List of Acronyms and Abbreviations

DAC	-	Deferred Acquisition Cost
GPW	-	Gross Premium Written
IBNR	-	Incurred But Not Reported
IPEC/Commission	-	Insurance and Pensions Commission
NEP	-	Net Earned Premium
NPW	-	Net Premium Written
O/S Claims	-	Outstanding Claims
ROA	-	Return on Assets
ROE	-	Return on Equity
UCR	-	Unearned Commission Reserve
UPR	-	Unearned Premium Reserve

Note: Unless stated otherwise, all monetary figures are in United States Dollars.

Executive Summary

This report details the performance of the non-life insurance sector during the quarter ended 31 December 2015. The number of registered players, including insurance agents and loss assessors, increased from 597 as at 30 September 2015 to 609 as at 31 December 2015. Non-life insurers reported total gross premium written (GPW) amounting to \$214.71 million for the year ended 31 December 2015 compared to audited GPW of \$208.02 million reported for the year ended 31 December 2014. Gross premium written amounting to \$92.77 million was generated through insurance brokers. On the other hand, the business written by reinsurers increased from \$100.38 million for the year ended 31 December 2014 to \$103.83 million for the year under review. Reinsurance brokers generated business worth \$70.12 million on behalf of reinsurers. Motor and fire insurance remained the dominant classes of insurance in the non-life insurance sector. All operating underwriters reported capital positions which were compliant with the regulatory minimum capital requirement of \$1.5 million as at 31 December 2015. The asset base for the insurance industry increased marginally from \$343.60 million as at 30 September 2015 to \$371.12 million as at 31 December 2015. The industry average prescribed assets ratio for non-life insurers was 7.25% as at 31 December 2015 which was above the minimum requirement of 5%. However, only five (5) insurers out of the twenty one (21) operating insurers were compliant with the minimum prescribed asset ratio. Non-life reinsurers, on the other hand, made significant strides towards investing in prescribed assets with the industry average prescribed assets ratio of 8.90% as at 31 December 2015, up from 6.51% as at 30 September 2015. A total of five (5) out of the eight (8) registered reinsurers were compliant with the minimum prescribed assets ratio as at 31 December 2015. There were no significant changes in the risk appetite of both non-life insurers and reinsurers as evidenced by negligible changes in the industry average retention ratios. Profit after tax for direct insurance companies decreased from \$10.25 million for the year ended 31 December 2014 to \$4.62 million for the year under review mainly owing to an upsurge in net incurred claims. On the other hand, reinsurers report total profit after tax of \$3.94 million for the year ended 31 December 2015, up from \$402,573 reported for the year ended 31 December 2014. The increase in profit after tax for reinsurers was on the back of increased business volume coupled with a decrease in net incurred claims.

1. Architecture of the Non-Life Insurance Industry

As at 31 December 2015, there were six hundred and nine (609) registered entities/persons in the non-life insurance industry, detailed breakdown of which is shown in Table 1 below.

Table 1: Architecture of the Non-life Insurance Industry

Type of Institution	Number of Registered Entities/Persons			Number of Suspended/ Non-Operating Entities
	30 Jun 15	30 Sep 15	31 Dec 15	31 Dec 15
Insurance Companies	24	24	24	3
Reinsurance Companies	9	9	9	1
Insurance Brokers	32	32	31	2
Reinsurance Brokers	5	6	6	-
Loss Assessors	21	22	22	-
Corporate Agents	118	122	128	-
Sole Agents	382	382	389	-
Total	591	597	609	6

The three insurance companies that were suspended from initiating and renewing business are Excellence Insurance Company, Global Insurance Company and KMFS Insurance Company. On the other hand, New Reinsurance Company was the only reinsurer that was under suspension as at 31 December 2015. The Commission is monitoring recapitalization efforts by Excellence Insurance Company. KMFS Insurance Company has appealed against the Commission's proposal to cancel its registration and the case is awaiting determination by the Minister of Finance and Economic Development.

SECTION A

2. SHORT-TERM (NON-LIFE) INSURANCE COMPANIES

Please note that the analysis of performance of the non-life insurance sector does not include statistics for companies which were under suspension as at the reporting date. Appendix 1A-C has detailed statistics for all the non-life insurers.

2.1. Performance in Terms of Business Written

The non-life insurance industry witnessed a 3.21% growth in terms of Gross Premium Written (GPW) from \$208.02 million for the year ended 31 December 2014 to \$214.71 million for the year ended 31 December 2015. Figure 1 below shows that whilst the non-life insurance sector witnessed growth since 2010, the same growth rate has been growing at a declining rate. A similar trend was witnessed on the volume of business retained by insurers as depicted by Net Premium Written (NPW) in the diagram below.

Figure 1: Trend in Business Written Since 2010

Health and farming recorded the highest percentage reduction in gross premium while hire purchase and bonds reported the highest percentage growths in GPW. The changes in the total gross premium written in different classes of business are shown in Table 2 below.

Table 2: Non-life Insurers' Gross Premium Written by Class of Business

Class of Business	Gross Premium Written (\$)		Percentage Change
	31 Dec 2014	31 Dec 2015	
Aviation	3,175,831	3,004,716	-5.39%
Bonds/Guarantee	10,013,419	11,434,520	14.19%
Engineering	10,570,849	10,421,805	-1.41%
Farming	3,305,430	2,340,712	-29.19%
Fire	45,479,567	46,540,727	2.33%
Hail	4,905,861	4,254,597	-13.28%
Health	406,771	265,079	-34.83%
Hire Purchase	1,560,036	1,924,196	23.34%
Marine	6,145,269	5,851,883	-4.77%
Miscellaneous Accident	16,159,955	17,881,754	10.65%
Motor	90,021,619	85,735,425	-4.76%
Personal Accident	20,241,739	22,078,520	9.07%
Personal Liability	2,928,522	2,972,230	1.49%
Total	214,914,868	214,706,164	-0.10%

*(Note that figures for 2014 in Table 2 are unaudited, hence different Total GPW from that in Figure 1 above).

There were no significant changes in the distribution of business generated by non-life insurers with fire and motor insurance remaining the major sources of business. The two business classes accounted for a total of 61.61% of total gross premium written. Figure 2 below shows the distribution of total gross premium written by non-life insurers for the year under review across different business classes.

Figure 2: Distribution of Insurers' Gross Premium Written by Business Class

2.2. Insurance Penetration and Density

The contribution of the non-life insurance industry to the country's GDP increased marginally as evidenced by the rise in the penetration ratio from 1.47% for the year ended 31 December 2014 to 1.52% for the year ended 31 December 2015.

In tandem with the increased penetration ratio, the average per capita spending on non-life insurance (non-life insurance density) increased from \$15.24 for the year ended 31 December 2014 to \$15.40 for the year ended 31 December 2015. Table 3 below shows the statistics relating to non-life insurance penetration and density since 2012.

Table 3: Non-life Insurance Penetration Ratio and Insurance Density

	2012	2013	2014	2015
Gross Premium Written	\$189.92 million	\$207.69 million	\$208.02 million	\$214.71 million
GDP at Market Prices*	\$12.39 billion	\$13.49 billion	\$14.20 billion	\$14.17 billion
Population*	13,061,269	13,368,620	13,652,297	13,943,242
Penetration Ratio	1.53%	1.54%	1.47%	1.52%
Insurance Density	\$14.54	\$15.54	\$15.24	\$15.40

*Source: Ministry of Finance and Economic Development

**Source: Zimstat - Population Projections Thematic Report

2.3. Capitalization

As at 31 December 2015, all the operating non-life insurance companies reported capital positions which were compliant with the minimum capital requirement of \$1.5 million. Table 3 below shows the capital positions reported by all operational non-life insurers. However, going forward the Commission will be assessing compliance to minimum capital requirements subject to consideration of permissible assets as shall be defined in a Statutory Instrument that the Commission will gazette in due course. The minimum capital requirements have since been increased to \$2.5 million and implementation of the same will be phased.

All non-life insurance companies reported solvency margins which were above the prescribed minimum of 25% as at 31 December 2015. The industry average solvency margin for direct non-life insurers improved from 65.22% as at 30 September 2015 to 70.36% as at 31 December 2015. Appendix 1C shows performance indicators in respect of capital for all insurance companies.

Table 4: Reported Capital Positions for Non-life Insurers

Name of Insurance Company	Reported Capital Position (\$)			
	31-Dec-14	30-Jun-15	30-Sep-15	31 Dec-15
1. Alliance Insurance Company	4,485,839	5,024,055	4,964,481	5,284,413
2. Allied Insurance Company	1,723,713	1,742,192	1,681,491	1,656,247
3. C.B.Z Insurance Company	2,127,248	3,640,069	3,965,527	4,210,147
4. Cell Insurance Company	394,480	850,638	1,543,467	1,501,238
5. Champions Insurance Company	1,900,067	2,416,845	2,276,228	2,154,603
6. Clarion Insurance Company	1,611,807	1,792,888	1,556,020	1,682,230

8. Eagle Insurance Company	4,664,093	5,080,612	3,297,739	5,799,232
9. Evolution Insurance Company	1,526,129	1,668,492	1,650,819	1,755,713
10. ECGC	-	-	2,246,894	2,391,326
11. Hamilton Insurance Company	2,152,955	2,203,848	2,315,205	2,174,021
12. Heritage Insurance Company	2,119,418	2,404,976	2,206,125	2,273,837
13. Nicoz Diamond Insurance Company	10,822,503	10,898,000	10,914,000	11,149,430

Name of Insurance Company	Reported Capital Position (\$)			
	31-Dec-14	30-Jun-15	30-Sep-15	31 Dec-15
14. Old Mutual Insurance Company	14,433,261	16,393,889	18,009,265	18,060,853
15. Quality Insurance Company	1,500,000	1,327,000	1,178,000	1,675,000
16. Regal Insurance Company	2,857,897	2,979,842	2,752,143	2,818,931
17. Safel Insurance Company	1,607,434	1,736,989	1,645,492	1,753,874
18. Sanctuary Insurance Company	1,653,567	1,806,175	1,726,699	1,665,088
19. THI Insurance (Pvt) Ltd	4,832,078	3,931,315	1,781,034	1,830,717
20. Tristar Insurance Company	1,533,628	1,032,741	734,056	2,549,386
21. Zimnat Lion Insurance Company	4,713,426	5,237,314	5,330,414	6,668,371

Key:

	The insurer reported a capital position that was compliant with the minimum capital requirement of \$1.5 million for non-life insurers.
	The insurer reported a capital position which was not compliant with the minimum capital requirement of \$1.5 million.

2.4. Asset Quality

The asset base for direct non-life insurers increased by 12.17% from \$172.91 million as at 30 September 2015 to \$193.95 million as at 31 December 2015. The increase in total assets was mainly driven by an upsurge in premium debtors as well as growing investments in prescribed assets which amounted to \$9.29 million and \$6.51 million respectively. The premium debtors were mainly accrued in tobacco insurance, which covers perils such as hail damage, where premiums are only collected in arrears at the end of the tobacco farming season.

The increase in investments in prescribed assets resulted in the non-life insurance industry recording an industry average prescribed assets ratio of 7.25% as shown in Figure 4 below, which was compliant with the minimum requirement of 5%, up from 1.27% reported as at 30 September 2015. However, the Commission has noted with concern that, notwithstanding the compliance reported at industry level, only five out of the twenty four registered insurers were compliant with the same requirement and seven had no prescribed assets at all. The Commission will take necessary regulatory action to ensure compliance on an ongoing basis.

Figure 3: Trend in Total Assets

Total assets for non-life insurers as at 31 December 2015 were considered moderately concentrated across different asset classes as shown in Figure 4 below. Cash and cash equivalents, premium debtors and fixed assets were the major asset classes accounting for a total of 63.08% of total assets as at 31 December 2015.

In a bid to improve the alignment of the profile of total assets of the non-life insurers with that of their liabilities, the Commission encourages insurers to devise strategies that will see more assets being in the form of cash and cash equivalents and less assets being in form of asset classes such as premium debtors, investments in associated companies and fixed assets. This will go a long way in ensuring that insurers timely meet their obligations, especially to policyholders. In addition, this drift in asset allocation will also help insurers to comply with Circular 2 of 2013 which became effective on 1 January 2016.

Figure 4: Distribution Non-life Insurers' Total Assets

NB: Technical assets refer to reinsurers' share of outstanding claims and deferred acquisition cost.

2.5. Reinsurance

The non-life insurance sector reported negligible changes in their risk appetite. This is evidenced by insignificant changes in the retention ratio from 55.61% for the year ended 31 December 2014 to 55.64% for the year ended 31 December 2015. The retention ratio for individual insurers for the period under review ranged from 24.39% to 99.38% as shown in Figure 5 below.

Health and motor insurance remained the business classes with the highest retention ratios. On the other hand, aviation and engineering insurance remained the classes with the lowest retention ratios mainly owing to limited capacity to withstand possible huge losses from the same business classes. Figure 6 below shows retention by class of business.

The performance of insurers in respect of reinsurance premium remittances deteriorated marginally as evidenced by the increase in industry average reinsurance creditors to reinsurance premium ratio from 25.44% for the year ended 31 December 2014 to 28.06% for the year under review. Notwithstanding the relatively low industry average reinsurance creditors to reinsurance premium ratio, some insurers reported significant reinsurance premium arrears. This compromises reinsurance arrangements for effective spread of risk by the respective insurers.

Figure 5: Retention Ratios for Short Term Insurance Companies

Figure 6: Non-life Insurers' Average Retention Ratios for Different Classes of Business

2.6. Actuarial Matters

Total technical liabilities for non-life insurers amounted to \$51.84 million as at 31 December 2015 compared to \$47.19 million that was reported as at 30 September 2015. The reserves were skewed towards Unearned Premium Reserves (UPR) which amounted to \$26.47 million and accounted for 51.06% of total technical liabilities while the balance was made up of both reported and not reported outstanding claims.

The non-life direct insurance industry was considered to be having adequate assets to match technical liabilities. This is evidenced by the ratio of short term investment assets to total reserves which was 123.37% as at 31 December 2015. The industry average short term investments to reserves ratio indicates that the industry as a whole, generally has adequate assets to match technical liabilities. However, the total short term investments to total reserves ratio for individual insurers ranged from 2.93% to 3,279.77% which implies that some insurers may not be having adequate assets to match their liabilities. (See Appendix 1C).

2.7. Earnings

Non-life insurers reported a 54.94% decrease in total profit after tax from \$10.25 million for the year ended 31 December 2014 to \$4.62 million for the year ended 31 December 2015. The decrease in total profit after tax was mainly attributable to an upsurge in net incurred claims as well as unrealized losses in investments which amounted to \$5.60 million and \$1.84 million respectively. The increase in unrealized losses can be explained by the poor performance of the financial markets during the year under review. The industry average return on assets (ROA) and return on equity of (ROE) deteriorated from 5.73% and 13.16% for the year ended 31 December 2014 to 2.54% and 5.78% respectively, for the year under review.

As shown in table 4 below, health insurance, hire purchase and motor insurance recorded loss plus commission ratios during the year under review. However, apart from motor insurance, these business classes account for insignificant volumes of total gross premium written hence their loss ratios and or commission ratios do not have a significant impact on the overall profitability of the insurer.

Table 5: Loss Ratios by Class of Business for Short Term Insurers

Business Class	Loss Ratio	Net Commission Ratio	Loss + Commission Ratio
Health	8.27%	69.72%	77.99%
Hire Purchase	45.26%	21.66%	66.92%
Motor	54.59%	7.39%	61.98%
Hail	76.76%	-16.00%	60.76%
Personal Accident	36.99%	10.56%	47.55%
Miscellaneous Accident	21.79%	23.11%	44.90%
Personal Liability	32.20%	11.58%	43.78%
Engineering	42.68%	-4.68%	38.00%
Fire	36.03%	0.86%	36.89%
Farming	25.69%	-6.45%	19.24%
Marine	6.77%	11.59%	18.36%
Bonds/Guarantees	7.51%	4.12%	11.63%
Aviation	4.00%	-137.87%	-133.87%
Industry Average	44.54%	7.64%	52.18%

The income generated from investments to supplement underwriting income remained low as evidenced by the deterioration in investment income to net premium ratio from 3.50% reported for the year ended 31 December 2014 to 1.70% for the period under review. The low investment income to net premium written ratio may put pressure to the profitability of the sector. This position was also exacerbated by deteriorating underwriting performance which translated into the combined ratio increasing from 92.85% for the year ended 31 December 2014 to 97.34% for the period under review. The increase in the combined ratio was mainly owing to the deterioration in loss ratio from 40.74% to 44.54%.

2.8. Liquidity

The non-life insurance industry witnessed an increase in total cash and near cash assets during the quarter under review from \$52.70 million as at 30 September 2015 to \$63.95 million as at 31 December 2015. The growth in cash and near cash assets was mainly driven by an increased uptake of prescribed assets.

The increase in cash and cash equivalents translated into an improvement in the acid test ratio from 61.86% as at 30 September 2015 to 65.12% as at 31 December 2015. The acid test ratio measures the amount of readily available liquid assets vis-à-vis the current liabilities. The acid test ratio for individual insurers as at 31 December 2015 ranged from 1.69% to 863.62%. See Appendix 1C for the liquidity indicators of each insurer.

2.9. Market Share for Non-life Insurers

The market for non-life insurers was considered moderately concentrated based on business written during the year under review. The non-life insurance market recorded Herfindahl Indices of 0.11 and 0.12 in terms of Gross Premium Written (GPW) and Net Premium Written (NPW) respectively. The market leaders in terms of business written were Old Mutual Insurance Company, Alliance Insurance Company and Nicoz Diamond Insurance Company as shown in Figure 7 below with a combined market share of 45.53% and 48.56% in terms GPW and NPW respectively.

Figure 7: Market Share for Insurers in Terms of GPW and NPW

The same insurers were also market leaders in terms of total assets as at 31 December 2015 as shown in Figure 8 below. The market shares for all insurers are shown in Appendix 1C.

Figure 8: Market Share for Insurers in Terms of Total Assets

SECTION B

3. REINSURANCE COMPANIES

Please note that the figures for PTA Reinsurance Company (Zep-Re) contained in this report are only for the institution's Regional Hub Office located in Zimbabwe and not for the company as a whole. The Regional Hub Office writes business in Zimbabwe, Swaziland, Botswana, Namibia, and South Africa among others. PTA Reinsurance Company was formed under the auspices of COMESA and writes business in all COMESA member states. The Regional Hub Office is supported by the balance sheet of Zep-Re as a whole. Detailed statistics for all reinsurers are shown in Appendix 2A-C.

3.1. Performance in Terms of Business Written

Total gross premium written (GPW) by non-life reinsurers increased by 3.44% from \$100.38 million for the year ended 31 December 2014 to \$103.83 million for the year ended 31 December 2015. The increase in total GPW was mainly attributed to the growth in business generated from engineering insurance during the year under review which amounted to \$5.04 million.

Non-life reinsurers generated GPW amounting to \$89.95 million from the local market during the year under review. This amount was significantly below the reinsurance premium of \$95.24 million reported by direct non-life insurers. Such a discrepancy may be attributable to non-life insurers placing business outside Zimbabwe without going through local reinsurers. Insurers are urged to ensure compliance with section 72 of the Insurance Act [Chapter 24:07] by seeking the necessary approvals from the Commission prior to placement of insurance business offshore.

Figure 9: Trend in Business Written Since 2010

Personal Liability and engineering reinsurance recorded the highest growth in terms of GPW for the period under review. Table 6 below shows the growth recorded in different classes of business.

Table 6: Reinsurers' Gross Premium Written by Class of Business

Class of Business	Gross Premium Written (\$)		Percentage Change
	31 December 2014	31 December 2015	
Aviation	1,006,062	1,042,320	3.60%
Bonds/Guarantee	1,472,644	842,606	-42.78%
Engineering	3,890,119	8,934,146	129.66%
Farming	8,432,057	8,822,344	4.63%
Fire	41,285,503	41,273,901	-0.03%
Hail	1,677,460	1,747,910	4.20%
Health	897,566	329,956	-63.24%
Hire Purchase	85,540	120,556	40.94%
Marine	2,412,597	3,621,893	50.12%
Miscellaneous Accident	12,957,591	11,092,742	-14.39%
Motor	19,865,526	16,365,617	-17.62%
Personal Accident	6,276,564	6,562,481	4.56%
Personal Liability	944,329	3,069,286	225.02%
Total	101,203,558	103,825,758	2.59%

*(Note that figures for 2014 in Table 6 are unaudited, hence different Total GPW from that in Figure 9 above).

Fire and motor were the largest source of business for reinsurers and the two business classes accounted for 39.75% and 15.76% of total gross premium written during the year under review respectively. Generally fire insurance business is characterized by low frequency but high severity claims hence insurers usually pass on this risk to reinsurers. Figure 10 below shows the distribution of gross premium written for the year under review across different classes of business.

Figure 10: Distribution of Reinsurers' GPW by Business Class

3.2. Capitalization

All operational non-life reinsurers were compliant with the minimum capital requirement of \$1.5 million, stipulated in Statutory Instrument 21 of 2013, as at 31 December 2015. However, some reinsurers may not be compliant with the minimum capital requirements once the Commission commences applying Circular 1 of 2014 which provides for permissible assets as well as minimum provisions which should be made by reinsurers for the determination of capital. Table 7 below shows capital positions for all reinsurance companies.

As announced by the Minister of Finance and Economic Development in the 2016 Budget Statement the minimum capital requirements for reinsurers was reviewed to \$5 million and the Commission will soon gazette a statutory instrument to operationalize the new requirements.

The industry average solvency margin for non-life reinsurers was 108.20% as at 31 December 2015 which was significantly above the minimum requirement of 25%. The solvency margin for individual reinsurers ranged from 37.54% to 435.23%. See Appendix 2C for more information.

Table 7: Capital Positions for Non-life Reinsurers

Name of Company	Reported Capital Position (\$)			
	31 Dec 14	30 Jun 15	30 Sep 15	31 Dec 15
1. Baobab Reinsurance Company	26,648,670	30,617,357	32,409,344	30,798,757
2. Colonnade Reinsurance Company	1,443,929	2,078,059	2,121,168	1,715,446
3. FBC Reinsurance Company	10,272,398	11,080,697	11,022,630	11,843,893
4. FMRE Property & Casualty	6,189,045	6,262,748	6,142,739	6,902,717
5. Grand Reinsurance Company	9,806,817	10,288,856	10,400,588	13,150,970
6. Tropical Reinsurance Company	3,635,764	3,931,290	4,010,510	3,723,475
7. ZB Reinsurance Company	8,370,397	9,240,360	9,269,310	9,474,645
8. PTA Reinsurance Company (Zep Re)	1,233,794	2,898,862	3,530,448	3,504,129

Key:

	The reinsurer reported a capital position that was compliant with the then minimum capital requirement of \$1.5 million.
	The insurer reported a capital position which was not compliant with the then minimum capital requirement.

3.3. Asset Quality

Non-life reinsurers' total assets continued on an upward trend and increased by 2.56% from \$130.38 million as at 30 September 2015 to \$134.43 million as at 31 December 2015. The increase in total assets for reinsurers was largely driven by an upsurge in premium debtors (receivables), retrocessionaires' share of outstanding claims as well as improved uptake of prescribed assets which amounted to \$3.29 million, \$2.28 million and \$2.19 million respectively.

Growth that is driven by premium debtors may not be sustainable in the long run, given that some of the cash in lieu of the same debtors may not eventually be paid to the reinsurers. More so given the liquidity challenges currently being experienced in the economy.

Figure 11: Trend in Total Assets

Although the asset base of the non-life reinsurers was considered moderately concentrated in some asset classes as shown in figure 12 below, total assets tied up in investments in associated companies were considered too high and may compromise the ability of the reinsurance sector to appropriately match liabilities.

Figure 12: Breakdown of Non-life Reinsurers' Total Assets

Such a scenario is also exacerbated by the fact that the reinsurers write business on credit which resulted in premium debtors accounting for 16.86% of total assets as at 31 December 2015. Having a significant portion of assets tied up in premium debtors also implies that reinsurers may be losing on the income that they would have generated had the premiums been remitted and invested. The industry average prescribed asset ratio was 8.90% as at 31 December 2015. Only three reinsurers were not compliant with the minimum prescribed asset ratio of 5%. See Appendix 2C for more information.

3.4. Retrocession

The industry average retention ratio was 72.20% for the year ended 31 December 2015 compared to 71.21% that was reported for the year ended 31 December 2014. The insignificant changes reported in the industry average retention ratio indicate that the risk appetite for reinsurers remained largely the same. The retention ratios for individual reinsurers for the year under review ranged from 57.52% to 90.04% as shown in Figure 13 below.

Figure 13: Retention Ratios for Reinsurers

Unlike in the case of direct non-life insurers, non-life reinsurers were fairly current with their retrocession premium remittances. This is evidenced by the low industry average reinsurance creditors to reinsurance premiums which was 26% as at 31 December 2015 compared to 30.07% reported as at 31 December 2014. The same ratio for the sector ranged from nil to 234.09% as at 31 December 2015. (See Appendix 2C).

3.5. Actuarial Matters

Non-life reinsurers reported total technical liabilities amounting to \$29.75 million as at 30 December 2015 reflecting insignificant changes from \$29.88 million that was reported as at 30 September 2015. The largest proportion of total reserves was attributable to unearned premium reserves (UPR) which amounted to \$14.28 million and accounted for 48% of total technical liabilities.

The non-life reinsurance industry as a whole had adequate resources to match the technical liabilities as at 31 December 2015. This is evidenced by the industry average total liquid investments to reserves ratio of 201.64% that was reported as at 31 December 2015. Only one reinsurer reported a ratio which was below 100% implying that it may not be having adequate liquid assets to match reserves. (See Appendix 2C).

3.6. Earnings

Total profit after tax for non-life reinsurers increased from \$402,573 for the year ended 31 December 2014 to \$3.94 million for the year ended 31 December 2015. The increase in total profit after tax was mainly attributable to decreasing net claims incurred as well as growing investment income. The industry average return on equity (ROE) and return on assets (ROA) improved from 0.60% and 0.34% for the year ended 31 December 2014 to 5.30% and 3.12% respectively, for the year under review.

Underwriting was the major income driver for non-life reinsurers with investment income accounting for only 3.49% of net premium written during the year ended 31 December 2015. Whilst it is commendable that insurers are generating the bulk of their income from their core business, the investment generated relative to net premium written was considered too low to supplement underwriting income.

The decrease in net incurred claims, alluded to above, resulted in an improvement in the loss ratio from 45.12% for the year ended 31 December 2014 to 40.99% for the year under review. The improvement in the loss ratio resulted in the decrease in the combined ratio from 98.32% for the year ended 31 December 2014 to 97.34% for the year under review.

Health, bonds/guarantees and motor reinsurance reported the highest loss plus commission ratios during the year under review as shown in Table 8 below. On the other hand, personal liability, engineering and marine were the most profitable classes of business in terms of the loss plus commission ratios as shown in Table 8 below.

Table 8: Loss Ratios by Class of Business for Reinsurers

Business Class	Loss Ratio	Net Commission Ratio	Loss + Commission Ratio
Health	163.99%	9.81%	173.80%
Bonds/Guarantees	74.04%	52.76%	126.80%
Motor	74.05%	32.54%	106.59%
Farming	71.43%	31.97%	103.40%
Hail	50.70%	29.81%	80.51%
Aviation	47.42%	29.39%	76.81%
Miscellaneous Accident	44.67%	31.18%	75.85%
Personal Accident	40.94%	28.88%	69.82%
Hire Purchase	33.24%	28.36%	61.60%
Fire	26.91%	30.64%	57.55%
Marine	8.78%	29.48%	38.26%
Engineering	7.96%	15.42%	23.38%
Personal Liability	10.65%	11.21%	21.86%
Industry Average	40.99%	28.82%	69.81%

3.7. Liquidity

The amount of liquid assets held by non-life reinsurers remained largely the same with insignificant changes being recorded from \$43.64 million as at 30 September 2015 to \$43.66 million as at 31 December 2015. The non-life reinsurance industry remained overall strong in terms of liquidity. This is evidenced by the industry average acid test ratio of 96.31% which was reported as at 31 December 2015. The acid test ratio for individual reinsurers as at 31 December 2015 ranged from 41.61% to 248.62% (see Appendix 2C under Liquidity).

3.8. Market Share for Reinsurers

The non-life reinsurance industry recorded a Herfindahl Index of 0.15 in terms of both gross premium written and net premium written for the year ended 31 December 2015. As a result the Zimbabwean non-life reinsurance industry was therefore considered moderately concentrated. ZB Reinsurance Company, FMRE Property and Casualty, and FBC Reinsurance Company remained the market leaders in terms of both GPW and NPW with combined market shares of 56.34% and 55.63% respectively as shown in Figure 14 below.

Figure 14: Market Share for Reinsurers in Terms of GPW and NPW

Baobab Reinsurance Company, FBC Reinsurance Company and Grand Reinsurance Company remained the market leaders, in terms of total assets. These three reinsurers had a combined market share of 63.37% as at 31 December 2015. Figure 15 below shows the market share of all reinsurers in terms of total assets.

Figure 15: Market Share for Reinsurers in Terms of Total Assets

SECTION C

4. INSURANCE BROKERS

Please note that Alexander Forbes Risk Zimbabwe changed its name to WFDR Risk Services.

4.1 Business Written

Total premium written by insurance brokers increased from \$90.94 million for the year ended 31 December 2014 to \$92.77 million for year ended 31 December 2015. The total premium written by insurance brokers accounted for 43.21% of gross premium written by direct non-life insurers indicating that non-life insurers generated the bulk of their business from agents and clients who deal directly with them.

From the business generated by insurance brokers during the year under review, total net brokerage commission amounting to \$16.26 million was realized compared to \$15.12 million reported for the comparative period in 2014. The net brokerage commission realized translated into an industry average net brokerage commission of 17.52% for the year compared to 16.63% reported for the year ended 31 December 2014. Table 9 below shows the indicators of the business written by the insurance brokers.

Table 9: Indicators of Business Written for Insurance Brokers

Indicator	31 Dec 2014	31 Dec 2015	Percentage Change
Premium Written	90,938,692	92,770,029	2.01%
Brokerage Commission	16,079,262	16,888,199	5.03%
Premium Written Less Commission	74,859,431	75,881,829	1.37%
Commission Incurred	956,695	631,228	-34.02%
Net Brokerage Commission	15,122,566	16,256,971	7.50%
Other Income	1,526,416	1,067,573	-30.06%
Operating Expenses	15,272,305	15,699,831	2.80%
Profit Before Tax	1,376,677	1,624,713	18.02%
Taxation	380,255	417,674	9.84%
Profit After Tax	996,423	1,207,039	21.14%

Motor and fire insurance remained the dominant classes of business generated by insurance brokers. Figure 16 below shows the distribution of business in terms of total premium written.

Figure 16: Distribution of Insurance Brokers' Gross Premium Written by Business Class

4.2 Capitalization

Of all the registered insurance brokers, only Rainbow Insurance Brokers reported capital positions which was below \$100,000 as at 31 December 2015 as shown in Table 10 below. The capital positions for the individual insurance brokers ranged from \$13,560 to \$1.01 million.

Table 10: Reported Capital Levels for Insurance Brokers

29. Zimbabwe Insurance Brokers	227,655	209,370	202,858	222,636

Key:

	The insurance broker reported a capital position that was above \$100,000.
	The insurance broker reported a capital position that was below \$100,000.

4.3 Asset Quality

Total assets for insurance brokers decreased from \$26.70 million as at 30 September 2015 to \$25.48 million as at 31 December 2015. The decrease in total assets was mainly attributable to the shrinkage in cash and cash equivalents from \$6.22 million as at 30 September 2015 to \$4 million as at 31 December 2015.

The asset base for insurance brokers was mainly made up of property and equipment, premiums receivable as well as cash and cash equivalents which accounted for a total of 61.21% of total assets as shown in Figure 17 below.

Figure 17: Distribution of Insurance Brokers' Total Assets

4.4 Earnings

Total profit after tax for insurance brokers increased from \$996,423 for the year ended 31 December 2014 to \$1.21 million for the year ended 31 December 2015. The increase in profit after tax was buoyed by the growth in net brokerage commission that emanated from increased business volumes, as well as decreasing operating expenses. The industry average return on equity (ROE) and return on assets (ROA) for the year under review were 13.45% and 4.74% respectively.

4.5 Market Share for Insurance Brokers

The sector for insurance brokers was considered unconcentrated as evidenced by a reported Herfindahl Index of 0.09 in terms of both net brokerage commission and premium written for the year ended 31 December 2015. Minerva Risk Solutions, Marsh Insurance Brokers Zimbabwe and HRIB were the market leaders in terms of business written as well as brokerage income as shown in Figure 18 below. On the other hand, Minerva Risk Solutions, Progressive Insurance Brokers and Eureka Insurance Brokers were the market leaders in terms of total assets as shown in Figure 19 below.

Figure 18: Market Share in Terms of Net Brokerage Income and Premium Written

Figure 19: Market Share for Insurance Brokers in Terms of Total Assets

SECTION D
5. REINSURANCE BROKERS

5.1 Business Written

Reinsurance brokers recorded a 10.23% increase in volume of business written as indicated by the increase in total premium written from \$63.61 million for the year ended 31 December 2014 to \$70.12 million for the year ended 31 December 2015. The business generated by local reinsurance brokers accounted for 67.53% of gross premium written by non-life reinsurers. Total brokerage commission for the period under review amounted to \$11 million and translated into an industry average commission rate of 20.13%. Table 10 below shows the indicators of the business written by the reinsurance brokers.

Table 11: Indicators of Business Written for Reinsurance Brokers

Indicator	31 Dec 2014	31 Dec 2015	Percentage Change
Premium Written	63,607,452	70,117,416	10.23%
Brokerage Commission	13,822,077	14,111,378	2.09%
Premium Written Less Commission	49,785,375	56,006,038	12.49%
Commission Paid	11,121,106	11,001,136	-1.08%
Net Brokerage Commission	2,700,971	3,110,242	15.15%
Other Income	46,781	84,204	80.00%
Operating Expenses	1,965,474	2,392,219	21.71%
Profit Before Tax	782,278	802,226	2.55%
Taxation	227,879	251,797	10.50%
Profit After Tax	554,399	550,429	-0.72%

5.2 Capitalization

All the registered reinsurance brokers, except Marsh Insurance Brokers reported capital positions which were above \$100,000 as at 31 December 2015. Table 12 below shows the capital positions for all reinsurance brokers.

Table 12: Capital Levels for Reinsurance Brokers

Name of Company	Reported Capital Position (\$)			
	31 Dec 2014	30 Jun 2015	30 Jun 2015	31 Dec 2015
1. Afro-Asian Reinsurance Brokers	34,580	2,822	139,857	118,087
2. Classic Reinsurance Brokers		122,172	121,699	122,172
3. Marsh Insurance Brokers			11,896	(3,448)
4. Minerva Re (Private) Limited	1,148,561	1,574,836	1,753,749	1,745,965
5. Pan African Re	450,661	576,814	567,131	609,776
6. Reinsurance Brokers International	88,327	176,948	140,829	139,087

5.3 Asset Quality

Reinsurance brokers reported total assets amounting to \$17.26 million as at 31 December 2015, reflecting a 27.65% increase from \$13.52 million reported as at 30 September 2015. The increase in total assets was mainly attributable to an upsurge in premium receivable by \$3.09 million which is an expected trend given that most treaty programmes are renewed in the last quarter of the year. The asset base for reinsurance brokers was concentrated in premium receivables which accounted for 77.06% of total assets as at 31 December 2015.

5.4 Earnings for Reinsurance Brokers

Notwithstanding the increase in business written, total profit after tax for reinsurance brokers decreased marginally by 0.72% from \$554,399 for the year ended 31 December 2014 to \$550,429 for the year ended 31 December 2015. The industry average return on equity (ROE) and return on assets (ROA) for the year under review were 20.15% and 3.19% compared to 32.19% and 4.95% respectively that was reported for the year ended 31 December 2014.

5.5 Market Share for Reinsurance Brokers

Minerva Re (Private) Limited retained the largest market share in terms of income generated, business written as well as total assets. Table 13 below shows the market shares for all reinsurance brokers.

Table 13: Market Share for Reinsurance Brokers

Name of Reinsurance Broker	Premium Written	Net Brokerage Commission	Total Assets
1. Minerva Re (Private) Limited	68.37%	75.40%	75.39%
2. Pan African Reinsurance Brokers	23.37%	18.19%	17.81%
3. Reinsurance Brokers International	5.36%	4.27%	3.40%
4. Marsh	2.57%	1.82%	1.48%
5. Afro-Asian Reinsurance Brokers	0.32%	0.32%	1.22%
6. Classic Reinsurance Brokers*	-	-	0.71%
Total	100%	100%	100%

**The reinsurance broker did not write any business during the period under review.*
