BOARD OF DIRECTORS

The Commission had no board of directors in place during 2014.

31 December 2015

The Minister
Ministry of Finance and Economic Development
6th Floor E Block
New Government Complex
Samora Machel Avenue
HARARE

Attention: Honourable P. Chinamasa (MP)

Dear Sir,

I have the honour to submit, in terms of Section 70 of the Insurance Act [Chapter 24:07] my report for the year ended 31st December 2014. The report has been compiled by the Commission from returns lodged with it in terms of the Insurance Act [Chapter 24:07].

Yours faithfully

M. S. Mpofu
Commissioner of Insurance, Pension and Provident Funds

9. INDUSTRY CHALLENGES, REGULATORY INTERVENTIONS AND POLICY RECOMMENDATIONS	21
10.OUTLOOK	22
11.ACKNOWLEDGEMENTS.....	23
12.APPENDICES	24

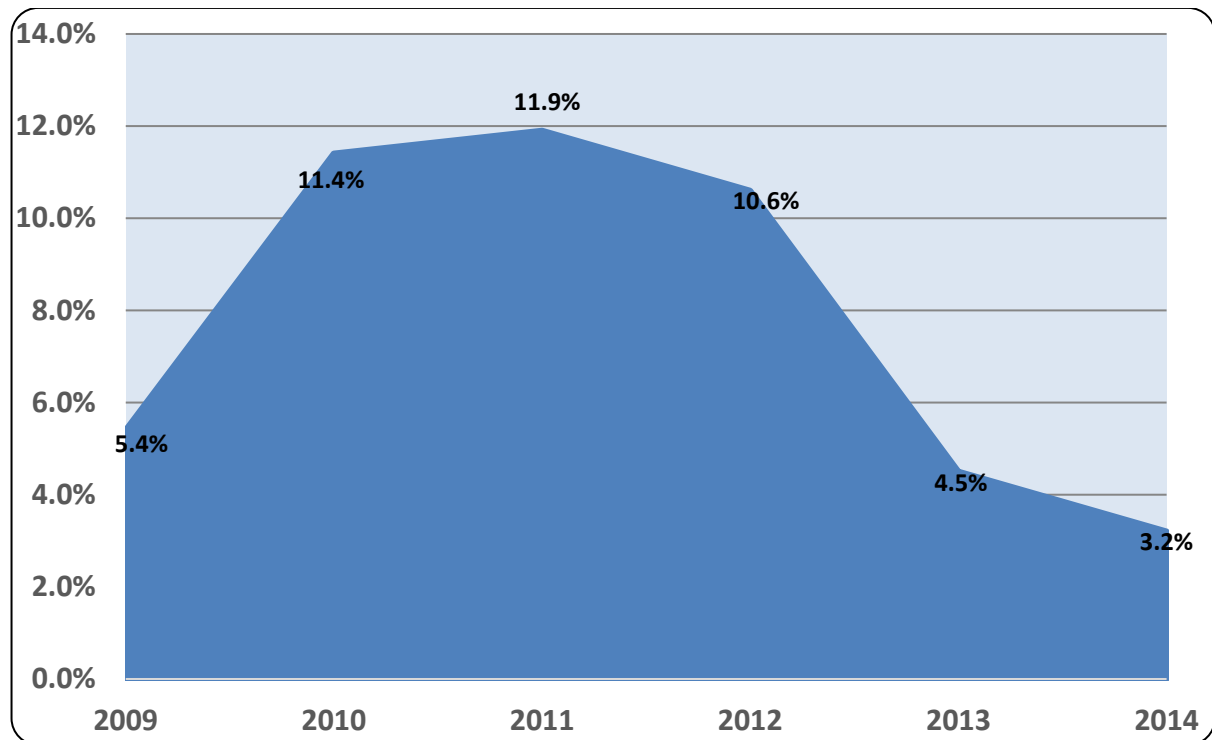

1. Preamble

- 1.1. The Commissioner of Insurance is required in accordance with Section 70 of the Insurance Act [Chapter 24:07], to submit an annual report pertaining to the performance of the insurance industry.
- 1.2. This report reviews the performance of the insurance industry during the year ended 31 December 2014.

2. Economic Overview

- 2.1. The real gross domestic product (GDP) for Zimbabwe was estimated at \$12.2 billion.
- 2.2. The Zimbabwean economy rebounded in 2009 on the back of the adoption of multiple currencies. The country's economic growth averaged 10.5% between 2009 & 2012 on account of improved macroeconomic conditions.
- 2.3. However, economic activity decelerated from 4.5% in 2013 to 3.2% in 2014 on account of emerging vulnerabilities and other structural challenges that included production constraints emanating from deteriorating infrastructure; power shortages; debt over-hang; and reduced foreign direct investment (FDI) and other foreign currency inflows.
- 2.4. The country experienced continued decline in industrial capacity utilization, increase in the informalization of the economy and reliance on imports of cheap finished goods, also contributed to the depressed GDP figures.
- 2.5. Figure 1 below depicts the economic activity trend from 2009.

Figure 1: GDP Growth Trend

3. Architecture of the Insurance Industry

- 3.1. The number of regulated entities, excluding loss assessors and agents, decreased from ninety three (93) as at 31 December 2013 to ninety two (92) as at 31 December 2014.
- 3.2. The breakdown of the number of entities per class of business is shown in Table 1 below and the list of these registered regulated entities is shown in Appendix 1.
- 3.3. The change in the number of registered entities was attributed to four non-life insurers and one non-life reinsurer deregistered during the year and four new registrations.
- 3.4. Agricultural Insurance Company (Private) Limited, Jupiter Insurance Company, SFG Insurance Company and Suremed Insurance Company are the non-life insurers that were deregistered on account of being inadequately capitalised.
- 3.5. New Horizon Reinsurance Company was deregistered as a result of the reinsurer's failure to operate, for a period in excess of one year after being licensed.

3.6. During the year, one life company was registered, namely Econet Life. There were also two insurance brokers that were registered, that is, Revival Insurance Brokers and Excel Risk Solutions. In addition, one reinsurance broker, Classical Reinsurance Company was licensed.

Table 1: Number of Regulated Entities

Class of Business	No. of Registered Entities		New registration/ deregistration	No. of Suspended/Non- Operational Entities
	31 Dec 2013	31 Dec 2014		31 Dec 2014
Non-life Insurance	29	25	-4	2
Non-life Reinsurance	10	9	-1	0
Life Assurance	10	11	+1	1
Funeral Assurance	9	9	0	0
Life Reassurance	2	2	0	0
Insurance Broking	29	31	+2	4
Reinsurance Broking	4	5	+1	1
Total	93	92	-1	8

3.7. As at 31 December 2014, two non-life insurers, one life assurer, four insurance brokers, one reinsurer, and one reinsurance broker were not operational as indicated in the table above.

3.8. During the year, Altfin Life Assurance Company was suspended from initiating new business after it was determined that the insurer was under capitalised and had serious corporate governance deficiencies.

- 3.9. Altfin Insurance Company, one of the insurers that was under suspension as at 31 December 2014, was subsequently deregistered on 7 January 2015 after the entity was determined to be insolvent and its shareholders failed to recapitalise it. The entity was eventually placed under voluntary liquidation.
- 3.10. Export Credit Guarantee Corporation (ECGC), the other non-life insurer that was under suspension as at 31 December 2014, at time of compiling this report, had resumed operations with its suspension lifted after the entity's successful recapitalisation.
- 3.11. Of the operational underwriters as at 31 December 2014, three insurers, namely Global Insurance Company, KMFS Insurance Company, Excellence Insurance Company and one reinsurance company namely New Reinsurance Company of Harare, at the time of writing this report, been suspended from initiating or renewing insurance business.
- 3.12. On the other hand, two (2) of the four (4) non-operating insurance brokers as at 31 December 2014 namely Revival Insurance Brokers and Cover link Insurance Brokers, had commenced operations as at the time of writing this report.
- 3.13. Navistar Insurance Brokers remained under suspension and is currently under voluntary judicial management, whilst Excel Risk Solutions voluntarily surrendered its licence for cancellation.

4. Performance of the Insurance Industry

Trend in the Volume of Business...

- 4.1. The insurance sector wrote business worth \$512.7 million in 2014, which was 7.6% higher than \$485.07 million gross premium reported in the previous year. Total business written was skewed towards insurance life business inclusive of funeral, which accounted for \$313.7 million that is 60% of the total gross premium written by insurers.
- 4.2. However, the level of business written by non-life reinsurers during the year was \$100.4 million, which was more than 10 times the business generated by life reinsurance companies. This is an indication that there is relatively less use of reinsurance arrangements by life companies as compared to non-life companies.

4.3. The gross premium written by the various classes of insurers during 2014 is shown in table 2 below.

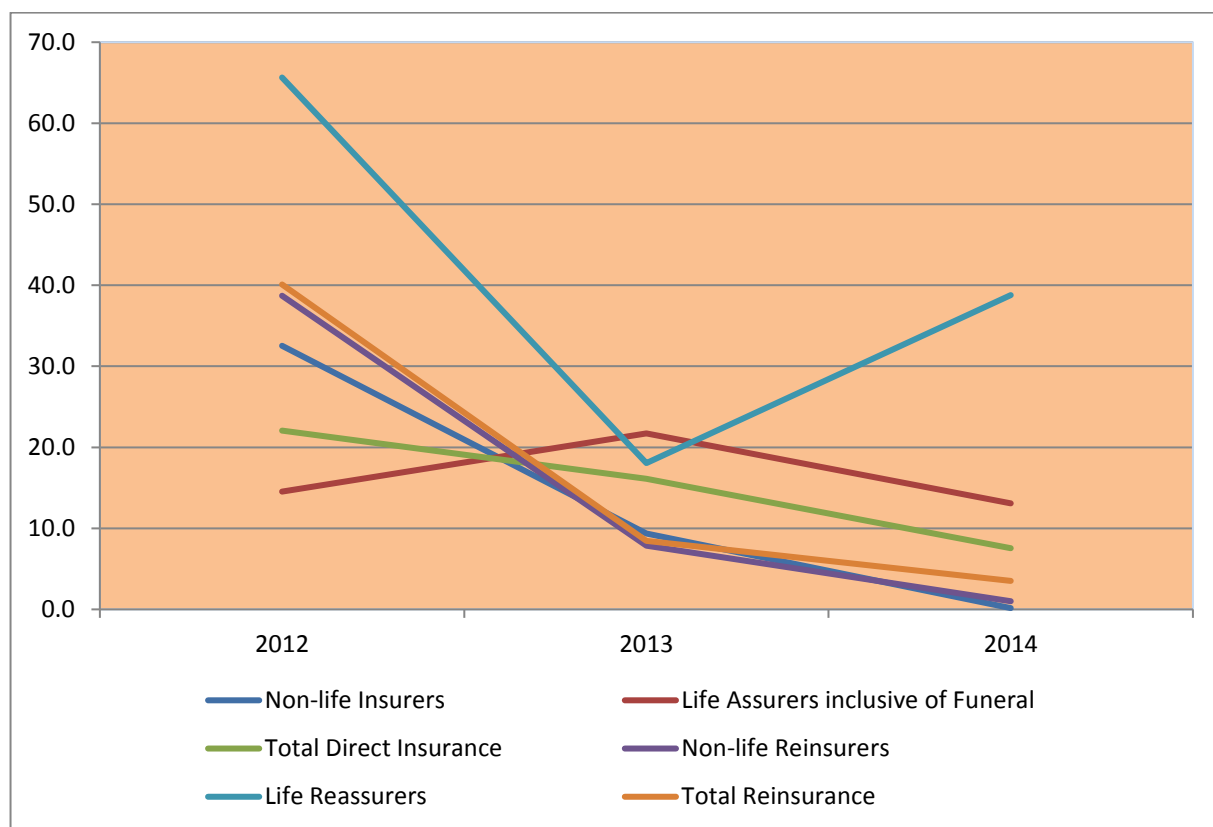

Table 2: Total Gross Premium

	USD Million				
Class of business	2010	2011	2012	2013	2014
Non-life Insurers	100.19	143.30	189.92	207.69	208.02
Life Assurers	85.02	161.82	169.58	199.90	280.66
Funeral Assurers	4.79	37.17	58.31	77.48	33.01
Total Direct Insurance	190.01	342.29	417.81	485.07	521.70
Non-life Reinsurers	27.04	66.43	92.14	99.38	100.38
Life Reassurers	3.24	3.61	5.98	7.06	9.80
Total Reinsurance	30.28	70.04	98.13	106.44	110.18

4.4. The growth trends experienced by the insurance sector since 2009, was a reflection of the performance of the economy. The rebound of the economy after dollarization saw the insurance industry experiencing phenomenal growth, peaking at 80.1% in 2010, in terms of gross premiums written by both life and non-insurance companies. However, since 2011 the sector has begun to experience receding growth, recording an overall growth rate of 22.1% in 2011 which ebbed to 7.6% by 2014. The slow growth of the sector was in response to the generally depressed performance of the national economy over the same period.

4.5. The business trends in the insurance business are depicted in figure 2 below.

Figure 2: Business Trend 2012 to 2014

5. Capitalisation

- 5.1. All registered insurers except for twelve, reported capital positions which were above the respective minimum regulatory capital requirement levels as at 31 December 2014 as shown in Table 3 below. This was an improvement as compared to 28 underwriters out 60 who were undercapitalized as at 31 December 2013.
- 5.2. The table below shows the level of compliance to minimum capital requirements for different classes of business.

Table 3: Compliance with Minimum Capital Requirements as at 31 December 2014

Class of Business	MCR (US\$)	Number Entities	Non-Compliant Entities
Non-life Insurance	1,500,000	25	6
Non-life Reinsurance	1,500,000	9	1
Life Assurance	2,000,0000	11	1
Funeral Assurance	1,500,000	9	4
Life Reassurance	1,500,000	2	1
Total		56	13

- 5.3. Table 4 below indicates the reported capitalization level reported by each of the registered underwriters. These reported capital levels, however were not discounted to account for non-admissible assets such as related party exposures and other factors as provided for in Circulars 1 and 2 of 2014. These circulars are aimed at improving the quality of capital underwriters may hold to support their insurance business.

Table 4: Reported Capitalization by each of the Registered Underwriter

Entity	Equity (USD million)		Entity	Equity (USD million)
Life Assurers			Non-Life Insurers*	
1. Altfin Life Assurance Company	355,575		1. Alliance Insurance Company	4,485,839
2. C.B.Z Life Limited	8,524,601		2. Allied Insurance Company	1,723,712
3. Econet Life Assurance	2,000,0000		3. Altfin Insurance Company	906,600
4. Evolution Life & Health Assurance Company	2,587,902		4. C.B.Z Insurance Company	2,127,248
5. Fidelity Life Assurance of Zimbabwe	11,945,573		5. Cell Insurance Company	394,480
6. First Mutual Life Assurance Company	68,501,447		6. Champions Insurance Company	1,900,067
7. Heritage Life Limited	2,403,424		7. Clarion Insurance Company	1,611,807
8. Nyaradzo Life	3,629,536		8. Credit Zimbabwe	2,993,631
9. Old Mutual Life Assurance Company Zimbabwe	137,491,525		9. Eagle Insurance Company	4,664,093
10. ZB Life Assurance Limited	16,962,381		10. Evolution Insurance Company	1,526,129
11. Zimnat Life Assurance Company Limited	14,437,035		11. Excellence Insurance Company	141,820
Funeral Assurers			12. Global Insurance Company	802,540
1. Cell Funeral Assurance Company	(21,336)		13. Hamilton Insurance Company	2,158,835
2. Doves Funeral Assurance Private Limited	9,020,185		14. Heritage Insurance Company	2,119,418
3. First Funeral Assurance Company (Private) Limited	5,039,025		15. KMFS Insurance Company	423,217
4. Foundation Mutual Society	1,644,992		16. Nicoz Diamond Insurance Company	10,822,503
5. Moonlight Provident Associates (Private) Limited	523,823		17. Old Mutual Insurance Company	14,608,218
6. Passion Funeral Assurance (Private) Limited	776,707		18. Quality Insurance Company	1,378,264
7. Sunset Funeral Assurance (Private) Limited	1,683,212		19. Regal Insurance Company	2,582,827
8. Ruvimbo Funeral Assurance (Private) Limited	1,776,146		20. Safel Insurance Company	1,607,434
9. Vineyard Funeral Assurance	1,237,911		21. Sanctuary Insurance Company	1,653,567
Non-Life Reinsurers			22. THI Insurance (Pvt) Ltd	5,163,901

1.	Baobab Reinsurance Company	26,648,670		23.	Tristar Insurance Company	1,533,628
2.	Colonnade Reinsurance Company	1,443,929		24.	Zimnat Lion Insurance Company	3,638,373
3.	FBC Reinsurance Company	10,272,398		Life Assurers		
4.	FMRE Property & Casualty	6,189,045		1.	Baobab Reinsurance Life & Health (Private) Limited	5,935,744
5.	Grand Reinsurance Company	9,806,817		2.	FMRE Life and Health (Private) Limited	1,115,857
6.	New Reinsurance Company	405,000				
7.	Tropical Reinsurance Company	3,635,764				
8.	ZB Reinsurance Company	8,370,397				
9.	Zep Re Country**					

*Export Credit Guarantee Corporation was finalizing recapitalization initiatives

**Please note that the figures for PTA Reinsurance Company (Zep-Re) contained in this report are only for the institution's Zimbabwean Country Office and not for the company as a whole. The country office writes business in Zimbabwe, Swaziland, Botswana, Namibia, and South Africa among others. PTA Reinsurance Company was formed under the auspices of COMESA and writes business in all COMESA member states. The Country Office is supported by the balance sheet of Zep-Re as a whole company. The figures for the country office are used in this report

- 5.4. Engagements with undercapitalized entities were ongoing, with the view of instituting the necessary regulatory measures that would ensure protection of policyholders.

The nature of the regulatory action taken by the Commission to address the failure to meet the minimum capital is also determined by other factors such as solvency margins, liquidity, assets quality and the ability to timely settle legitimate claims.

6. Assets

- 6.1. The total asset base of the insurance industry was \$1,858.43 million as at 31 December 2014, a 2% increase from the 2013 position. This was a slowdown compared to 16.7% asset growth experienced during 2013. The trend in growth was in tandem with the generally depressed economic performance of the country. There was however, a noted decrease of 39% in the total assets reported by funeral assurers, which was attributed to Nyaradzo's assets being recorded under life assurers after the company became a fully registered life office.

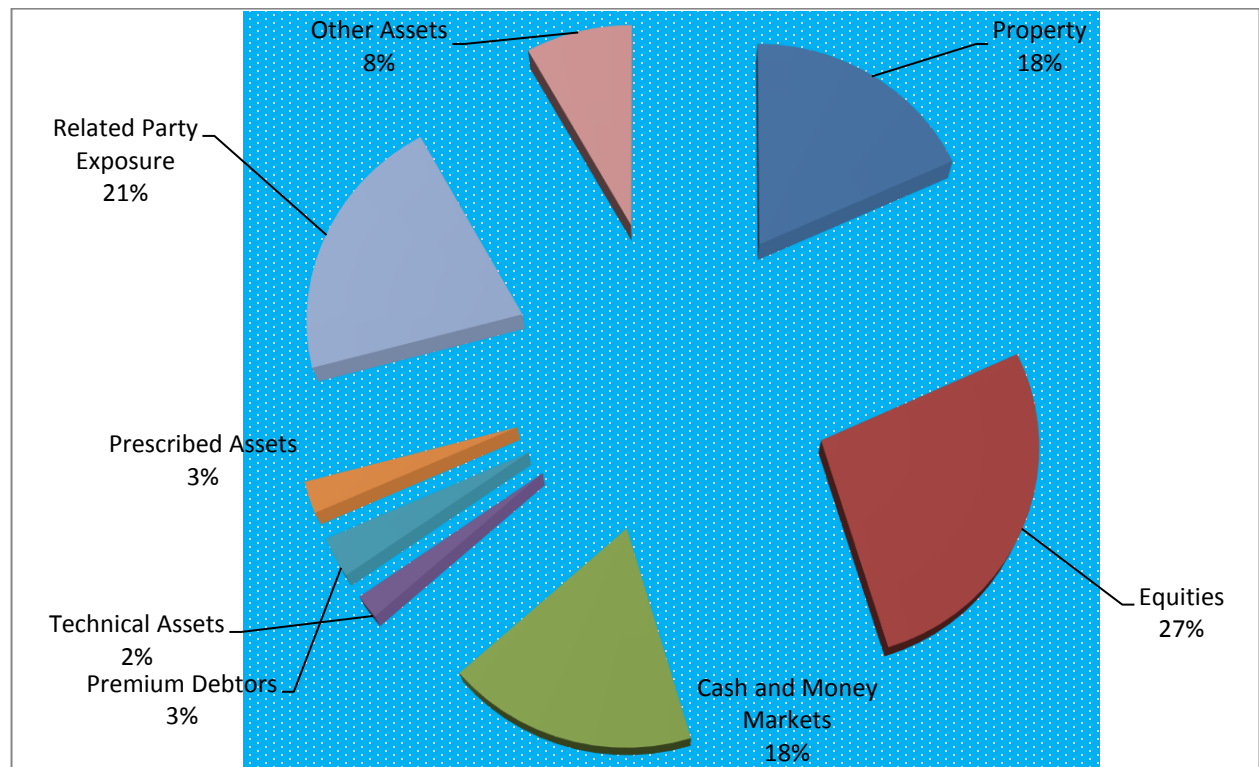

6.2. Table 5 below shows insurance assets under the different classes of business over the last three years.

Table 5: Assets per Class of Insurance Business

	USD Million			
Class of Business	31-Dec-12	31-Dec-13	31-Dec-14	Growth (%)
Non-life Insurance	145.47	163.56	179.66	9.85%
Non-life Reinsurance	116.82	121.14	119.12	-1.67%
Life Assurance	1,205.77	1,482.09	1,535.13	3.58%
Funeral Assurance	60.21	78.29	47.73	-39.04%
Life Reassurance	5.58	13.35	13.79	3.30%
Total	1,533.84	1,858.43	1,895.43	1.99%

- 6.3. Life assurance business inclusive of funeral and life reinsurance continues to be dominant, accounting for 84.2% of total assets as at 31 December 2014.
- 6.4. The total assets for the insurance industry as at 31 December 2014 were skewed towards equities (27%) and related party exposures (21%) mainly in the form of investments in subsidiary and associate companies. The structure of the assets for the industry is shown in figure 1 below.
- 6.5. The composition of an insurer's assets is a critical factor in determining the insurer's ability to match its liabilities to assets in order to timely meet obligations.

Figure 2: The Structure of Insurance Industry Assets as at 31 December 2014

- 6.6. In general, short term (non-life) insurers are expected to hold more liquid assets as compared to life companies and pension funds. This is due to the unpredictable nature of their business in that the frequency of claims settlement cannot be easily determined hence the need to have more liquid resources readily available.
- 6.7. On the other hand, life companies and pension funds' liabilities in general can relatively be predicted with ease and generally are long term in nature. The ideal asset mix for them is to hold less liquid assets and more long term investments such as properties and equities. However, the optimal asset mix of an insurer depends on its liability profile.
- 6.8. Most of the entities are not compliant with the provision of investment guidelines issued by the Commission.
- 6.9. The asset thresholds permitted under the various classes of assets in terms of Circulars 1 and 2 of 2013 for life assurers respectively and non- life companies are shown in table 7 below.

Table 7: Investment Holding Thresholds as per Guidelines

Asset Class	Upper Limit applicable to Life Assurers as per Circular 1 of 2013	Upper Limit applicable to Non-life Insurers as per Circular 2 of 2013
Prescribed Assets	40%	35%
Properties	50%	10%
Quoted Shares	50%	45%
Unquoted shares	10%	5%
Money Market	45%	70%
Cash	10%	20%
Other	10%	5%

6.10. The investment guidelines for the short term insurers are to be fully complied with by 31 December 2015, with those for life and pensions to be complied with by 31 March 2016 respectively.

6.11. The asset distributions for non-life insurers and life assurers including funeral assurers are depicted in figures 3 and 4 respectively.

Figure 3: Asset Structure for Non-Life Insurers as at 31 December 2014

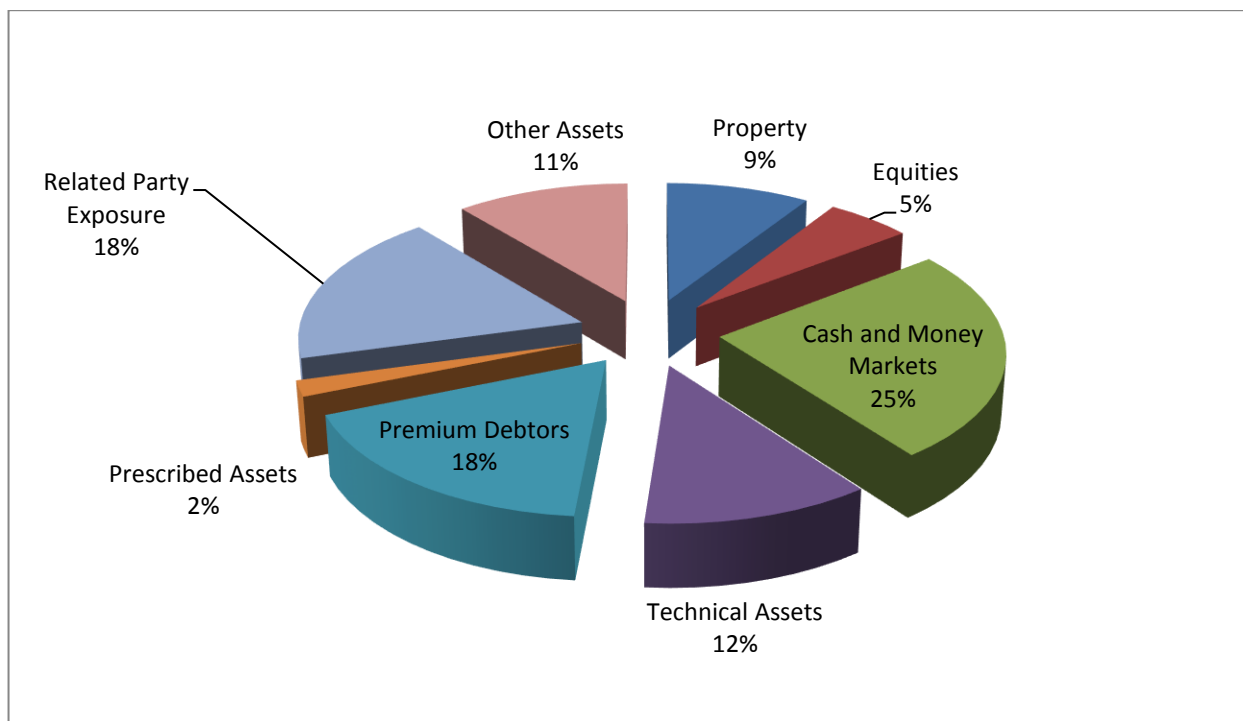

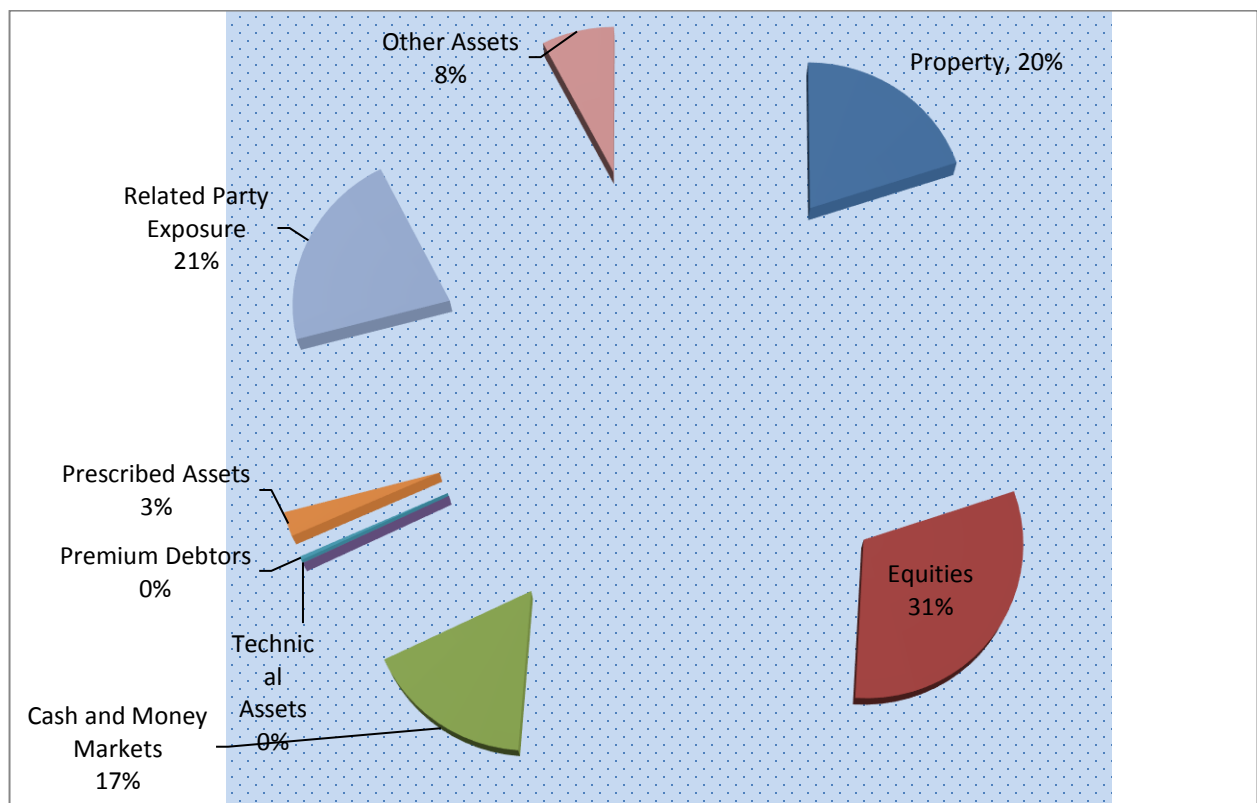

Figure 4: Asset Structure for Life Assures as at 31 December 2014

Compliance to Prescribed Asset...

6.12. The insurance industry recorded low compliance of 2% for nonlife companies and 3% for life companies to the minimum prescribed assets required against the 5% and 7.5% stipulated minimums respectively.

Insurance Premium and Contribution Arrears...

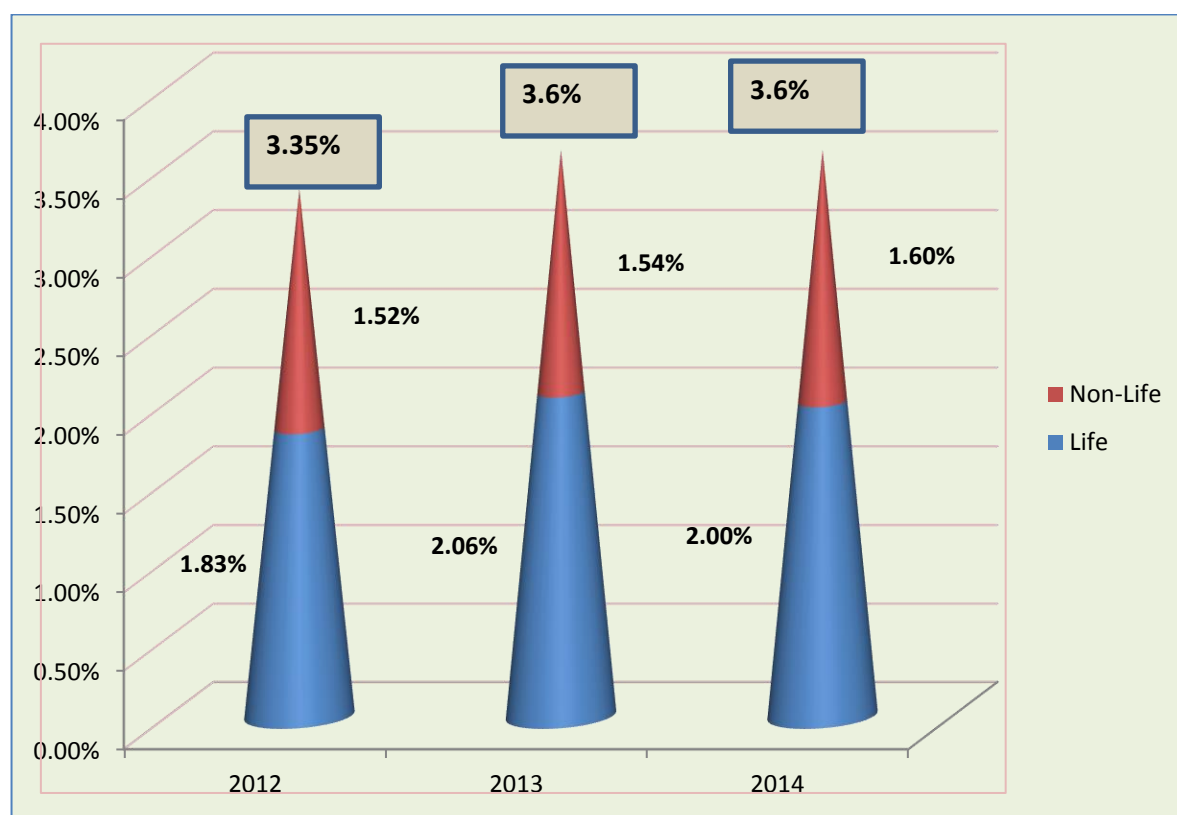

6.13. The quality of the industry's assets in particular, non-life is adversely affected by insurance premium debtors, which were 18% as at 31 December 2014.

6.14. The arrears phenomenon is a manifestation of the liquidity challenges that are bedevilling the economy including insurance and pensions business.

7. Insurance Penetration

- 7.1. The insurance penetration ratio, that is the percentage of gross premium written to the gross domestic product, remained constant at 3.6%, though the penetration ratio of non-life insurance increased by 0.06 percentage points with life insurance declining by the same magnitude.
- 7.2. Of the 11 African countries whose data was available as indicated in table 5, the Zimbabwe penetration ratio compares favourable to the average of 2.3% for these countries. However the penetration ratio is still well below the 14% for South Africa and the 6.8% world average as reported by Swiss Re in their Sigma No 4/2015.

Figure 1: Penetration Ratios for the Insurance Sector

- 7.3. It should however; be noted that the penetration ratio calculated in this report is an underestimation of the contribution of insurance business to the GDP as it does not take into account other insurance activities such as health insurance written by medical aid societies.
- 7.4. The regulation of these activities falls outside the ambit of the Commission.

Table 2: Insurance Penetration Ratios for Selected Countries in Africa

Country	Life Insurance	Non-Life Insurance	Overall
1. South Africa	11.4%	2.7%	14.0%
2. Namibia	5.0%	2.2%	7.2%
3. Mauritius	4.1%	1.9%	5.8%
4. Zimbabwe	2.0%	1.6%	3.6%
5. Kenya	1.0%	1.9%	2.9%
6. Morocco	1.1%	2.1%	3.2%
7. Tunisia	0.3%	1.5%	1.8%
8. Angola	0.0%	0.8%	0.8%
9. Algeria	0.0%	0.7%	0.7%
10. Egypt	0.3%	0.4%	0.7%
11. Nigeria	0.1%	0.2%	0.3%
Total	2.3%	1.5%	3.7%

Source: Swiss Re - Sigma 4/2015

8. Regulatory and Supervisory Developments

Registrations, Deregistrations and Suspensions...

- 8.1. The entities that were registered, deregistered or suspended are detailed above under section 3 of this report.

Regulatory Developments...

- 8.2. The Commission issued guidelines on the calculation of regulatory capital. The objectives of these guidelines (Circular 1 and 4 of 2014) are to:

- a) establish parameters for defining admissible and non-admissible assets;
- b) account for risks inherent in some assets e.g. discounting of unquoted equities; and
- c) ensure that insurers account for all insurance liabilities based on sound actuarial input

8.3. These guidelines will become fully effective by 31 December 2015.

9. Industry Challenges, Regulatory Interventions and Policy Recommendations

9.1. In addition to the liquidity and premium debtors as alluded to above, the insurance industry continue to face the following other challenges:.

Regulatory Capacity...

- 9.2. The Commission is not adequately capacitated to effectively regulate the insurance industry both in terms of financial and non-financial resources.
- 9.3. The appointment of the Board of directors for the Commission should be expedited so as to improve oversight of the Commission's operations.

Outdated Legal Framework...

- 9.4. Both the Insurance and Pension and Provident Funds Acts are out-dated. The process to review them in order to harmonise them in line with regional and international legislation is underway.
- 9.5. The review will also seek to minimize regulatory arbitrage in the Zimbabwean insurance sector by ensuring that all insurance activities are regulated by the Commission.
- 9.6. The Commission held a stakeholders workshop in August 2014, during which the Insurance and Pensions Commission, the Insurance and the Pension and Provident Funds Bills were reviewed as part of the consultation process in updating the legal framework.

Corporate Governance Challenges...

- 9.7. The industry continues to be devilled by poor corporate governance challenges emanating mainly from owner managed insurance entities, conflict of interest and related party transactions.

- 9.8. The Commission has noted with concern undesirable practices where some shareholders are using their insurance companies as cash-cows to fund their non-insurance business ventures at the expense of creating the necessary insurance pools (reserves), required to meet insurance claims as and when they arise.
- 9.9. The Commission will institute measures to review the maximum shareholding threshold for an individual and his or her close relatives as a way of curbing this malpractice.

Limited Investment Options and Liquidity Challenges...

- 9.10. Insurers have been largely investing in properties and equities as investment vehicles. There is need to increase investment instruments especially government bonds.
- 9.11. The development of capital markets is important especially in the form of listed bonds. There is need for capital market players to come with alternative tradable quoted financial instruments.
- 9.12. Tradability of financial instruments including prescribed assets will promote investment by market participants.

10. Outlook

- 10.1. Whilst the insurance industry generally follows the fortunes of the economy, there is an opportunity to increase insurance penetration through the development of appropriate legislation and innovativeness that allows tapping into the informal sector, which is currently driving the economy.

11. Acknowledgements

11.1. I wish to express my appreciation for the assistance from market players and their cooperation in producing this report.

11.2. Many thanks also go to the Commission staff and to our parent Ministry, the Ministry of Finance and Economic Development.

.....

M. S. Mpofu

Commissioner of Insurance, Pension and Provident Funds.
