SECTION E

6. Complaint Handling

6.1 Short-term Insurance Sector

In the 2019 second quarter, the Commission received 48 complaints, 47 of which were resolved while the other case is still being investigated.

The majority of the complaints received related to the application of the condition of average, mostly on motor vehicle insurance following the fiscal and monetary reforms being implemented particularly the removal of the parity between the United States dollar and the RTGS\$ values.

In respect to the condition of average, the Commission encourages insurers to communicate with their policyholders so that they can review their coverage in line with the market value of their assets. Policyholders are also encouraged to review the value of their assets in liaison with their insurers in an effort to determine the correct value to avoid disappointment at claim stage.

Other complaints related to alleged delays in the settlement of claims by insurers, with some insurers taking more than three months to settle admitted and legitimate claims. This development leads to loss of confidence in the insurance sector. The Commission is already taking corrective measures against players who delay settling valid claims.

Treating customers fairly will enhance confidence in the insurance industry and boost investor perception which will go a long way in the sustainable development of the sector.

SECTION F

7. Conclusion

7.1 Conclusion

The wake of economic adversities, the insurance players are encouraged to ensure that proper risk management architecture is established and continuously reviewed in order to safe guard the policyholder assets.

The players are custodians of public funds hence issues like corporate governance and compliance must be given the attention they desire. Corporate malgovernance may result in failure and loss of trading licences hence players must ensure that they are compliant to our directives in that regard.
