members with unclaimed Benefits	15,858	9,853
Total	**353,160**	**353,927**
Exits	**7,353**	**2,076**

8.2.2. As shown in the table above, there was a decrease in total membership from 353,927 to 353,160 as at 30 September 2021, notwithstanding new members who joined either from newly registered funds or funds that transferred from other fund types to insured funds.

8.2.3. The number of active members also declined from 107,758 members as at 30 September 2020 to 98,026 members as at 30 September 2021.

8.2.4. There was also a decrease in the number of pensioners from 7,545 as at 30 September 2020 to 6,958, which was mainly attributed to members who were paid full commutations.

8.2.5. On the other hand, the number of deferred members increased from 226,441 as at 30 September 2020 to 230,848 and this was mainly due to an increase in funds which applied for dissolutions.

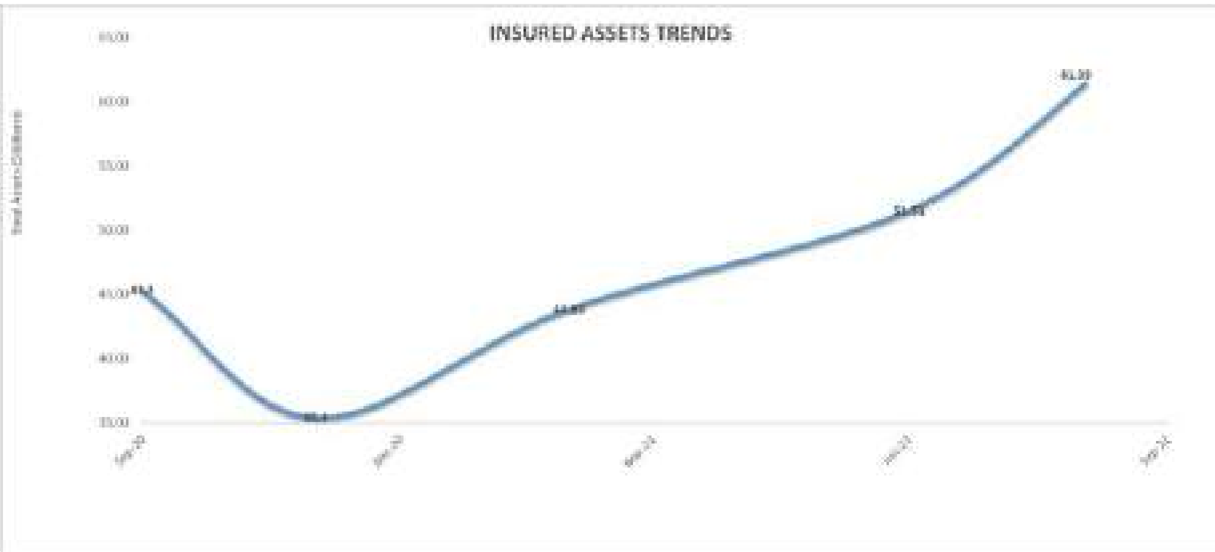
8.3. **Asset Quality**

8.3.1. Insured funds reported assets valued at ZW$61.40 billion as at 30 September 2021 which was a 35.42% nominal increase from $45.34 billion reported during the same period in the previous year.

8.3.2. The increase was mainly due to equities and investment property revaluation in line with the prevailing economic environment.

8.3.3. The asset trend for insured funds from 30 September 2020 to 31 September 2021 is shown in the figure below:

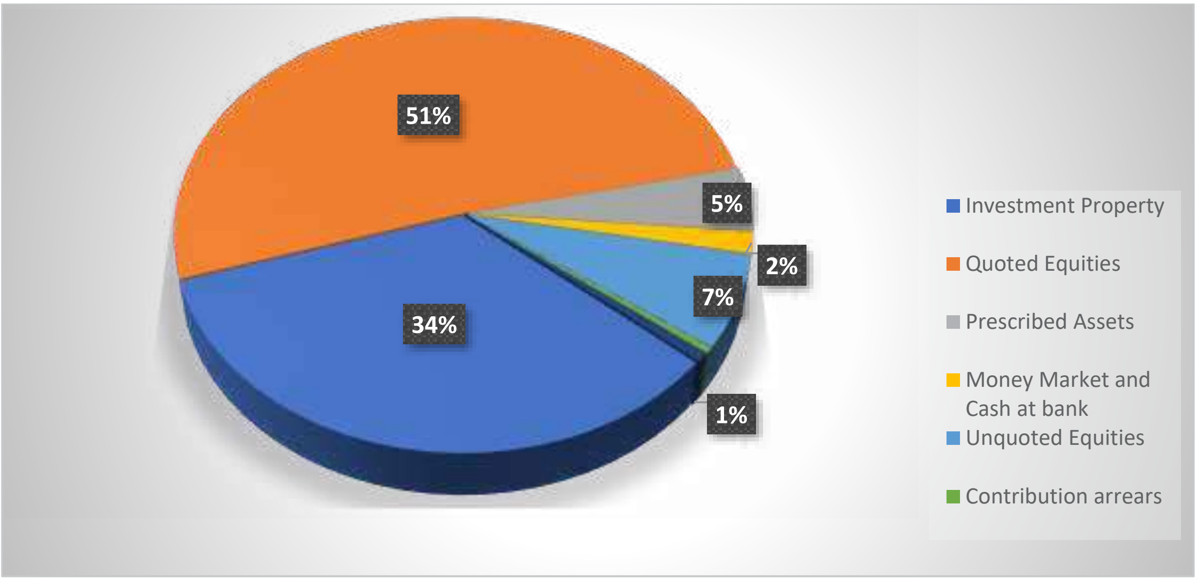
***Figure 14*: Insured Assets trend, September 2020 to September 2021**



8.3.4. As shown in the figure above, the asset base for insured funds has been on an upward trajectory from 30 September 2020, mainly on account of revaluations and inflation following currency reforms.

8.3.5. The composition of insured funds' investments is shown in the figure below:

Figure 15 : Composition of Insured Fund Assets as at 30 June 2021



8.3.6. Investment property and equities totalling ZW$56.74 billion, constituted 92.42% of all the assets. Investments in prescribed assets totalling ZW$2.94 billion, constituted only 4.79% of the sector's total asset base as at 30 September 2021, which is still below the minimum regulatory threshold of 20%.There was a 5.84% decrease to the 2021 second quarter compliance ratio.

8.4. **Earnings**

8.4.1. Insured schemes reported a surplus of ZW$26.22 billion for the 9 months ending 30 September 2021.

8.4.2. The ZW$26.22 billion is mainly attributed to interest from investment and fair value gains on equities totalling ZW$23.95 billion, compared to ZW$18.81 billion in 2020.

8.4.3. Total income amounted to ZW$28.47 billion for the period ending 30 September 2021 compared to ZW$19.71 billion during the same period in 2020.

8.4.4. Insured funds paid ZW$1.61 billion in benefits for the 9 months ending 30 September 2021, constituting 71.44 % of the sector's total expenditure of ZW$2.25 billion.

8.4.5. The sector's administrative expenses totalled ZW$643.19 million and were driven by investment expenses totalling ZW$257.14 million.

8.4.6. Administrative expenses translated to 19.91% and 2.26% of contributions and total income, respectively, as compared to 41.68% and 2.70% of reported in the second quarter of 2021.

8.5. **Insured Forex business**

8.5.1. There were 23 insured funds which were receiving contributions in US$ in the third quarter of 2021, with 19 under Old Mutual, two each under Zimnat Life and First Mutual Life.

8.5.2. These funds had a forex asset base of US$3.72 million as at 30 September 2021, thus constituting about 1% of the sector's asset base of ZW$61.40 billion.

8.5.3. The total asset portfolio was mainly invested in money market investments at US$2.99 million and cash at bank at US$0.73 million.

8.5.4. The total income for the period under review was wholly from contributions, with nothing coming from investment income.

9. Self-Administered Funds

9.1. Sector Architecture

9.1.1. There were 171 self-administered funds as at 30 September 2021, compared to 165 reported as at 30 September 2020. The increase was attributed to new registration of funds during the period under review.

9.1.2. The number of self-administered pension funds per administrator as at 31 December 2019 are shown in Table below.

Table 10: Self-Administered Funds Administration

Name of Administrator/Insurer*	30 September 2021	30 September 2020
Professional Administrators		
Capitol Insurance Broker	1	1
Comarton Consultants	26	25
Marsh Employee Benefits	40	40
Minerva Benefit Consulting	67	63
Zimbabwe Insurance Brokers	5	5
Sub-total	**139**	**134**
Life Companies		
Fidelity Life Assurance Company	1	1
First Mutual Life Assurance Company	5	5
Old Mutual Life Assurance Company	21	21
Nyaradzo Life Assurance Company	3	2
Zimnat Life Assurance Company	2	2
Sub-total	**32**	**31**
Grand Total	**171**	**165**

**Not all registered life offices (life assurance companies) are involved in pension administration.*

9.1.3. As shown in Table 10 above, 81.39% of the self-administered pension funds were administered by Fund Administrators, compared to 18.61% under the administration of Life Insurers. It is also important to note that two Fund Administrators administered 107 pension funds, accounting for 62.57% of the total number of self-administered funds.

9.2. **Membership**

9.2.1. There was a marginal decrease in total membership from 123 089 members as at 30 September 2020 to 119 456 as at 30 September 2021 a decline of 2.95%. The decline is attributable to full commutations and the withdrawal of preservation benefits by members in line with increased commutation thresholds.

9.2.2. The membership distribution per class of membership is shown in Table 11 below:

Table 11: Distribution of Membership for Self-administered Funds

	Number of members as at……	
Membership Class	**30 September 2021**	**30 September 2020**
New Entrants	1,864	1,573
Active Members (excluding new)	68,895	73,765
Pensioners	6,107	6,352
Deferred Pensioners	29,209	27,801
Suspended Pensioners	3,882	3,298
Unclaimed Benefits	9,499	10,300
Total Membership	**119,456**	**123,089**
Exits	1,238	2,388

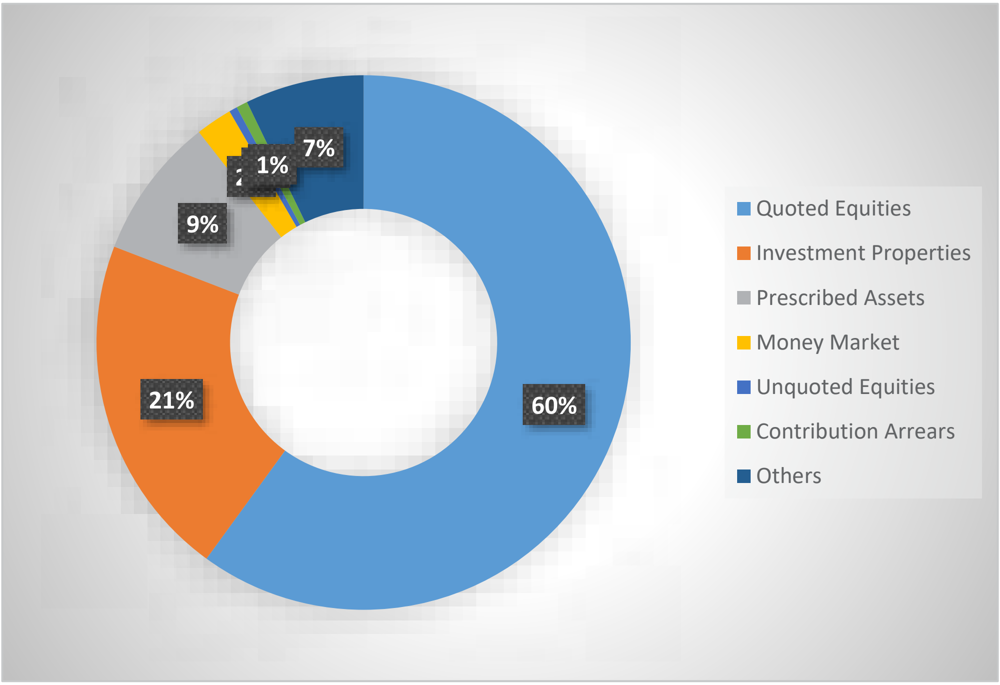
9.2.3. As shown in Table 11 above, the number of members with unclaimed benefits decreased by 7.77%, from 10,300 to 9,499 over the period 30 September 2020 to 30 September 2021.

9.2.4. There was an increase in the number of members with deferred benefits from 27,801 as at 30 September 2020 to 29,209 as at 30 September 2021.

9.3. Asset Quality

9.3.1. Self-administered funds reported assets valued at ZW$85.45 billion as at 30 September 2021, which was a 203% increase from ZW$28.24 billion reported during the same period in the previous year.

Figure 16: Distribution of Self-Administered Funds Assets



9.3.2. As shown in the Figure above, equities investments and investment property were ZW$69.12 billion and accounted for 81% of the total asset base. The quantum of investment in these two asset classes reflects concentration of assets in classes that preserve value.

9.3.3. Investments in prescribed assets decreased slightly from 10.24% as at 30 September 2020 to 8.59% as at 30 September 2021. The prescribed assets ratio of 8.59% is still far below the required minimum regulatory compliance threshold of 20%.

9.3.4. Contribution arrears increased from ZW$219.27 million as at 30 September 2020 to ZW$535.78 million as at 30 September 2021.

9.4. **Earnings**

9.4.1. Total income of ZW$48.68 billion was realised over the period, up by 143.8% compared to ZW$19.97 billion realised over the same period in 2020. The total income was mainly driven by fair value gains.

9.4.2. Total expenditure was ZW$3.60 billion for the period 30 September 2021, having increased by 340% from ZW$817.27 million reported as at 30 September 2020. Benefit payments constituted 73.64% of the total expenditure.

9.4.3. Administrative expenses totalled ZW$943.75 million for the period under review, compared to ZW$272.65 million for the comparative period ending 30 September 2020.

9.4.4. This translated to an average expense to income and expense to contribution ratios of 3.30% and 24.70% respectively

9.5. **Forex Business**

9.5.1. There were 6 self- administered pension funds receiving contributions in US$ as at the reporting date. All the 6 Funds were under the administration of one Fund Administrator, Minerva Benefits Consulting.

9.5.2. The total asset base for self- administered pension funds receiving contributions in US$ as at 30 September 2021 stood US$3.32 million.

9.5.3. The two major classes held by the funds were money market investments at US$1.1 million, cash at bank at US$0.931 million and contribution arrears at US$ 1.9 million.

9.5.4. As previously highlighted, the Commission will engage the fund to ensure that the contribution arrears are dealt with.

9.5.5. Total income of US$3.1million was realised for the period under review.

9.5.6. Total expenditure was US$0.38 million for the period ending 30 September 2021 and the administrative expenditure was US$0.18 million.

10. Stand-Alone Pension Funds

10.1. **Overview of Stand-Alone Funds Sector**

10.1.1. The number of Stand-alone funds for the quarter ending 30 September 2021 remained unchanged at 15.

10.2. **Membership**

10.2.1. Total membership (excluding beneficiaries) for stand-alone pension funds increased by 0.69 % from 411,647, members as at 30 September 2020, to 414,516 members as at 30 September 2021.

10.2.2. The distribution of membership by class as at 30 September 2020 and 30 September 2021 is shown in the table below. The marginal increase in membership is mainly attributable to new members joining the pension schemes during the period under review.

Table 12 : Membership Statistics for Stand-Alone Pension Funds

Membership Category	Q3 2021	Q3 2020
Membership category	Q3 2021	Q3 2020
New Entrants	4,794	2,381
Active members (excluding new entrants)	151,466	146,810
Pensioners (Excluding beneficiaries)	20,140	21,600
Deferred Pensioners	95,744	99,284
Suspended Pensioners (Excluding beneficiaries)	6,680	6,858
Unclaimed benefits (number)	135,662	134,284
Total membership Excluding Beneficiaries	414,516	411,647
Beneficiaries	20,947	20,845

10.3. **Asset Quality**

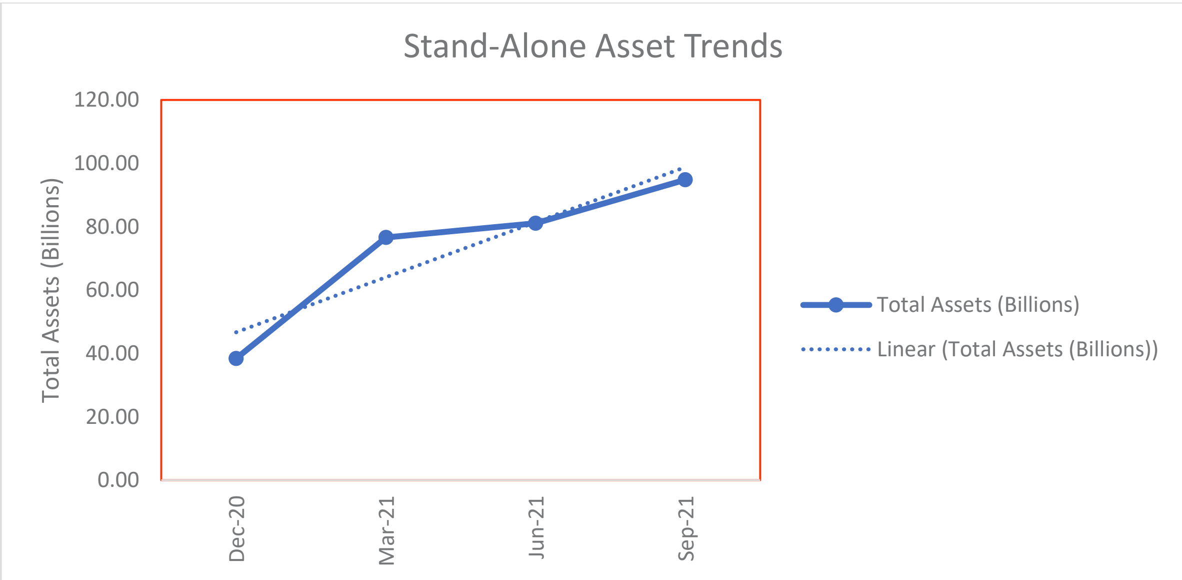
10.3.1. Stand-Alone pension funds' assets increased in nominal terms by 175.02% from ZW$34.47 billion as at 30 September 2020 to ZW$94.80 billion as at 30 September 2021.

10.3.2. The increase in the asset base was mainly attributed to investment property and quoted equities which increased by 91.14% and 406%, respectively.

10.3.3. There was a general shift towards investment in quoted equities over the period under review mainly due to their nature in tracking inflation and value preservation as compared to other investment classes.

10.3.4. The movements in assets for stand-alone funds is shown in Figure 17:

Figure 17: Distribution of Assets for Stand Alone Funds as at 30 September 2021



10.3.5. Investment in prescribed assets increased to ZW$650.5 million from ZW$407.4 million in the previous year. The share of prescribed assets to total stand-alone funds' assets declined to 0.69% from 0.91%.

10.3.6. The compliance rate was below the minimum threshold percentage of 20% because of continuous revaluation of investment property as well as an injection of more funds into stocks which happen to be the major value preserving asset classes at the moment.

10.3.7. Contribution arrears increased by 173.37% to ZW$2.6 billion from ZW$0.94 billion recorded as at 30 September 2020. The proportion of contribution arrears to total assets as at 30 September 2021 was 2.72%.

10.3.8. The Commission wishes to commend the Zimbabwe Electricity Industry Pension Fund which cleared its legacy contribution arrears.

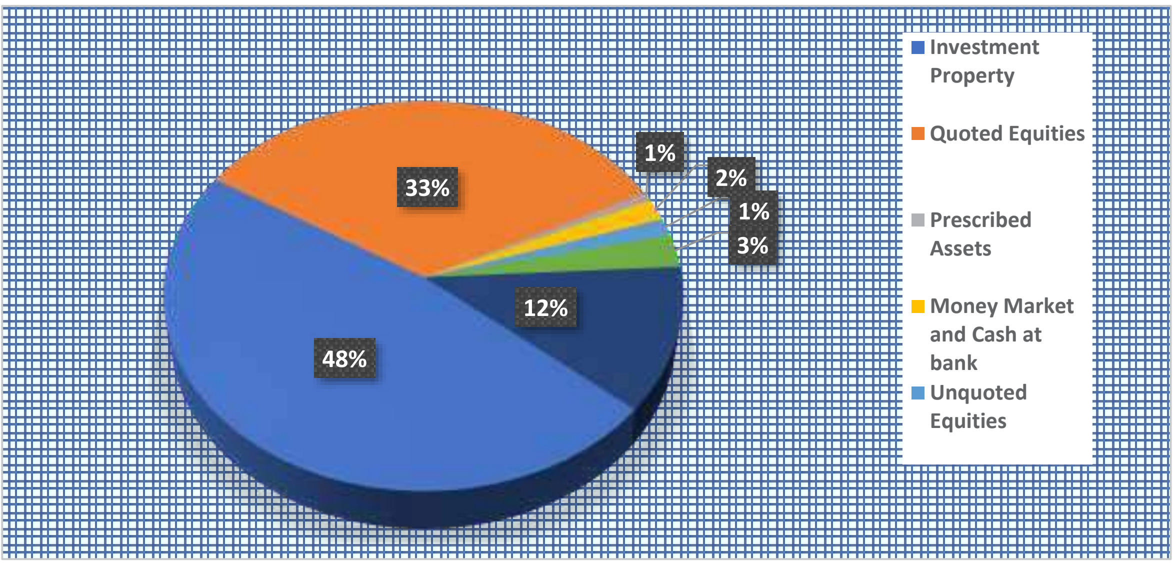
10.3.9. However, the proportion of contribution arrears to total assets for stand-alone funds remained the same because of late payment interests being levied on outstanding contributions in line with requirements of the Guidance Paper.

10.3.10. The Commission is concerned with sponsoring employers who continue to default on their obligations to the funds as this prejudices fund members in terms of forgone income from investment.

10.3.11. To address this, the Commission is engaging sponsoring employers to ensure that contribution arrears are cleared in the shortest possible time. The aim is to see every sponsoring employer up to date on contributions.

10.3.12. The distribution of the assets for the stand-alone funds is shown in the Figure below:

Figure 178: Distribution of Assets for Stand Alone Funds as at 30 September 2021



10.4. **Earnings**

10.4.1. Stand-alone pension funds reported surplus income over expenditure of ZW$28.4 billion for the quarter ending 30 September 2021, compared to ZW$18.57 billion reported the same period the previous year. Fair value gains accounted for 74.86% of the total income.

10.4.2. Contributions accounted for 14.58% of total income, while rental income and interest on arrears contributed 4.58% and 1.58%, respectively.

10.4.3. Total Expenditure for the period January to September 2021 amounted to ZW$3.3 billion. Of that amount, ZW$1.64 billion, accounting for 49.66%, was benefits payments.

10.4.4. Administration expenses for the period under review, which amounted to ZW$1.66 billion, were mainly driven by staff costs, provision for bad debts and property expenses that accounted for 26.07%, 24.59% and 14.80% respectively.

10.4.5. Stand-alone pension funds' total expenditure amounted to ZW$ 3.3 billion for the quarter ending 30 September 2021. Pension benefits accounted for 49.66% of the total expenses. The administration expenses were 35.90% of contributions, 5.23% of total income and 22.70% of realised income

10.5. **Liabilities**

10.5.1. Arrear pension benefits increased by 1,247% from ZW$35.1 million as at 30 September 2020 to ZW$472.9 million as at 30 September 2021. On the other hand, unclaimed benefits increased by 7,438.24% from ZW$26.8 million as at 30 September 2020 to ZW$2.03 billion as at 30 September 2021.

10.5.2. Continuous growth of unclaimed benefits remains a great concern to the Commission and administrators are urged to improve on their Know Your Customer (KYC) requirements so that members can be contacted to get their pension benefits.

10.5.3. Furthermore, funds with high unclaimed benefits are urged to comply with requirements for remittance to the Guardian Fund and institute measures to trace beneficiaries.

10.6. **Forex Business**

10.6.1. As at 30 September 2021, there were 2 stand-alone funds receiving contributions in US$.

10.6.2. The forex asset base for these funds amounted to USD$3.92 million. The major asset classes for the funds' portfolio were money market (US$2.95 million) and cash at bank at US$0.43 million.

10.6.3. Total income received by these funds for the period January to September 2021 amounted to US$3.67 million. The income was mainly driven by contributions (US$3.61 million) and dividends from investments of US$0.06 million.

10.6.4. Total expenditure for the same period stood at US$0.43 million, with benefits paid accounting for 49% of that total expenditure.

Annexure 1: Consolidated Industry Statement of Comprehensive Income
