Disclaimer

This report does not cover the public-sector pension scheme, National Social Security Authority (NSSA). The report is based on unaudited financial statements of insured, stand-alone self-administered funds, as well as self-administered funds under insurers and professional fund administrators. The report, including any attachments, has been prepared by the Insurance and Pensions Commission solely for informative purposes to the pension industry stakeholders, and may not be reproduced, redistributed, communicated to a third party or relied upon by any other person or for any other purpose without the Commission's prior written consent. The Commission does not accept any liability if the report is used for any other purpose other than for the above-mentioned intended purpose.

Furthermore, care should be taken when reading comparative monetary figures within this report given that comparative monetary figures from 2018 were denominated in US\$ while figures for 2019 are denominated in ZWL\$.

Definition of Terms

Insured Fund – A fund under the administration of an insurance company, whose contributions are used to buy assets which are registered in the name of the insurer, mandated with the administration of the fund and not in the name of that fund.

Self-Administered Fund – For the purposes of this report, self-administered funds are those under dedicated fund administrators and insurers but their assets are registered in the respective names of the funds.

Stand-Alone Fund – These are self-administered funds which own and control their administration structures (having own employees) for the purpose of operating the fund.

Pension Fund Member – in relation to a fund, means any person who is a member of that fund in terms of the rules thereof.

Active Member – Members of a fund who are actively contributing to the fund, including those on contribution holiday for a period of time.

Pensioner – a person in receipt of pension benefits from a pension fund.

Deferred Pensioner – A member whose pension benefits are preserved within the fund until the member attains the retirement age.

Suspended Pensioner – A pensioner whose pension benefits are withheld by the pension fund on account of not providing proof of his/her existence.

Members with unclaimed benefits – Members of a fund who have not claimed their benefits when they were entitled to receive such benefits and cannot be located by the fund.

Executive Summary

There were 1,094 registered occupational pension funds as at 30 September 2019, out of which, 1,056 were defined contribution schemes and 38 were defined benefit schemes. Membership, excluding beneficiaries stood at 798,828 as at 30 September 2019 compared to 798,400 recorded as at 30 June 2019.

The industry had a total asset base of \$9.45 billion as at 30 September 2019, having increased by 34.23% from \$7.04 billion as at 30 June 2019. The increase was mainly driven by a spike in the values of investment property and equities. The increase in investment property was mainly on account of revaluations of property values from US\$ to ZWL\$ following currency reforms. The two asset classes totalled \$7.21 billion, accounting for 76.48% of total industry assets. Consequently, these asset classes continued to be the major investment classes as the industry seeks to preserve long-term value by hedging against inflation.

Investments in prescribed assets increased from \$510.62 million as at 30 June 2019 to \$722.12 million as at 30 September 2019. This accounted for 7.64% of total pensions industry assets, which is below the 10% regulatory minimum.

Contribution arrears decreased from \$655.01 million as at 30 June 2019 to \$616.04 as at 30 June 2019.

The industry's total income was \$2.69 billion for the nine (9) months ended 30 September 2019 compared to \$55.64 million for the same period in 2018. The marked increase in income was driven by fair value gains and profit on disposal of assets totalling \$1.01 billion and \$868.30 million respectively.

Total industry expenditures for the nine (9) months was \$341.84 million, resulting in a financial surplus of \$2.34 billion. Administrative expenses for the period under review were \$106.73 compared to \$63.56 million for the comparative period in 2018. The main drivers of the expenses were administration, investment, staff and property maintenance. These expenses resulted in average expenses to total income ratio of 3.68% compared to a ratio of 8.78% in 2018.

Arrear pension benefits increased from \$77.77 million as at 30 June 2019 to \$87.07 million as at 30 September 2019. On the other hand, unclaimed benefit liabilities marginally declined from \$33.75 million as 30 June 2019 to \$32.44 million as at 30 September 2019.

The Insurance and Pensions Commission at a Glance

The Insurance and Pensions Commission (IPEC) is a statutory body mandated with regulating, supervising and developing the insurance and pensions industry for the protection of policyholders and pension scheme members in Zimbabwe. This report outlines IPEC's various activities consistent with its statutory mandate for the nine months ended 30 September 2019 as well as the state of the pensions industry for the same period.

Terms of Reference

The activities of the Commission are guided by the following Acts and their respective regulations:

- ❖ Insurance and Pensions Commission Act [*Chapter 24:21*]
- ❖ Pension and Provident Funds Act [*Chapter 24:09*]
- ❖ Insurance Act [*Chapter 24:07*]
- ❖ Money Laundering and Proceeds of Crime Act [*Chapter 09:24*]
- ❖ Finance Act [*Chapter 23:04*]
- ❖ Public Entities and Corporate Governance Act [*Chapter 10:31*]
- ❖ Public Procurement and Disposal of Public Assets Act [*Chapter 22:23*]
- ❖ Public Finance Management Act [*Chapter 22:19*]

Economic Overview

The key fundamentals affecting the pensions industry during the nine months ended 30 September 2019 are highlighted below:

Currency Changes

Currency reforms were introduced through Statutory Instruments 132, 133 and 142 of 2019 as shown in Figure 1 below:

Figure 1: Currency Journey Map

The introduction of the mono-currency directly affected in-force forex-denominated insurance contracts, as well as fixed income investments such as bonds and money market.

Exchange Rate Developments January to November 2019

The country experienced deterioration of the local currency against other major currencies, particularly the United States dollar during the period February to November 2019 as shown in Figure 2, below:

Figure 2: ZWL - US\$ Exchange Rates January 2019 to November 2019

The movements in the exchange rate largely influenced pricing models for basic goods and services which continue to be multi-tiered depending on whether a customer is paying in hard cash or electronic money. The Reserve Bank's planned new-cash injection into the economy is expected to introduce stability in both the exchange and inflation rates going forward.

Trends in the Performance of Zimbabwe Stock Exchange

The period from January to September 2019 has witnessed an average negative real return on all indexes as shown on Figure 3 below:-

Figure 3: Performance of Zimbabwe Stock Exchange

Whilst listed equities are generally a hedge against inflation, the value of shares has not changed to cover for inflation.

Performance of Money Market Investments

Real returns on money market investments were in the negative territory whilst nominal deposit rates continued to be flat for the first seven months of the year. However, from August 2019, the market witnessed an improvement in the real deposit rates due to the regulatory interventions by the Reserve Bank of Zimbabwe, which increased the minimum lending rates to 50% from about 12.50%.

Figure 4: Trends in the Money Market

Trends in Real Estate Market:

The value of property portfolio is increasing in nominal terms in line with developments in inflation. However, rental yields are reportedly depressed on account of the recent inflation developments and low occupancy levels.

Highlights of the Commission's Regulatory Activities

In pursuit of its mandate, the Commission undertook various initiatives aimed at regulating, supervising and developing the insurance and pensions industry in Zimbabwe. During the last nine months, the following activities and initiatives were undertaken by the Commission:

- ❖ Conducting institutional risk assessment on money laundering and terrorism financing.
- ❖ The Commission is now actively pursuing the AML/CFT agenda in its capacity as a designated competent authority under the Money Laundering and Proceeds of Crime Act. In this regard, the Commission is undertaking onsite inspections to assess compliance with AML/CFT requirements. These inspections are currently being done together with prudential supervision.

1 Regulatory Developments

- 1.1** The Commission continues to be seized with need to put to closure the compensation of pension members as recommended by the Commission of Inquiry, at a time when we are faced with value loss due to inflationary pressures.
- 1.2** To this end, IPEC with the assistance of the World Bank, has come up with a draft Guidance Paper on the need to revalue insurance and pensions assets and liabilities to ensure equity in the distribution of valuation surplus under the inflationary conditions.
- 1.3** During the 9 months ended 30 September 2019, the Commission issued the following circulars to the Industry;

Table 1: Circulars Issued during the 9 months ended 30 September 2019

Document	Release Date	Content
Circular 1 of 2019	3 January 2019	Currency of payment for levies
Circular 2 of 2019	4 March 2019	Reporting guidelines for insurance companies and pension funds after 20 February 2019 Monetary Policy Statement.
Circular 3 of 2019	12 March 2019	Requirement for compliance plans for increased minimum prescribed asset thresholds.
Circular 4 of 2019	8 April 2019	Guidelines for the transfer of assets and liabilities between pension funds and administrators in terms of Section 27 of the Pension and Provident Funds Act [Chapter 24:09].
Circular 6 of 2019	7 May 2019	Submission of a quarterly schedule of members with unclaimed benefits and their liabilities.
Circular 10 of 2019	9 July 2019	Guidance on procedures to be followed on dissolution of pension funds.

2 Key Risks Affecting The Industry

2.1 Operational risk

Operations risk is inherently high in the pensions industry on account of the following:

- ❖ Failure to separate shareholder, insurance and pension fund assets. This potentially results in the transfer of value from insured pension funds to shareholders of life insurer.
- ❖ Some pension funds that pay annuities have failed to separate assets between active members and pensioners, this potentially results in the transfer of value from active members to pensioners, where fund investments returns are inadequate to pay the guaranteed pension.
- ❖ Compromised data integrity.
- ❖ The operation risk has been heighten by inadequate or absence of policy and procedure manuals in the operation of pension funds, coupled with non-adherence to the same. This has resulted in compromised internal control environment that has been observed through conducted on-site inspections.
- ❖ It has been noted that some pension funds bought properties from sponsoring employers but have not attended to the legal transfer of the properties to the respective funds. The title deeds have remained in the name of the employers. This increases the risk that pension fund assets may be used to settle liabilities of the sponsoring employer, in the event that the employer is successfully sued for defaulting on debts. The pension properties may be sold to pay sponsoring employer liabilities and adversely affect pension benefits. One pension fund lost 80% of its assets, when the sponsoring employer went under liquidation.

2.2 Credit risk

The industry is exposed to inherently high credit risk that is manifesting through contribution arrears totalling \$616.04 million and rental arrears totalling \$37.07 million, constituting a combined 6.91% of the industry's total assets as at 30 September 2019.

The Commission is urging trustees to actively pursue the recovery of contribution arrears. Among others initiatives they must ensure that:

- ❖ all arrears are accurately reported and formally acknowledged as debt by the sponsoring employer;
- ❖ they have credible payment plans in place for all contribution arrears and enforce adherence to the same , taking necessary action against defaulting sponsoring employers; and
- ❖ pension deductions are stopped to avoid further ballooning of the arrears when prospects of recovery of the same are low. Stopping deductions by making pension funds paid up will help manage member expectations.

2.3 Liquidity risk

The industry is also exposed to relatively high liquidity risk on account of the concentration of the asset portfolios in properties and equities. As at 30 September 2019, the two real asset classes accounted for 76.48% of the industry's total asset base. The aforementioned contribution and rental arrears also heighten the risk. Some players are unable to unwind from their positions to meet liabilities on time without incurring huge financial losses. The funds end up selling assets at discounted prices.

Liquidity risk is being reflected through arrears in benefit payments, which were at \$87.10 million as at the reporting date. The risk is relatively high for stand-alone funds owing to liquidity challenges.

Pension funds are urged to actively manage their asset and liability profiles and consider unitising their investments in properties and equities.

2.4 Investment Risk

Inherent investment risk is high on account of the limited investment options and the inflationary environment resulting in negative real returns. Under the circumstances, the industry is struggling to preserve value in the environment characterised by absence of high yielding assets, low occupancy levels in the properties market and inflationary pressure on fixed income securities.

The industry is encouraged to look beyond the traditional investments and consider alternative investment options with potentially high returns.

3 Pensions Complaints

During the quarter ended 30 September 2019, the Commission handled 96 pension-related complaints, out of which 83 were resolved. The majority of cases that remain outstanding relate to non-remittance of contributions by employers and low values at conversion.

In general, complaints and challenges in the pensions industry during the period under review related to:

- a. Non-payment of pension benefits;
- b. Low values caused by hyperinflation and subsequent dollarisation in February 2009;
- c. Contribution arrears mostly since 2009;
- d. Treatment of contributions made between 2009 and 2018, given the change in currency in June 2019; and
- e. Late payment of benefits.

The Commission continues to encourage pension funds to ensure that sponsoring employers who have outstanding contributions adhere to agreed payment plans.

Trustees should ensure that annual benefit statements are issued to members so that they are aware of their benefits status and contribution arrears, if any.

Other complaints related to the delays in processing of benefits by pension funds, mostly owing to inadequate information on the part of beneficiaries.

Pension fund members are advised to regularly update their details, particularly contact details as well as their nominated beneficiaries.

Pension funds are encouraged to communicate regularly with the fund members to ensure that they remain up to date with developments in the industry in general and the fund in particular. The Commission continued to educate members of the public on their rights as consumers of both pension and insurance products and also where to turn to in cases of disputes with service providers.

4 Industry Overview

The key performance indicators for the pensions industry as at 30 September 2019 are as shown in Table 2 below:

Table 2: Key Highlights of the Pensions Industry as at 30 September 2019

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Self-Administered Funds	Total
Number of Funds	909	169	16	1,094
Active funds	468	144	16	628
Members ¹	336,650	120,851	341,327	798,828
Share of total membership	42.44%	15.18%	42.38%	100.00%
Total Income (\$ million)	460.23	1,788.23	433.13	2,681.59
Total Contributions (\$ million)	107.35	140.26	165.08	412.69
Rental Income (\$ million)	0.22	9.49	48.30	58.01
Investment Income ²	326.63	1,482.53	207.00	2,016.16
Investment Income over total assets	16.48%	34.27%	6.59%	21.34%
Total Expenditure ³ (\$ million)	87.36	142.30	112.19	341.84
Total Benefits Paid (\$)	79.92	99.84	77.42	257.18
Pension benefits per pensioner	-	256.74	198.30	184.09
Expenses/Contributions ⁴	6.47%	28.24%	30.08%	23.31%
Expenses/Total Income ⁴	1.51%	2.21%	11.47%	3.59%
Income Surplus(Deficit) \$ million	372.87	1,645.93	320.94	2,339.74
Total Assets (\$) billion	1.98	4.33	3.14	9.45
Property Portfolio (\$) billion	0.77	1.34	1.30	3.42
Average Asset accumulation per member	5,886	35,932	9,344	11,911
Percentage of Total Assets	20.97%	45.78%	33.24%	100.00%
Prescribed Assets (\$ million)	219.25	408.28	94.59	722.12
Prescribed Assets Ratio	11.06%	9.44%	3.01%	7.64%
Contribution Arrears (\$ million)	41.44	80.92	493.68	616.04

Notes:

1. Total membership excludes fund beneficiaries (widows and orphans of members).
2. Total Investment income is made up of rental income, dividends, interest on investments, profit on disposal of assets and fair value gains.
3. Total Expenditure for the industry includes benefits paid, transfer to reserves, revaluation losses and provisions.
4. Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation losses.

As shown in Table 2 above, there were 1,094 registered occupational pension funds as at 30 September 2019, increasing from 1,090 funds as at 30 June 2019. The increase was mainly due to the registration of 4 new insured funds. It is important to note that one of the new funds registered was transferring its assets and liabilities to an insured fund, from being a sponsoring employer of a stand-alone pension fund. The registered pension funds as at 30 September 2019 were composed of 1,056 defined contribution schemes and 38 defined benefit schemes.

4.1 Membership

The industry's total membership, excluding beneficiaries marginally increased from 798,400 as at 30 June 2019 to 798,828 as at 30 September 2019. The breakdown of membership as at 30 September 2019 and 30 June 2019 is shown in Table 3 below:-

Table 3: Quarterly Breakdown in Membership

Membership type	Membership as at ...	
	30 September 2019	30 June 2019
New Entrants	10,855	9,385
Actives	314,524	325,484
Pensioners	37,288	37,031
Deferred Pensioners	362,233	356,477
Suspended Pensioners	16,113	17,865
Unclaimed Benefits	57,815	52,158
Total Membership (excluding beneficiaries)	798,828	798,400
Beneficiaries	13,777	16,792
Total Membership (including beneficiaries)	812,605	815,142
Exits	10,342	5,505

As shown in table 3 above, there was a decline in the number of active members from 325,484 members as at 30 June 2019 to 314,524 members as at 30 September 2019. The decline was mainly caused by one insurer who was reporting their preservation fund members as active members, instead of deferred pensioners. Resultantly, the number of deferred pensioners increased from 356,477 members as at 30 June 2019 to 362,233 members as at 30 September 2019.

4.2 Asset Quality

The pension industry had a total asset base of \$9.45 billion as at 30 September 2019, increasing by 34.23% from \$7.04 billion as at 30 June 2019. The increase was mainly driven by an increase in the values of investment properties and equities. Investment property increased from \$2.05 billion as at 30 June 2019 to \$3.04 billion as at 30 September 2019. The increase in investment property was mainly due to revaluations of property values from US\$ values to ZWL\$.

Quoted equities investment increased by 22.44% from \$3.03 billion as at 30 June 2019 to \$3.71 billion as at 30 September 2019 on account of an increase in the values of shares on the Zimbabwe Stock Exchange. The industry's equities portfolio grew at a higher rate than the 12.88% increase in the ZSE's market capitalisation.

The industry's equities portfolio as at 30 September 2019 accounted for 12.06% of the total market capitalisation of listed equities. The nominal growth in the asset base of the pensions industry from 31 March 2017 to 30 September 2019 is shown in figure 5 below:

Figure 5: Trend in Industry Assets Growth

As shown in Figure 5 above, the nominal increase in the industry's asset base was rapid from 31 March 2019 to 30 September 2019, emanating from the change in the functional currency in Zimbabwe, from US\$ to ZWL\$ in February 2019. The distribution of the industry's assets as at 30 September 2019 is shown in figure 6 below:-

Figure 6: Distribution of Pension Industry Assets as at 30 September 2019

As shown in figure 6 above, equities investments and investment property continued to be the major investment classes as the industry seeks to preserve long term value and hedge against inflation. The two asset classes totalled \$7.21 billion as at 30 September 2019, accounting for 76.48% of total industry assets.

Contribution arrears decreased from \$655.01 million as at 30 June 2019 to \$616.04 million as at 30 September 2019. The decline was mainly due to the conversion of contribution arrears to a long term debt by one stand-alone pension fund.

Although there was an increase in the total amount invested in prescribed assets from \$510.62 million as at 30 June 2019 to \$722.12 million as at 30 September 2019, the prescribed asset ratio of 7.64% was below the 10% regulatory minimum. The increase in the amount invested in prescribed assets reflected an increase in the uptake of prescribed assets by the industry.

Table 4 below shows the amounts and compliance levels for prescribed assets from 30 September 2018 to 30 September 2019.

Table 4: Compliance levels for Prescribed Assets

Date	Amount Invested	Compliance Level
30 September 2018	\$434.87 million	9.35%
31 December 2018	\$325.65 million	6.24%
31 March 2019	\$393.91 million	7.32%
30 June 2019	\$510.62 million	7.25%
30 September 2019	\$722.12 million	7.64%

The prescribed asset compliance ratios per sector as at 30 September and 30 June 2019 are as shown in Table 5 below.

Table 5: Prescribed Asset Ratio Compliance Ratios

Sector	30 September 2019		30 June 2019	
	Amount (\$m)	Ratio	Amount (\$m)	Ratio
Stand Alone	94.59	3.01%	80.46	3.68%
Self-Administered	408.28	9.44%	256.32	8.06%
Insured	219.25	11.06%	173.84	10.97%
Total	722.12	7.64%	510.62	7.25%

As shown in table 5 above, only insured funds had an average compliance ratio above the 10% regulatory minimum, with stand-alone funds having a ratio of 3.01%. The relatively low compliance ratio for stand-alone funds is an issue of concern to the Commission.

4.3 Liabilities

Arrear pension benefits increased from \$77.77 million as at 30 June 2019 to \$87.07 million as at 30 September 2019. The increase in the arrear pension benefits may be due to revaluations of benefits pertaining to the members. Unclaimed benefit liabilities marginally declined from \$33.75 million as at 30 June 2019 to \$32.44 million as at 30 September 2019.

4.4 Earnings

The industry reported a financial surplus of \$2.34 billion for the nine months ended 30 September 2019. The surplus was higher than the \$291.20 million reported for the same period in 2018.

The industry's surplus was due to total income amounting to \$2.68 billion for the 9 months ended 30 September 2019, compared to \$55.64 million for the same period in 2018. The income for the period under review was driven by fair value gains and profit on disposal of assets totalling \$1.01 billion and \$868.30 million respectively. The fair value gains were mainly due to a bull run on the Zimbabwe Stock Exchange as well as revaluation of investment properties.

Total industry expenditure increased from \$259.44 million for the nine months ended 30 September 2018 to \$341.85 million for the period under consideration. The increase was mainly due to an increase in total benefits paid, from \$195.88 million in 2018 to \$260.95 million in 2019. The increase in benefits paid is due to increase in member benefits by pension funds in response to inflationary pressures.

Administrative expenses (excluding revaluation losses, transfer to reserves and other provisions) totalled \$106.73 million for the period under review, compared to \$63.56 million for the comparative period in 2018. The \$106.73 million was mainly driven by administration, investment, staff and property maintenance expenses with a combined total of \$80.03 million. The expenses resulted in average expense ratios of 23.98% and 3.68% to total contributions and total income respectively, compared to 20.04% and 8.78% in 2018.

It is important to note that the ratio of administrative expenses to contributions of 23.98% is affected by the number of inactive funds, which accounted for 48.51% of the total number of funds in the industry and were not accruing contributions during the period under review. The ratio should not be used in isolation from the expenses to total income ratio.

5 INSURED SCHEMES

5.1 Sector Architecture

There were 6 life companies administering 909 pension funds as at 30 September 2019, increasing from 905 as at 30 June 2019. The increase was due to the registration of 4 new pension funds. The distribution of the pension funds among insurers as at 30 September 2019 and 30 June 2019 is shown in Table 6 below.

Table 6: Distribution of Insured Pension Funds

Life Assurer	30 September 2019	30 June 2019
CBZ Life	3	3
Fidelity Life	71	71
First Mutual Life	193	193
Old Mutual Life	328	324
ZB Life	151	151
Zimnat Life	163	163
Total	909	905

As depicted in Table 6 above, Old Mutual Life Assurance registered 4 new insured funds. The funds are listed below:

- ❖ Gwanda State University Pension Fund
- ❖ Harare Municipal Medical Aid Society Pension Fund
- ❖ Manicaland State University of Science and Applied Sciences Pension Fund
- ❖ Umguza Rural District Council Pension Fund

It is also important to note that although there were 909 funds administered, there were only 462 active funds which constituted 50.82% of the total insured funds administered. Inactive funds are funds which are either paid-up or under dissolution. The high number of inactive funds is a concern to the Commission and was attributable to viability challenges of the sponsoring employers.

5.2 Membership

Total membership for insured funds decreased from 341,895 as at 30 June 2019 to 336,650 as at 30 September 2019. The decrease in membership was mainly driven by exits totaling 7,344 members. The membership for insured funds as at 30 September 2019 and 30 June 2019 is shown in Table 7 below.

Table 7: Insured Funds Membership

Membership Class	Number of members as at...	
	30 September 2019	30 June 2019
New Entrants	5,193	3,836
Active Members (Excluding new Entrants)	92,789	105,065
Pensioners	6,751	8,143
Deferred Pensioners	224,634	220,437
Suspended Pensioners	1,531	1,510
Members with unclaimed Benefits	5,675	2,904
Total	336,650	341,895
Exits	7,344	2,041

As shown in table 7 above, there was a decline in the number of active members from 105,065 members as at 30 June 2019 to 92,789 members as at 30 September 2019. The decline was mainly caused by one insurer who was reporting members from a preservation fund as active members, instead of reporting them as deferred pensioners. The adjustment also resulted in the reported increase in the number of deferred pensioner between the two comparative dates.

5.3 Asset Quality

Insured funds reported assets totalling \$1.98 billion as at 30 September 2019, constituting 20.97% of the industry's total assets. The asset base increased by 12.50% from \$1.76 billion as at 30 June 2019. The increase in the asset base was mainly due to an increase in investment property from \$619.13 million as at 30

June 2019 to \$771.14 million as at 30 September 2019. The increase may be due to the revaluation of investment property by insurers.

The growth of insured fund assets from 31 March 2017 to 30 September 2019 is shown in figure 7 below.

Figure 7: Growth of insured fund assets

As shown in figure 7 above, the asset base for insured funds has been on an upward trajectory from 31 March 2017 to 30 September 2019. As at 30 September 2019, a total of \$1.62 billion was invested in equities and investment property, accounting for 81.83% of insured fund assets. The concentration of investments in these two asset classes was in line with industry trends. The composition of insured funds' investments is shown in Figure 8 below.

Figure 8: Composition of Insured fund assets as at 30 September 2019

As depicted in figure 8 above, investments in prescribed assets totaling \$219.25 million constituted 11.06% of the sector's total asset base as at 30 September 2019. The prescribed asset ratio as at 30 September 2019 was compliant with the minimum regulatory threshold of 10%.

2.4 Earnings

Insured schemes reported a surplus of \$365.84 million for the 9 months ended 30 September 2019. The surplus was higher than the \$46.77 million reported for the same period in the year 2018 on account of higher total income.

Insured funds had total income amounting to \$460.23 million for the 9 months ended 30 September 2019 compared to \$113.87 million for the same period in 2018. The \$460.23 million was attributable to fair value gains on equities and investment property totalling \$306.64 million, compared to \$3.81 million in 2018.

Fair value adjustments totalling \$134.82 million contributed 66.40% of the total income for the period under review. The fair value gains were due to the bullish performance of the stock market.

Insured funds paid \$79.92 million in benefits for the 9 months ended 30 September 2019, constituting 84.67% of the sector's total expenditure of \$94.39 million. The sector's administrative expenses totalled \$14.47 million and were driven by investment expenses totalling \$8.52 million and administration expenses totalling \$4.71 million. The administrative expenses translated to 6.47% and 1.51% of contributions and total income respectively, which compared favourably to 11.75% and 4.83% for the same period in 2018.

The Statements of Comprehensive Income for insured schemes for the 9 months ended 30 September 2019 are shown on Annexure 3.

6 SELF-ADMINISTERED FUNDS

6.1 Sector Architecture

There were 169 self-administered funds as at 30 September 2019, the same number as reported as at 30 June 2019. The number of self-administered pension funds per administrator as at 30 September 2019 are shown in Table 8 below.

Table 8 : Number of Self-administered Funds

Name of Administrator/Insurer*	30 September 2019
Professional Administrators	
Capitol Insurance Broker	1
Comarton Consultants	25
Marsh Employee Benefits	42
Minerva Benefit Consulting	63
Zimbabwe Insurance Brokers	5
Sub-total	136
Life Companies	
Fidelity Life Assurance Company	1
First Mutual Life Assurance Company	4
Old Mutual Life Assurance Company	24
Nyaradzo Life Assurance Company	2
Zimnat Life Assurance Company	2
Sub-total	33
Grand Total	169

*Not all registered life offices (life assurance companies) are involved in pension administration.

As shown in table 8 above, 80.47% of the self-administered pension funds were administered by professional administrators, compared to 19.53% under insurers. It is also important to note that 154 funds, accounting for 91.12% of the total number of self-administered funds, were administered through 4 entities. The concentration of the funds among the 4 entities may be an indication of competitive advantage.

6.2 Membership

There was a marginal increase in total membership from 120,378 members as at 30 June 2019 to 120,851 as at 30 September 2019. The membership distribution per class of membership is shown in Table 9 below:

Table 9: Distribution of Membership for Self - Administered Funds

Membership Class	Number of members as at.....	
	30 September 2019	30 June 2019
New Entrants	2,651	3,209
Active Members (excluding new)	67,485	69,421
Pensioners	6,957	7,021
Deferred Pensioners	32,669	32,191
Suspended Pensioners	2,729	2,744
Unclaimed Benefits	8,365	5,792
Total Membership	120,851	120,378
Exits	2,388	2,387

As shown in table 9 above, the number of members with unclaimed benefits increased from 5,792 to 8,365 between 30 June 2019 and 30 September 2019. The increase reflects a need to continuously educate members and their beneficiaries on when, where and how to claim their benefits.

6.3 Asset Quality

The sector's asset base increased by 41.97% in nominal terms from \$3.05 billion as at 30 June 2019, to \$4.33 billion as at 30 September 2019. The increase was mainly driven by an increase in the value of investment property from \$768.99 million to \$1.34 billion between the two comparative dates. The increase was a result of the revaluation of investment property.

The sector's assets contributed 45.82% of the pension industry's \$9.45 billion asset base and translated to an average capital accumulation per member of \$35,932 increasing from \$25,334 as at 30 June 2019.

Figure 9 below shows the distribution of self-administered funds' assets as at 30 September 2019. Refer to Annexure 6 for detailed Statements of Financial Position.

Figure 9: Distribution of Self-Administered Funds Assets

As shown in figure 9 above, quoted equity investments and investment property were \$3.46 billion and accounted for 79.88% of the total asset base. The quantum of investment in these two asset classes indicates that there is lack of variety of investment assets on the Zimbabwean capital market, as well as a lack of hedging instruments to guard against inflation. The investments make the industry vulnerable to concentration and market risks.

There was an increase in prescribed assets investments from \$256.32 million as at 30 June 2019 to \$408.28 million as at 30 September 2019. The prescribed

assets investments translated to a ratio of 9.44% of total assets. The ratio was below the minimum regulatory threshold of 10%.

The prescribed asset ratios per administrator ranged from 0% to 14.15% with only one administrator having a compliance level above 10%. Given the increase in the number of prescribed asset securities during the quarter under review, the Commission will enforce regulatory action on non-compliant funds.

6.4 Earnings

Self-administered funds reported a financial surplus of \$1.65 billion for the nine months ended 30 September 2019, reflecting a nominal increase of more than 10-fold from \$129.18 million for the same period in 2018. The comparative increase was on account of higher total income of \$1.79 billion for the period under review compared to \$217.47 million in 2018. The total income of \$1.79 billion was driven by fair value gains totaling \$1.30 billion which were a result of increases in property and equity valuations.

Total expenditure was \$142.30 million for the 9 months ended 30 September 2019, increasing from \$88.29 million reported for the same period in 2018. The comparative increase was driven by a 47.67% increase in the amount of benefits paid from \$67.61 million in 2018 to \$99.84 million in 2019. The increase in the magnitude of benefits paid was driven by an increase in amounts paid to retrenched and retiring members, as well as full commutations. There was also an increase in the average monthly pension benefits for the sector, from \$99.97 for the comparative period in 2018 to \$256.74 for the period under review.

Administrative expenditure (excluding fair value losses, transfer to reserves, amortisation) totaled \$42.54 million for the 9 months ended 30 September 2019, increasing from \$20.68 million for the same period in 2018. The comparative increase was driven by higher investment expenses, which totaled \$18.46 million in 2019. Given that pension fund assets values were

comparatively higher in nominal terms in 2019 than in 2018, the higher investment expenses were on account of asset managers charging a portion of their fees based on the market value of assets under investment.

The ratios of administrative expenditure to contributions and total income for the period under review stood at 28.24% and 2.21% respectively, compared to 23.56% and 8.97% for the same period in 2018. The ratio of non-benefit expenses to total income was considered satisfactory.

See annexure 5 for further details on insured funds' income and expenditure.

7 STAND-ALONE PENSION FUNDS

7.1 Overview of Stand-Alone Funds Sector

During the quarter ending 30 September 2019, a total of 16 funds were reported in the Stand-Alone sector. The number remained unchanged from the previous quarter.

7.2 Membership

Total membership for stand-alone pension funds increased from 336,127 members as at 30 June 2019 to 341,327 members as at 30 September 2019. The increase was driven by new entrants totalling 3,011 members. The distribution of membership by class as at 30 September 2019 and 30 June 2019 is shown in Table 10 below.

Table 10 : Membership Statistics for Stand-Alone Pension Funds

	Number of members as at...	
Membership Category	30 September 2019	30 June 2019
New entrants	3,011	2,340
Active members	154,250	150,998
Pensioners	23,580	21,867
Deferred Pensioners	104,930	103,849
Suspended Pensioners	11,858	13,611
Unclaimed benefits	43,698	43,462
Totals	341,327	336,127
Exit members	610	1,075

As shown in Table 10 above, members with unclaimed benefits remained high within the sector, totaling 43,698 members as at 30 September 2019, accounting for 75.58% of the pension industry's membership with unclaimed benefits. It is important to note that 32,546 members with unclaimed benefits were reported by one fund. The fund is an industrial fund in an industry with high labour turnover rates. The high number of members with unclaimed

benefits may be an indication of low levels of member awareness on pension issues, as well as poor data management systems.

7.3 Asset Base

Stand-alone pension fund assets increased by 40.81% from \$2.23 billion as at 30 June 2019 to \$3.14 billion 2019. The increase in the asset base was mainly attributable to an increase in investment property values from \$665.05 million as at 30 June 2019 to \$1.30 billion as at 30 September 2019.

The increase was attributable to the revaluation of property values by stand-alone funds. There was also an increase in the value of equities from \$589.78 million as at 30 June 2019 to \$815.50 million as at 30 September 2019. The two asset classes are a safe haven for pension funds during inflationary times.

The sector's asset base accounted for 33.24% of the industry's total asset base, and translated to an average asset accumulation of \$9,344 per member. The distribution of assets for stand-alone pension funds as at 30 September 2019 is shown in Figure 10.

Figure 10: Distribution of Assets for Stand-Alone Funds

As shown in figure 10 above, as well as in other sectors of the industry, long-term asset classes in the form of investment property and equities accounted for 67.37% of the asset base. There is a need to ensure that the funds diversify their long-term investments given volatilities in rental income and vulnerability of equities to bearish market movements.

Prescribed assets investments constituted only 3.01% of the sector's total assets as at 30 September 2019, which was way below the statutory minimum of 10%. Regulatory action will be imposed on non-compliant entities.

Contribution arrears decreased from \$527.39 million as at 30 June 2019 to \$493.68 million as at 30 September 2019. The decline was, however, not indicative of any repayment of arrears by sponsoring employers, but was a result of one fund converting contribution arrears by one of its sponsoring employers into a long-term debt.

7.4 Liabilities

Arrear pension benefits increased from \$ 71.54 million as at 30 June 2019, to \$82.03 million as at 30 September 2019. It was of concern to the Commission that the \$82.03 million was mainly emanating from 2 pension funds which have high levels of contribution arrears and relatively large investments in property. One of the funds had arrear pension benefits totaling \$64.47 million.

Unclaimed benefits totaled \$19.81 million as at 30 September 2019, decreasing from \$29.90 million as at 30 June 2019. The decline was on account of one fund, which reduced its unclaimed benefit liabilities from \$10.45 million as at 30 June 2019 to \$271,524 due to a reporting error. The issue of unclaimed benefits is one of the reasons behind the Commission's public education and awareness campaigns. The Commission is also considering setting minimum data management standards for the industry to avoid the growth and magnitude of unclaimed benefit liabilities, as well as dealing with data integrity challenges.

See Annexure 8 for a detailed breakdown of stand-alone pension funds' liabilities.

7.5 Earnings

During the nine months ended 30 September 2019, stand-alone pension funds reported a surplus of \$320.94 million compared to \$73.46 million for the corresponding period in 2018. The surplus for the period under review was driven by total income totalling \$433.13 million, compared to \$177.51 million for the same period in 2018.

Income for the period under review was mainly driven by contributions totalling \$165.08 million and fair value gains on equities and properties totalling \$103.11 million. Contributions increased from \$94.50 million reported for the comparative period in 2018, which may be a reflection of an increase in

pensionable salaries. A breakdown of the sector's total income is summarised in Figure 11 below:

Figure 11: Income Distribution for Stand-Alone Funds as at 30 September 2019

Total expenditure was \$112.19 million for the 9 months ended 30 September 2019 and was marginally higher than the \$104.05 million reported for the same period in 2018. Expenditure for the period under review was driven by benefit payments totalling \$77.42 million that accounted for 42.34% of total expenditure during the review period. The benefit payment slightly increased from \$68.77 million for the comparable period in 2018.

Monthly pension benefits totalled \$56.75 million for the 9 months ended 30 September 2019, growing by 24.04% from \$45.75 million for the same period in 2018. The increase may be attributable to pension increases by some funds during the 9 months under review.

The sector's administrative expenses totalled \$34.77 million for the period under review, driven by staff costs, administration expenses and property maintenance costs. The administrative expenses were 30.08% of contributions and 11.47% of total income respectively, compared to 22.55% and 12.01% for

the same period in 2018 respectively. The high expenses ratios were of great concern to the commission.

8 SECTION D: ANNEXURES

Annexure 1: Consolidated Industry Statement of Comprehensive Income for the 9 months ended 30 September 2019

	INSURED	SELF ADMINSTERED	STAND ALONE	TOTAL
Income				
Year to date Contributions (Including arrears)	107,349,550	140,257,557	165,082,899	412,690,007
