Disclaimer

This report including enclosures and attachments, has been prepared by the Insurance and Pensions Commission (IPEC) solely for informative purposes to the pension industry stakeholders, and may not be reproduced, redistributed, communicated to a third party or relied upon by any other person for any other purpose without the Commission's prior written consent. The Commission does not accept any liability, if this report is used for any other purposes other than the above-mentioned intended purpose.

This report highlights major developments of the pension industry and does not cover the public-sector pension scheme and the National Social Security Authority (NSSA). The report is based on unaudited financial statements of insured, stand-alone self-administered funds, as well as self-administered funds under insurers and professional fund administrators.

Definition of Terms

Active Member – Member who is required in terms of the rules to make periodic contributions to that fund and includes a member who is on contribution holiday for a period of time.

Beneficiary – A person other than a contributing member of a fund who is entitled to, in terms of the rules of the fund, receive benefits from the fund upon the happening of a specific event and whose entitlement arise on account of a relation with the contributing member.

Deferred Pensioner – A member who is no longer eligible to make contributions to the fund on account of having left the employ of the participating employer(s) and whose benefits are preserved within the fund and become accessible upon reaching the earliest retirement age of 55.

Inactive fund – A fund which is no longer contributing/paid-up or under dissolution.

Insured Fund – A fund under the administration of an insurance company that is administered through one or more policies of insurance whose assets are registered in the name of the insurer, mandated with the administration of the fund.

Members with unclaimed benefits – Members of a fund who have not claimed their benefits when they were entitled to receive such benefits and cannot be located by the fund.

Pensioner – a person in receipt of pension benefits from a pension fund.

Pension Fund Member – in relation to a fund, means any person who is a member of that fund in terms of the rules thereof.

Self-Administered Fund – For the purposes of this report, means a fund that is administered by registered fund administrators and insurers and whose assets are registered in the respective name of the fund.

Stand-Alone Fund – These are self-administered funds which own and control their administration structures (having own employees) for the purpose of operating the fund.

Suspended Pensioner – A pensioner whose pension benefits are withheld by the pension fund on account of not providing proof of existence.

1. Executive Summary

1.1 The pensions industry had 959 registered funds as at 31 March 2020, of which 922 were defined contribution schemes whilst 37 were defined benefit schemes.

1.2 Total membership, excluding beneficiaries was 887 746 as at 31 March 2020, having risen from 809 176 as at 31 December 2019.

1.3 The industry had a total asset base of \$29.81 billion as at 31 March 2020, an increase of 80.33% in asset values recorded as at 31 December 2019. Investment property and equities continue to reprice faster than all other asset classes, thus diluting exposures to these assets. As a result, investment property and equities were valued at \$24.64 billion, accounting for 82.67% of total industry assets.

1.4 Notwithstanding the increase in absolute values of prescribed assets from \$1.22 billion as at 31 December 2019 to \$2.29 billion, compliance was still low at 7.67 % against the regulatory minimum of 20%.

1.5 Total income for the industry was \$5.79 billion compared to \$214 million for the same period in 2019. The income was driven by interest from investments, which constituted 51.21%, and fair value gains (36.75%), whose combined share amounted to \$5.09 billion.

1.6 Total industry expenditures for the period under review amounted to \$399.09 million, of which \$259.54 million was for pension benefit payments.

1.7 Administrative expenditures amounted to \$139.55 million, resulting in average expenses to total income ratio of 2.02% compared to 1.97% reported as at 31 December 2019. Furthermore, the administration expenses to total realised income ratio was 3.2%, compared to the expenses to total income ratio of 2.02% reported as at December 2019.

2. The Insurance and Pensions Commission at Glance

The Insurance and Pensions Commission (IPEC) is a statutory body mandated to regulate, supervise and develop the insurance and pensions industry for the protection of policyholders and pension scheme members in Zimbabwe. This report outlines industry developments and IPEC's various activities in the pensions industry consistent with its statutory mandate for the 3 months ended 31 March 2020.

3. Terms of Reference

The activities of the Commission are guided by the following acts and their regulations:

- Insurance and Pensions Commission Act [Chapter 24:21];
- Pension and Provident Funds Act [Chapter 24:09];
- Insurance Act [Chapter 24:07];
- Money Laundering and Proceeds of Crime Act [Chapter 09:24];
- Finance Act [Chapter 23:04];
- Public Entities and Corporate Governance Act [Chapter 10:31];
- Public Finance Management Act [Chapter 22:19]; and
- Public Procurement and Disposal of Public Assets Act [Chapter 22:23].

4. Economic Overview

4.1 World and Regional Economic Outlook

4.1.1 The World economy has drastically changed since the outbreak of the coronavirus pandemic in November 2019. As jurisdictions implement necessary quarantines and social distancing practices under national lockdowns to contain the pandemic, the global economy has been put in a Great Lockdown, which appears worse than the 2008 Global Financial Crisis.

4.1.2 The global economy is projected to contract by 3% as a result of the COVID-19 pandemic (IMF World Economic Outlook, April 2020) compared to the initial 3.4% projection of October 2019 (IMF World Economic Outlook).

4.1.3 The negative global economic growth projection is being driven by a slowdown in economic activity on the back of mandatory Governments and World Health Organisation (WHO) COVID-19 induced lockdowns across jurisdictions.

4.1.4 Advanced economies are projected to contract by 6.1% while emerging markets and developing economies are projected to contract by 2.2% (including China) and 1% (excluding China).

4.2 Sub-Saharan Africa

4.2.1 Sub-Saharan African economies are projected to contract by 1.6%, which is four percentage points lower than the 3.6% growth initially projected in the October 2019 IMF World Economic Outlook. The World Bank estimates that

2020 will mark Sub-Saharan Africa's first recession in 25 years.

4.3 Domestic Economic Outlook

4.3.1 Zimbabwe's economy is projected to contract by 7.4% in 2020 from an initial growth projection of 0.8% (IMF). The economic downturn is projected in the wake of economic uncertainties characterised by liquidity challenges, weak domestic demand, low commodity prices, low production due to Covid-19 induced lockdown, loss of income, below-normal agricultural production on account of drought and increasing inflation.

4.3.2 The economy is also projected to be adversely affected by low activity in tourism as a result of the extensive travel restrictions. The country is, however, anticipated to rebound in 2021 to a small growth of 2.5%.

4.4 Currency Reforms

4.4.1 The restoration of the monetary policy autonomy following the abandonment of the multi-currency system and the re-introduction of a mono-currency in 2019, has ignited exchange rate induced inflationary pressures and depreciation of the local currency against other vehicle currencies.

4.4.2 The gazetting of S.I 85 of 2020 facilitated the use of foreign currency by holders of free funds during the COVID-19 lockdown. While the S.I. provided flexibility to consumers to use free funds during this period, some business entities have gone on to exclusively charge their goods and services in foreign currency in violation of S.I. 142 of 2019.

4.4.3 The insurance and pensions industry have not been spared from the prevailing inflationary environment with most economic agents now opting for foreign currency-denominated policies as opposed to Zimbabwe dollar-denominated policies as they seek to guard against regular review of sums insured. Similarly, employers who are paying salaries and pension contributions in foreign currency have made a call for the payment of benefits in the corresponding currency in which contributions would have been made.

4.5 Exchange Rate and Inflation Developments

4.5.1 The local currency has consistently depreciated against major currencies notably the United States dollar since the introduction of currency reforms.

The exchange rate depreciated from RTGS\$2.5 in February 2019 to the current ZWL\$25 pegged in March 2020. However, the gap between formal market exchange rate and the alternative foreign exchange market at rate has persistently widened thereby creating further distortions in the market.

4.5.2 During the quarter under review, inflation remained on an upward trajectory spiking from 176% in June 2019 to 676.39% in March 2020.

4.5.3 Month-on-month inflation averaged 14.11% during the quarter under review. Inflation is expected to continue to be largely influenced by speculative tendencies by economic agents especially around exchange rate movements. Furthermore, the COVID-19 pandemic has created supply-side disruptions thereby exacerbating

inflationary forces.

4.6 Trends in the Real Estate Market

4.6.1 Property valuations in the United States dollar officially ended on 24 June 2019 following the gazetting of S.I 142 of 2019. This resulted in valuation inconsistencies especially for entities that had just concluded their annual valuations. Audited Zimbabwe dollar property revaluations are expected by 30 June 2020.

4.6.2 The property market has continually suffered from rental arrears, low occupancy ratios and rental adjustments lagging behind inflation rates. In order to protect tenants, the Government gazetted Statutory Instrument 96 of 2020 to cushion tenants from the effects of COVID-19. The foregoing factors compromise policyholder benefits and values.

4.7 Trends on the ZSE

4.7.1 During the review period, the equities market was largely bullish, registering a 98.3% growth in market capitalisation from ZWL\$29.767 billion at the beginning of the quarter to ZWL\$59.038 billion by the end of the quarter.

4.8 Trends in the Money Market

4.8.1 Nominal monthly deposit rates for money market investments varied from 3.55% to 14.99 % against real negative returns of up to 86.66% and annual inflation rate of 676.39%. The Central bank also took a soft stance on its Overnight lending rate from 35% to 15% as the effects of COVID-19 took its toll.

4.9 Regulatory and Supervisory COVID-19 Measures

In response to the COVID-19 Pandemic, the Commission, in liaison with the industry instituted a number of measures to ensure business continuity and sustainability of the insurance and pensions industry.

Some of the measures instituted include the following:

4.9.1 Call for business continuity plans from the industry through Circular 6 and 8 of 2020. The main purpose of the Circulars was to ensure the following:-

- Business continuity and avoiding disruptions and delays in processing of benefits;
- Continued accessibility of the industry to policyholders and pension scheme members to ensure timely payments of benefits and resolution of members' queries and enquiries;
- Meeting of regulatory reporting obligations including filing of quarterly and annual returns ; and
- Conducting of impact assessment of the pandemic on the industry.

4.9.2 Extension of deadlines for statutory returns. In view of the lockdown measures which resulted in most of industry staff working remotely from homes, the Commission extended the deadline for industry's submission of quarterly returns.

4.9.3 Selective suspension of pension contributions. Following disruptions in business operations which resulted in labour market interruptions, the Commission received and approved suspensions of pension contributions for some funds whose sponsoring employers

were facing difficulties until such a time when the economy returns to normalcy.

4.9.4 Suspension of on-site inspections – the Commission suspended all onsite inspections and shifted focus to offsite inspections. The offsite inspections will inform future onsite inspections once the pandemic has been contained.

4.9.5 Adoption of virtual meetings with the Commission's clients and stakeholders, which has become the new normal under the current environment. The Commission is set to conduct its virtual Annual General Meeting on 30 June 2020.

4.9.6 Identified risks associated with the pandemic and came up with mitigatory measures as part of the Commission's risk matrix.

4.9.7 Supervisory information exchanges with other regulators under the auspices of the International Association of Insurance Supervisors (IAIS) and the International Organisation of Pension Supervisors on measures being implemented in response to the COVID-19 pandemic.

4.9.8 Coordinated industry's support to Government towards COVID-19 combative efforts following the declaration of the pandemic as a national disaster. The Commission facilitated industry's meetings with the Inter-Ministerial Committee on COVID-19, which is chaired by the Hon. Vice President, Cde. K.C. Mohadi and donations to Government.

4.9.9 The Commission will continue to monitor the impact of the pandemic on the industry, policyholders and

pensioners, with a view to informing regulatory and supervisory interventions.

5. Highlights of the Commission's Activities

In line with its mandate of regulating, supervising and strengthening the pensions industry, the Commission, conducted various activities during the period under review as highlighted below:-

5.1 Fund Registrations

5.1.1 The Commission registered 3 pension funds under Old Mutual Life Assurance Company namely:-

- Mine Maintenance Services Provident Fund – Full registration
- True Destinations Investments - Full registration
- Chivi Rural District Council - Provisional registration

5.2 Registration of Redrafted Rules

5.2.1 The Commission continues to register redrafted rules in an effort to ensure that the rules are updated in line with current legal and regulatory requirements, disclosure requirements as well as to address identified governance deficiencies. Fifty-seven (57) rules were registered in the first quarter bringing the total as at 31 March 2020 to 82%.

5.2.2 Pension funds that have not yet submitted their rules for re-registration are called to do so by 30 June 2020, failure of which they will be penalised for non-compliance.

5.3 Onsite and offsite Inspections

5.3.1 During the quarter under review, the Commission issued Corrective Orders to three (3) entities following onsite inspections conducted in 2019. The

Commission continues to monitor implementation of the Corrective Orders which are aimed at addressing issues raised during the onsite inspections.

5.3.2 Two (2) new onsite inspections were conducted on a pension fund and administrator during the quarter. The Commission is working with the respective institutions to address matters of regulatory concerns to ensure adequate protection of policyholders and pension scheme members. Going forward and in view of the COVID-19 pandemic, the Commission's thrust will be on offsite surveillances given that it will be difficult to conduct onsite inspections

5.3.3 The Commission conducted an offsite inspection on management information systems being used by the industry in the administration of pension fund business during the review period. The inspection was motivated by poor data integrity in relation to information that is filed by the industry through quarterly and annual returns which the Commission has been grappling with for a long time. Pension funds and administrators are working on improving their management information systems to address the issue of data integrity.

5.4 Dissolutions

5.4.1 During the period under review, the Commission received and approved applications for dissolutions from FSI Agricom Pension Fund and Rufaro Marketing Pension Fund in view of the financial constraints faced by the sponsoring employers.

5.5 Regulatory Developments

The following Circulars and Statutory Instrument were issued during the quarter

Table 1: Circulars Issued and Statutory Instruments

Document	Release Date	Content
Circular 1 of 2020	7 February 2020	Guidelines on Resolution of Troubled Entities
Circular 2 of 2020	7 February 2020	Guidelines on Minimum Disclosure Requirements for Pension Funds and Fund Administrators
Circular 4 of 2020	27 February 2020	Notification of publication of the Pension and Provident Funds Bill and calling industry to submit comments and concerns to Parliament on the provisions of the Bill
Circular 6 of 2020	24 March 2020	Industry's responsiveness to COVID 19
SI 69 of 2020	13 March 2020	SI that empowers IPEC to issue guidelines, directives, and circulars to industry. Therefore, SI gives effect to the Guideline for the Insurance and Pensions Industry on Adjusting Insurance and Pension Values in Response to Currency Reforms

5.6 Pensions Complaints Resolution Report

5.6.1 During the quarter ended 31 March 2020, the Commission received 203 complaints, out of which 117 were resolved while 86 are under investigation.

5.6.2 Table 2 below depicts the complaints handled during the quarter under review.

Table 2: Complaints Handling

Nature of Complaints	Number of Complaints
Low pension values	46
Non-payment of benefits	52
Late payment of benefits	39
Unremitted contributions	66
Total	203

5.6.3 As reported in the previous reports, the majority of unresolved cases related to low pension values owing to the loss of values after adoption of the multicurrency regime in 2009 and non-remittance of contributions by sponsoring employers and late payment of benefits.

5.6.4 Cases to do with non-remittance are at various stages of resolution as some employers have submitted payment plans to respective fund administrators whilst others have resorted to making part payments.

5.6.5 The Commission continues to encourage pension funds to follow up on payment plans agreed with sponsoring employers who have outstanding contributions.

5.6.6 Trustees should ensure that annual benefit statements are submitted to members so that they are aware of their benefits status and contribution arrears, if any. From some of the inspections conducted in 2019 and during the quarter, it was also noted that most pension funds were not issuing benefit statements on time and where these were being issued, the information was incomplete and did not meet requirements of Circular 2 of 2016. Trustees should therefore attend to this shortcoming.

5.6.7 On the other hand, pension fund members are advised to regularly update their details, particularly contact details as well as their nominated beneficiaries, so that there are no delays in their benefit payments and avoid being suspended from receiving payments.

6. Industry Overview

The key performance indicators for the pensions industry as at 31 March 2020 are as shown in Table 3 below:

Table 3: Key Highlights of the Pensions Industry as at 31 March 2020

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Self-Administered Funds	Total
Number of Funds	778	165	16	959
Active funds	493	132	16	641
Members	348,071	119,855	419,820	887,746
Share of total membership	39.21%	13.50%	47.29%	100.00%
Total Income (\$)	3,240,602,150	1,696,924,753	848,851,366	5,786,378,269
Total Contributions (\$)	154,758,886	139,072,531	147,133,701	440,965,118
Rental Income (\$)	2,004,933	9,997,684	63,109,824	75,112,441
Investment Income	3,079,297,739	1,552,628,741	652,183,616	5,284,110,096
Investment Income over total assets	23.68%	17.11%	8.44%	17.73%
Total Expenditure (\$)	127,993,369	148,085,305	123,009,161	399,087,834
Administration Expenses (\$)	32,750,890	27,174,578	57,199,816	117,125,284
Total Benefits Incurred (\$)	89,628,238	119,956,926	49,956,999	259,542,162
pension benefits per pensioner	266.10	247.51	153.37	194.26
Expenses/Contributions	21.16%	19.54%	38.88%	26.56%
Expenses/Total Income	1.01%	1.60%	6.74%	2.02%
Total Assets (\$)	13,006,095,949	9,074,249,371	7,730,665,796	29,811,011,116
Total Assets per member	37,366	75,710	18,414	33,581
Percentage of Total Assets	43.63%	30.44%	25.93%	100.00%
Prescribed Assets (\$)	1,325,122,784	835,327,443	124,716,308	2,285,166,535
Prescribed Assets Ratio	10.19%	9.21%	1.61%	7.67%
Contribution Arrears (\$)	57,555,238	41,976,669	575,113,355	674,645,263

Notes:

1. Total membership excludes fund beneficiaries (spouse and children of the deceased members).
2. Total Investment income is made up of rental income, dividends, interest on investments, profit on disposal of assets and fair value gains.
3. Total Expenditure for the industry includes benefits paid, transfer to reserves, revaluation losses and provisions.
4. Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation losses.

As shown in Table 3 above, there were 959 registered occupational pension funds as at 31 March 2020, declining by 108 pension funds (10.12%), from 1,067 registered funds recorded as at 31 December 2019.

This is notwithstanding that during the year the Commission received 9 applications for registration, out of which 3 were granted full registration. The decline in the number of registered funds is due to data correction by ZB and First Mutual Life Assurance companies who were previously misclassifying participating employers as funds.

Furthermore, of the registered funds, 642 were active, which constituted 66.94% of the total number of funds. The decline in actives by 118 funds, from 760 reported

as at 31 December 2019 was mainly as a result of data correction by the aforementioned insurers.

The Commission continues to work with the industry in sanitising data to ensure that accurate figures are reported. The Commission is working on reregistration of all pension funds and their respective rules to ensure improvement in statistics reported starting from the 2020 Second Quarter Report.

6.1. Membership

6.1.1 The industry's total membership, excluding beneficiaries increased from 809,176 as at 31 December 2019 to 887,746 as at 31 March 2020. This was mainly on account of new entrants as well as an inclusion of 74,645 members with unclaimed benefits that were previously excluded by the Clothing Industry Pension Fund.

6.1.2 The breakdown of membership as at 31 March 2020 and 31 December 2019 is shown in Table 4 below:-

Table 4: Breakdown in Membership

Membership Class	Membership as at ...	
	31 March 2020	31 December 2019
New Entrants	9,100	10,570
Actives	323,576	325,552
Pensioners	38,907	40,337
Deferred Pensioners	354,976	357,182
Suspended Pensioners	16,958	16,113
Unclaimed Benefits	144,609	57,815
Total Membership (excluding beneficiaries)	887,746	809,176
Beneficiaries	17,356	13,124
Total Membership (Including beneficiaries)	905,102	822,300
Exits	4,737	5,559

6.1.3 As shown in table 4 above, there was a marginal decline in the number of active members from 325,552 as at 31

December 2019 to 323,576 as at 31 March 2020.

6.1.4 Given the high number of members with unclaimed benefits (144,609), pension funds are encouraged to be proactive in empowering their members with knowledge on how to timely file for their benefits, through pre-retirement education and pamphlets. The Commission has also uploaded information on unclaimed benefits on its website, in an effort to inform members of their benefits.

6.2. Asset Quality

6.2.1 The industry's asset base in nominal terms increased by 454.09% from \$5.38 billion as at 31 March 2019 to \$29.81 billion as at 31 March 2020. However, it is worth noting that there is a decline in the real asset base given the annual inflation rate of 676.39%, for March 2020.

6.2.2 The figure below shows the industry asset base trend from the first quarter of 2019 to the first quarter 2020.

Figure 1: Trend in Industry Assets Growth

6.2.3 As shown in Figure 1, the industry's asset base increased by 81.68% from \$16.41 billion as at 31 December 2019 to \$29.81 as at 31 March 2020. The increase was mainly driven by an increase in the values of investment properties and

equities which accounted for 82.67% of the industry's assets. Investment property increased from \$7.39 billion as at 31 December 2019 to \$14.13 billion as at 31 March 2020, hence increasing its share of total assets from 45.06% as at 31 December 2019 to 47.38% as at 31 March 2020.

6.2.4 Quoted equities investment increased by 82.12% from \$5.37 billion as at 31 December 2019, to \$9.78 billion as at 31 March 2020, on account of an increase in the values of quoted equities holding on the Zimbabwe Stock Exchange.

6.2.5 The distribution of the industry's assets as at 31 March 2020 is shown in Figure 2 below:-

Figure 2: Distribution of Pension Industry Assets as at 31 March 2020

6.2.6 As shown in Figure 2 above, the industry's investments continued to be skewed towards equities and investment property accounting for 82.67% of total industry assets as at 31 March 2020. The two asset classes totalled \$24.64 billion and are viewed as value preserving and a hedge against inflation.

6.2.7 Funds' value of investments in equities and investment property has been increasing in absolute terms

as shown in Figure 3 below;

Figure 3: Equities and Investment Property Trend

6.2.8 Contribution arrears increased to \$674.65 million as at 31 March 2020, from \$621.68 as at 31 December 2019. Whilst there was a nominal increase in contribution arrears, the proportion of contribution arrears to total assets declined from 3.8% as at 31 December 2019 to 2.26% as at 31 March 2020. Notwithstanding the above, the Commission is concerned about the increase in absolute values of contribution arrears given the impact of inflation on the arrears.

6.2.9 There was an increase in the total amount invested in prescribed assets from \$1.22 billion as at 31 December 2019, to \$2.29 billion as at 31 March 2020 as shown in Table 5 below:

Table 5: Compliance levels for Prescribed Assets

Sector	31 March 2020		31 December 2019	
	Amount (\$b)	Ratio (%)	Amount (\$b)	Ratio (%)
Stand-Alone Funds	0.84	9.21	0.12	2.58
Self-Administered Funds	0.12	1.61	0.50	8.75
Insured	1.33	10.19	0.60	9.73
Total/Average ratio	2.29	7.67%	1.22	7.41%

Figure 4 – Prescribed Assets Compliance Level

6.2.10 Notwithstanding the increase in amounts invested in prescribed assets, the ratio of 7.67% was below the regulatory minimum of 20%, the Commission is working with the industry to ensure that there are value preserving prescribed assets in the market which industry can subscribe to.

6.3. Liabilities

6.3.1 Arrear pension benefits decreased from \$91.89 million as at 31 December 2019 to \$78.96 million as at 31 March 2020. Notwithstanding this decrease, the persistently high benefit arrears may be due to the harsh operating environment which sponsoring employers are faced with.

6.3.2 Unclaimed benefit liabilities drastically increased from \$30.83 million as at 31 December 2019 to \$149.31 million as at 31 March 2020. The notable increase was as a result of a number of funds which previously omitted reporting on unclaimed benefits.

6.4. Earnings

6.4.1 Table 6 below indicates the key income and expenditure indicators: -
Table 6: Key Income Indicators

Table 6: Key Income Indicators

Indicator	March 2020	March 2019
Total Contributions (\$m)	440.97	90.85
Investment Income (\$billions)	5.28	0.1
Total Income (\$billions)	5.79	0.21
Total Benefits Paid (\$m)	259.54	0.07
Total Expenditure (\$m)	399.09	165.69
Expenses/Contributions Ratio	26.56%	23.09%
Expenses/Total Income Ratio	2.02%	9.78%

6.4.2 The income for the period under review was mainly driven by interest from investments and fair value gains amounting to \$5.09 billion. The fair value gains were mainly due to the revaluation of investment properties and listed equities.

6.4.3 Total expenditure increased from \$165.69 million for the quarter ended 31 March 2019 to \$399.09 million for the same period in 2020. The increase was mainly due to an increase in total benefits paid, from \$66.64 million in 2019 to \$259.54 million in 2020. Although there was a 389% nominal increase in total benefits paid, the increase was still far below the recorded annual inflation of 676.39% for March 2020.

6.4.4 Expenses to contributions ratio was 26.56%, whilst the expenses to total income ratio was 2.01% for the year ended 31 March 2020, compared to 23.09% and 9.78% in 2018, respectively.

6.4.5 Figure 5 and 6 below show expense ratios trend for the period 31 December 2018 to 31 December 2019.

Figure 5: Expenses to Contribution Ratio

Figure 6: Expenses to Total Income Ratio

6.4.6 The high expenses ratios continue to be a cause for concern as this has a bearing on the benefits to members. In an effort to ensure transparency in the disclosure of expenses, the Commission issued Circular 2 of 2020 on Minimum Disclosures, which directs the industry to disclose all costs of the funds in a disaggregated manner. This will inform corrective actions needed to manage expenses within reasonable levels.

7. Insured Schemes

7.1 Sector Architecture

7.1.1 There were 6 life companies administering 778 pension funds as at 31 March 2020, declining from 881 reported as at 30 December 2019. The decline was on account of correction of data by ZB Life Assurance and First Mutual Life Assurance who were previously reporting participating employers under one scheme as individual funds.

7.1.2 Distribution of the pension funds among insurers as at 31 March 2020 and 31 December 2019 is shown in Table 7 below.

Table 7: Distribution of Insured Pension Funds

Life Assurer	31 March 2020	31 December 2019
CBZ Life	5	5
Fidelity Life	38	38
First Mutual Life	123	180
Old Mutual Life	339	342
ZB Life	108	152
Zimnat Life	165	164
Total	778	881

7.1.3 It is important to note that although there were 778 funds administered, only 494 of these funds were active funds which constituted 63.5% of the total insured funds. The high number of inactive funds is of concern to the Commission and was attributed to viability challenges faced by the sponsoring employers.

7.2 Membership

7.2.1 Total membership for insured funds increased to 347,463 as at 31 March 2020 from 344,715 as at 31 December 2019. The membership for insured funds as at 31 March 2020 and 31 December 2019 is

shown in Table 8 below.³

Table 8: Insured Funds Membership

Membership Class	Number of members as at...	
	31 March 2020	31 December 2019
New Entrants	5,918	6,991
Active Members (Excluding new Entrants)	101,339	102,603
Pensioners	8,182	7,773
Deferred Pensioners	224,560	219,108
Suspended Pensioners	1,499	1,847
Members with unclaimed Benefits	6,573	6,393
Total	348,071	344,715
Exits	2,267	4,322

As shown in Table 8 above, there was a decrease in the number of active members from 102,603 members as at 31 December 2019 to 101,339 members as at 31 March 2020. The decrease in active membership was as a result of movement of members into other membership classes i.e. pensioners and deferred pensioners' categories.

7.3 Asset Quality

7.3.1 The asset base for insured funds increased by 108.87% from \$6.23 billion reported on 31 December 2019 to \$13.01 billion as at 31 March 2020. This asset base constituted 43.63% of the industry's total assets.

7.3.2 The increase in the asset base was mainly due to revaluation of properties in line with inflation that is obtaining in the operating environment. The revaluations resulted in equity and investment property increasing by 117.50% and 103.38% respectively.

7.3.3 The growth of insured fund assets from 31 March 2019 to 31 March 2020 is shown in figure 7 below.

Figure 7: Insured Funds Asset Trend

7.3.4 As shown in Figure 7 above, the asset base for insured funds has been on an upward trajectory from 31 March 2019 to 31 March 2020. However, the biggest increase occurred after September 2019, mainly on account of revaluations following currency reforms. The composition of insured funds' investments is shown in Figure 7.

Figure 8: Composition of Insured Fund assets as at 31 March 2020

7.3.5 As depicted in Figure 8 above, Insured Funds' investments in prescribed assets totalling \$1.33 billion constituted 10.19% of the sector's total asset base as at 31 March 2020. The prescribed asset ratio was not compliant with the revised minimum regulatory threshold of 20%.

7.4 Earnings

7.4.1 The total income for insured funds amounted to \$3.24 billion for the 3 months ended 31 March 2020, compared to \$92.26 million for the same period in 2019. The \$3.24 billion is mainly attributed to interest on investment which amounted to \$2.94 billion, and constituted 90.70% of total income.

7.4.2 Total expenditure amounted to \$127.99 million, of that amount \$89.63 million was benefit payments constituting 70.03% of total expenditure. The sector's administrative expenses totalled \$32.75 million and were driven by investment expenses totalling \$23.97 million and fund administration expenses totalling \$5.38 million.

The administrative expenses translated to 21.16% and 1.01% of contributions and total income respectively, as compared to 7.43% and 2.15% for the same period in 2018. The Statements of Comprehensive Income for insured schemes for the 3 months ended 31 March 2020 are shown on Annexure 3.

8 Self-Administered Funds

8.1 Sector Architecture

8.1.1 There were 165 self-administered funds as at 31 March 2020, compared to 170 reported as at 31 December 2019. The decline was mainly attributed to some funds joining umbrella fund as participating employers. The number of self-administered pension funds per administrator as at 31 March 2020 are shown in Table 9 below.

Table 9 : Number of Self-administered Funds

Name of Administrator/Insurer*	31 March 2020	31 December 2019
Professional Administrators		
Capitol Insurance Broker	1	1
Comarton Consultants	24	25
Marsh Employee Benefits	41	42
Minerva Benefit Consulting	64	64
Zimbabwe Insurance Brokers	5	5
Sub-total	135	137
Life Companies		
Fidelity Life Assurance Company	1	1
First Mutual Life Assurance Company	5	4
Old Mutual Life Assurance Company	20	24
Nyaradzo Life Assurance Company	2	2
Zimnat Life Assurance Company	2	2
Sub-total	30	33
Grand Total	165	170

*Not all registered life offices (life assurance companies) are involved in pension administration.

8.1.2 As shown in Table 9 above, 81.8% of the self-administered pension funds were administered by pension administrators, compared to 18.2% under insurers. It is also important to note that 105 funds, accounting for 63.6% of the total number of self-administered funds, were administered through 2 entities.

8.2 Membership

8.2.1 There was a marginal decrease in total membership from 121,634 members as at 31 December 2019 to 119,855 as at 31 March 2020.

8.2.2 The membership distribution per class of membership is shown in Table 10 below:

Table 10: Distribution of Membership for Self - Administered Funds

Membership Class	Number of members as at.....	
	31 March 2020	31 December 2019
New Entrants	1,607	2,407
Active Members (excluding new)	65,424	66,922
Pensioners	7,099	7,151
Deferred Pensioners	32,321	32,754
Suspended Pensioners	3,505	3,437
Unclaimed Benefits	9,899	8,963
Total Membership	119,855	121,634
Exits	1,425	2,672

8.2.3 As shown in Table 10 above, the number of members with unclaimed benefits increased by 10.44% ,from 8,963 to 9,899 between 31 December 2019 and 31 March 2020.

8.3 Asset Quality

8.3.1 The sector's asset base increased by 59.96% in nominal terms from \$5.67 billion as at 31 December 2019 to \$9.07 billion as at 31 March 2020. The increase was mainly driven by 80.52%, 52.94% and 68.40% increase in the values of investment property, prescribed assets and equities respectively. The increase was a result of the revaluation of properties and equities.

8.3.2 It is also important to note that contribution arrears decreased by 41.66% from \$71,95 million to \$41,98 million, which is an overall indicator of improved

financial soundness of self-administered funds.

8.3.3 The sector's assets contributed 30.44% of the pension industry's \$29.81 billion asset base.

8.3.4 Figure 9 below shows the distribution of self-administered funds' assets as at 31 March 2020. Refer to Annexure 6 for detailed Statements of Financial Position.

Figure 9: Distribution of Self-Administered Funds Assets

8.3.5 As shown in Figure 9 above, equities investments and investment property were \$6.91 billion and accounted for 76.14% of the total asset base. The quantum of investment in these two asset classes reflects the need by funds to preserve value for members.

8.3.6 Investments in prescribed assets increased from \$496.05 million as at 31 December 2019 to \$835.33 million as at 31 March 2020. The prescribed assets investments translated to a ratio of 9.21% of total assets compared to 8.75% reported as at 31 December 2019. Notwithstanding the increase in the prescribed assets ratio, this was below the revised minimum regulatory threshold of 20%.

8.4 Earnings

8.4.1 The total income of \$1.70 billion was mainly driven by fair value gains totalling \$1.41 billion.

8.4.2 Total expenditure was \$148.09 million for the 3 months ended 31 March 2020, increasing by 49% from \$99.07 million reported for the same period in 2019. The comparative increase was driven by a of benefits payments amounting to \$199.96 million in 2020, constituting 81.01% of total expenditure.

8.4.3 Administrative expenses totalled \$27.17 million for the period under review, compared to \$78.17 million for the comparative period in 2019. The expenses resulted in average expense ratios of 19.52% and 1.60% to total contributions and total income respectively, compared to 25.87% and 13.21% in 2019.

9 Stand-Alone Pension Funds

9.1 Overview of Stand-Alone Funds Sector

9.1.1 The number of Stand-alone funds for the quarter ending 31 March 2020, was unchanged at 16, a position reported in the fourth quarter of 2019.

9.2 Membership

9.2.1 Total membership for stand-alone pension funds increased by 22.46% from 342,827 members, as at 31 December 2019 to 419,820 as at 31 March 2020. The growth in membership was mainly driven by inclusion of members with unclaimed benefits who were not previously being accounted for and to a lesser extent by new entrants totalling 1,575.

9.2.2 The distribution of membership by class as at 31 March 2020 and 31 December 2019 is shown in Table 11 below:-

Table 11: Membership Statistics for Stand-Alone Pension Funds as at 31 March 2020

Membership Category	Number of members as at	
	31 March 2020	31 December 2019
New entrants	1,575	1,172
Active members	156,813	156,027
Pensioners	23,626	25,413
Deferred Pensioners	98,095	105,320
Suspended Pensioners	11,574	10,902
Unclaimed benefits	128,137	43,993
Totals	419,820	342,827
Exit members	1,045	1,078

9.2.3 The increase of 191.27% in the total number of individuals with unclaimed benefits in the quarter under review, from 43,933 reported as at 31 December 2019, was a result of over 70,000 members who were previously not being accounted for in the Clothing Industry Pension Fund system.

9.2.4 The Commission notes with concern the increase in suspended pensioners by 6.16% from 10,902 to 11,574

members and urges pension funds and administrators to come up with mechanisms that prompt or remind pensioners on the need to submit their certificates of existence timely.

9.3 Asset Base

9.3.1 Stand-Alone pension funds' assets increased by 71.4% from \$4.51 billion as at 31 December 2019 to \$7.73 billion as at 31 March 2020. The increase in the asset base was mainly as a result of assets revaluations. Guaranteed fund investments increased from \$8.79 million to \$49.39 million during the quarter.

9.3.2 The sector also registered an increase in the value of equities from \$844.13 million as at 31 December 2019 to \$1.61 billion as at 31 March 2020. The distribution of the assets for the stand-alone funds as at 31 March 2020 is shown in Figure 10 below.

Figure 10: Distribution of Assets for Stand Alone Funds as at 31 March 2020

9.3.3 As indicated in Figure 10, investment properties and equities accounted for 82.43% of the total asset base for stand-alone pension funds, as they are considered a safe haven for hedging against inflation risk. Though the move is considered strategic, industry should be cognisant of the associated risks such as market and liquidity risks that pension funds may be exposed to.

9.3.4 Investment in prescribed assets increased to \$124.72 million as at 31 March 2020, compared to \$116.4 million in the previous quarter. However, the share of prescribed assets to total stand-alone funds' assets dropped from

2.58% in the previous quarter to 1.61%, which is way below the 20% statutory minimum. The Commission is concerned with the decline in compliance level, given the need to comply with the revised minimum regulatory requirement of 20%.

9.3.5 Contribution arrears increased to \$575.11 million from \$515.39 million recorded in the fourth quarter of 2019. However, the proportion of contribution arrears to total assets declined to 7.44% from 11.43% recorded in the previous quarter.

9.4 Liabilities

9.4.1 Arrear pension benefits increased to \$59.70 million as at 31 March 2020, from \$54.96 million recorded in the previous quarter. It remains an issue of concern to the Commission that 60% of arrear pension benefits were attributable to Local Authorities Pension Fund. The Commission is actively engaged with pension funds with high contribution arrears to come up with aggressive strategies to liquidate the arrears.

9.4.2 Unclaimed benefits for the stand-alone pension funds totalled \$38.13 million as at 31 March 2020.

9.5 Earnings

9.5.1 Stand-alone pension funds reported a - amounting to \$725.84 million, for the quarter ending 31 March 2020, reflecting an increase of 4,206% when compared to \$16.86 million recorded in the corresponding period of 2019.

The total income for the quarter was \$848.85 million, and largely composed of unrealised gains accounting for 67.84%. Contributions accounted for 17.33% of total income, while rental income and interest on arrears contributed 7.43% and 3% respectively. The breakdown of income is summarised in Figure 11 below:-

Figure 11: Income Distribution for Stand-Alone Funds as at 31 March 2020

9.5.2 Total expenditure for the quarter ending 31 March 2020 was \$123.01 million, a nominal increase of 169.64% from \$45.62 million recorded in the corresponding period in the previous year. Total benefits payments accounted for only 40.61% of total expenditure the period under review and other expenses were 37.35% of total expenditure.

9.5.3 The breakdown of the total expenditure for stand-alone pension funds for the period under review is shown in Figure 12 below.

Figure 12: Expenditure Distribution for Stand-Alone Funds as at 31 March 2020

9.5.4 Stand-alone pension funds administrative expenses totalled \$57.20 million for the quarter ending 31 March 2020. The administration expenses were 38.88%, of contributions and 6.74% of total income, compared to 33% and 17.78%, recorded as at 31 March 2019 respectively. The improvement in the administration expenses to income ratio is due to the increase in unrealised gains from revaluation of assets, which are quite volatile, given the prevailing economic environment. Pension funds should therefore diversify their income streams.

ANNEXURES

ANNEXURES

Annexure 1: Consolidated Industry Statement of Comprehensive Income for the 3 months ended 31 March 2020

	INSURED	SELF ADMINSTERED	STAND ALONE	TOTAL
Income				
Year to date Contributions (Including arrears)	154,758,886	139,072,531	147,133,701	440,965,118
