DISCLAIMER

This report including enclosures and attachments, has been prepared by the Insurance and Pensions Commission (IPEC) solely for informative purposes to the pension industry stakeholders, and may not be reproduced, redistributed, communicated to a third party or relied upon by any other person for any other purpose without the Commission's prior written consent. The Commission does not accept any liability, if this report is used for any other purposes other than the above-mentioned intended purpose.

This report highlights major developments in the pension industry and does not cover the public-sector pension scheme and the National Social Security Authority (NSSA). The report is based on unaudited financial statements of insured, stand-alone self-administered funds, as well as self-administered funds under insurers and professional fund administrators.

DEFINITION OF TERMS

Active Member – Member who is actively making contributions in terms of the fund rules and includes a member who is on contribution holiday for an agreed period of time.

Beneficiary – A person other than a contributing member of a fund who is entitled, in terms of the rules of the fund, to receive benefits from the fund upon the occurrence of a specific event and whose entitlement arise on account of a relation with the contributing member.

Deferred Pensioner – A member who is no longer eligible to make contributions to the fund on account of having left the employ of the participating employer(s) and whose benefits are preserved within the fund until the member attains the retirement age.

Inactive Fund – A fund whose sponsoring employer is no longer contributing/paid-up or under dissolution.

Insured Fund – A fund under the administration of an insurance company that is administered through one or more policies of insurance whose assets are registered in the name of the insurer, mandated with the administration of the fund.

Members with Unclaimed Benefits – Members of a fund who have not claimed their benefits when they were entitled to receive such benefits and cannot be located by the fund.

Pensioner – a person in receipt of pension benefits from a pension fund.

Pension Fund Member – in relation to a fund, means any person who is a member of that fund in terms of the rules thereof.

Self-Administered Fund – For the purposes of this report, means a fund that is administered by registered fund administrators and insurers and whose assets are registered in the respective name of the fund.

Stand-Alone Fund – These are self-administered funds which own and control their administration structures (having own employees) for the purpose of operating the fund.

Suspended Pensioner – A pensioner whose pension benefits are withheld by the pension fund on account of not providing proof of existence.

Contribution Arrears – these are contributions which have fallen due to the fund but not yet remitted by the sponsoring employer.

Defined Contribution Scheme – A pension scheme in which the final benefits depend on the net contributions and investment returns

Defined Benefits Scheme – A pension scheme in which the final benefit is pre-determined using a formula provided for in the rules of the scheme.

1. Executive Summary

1.1 The number of registered funds in the pensions industry stood at 967 as at 31 December 2020 compared to 1 067 funds reported as at 31 December 2019. Of the 967 registered funds, 936 were defined contribution schemes, constituting 96.79% of the industry's funds

1.2 Total membership, excluding beneficiaries was 881 330, having risen by 8.99% from 808 635 as at 31 December 2019.

1.3 The total asset base for the industry increased by 273.06% from ZW\$29.55 billion as at 31 December 2019 to ZW\$110.24 billion as at 31 December 2020 whilst annual inflation was at 348.6%.

1.4 The increase in the asset base was mainly due to revaluation of investment property and quoted equities, which increased by 308.14% and 667.14%, respectively. These two major asset classes constituted 81.14% of total industry assets.

1.5 The value of prescribed assets increased in nominal terms by 880.56% to ZW\$ 7.06 billion from ZW\$0.72 billion reported as at 31 December 2019. Whilst there was an increase in the nominal value of prescribed assets investments, compliance was still low at 6.41% against the regulatory minimum of 20%.

1.6 Total income for the industry for the year 2020 was ZW\$79.21 billion compared to ZW\$22.27 billion reported in 2019. The income was mainly driven by fair value gains, interest on investments, profit on disposal investments and contributions which constituted a combined proportion of 93.88%.

1.7 Total industry expenditures for the period under review amounted to ZW\$5 billion, of which ZW\$3.28 billion went towards benefit payments.

1.8 Total administrative expenditures for the period January to December 2020 amounted to ZW\$1.72 billion compared to ZW\$0.83 billion for the same period in 2019.

1.9 Average expenses to total income ratio for the period under review was 2.18% compared to 1.23% in the prior year.

2. The Insurance and Pensions Commission at a Glance

2.1 The Insurance and Pensions Commission (IPEC) is a statutory body mandated to regulate, supervise and develop the insurance and pensions industry for the protection of policyholders and pension scheme members in Zimbabwe. This report outlines industry developments and IPEC's various activities in the pensions industry consistent with its statutory mandate for the 9 months ended 30 September 2020.

3. Terms of Reference

3.1 The activities of the Commission are guided by the following acts and the respective regulations: -

- Insurance and Pensions Commission Act [Chapter 24:21];
- Pension and Provident Funds Act [Chapter 24:09];
- Insurance Act [Chapter 24:07];
- Money Laundering and Proceeds of Crime Act [Chapter 09:24];
- Finance Act [Chapter 23:04];
- Public Entities and Corporate Governance Act [Chapter 10:31];

- Public Finance Management Act [Chapter 22:19]; and
- Public Procurement and Disposal of Public Assets Act [Chapter 22:23].

4. Economic Developments

4.1 2020 Global and Regional Economic Outturn

Revised International Monetary Fund (IMF) estimate a global economic output decline of 3.5% in 2020, buttressed by stronger than expected recovery across all regions in the second half of the year. The World Bank (WB) projects a deeper contraction of 4.3% due to the effects of the pandemic. For advanced economies, the revised GDP estimate was -4.9%, an improvement from the October forecast of -5.8%. GDP growth for emerging markets and developing countries (EMDEs) is expected to contract by 2.4%.

GDP growth forecast for Sub-Saharan Africa was revised upwards to 2% from an expected contraction of 3% in October 2020. However, the WB estimate the region to contract by 3.7% in 2020.

4.2 Global and Regional Economic Outlook

In light of Covid-19 developments, global economy is expected to grow by 5.5% in 2021 (IMF), up from a 5.2% forecast in October 2020, amid renewed hope for recovery following approvals of the Covid-19 vaccines. The World Bank projects a lower growth of 4%. While strong fiscal, monetary and other policies towards households and firms in some countries are expected to boost recovery, the resurgence of the Corona virus and control measures being enforced in several economies are likely to offset some of the gains.

Sub-Saharan Africa GDP growth projection for 2021 is set at 3.2% as per the IMF forecast, while the World Bank set a conservative growth of 2.7%. SSA growth is expected to be undermined by risks such as weaker recovery than expected in trading partners, logistical hurdles that could affect vaccine distribution and slow-down productivity.

Table 1: World Economic Outlook Revised Projections (Percentage Change)

	2020	2021	2022
World Output	-3.5	5.5	4.2
Advanced Economies	-4.9	4.3	3.1
USA	-3.4	5.1	2.5
Euro Area	-7.2	4.2	3.6

China	2.3	8.1	5.6
Sub-Saharan Africa	2	3.2	3.9
Nigeria	-3.2	1.5	2.5
South Africa	-7.5	2.8	1.4

Source: IMF Economic Outlook, Projections

Domestic Macroeconomic Outturn

The country experienced another recession in 2020, with GDP expected to contract by 4.1% from -6.1% in 2019. Significant output declines were in agriculture, mining, manufacturing, tourism and electricity generation, owing to the effects of the 2019 drought, cyclone and Covid-19 pandemic.

4.4 Exchange Rate Developments: The exchange rate depreciated from US\$1:ZW\$17.10 in January 2020 to US\$1:ZW\$81.80 in December 2020. It was largely stable in the quarter under review owing to the foreign exchange auction system, as it depreciated slightly to US\$1:ZW\$81.8 from US\$1:ZW\$81.4 at the end of October 2020. While the availability of foreign exchange has been improving, with a total of US\$29.58 million allotted on the 21st December 2020 compared to US\$27.85 million on the 27th October 2020 (RBZ), not all interested bidders

were able to access the needed funds as some failed to satisfy the auction system requirements. Bidders were disqualified for ineligibility in terms of the priority list, insufficient foreign currency account balances, overdue CD1 and outstanding bills of entry.

Figure 1: Inter-bank Exchange Rate January to December 2020 (US\$: ZWL) - End of Period

Source: Reserve Bank of Zimbabwe

4.5 Inflation Developments

Inflation continued on a downward trend in the second half of 2020 due to fiscal consolidation, coupled with monetary stabilisation measures which have brought about some stability in the pricing of goods and services. The annual inflation rate declined from a peak of 837.53% in July to 348.6% in December 2020, driven by non-food items. Month-on-month inflation rate declined from 35.5% in July to 3.2% in November before a slight increase to close the quarter at 4.2% as shown in Figure 2.

Figure 2: Month-on-Month Inflation 2020 and Year on Year Inflation 2020 (percent)

Source: ZIMSTAT

Annual blended CPI inflation has been on a declining trend from 249.63% in October 2020 to 186.91% in December

2020. Monthly blended CPI inflation rate, however, has been on an upward trend, from 1.43% in October, to 2.25% and 2.75% in November and December, respectively.

The reduction in inflation rate is a welcome development for the industry, particularly for fixed income earners such as pensioners and policyholders, as it allows for some preservation of value of their pay-outs or claims. However, given that inflation figures are still in the positive territory, prices are still increasing though at a decreasing rate.

4.6 Macroeconomic Outlook

The National Development Strategy 1 Macroeconomic Framework projects the economy to rebound by 7.4% in 2021. The growth forecast is expected on the back of recovery in the global economy from Covid-19, stable macroeconomic environment, a predictable policy environment and investor confidence. While the good rainy season provides positive recovery prospects, the uncertainties around Covid-19 may undermine the projection. Strong policy support as well as concerted efforts by all stakeholders towards the economic recovery process is of paramount importance. Public-private partnerships should be encouraged.

The economy is expected to continue experiencing a gradual decline in inflation in 2021 from 362.6% annual inflation in December 2020 to single digit levels (below 10%) by December 2021, supported by a targeted month-on-month inflation of less than 3%.

4.7 Investment Performance Zimbabwe Stock Exchange Developments:

The All Share and Top Ten indices grew by 1,046% and 733% respectively during the year ended 31 December 2020. Equity turnover grew by 754% from 2019 and market capitalisation surged by 968%. The trajectory of market capitalisation during the year is as shown in Figure 3.

Figure 3: Daily Market Capitalisation in ZWL Billions

Source: Zimbabwe Stock Exchange

Victoria Falls Stock Exchange (VFEX): SeedCo International remains the only trading counter on VFEX. As at 30 November 2020, market capitalisation was US\$43.40 million. The continued delay in lifting suspension of trades on Old Mutual and PPC shares is a major concern for the industry, as asset values of pension fund members and policyholders currently tied in the two counters cannot objectively be valued or liquidated.

Savings and Deposit Interest Rates:

Real interest rates remained negative in 2020, given the high rates of annual inflation which ended the year at 348.6% against nominal interest below 20%. Nominal savings deposit rates remained unchanged for the second half of 2020, ranging between 2.35% and 5.19%. Some minor improvements were recorded in One-month and Three-month deposit rates. One-month nominal deposit rates improved from a maximum of 8.28% end of October 2020 to 8.57% at mid-November 2020, while three-month deposit rates also marginally improved from a maximum of 8.69% to 8.71% during the same period.

4.8 Covid-19 Update:

The total number of confirmed Covid-19 cases recorded globally since the onset of the pandemic exceeded 79.2 million, with over 1.7 million deaths as at 27 December 2020. There is increased uncertainty and concern over the mutation of Sars-Cov-2 virus following 2 variants detected in South Africa and Britain in December 2020. It remains uncertain whether the variants will undermine the effectiveness of the approved vaccines.

Mandatory lockdowns due to Covid-19 disrupted business operations and income streams during the year. Effects of the pandemic have exacerbated the problem of policy lapses, and delayed payment of pensions contributions, premiums and benefits/claims. The new normal also brought about additional operating costs for insurers and pension funds, as they sought to capacitate staff to work remotely.

5. Industry Overview

5.1 The key performance indicators for the pensions industry as at 31 December 2020 are depicted in Table 2 below: -

Table 2: Key Highlights of the Pensions Industry as at 31 December 2020

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Self-Administered Funds	Total
Number of Funds	786	166	15	967
Members	355,079	118,854	407,397	881,330
Share of membership	40%	13%	46%	100.00%
Total Income (ZWLbillion)	24,894,946,306	28,121,492,113	26,193,601,908	79,210,040,326
Total Contributions (ZWL)	1,343,838,884	1,879,738,870	2,026,256,755	5,249,834,509
Rental Income (ZWL)	3,046,438	174,858,393	854,878,541	1,032,783,372
Investment Income (ZWL)	23,166,891,801	24,861,463,636	23,512,921,554	71,541,276,992
Investment Income over total assets	67.15%	66.65%	61.17%	64.90%
Total Expenditure (ZWL)	941,922,907	1,906,043,136	2,153,929,612	5,001,895,655
Total Benefits Incurred (ZWL)	714,855,758	1,103,893,314	1,459,566,848	3,278,315,921
pension benefits per pensioner (ZWL)	19,262.20	40,792.38	18,502.73	21,285.16
Expenses/Contributions	16.30%	51.06%	27.09%	32.91%
Expenses/Total Income	0.88%	3.41%	2.10%	2.18%
Income Surplus/Deficit (ZWL)	23,953,023,399	26,215,448,977	24,039,672,296	74,208,144,672
Total Assets (ZWL)	34,499,474,411	37,299,552,847	38,441,751,053	110,240,778,311
Total Assets per member (ZWL)	96,871	309,908	89,773	121,853
Percentage of Total Assets	31.29%	33.83%	34.87%	100.00%
Prescribed Assets (ZWL)	3,129,394,003	3,350,778,265	581,816,555	7,061,988,822
Prescribed Assets Ratio	9.07%	8.98%	1.51%	6.41%
Contribution Arrears (ZWL)	133,424,333	217,057,294	1,324,625,337	1,675,106,964

1. **Total membership excludes fund beneficiaries (spouse and children of the deceased members).**

2. **Total Investment income is made up of rental income, dividends, interest on investments, profit on disposal of assets and fair value gains.**

3. **Total Expenditure for the industry includes benefits paid, transfer to reserves, revaluation losses and provisions.**

4. **Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation losses.**

5.2 As shown in table 2, there were 967 registered occupational pension funds as at 31 December 2020, compared to 1 067 funds reported as at 31 December 2019.

5.3 As mentioned in our previous report, the major cause of the decline, which occurred in the first quarter of 2020, was due to misclassification of participating employers as pension funds by two Life Assurance Companies.

5.4 To address the observed inconsistencies, the Commission is in the process of finalising re-registration for all pension funds to ensure a credible register. Furthermore, the Commission will continue to engage industry players to ensure that data received from entities is credible.

5.5 The Commission is concerned with the high number of inactive funds which stood at 357, constituting 36.92% of the industry's funds as at the reporting period.

5.6 The increase in inactive funds has been exacerbated by viability challenges which sponsoring employers are facing, which include Covid-19 induced effects.

5.1. Membership

5.1.1 The industry's total membership, excluding beneficiaries increased by 8.99% to 881 330 from 808 635 as at 31 December 2019. The increase was largely attributable to new entrants mainly from life companies' administered funds.

5.1.2 As mentioned in our previous quarterly reports, the increase in membership from 2019 fourth quarter to 2020 first quarter is also attributed to the inclusion of members with unclaimed benefits that were previously excluded by the Clothing Industry Pension Fund.

5.1.3 The breakdown of membership as at 31 December 2020 and 31 December 2019 is shown in Table 3 below: -

Table 3: Breakdown in Membership

Membership Class	Membership as at ...	
	31 December 2020	31 December 2019
New Entrants	9,379	38,714
Actives excluding new entrants	316,570	310,662
Pensioners	33,208	48,531
Deferred Pensioners	350,537	381,746
Suspended Pensioners	12,773	12,791
Unclaimed Benefits	158,863	16,191
Total Membership (excluding beneficiaries)	881,330	808,635
Beneficiaries	23,374	26,289
Total Membership (including beneficiaries)	904,704	834,924
Exits	7,257	10,261

5.1.4 As shown in table 3 above, there was a decrease in the number of active members from 310,662 as of 31 December 2019 to 316,570 as at 31 December 2020. The decline was attributable to some members who exited employment given the prevailing viability challenges sponsoring employers are facing.

5.1.5 There was also a decline in pensioners and deferred members of 46.14% and 8.9%, respectively. The decline in these two membership categories is mainly attributed to members who exited after fully commutating their benefits. Full commutations have been increasing since the COVID-19 pandemic.

5.1.6 To reduce the high number of members with unclaimed benefits, the Commission urges pension funds to be

proactive in empowering their members with knowledge on how to timely claim their benefits. Furthermore, the Commission urges administrators to automate their systems to allow members to complete and submit the relevant documents for processing of benefits without physically visiting their offices considering the prevailing Covid19 movement restrictions.

5.1.7 Members of the public are being urged to make use of the search engine launched by the Commission on its website onto which information on unclaimed benefits has been uploaded to inform members of their benefits.

5.2. Asset Quality

5.2.1 The industry's asset base increased in nominal terms by 273.06% from ZW\$29.55 billion as at 31 December 2019 to ZW\$110.24 billion as at 31 December 2020. This was against an annual inflation rate of 348.6% for December 2020, implying a decline in the industry's assets in real terms.

5.2.2 Furthermore, the decline in asset base is also reflected by a decrease of 23.49% from USD 1.76 billion as at 31 December 2019 to USD1.35 billion as at 31 December 2020.

5.2.3 The industry's asset base of ZW\$110.24 billion translates to a pension penetration rate of 10.3%, expressed as a percentage of the GDP. This indicates that the pension industry still plays a pivotal role in the development of the economy.

5.2.4 In addition, the pensions industry's share of ZSE's market capitalisation as at 31 December 2020 was 34.75%, implying that industry remains critical to the development of the country's stock market.

5.2.5 The figure below shows the industry asset base trend from 31 December 2019 to 31 December 2020: -

Figure 4: Trend in Industry Assets Growth

5.2.6 The increase in asset base was mainly driven by an increase in the values of investment properties and quoted equities which accounted for 81.15% of the industry's assets.

5.2.7 Investment property increased to ZW\$51.63 billion from ZW\$12.65 billion as at 31 December 2019. Furthermore, its contribution to the industry's total assets increased from 42.8% to 46.83% between the two periods.

5.2.8 The increase in investment property was mainly driven by revaluation of properties.

5.2.9 Notwithstanding the suspension of trades of some major counters on the Zimbabwe Stock Exchange, the value of investments in quoted equities increased by 667.14% from ZW\$4.93 billion as at 31 December 2019, to ZW\$37.82 billion.

5.2.10 The distribution of the industry's assets as at 31 December 2020 is shown in Figure 5 below: -

Figure 5: Distribution of Pension Industry Assets as at 31 December 2020

5.2.11 Funds' value of investments in equities and investment property in absolute terms has been on an upward trend as shown in Figure 6 below:

Figure 6: Equities and Investment Property Trend

5.2.12 It should be noted that values of investments in quoted equities have been growing at a decreasing rate since June 2020 on account of the suspension of trades on Old Mutual, SeedCo and PPC, counters in which most insurers and pension funds are invested. Whilst the SeedCo counter has resumed trading, the other two counters remain suspended.

5.2.13 The commission noted that there were inconsistencies in the valuations of these suspended counters and should the counters remain suspended, guidance will be provided.

5.2.14 Contribution arrears increased to ZW\$1.68 billion from ZWL\$0.56 billion as at 31 December 2019. Whilst there was a nominal increase in contribution arrears, the proportion of contribution

arrears to total assets declined from 1.89% as at 31 December 2019 to 1.52%.

5.2.15 Of the ZW\$1.68 billion, 78.57% (which translates to ZW\$1.32 billion) is owed to stand-alone funds. Furthermore, two funds (Mining Industry Pension Fund and Local Authorities Pension Fund) constituted more than half of the industry's contribution arrears.

5.2.16 Notwithstanding the decline in the proportion of contribution arrears to total assets, sponsoring employers are urged to make good their arrears to reduce further loss of value by fund members. The continued accumulation of contribution arrears impacts negatively on the adequacy, sustainability, and security of pension schemes. Hence, the need for trustees to explore all the available options to recover the arrears.

5.2.17 The increase in the absolute value of contribution arrears is on account of two main factors namely: -

- a) Treatment of interest on arrears as per the requirements of the Guidance Paper on Currency Reforms which require funds to use the greater of
 - (i) actual rate of return on the fund's asset
 - (ii) rate of return on risk free assets; and
 - (iii) unsecured overdraft lending rate for the pension fund's bank.
- b) Continued non-payment of pension contributions by employers is due to viability challenges as indicated through an age analysis of the arrears where 67% are for a period over three months.

5.2.18 There was a nominal increase in the total amount invested in prescribed assets to ZW\$7.06 billion from ZW\$0.72 billion as at 31 December 2019 as shown in Table 4 below: -

Table 4: Compliance Levels for Prescribed Assets

Sector	31 December 2020		31 December 2019	
	Amount (ZWL b)	Ratio (%)	Amount (ZWL)	Ratio (%)
Stand-Alone Funds	0.58	1.51	0.10	0.77%
Self-Administered Funds	3.35	8.98	0.56	8.74%
Insured	3.13	9.07	0.06	0.57%
Total/Average Ratio	7.06	6.40%	0.72	2.43%

Figure 7: Prescribed Assets Compliance Level

5.2.19 Notwithstanding the increase in amounts invested in prescribed assets, the ratio of 6.40% was below the regulatory minimum of 20%. To improve industry compliance, the Commission reviewed the framework for approving applications by widening the criteria to include private equity and other instruments that ensure value preservation. The decline in compliance level was mainly due to the revaluation of investment properties vis-à-vis the fixed income bearing prescribed assets which remains constant until maturity.

5.2.20 To improve prescribed assets compliance, engagements with industry and Government, continues to explore all the possible ways to come up with value preserving instruments which can be accorded prescribed asset status.

5.3. Unclaimed Benefits

5.3.1 Unclaimed benefit liabilities increased significantly by 1,899.84% from ZW\$30.83 million as at 31 December 2019

to ZW\$616.51 million.

5.3.2 The notable increase was mainly as a result of revaluation gains and previously omitted unclaimed benefits which are now being reported. The Commission calls upon the industry to sanitise their data to improve data integrity. Additionally, the industry is urged to enhance awareness initiatives and come up with measures to track beneficiaries of unclaimed benefits.

5.4. Earnings

5.4.1 Table 5 below indicates the key income and expenditure indicators: -

Table 5: Key Income Indicators

Indicator	December 2020 (billion)	December 2019 (billion)
Total Contributions (ZW\$billion)	5.25	0.89
Investment Income (ZW\$billion)	71.54	20.07
Total Income (ZW\$billion)	79.21	22.27
Total Benefits Paid (ZW\$billion)	3.28	0.53
Total Expenditure (ZW\$billion)	5.00	1.36
Expenses to Contribution Ratio	32.91%	30.66%
Expenses/Total Income Ratio	2.18%	1.23%
Expenses/Total Realised Income	5.70%	3.58%

5.4.2 The income for the period under review was mainly driven by fair value gains and interest from investments amounting to ZW\$56.42 billion. The fair value gains were mainly due to the revaluation of investment properties and adjustment in prices of listed equities.

5.4.3 Total expenditure increased by 267.65% from ZW\$1.36 billion for the period ended 31 December 2019 to ZW\$5.00 billion for the same period in 2020. The increase was mainly driven by total benefits paid, investment management expenses and administration expenses which accounted for 65.54%, 6.58% and

6.25% respectively.

5.4.4 Expenses to contributions ratio was 32.91%, whilst the expenses to total income ratio was 2.18% for the year ended 31 December 2020, compared to 30.66% and 1.23% in 2019, respectively.

5.4.5 Whilst the expense to total income was 2.18%, the expenses to total realised income was, however, at 5.70% as shown on Table 5 above. This reflects that part of the industry's income is not realisable and cannot be used to meet the expenses and other immediate obligations.

5.4.6 Figures 8 and 9 below show the trend in expense ratios for the period 31 December 2019 to 31 December 2020: -

Figure 8: Expenses to Contribution Ratio

Figure 9: Expenses to Total Income Ratio

5.4.7 High expenses remain a cause for concern as this has the impact of reducing benefits payable to members. It however, should be noted that the increase in the expense ratios have

been exacerbated by the Covid19 pandemic. Going forward, the Commission will be implementing regulatory measures to curtail the expenses.

6. Insured Schemes

6.1. Sector Architecture

6.1.1 There were 6 life companies administering 786 pension funds as at 31 December 2020, decreasing from 884 reported as at 31 December 2019. The decline was on account of life companies which were reporting participating employers as individual funds as well as some Funds that have dissolved during the period under review.

6.1.2 The distribution of the pension funds among insurers as at 31 December 2019 and 31 December 2020 is shown in Table 6 below.

Table 6: Distribution of Insured Pension Funds

Life Assurer	31 December 2020	31 December 2019
CBZ Life	6	6
Fidelity Life	38	38
First Mutual Life	129	180
Old Mutual Life	339	342
ZB Life	109	153
Zimnat Life	165	165
Total	786	884

While there is a decrease in the number of funds during the reporting period, there was, however, an increase in the number of reported funds compared to Q3 2020. This was on account of one of the administrators (First Mutual Life Assurance) who had omitted some funds in their previous submissions.

6.1.4 It is also important to note that although there were 786 funds administered, there were 466 active funds which constituted 59.29% of the total insured funds.

6.2. Membership

6.2.1 Total membership, excluding beneficiaries, for insured funds increased to 355,079 compared to 327,177 reported in the same period of 2019. The membership for insured funds as at 31 December 2020 and 31 December 2019 is shown in Table 7 below.

Table 7: Membership Classes

Membership Class	Number of members as at...	
	31 December 2020	31 December 2019
New Entrants	5,494	17,053
Active members (excluding new entrants)	97,946	84,204
Pensioners (Excluding beneficiaries)	7,605	17,524
Deferred Pensioners	227,357	195,718
Suspended Pensioners (Excluding beneficiaries)	1,669	6,670
Unclaimed benefits (number)	15,008	6,008
Total Members excluding beneficiaries	355,079	327,177
Beneficiaries	1,058	4,425
Total Members including beneficiaries	356,137	331,602
Total Number of Exits	4,441	816

6.2.2 The increase in total membership was mainly driven by new members who joined the fund either from newly registered funds or funds which transferred from other fund types to insured funds.

6.2.3 Whilst there was an increase in the number of active members from 84,204 members as at 31 December 2019 to 97,946, there was a 56.6% decline in pensioners. The decline in pensioners is mainly attributed to members who exited through full commutations.

6.3. Asset Quality

6.3.1 Insured funds reported assets totalling ZW\$34.50 billion, constituting 31.29% of the industry's total assets.

6.3.2 The asset base increased by 246.73% from ZW\$ 9.95 billion as at 31 December 2019. The increase in the asset base was mainly due to revaluation of properties which increased by 841.51% from ZW\$1.59 billion as at 31 December 2019.

6.3.3 However, there was a 31.42% decline in the asset base from ZW\$45.34 billion reported as at 30 September

2020 to ZW\$34.46 billion reported as at 31 December 2020. The decline in asset base was attributed to one of the administrators (Old Mutual) who claimed to have overstated the September 2020 asset base. The commission is still carrying out investigations to ascertain the position.

6.3.4 The asset trend for insured fund assets from 31 December 2019 to 31 December 2020 is shown in figure 10 below: -

Figure 10 : Insured Funds Assets Trend

6.3.5 As shown in figure 10 above, the asset base for insured funds has been on an upward trajectory from 31 December 2019. A notable increase occurred after 30 June 2020, mainly on account of revaluations and inflation following currency reforms.

6.3.6 The composition of insured funds' investments is shown in Figure 11.

Figure 11: Composition of Insured fund assets as at 31 December 2020

6.3.7 The prescribed asset ratio of 9.07% for insured funds was below the minimum regulatory threshold of 20%.

6.4. Earnings

6.4.1 Insured schemes reported a surplus of ZW\$23.95 billion for the 12 months ended 31 December 2020. Total income amounted to ZW\$24.89 billion for the period under review compared to ZW\$7.67 billion for the same period in 2019.

6.4.2 The total income for the period under review was mainly driven by fair value gains and interest from investments which amounted to ZW\$23.12 billion, thus constituting 92.89% of total income.

6.4.3 Insured funds paid ZW\$0.72 billion in benefits for the 12 months ended 31 December 2020, constituting 75.89% of the sector's total expenditure of ZWL0.94 billion.

6.4.4 Furthermore, administrative expenses for the period under review amounted to ZW\$0.23 billion. Administrative expenses were mainly driven by investment expenses and costs relating to outsourcing fund administration services. The two expense items constituted 90.9% of administrative expenses.

6.4.5 The administrative expenses translated to 16.9% and 0.91% of contributions and total income respectively, as compared to 31.67% and 1.36% for the same review period in the previous year.

6.4.6 The Statements of Comprehensive Income for insured schemes for the 12 months ended 31 December 2020 are shown on Annexure 3.

7. Self-Administered Funds

7.1 Sector Architecture

7.1.1 There were 166 self-administered funds as at 31 December 2020, compared to 167 reported as at 31 December 2019. The number of self-administered pension funds per

administrator as at 31 December 2020 and comparative year is shown in Table 8 below.

Table 8 : Number of Self-administered Funds

Name of Administrator/Insurer*	31 December 2020	31 December 2019
Professional Administrators		
Capitol Insurance Broker	1	1
Comarton Consultants	25	25
Marsh Employee Benefits	40	41
Minerva Benefit Consulting	64	64
Zimbabwe Insurance Brokers	5	5
Sub-total	135	136
Life Assurance Companies		
Fidelity Life Assurance Company	1	1
First Mutual Life Assurance Company	5	5
Old Mutual Life Assurance Company	21	21
Nyaradzo Life Assurance Company	2	2
Zimnat Life Assurance Company	2	2
Sub-total	31	31

***Not all registered life assurance companies are involved in pension administration.**

7.1.2 As shown in Table 8 above, 81.33% of the self-administered pension funds were administered by Fund Administrators, compared to 18.67% under the administration of Life Insurers. It is also important to note that three Fund Administrators administered 129 pension funds, accounting for 77.71% of the total number of self-administered funds.

7.2 Membership

7.2.1 There was a 33.54% increase in total membership from 89 008 members as at 31 December 2019 to 118 860 as at 31 December 2020. The increase is mainly due to new entrants as well as an under estimation of the 2019 figure which was caused by non-submission of 2019 audited financials.

7.2.2 The membership distribution per class of membership is shown in Table 9 below:

Table 9: Distribution of Membership for Self - Administered Funds

Membership Class	Number of members as at.....	
	31 December 2020	31 December 2019
New Entrants	2,354	7,044
Active Members (excluding new)	70,754	66,451
Pensioners	5,271	4,324
Deferred Pensioners	27,259	8,911
Suspended Pensioners	3,015	1,034
Unclaimed Benefits	10,207	1,244
Total Membership	118,860	89,008
Exits	2,117	3,766

7.2.3 As shown in Table 9 above, the number of members with unclaimed benefits increased by 720.5%, from 1,244 to 10,207 between 31 December 2019 and 31 December 2020.

7.3 Asset Quality

7.3.1 The sector's asset base increased by 479.44% in nominal terms to ZW\$37.2 billion from ZW\$6.42 billion reported at 31 December 2019. The increase was mainly attributable to revaluation of investment property and quoted equities which amounted to ZW\$12.53 billion and ZW\$17.28 billion, respectively.

7.3.2 Contribution arrears increased by 392.42% for the period under review, from ZW\$44.08 million as at 31 December 2019 to ZW\$217.06 million as at 31 December 2020. The increase was owing to two main factors, namely the treatment of arrears in line with requirements of the Guidance Paper and failure by employers to remit pensions contributions on time. The situation was exacerbated by the impact of Covid 19 lockdown which resulted in many employers failing to meet obligations to pension funds.

7.3.3 Figure 12 below shows the distribution of self-administered funds' assets as at 31 December 2020.

Figure 12: Distribution of Self-Administered Funds Assets

7.3.4 As shown in Figure 12 above, equities investments and investment property had a combined value of ZWL29.8 billion and accounted for 80.11% of the total asset base. The quantum of investment in these two asset classes reflects concentration of assets in classes that preserve value.

7.3.5 Investments in prescribed assets stood at 8.98%, which is a slight increase from 8.74% as at 31 December 2019. The ratio is still far below the required minimum regulatory threshold of 20%.

7.3.6 It is important for pension funds to note that the Commission reviewed the framework for prescribed assets to include other financial instruments such as private equity and to generally widen the scope to include any projects in support of the national developmental agenda that can be conferred prescribed asset status. As such, pension funds are encouraged to come up with such instruments and apply for prescribed assets.

7.3.7 Contribution arrears increased by 392.42% from ZW\$44.08 million as at 31 December 2019 to ZWL217.06 million, thus accounting for 7.89% of the pensions industry's contribution arrears.

7.3.8 The ratio of contribution arrears to total assets for the sector slightly declined from 0.69% as at 31 December 2019 to 0.58%.

7.4 Earnings

7.4.1 The total income for the period January to December 2020 was ZW\$28.1 billion compared to ZW\$4.47 billion for the same period in 2019.

7.4.2 The increase in total income was mainly driven by fair value gains, profit on disposal of investments and contributions which contributed 85.40% of the total income.

7.4.3 Total expenditure was ZW\$1.91 billion, having increased by 558.62% from ZWL0.29 billion reported at 31 December 2019. Of this ZW\$91 billion, benefits payments amounted to ZW\$1.10 billion, thus constituting 57.59% of the total expenditure.

7.4.4 Administrative expenses totalled ZW\$0.8 billion for the period under review, compared to ZW\$0.04 billion for the comparative period ending 31 December 2019. The expenses resulted in average expense ratios of 3.41% and 51.06% to total income and total contributions respectively for the period under review, compared to 1.7% and 27.43% for the period ending 31 December 2019.

8. Stand-alone Pension Funds

8.1 Sector Overview

8.1.1 The number of stand-alone funds for the quarter ending 31 December 2020 dropped to 15 schemes from 16, which was reported as at 31 December 2019. The sector now comprises 9 defined contribution schemes, and 6, parastatal affiliated, defined benefit schemes following the transfer of Pentact pension fund to an umbrella fund under a life insurer.

8.2 Membership

8.2.1 Total membership (excluding beneficiaries) for stand-alone pension funds increased by 3.81% to 407 389 members from 392 450 members as at 31 December 2019. The distribution of

membership by class as at 31 December 2019 and 31 December 2020 is shown in Table 10 below.

Membership Class	Number of members as at.....	
	31 December 2020	31 December 2019
New Entrants	1,531	14,617
Active members (excluding new entrants)	147,870	160,007
Pensioners (Excluding beneficiaries)	20,338	26,683
Deferred Pensioners	95921	177,117
Suspended Pensioners (Excluding beneficiaries)	8,089	5,087
Unclaimed benefits (number)	133,648	8,939
Total Members excluding beneficiaries	407,397	392,450
Beneficiaries	20,813	19,910
Total Members including beneficiaries	428,210	412,360
Total Number of Exits	699	5,679

As shown on the table above, there was a 1395.11% increase in members with unclaimed benefits from 8,939 as at 31 December 2019 to 133,648. The increase was on account of the inclusion of members who were previously excluded by the Clothing Industry Pension Fund.

8.3 Asset Base

8.3.1 Stand-Alone pension funds' assets increased by 191.65% from ZW\$13.18 billion as at 31 December 2019 to ZW\$38.44 billion. The increase in the asset base was mainly due to revaluations gains on real assets.

8.3.2 The movements across the various asset categories are shown in table 11 below: -

Table 11 : Movement in Stand-Alone Assets

8.3.3 As shown on the graph above, the Stand-alone funds mainly invested in investment property and quoted equities. These instruments are preferred given that they can be used to hedge against inflation. Investment property and quoted equities rose by

179.08% and 655.66%, respectively.

8.3.4 Contribution arrears increased by 175% to ZW\$1.32 billion from ZW\$0.48 billion as at 31 December 2019. Contribution arrears by stand-alone funds constituted 78.57% of the industry's total contribution arrears and hence the need for arrears clearance strategy for the sector.

8.3.5 Furthermore, of the ZW\$1.32 billion, 64.39% (ZW\$0.85 billion) is owed to two funds (Mining Industry Pension Fund and Local Authorities Pension Fund).

8.3.6 Investments in prescribed assets increased by 579% to ZW\$58 billion as at 31 December 2020 from ZWL0.10 billion in the previous year.

8.3.7 The ratio of prescribed assets to total stand-alone funds' assets slightly increased from 0.77% as at 31 December 2019 to 1.51%. Despite the increase, the ratio is way below the minimum prescribed requirement of 20% and funds are encouraged to comply before regulatory measures are taken.

8.4 Liabilities

8.4.1 Arrear pension benefits increased to ZW\$257.95 million as at 31 December 2020 from ZW\$73.56 million as at 31 December 2019.

8.4.2 Unclaimed benefits increased by 1936.77% to ZW\$ 397.17 million from ZW\$19.50 million as at 31 December 2019. As stated previously, the increase in unclaimed benefits was as a result of the previous exclusion of these benefits by some of the funds.

8.5 Earnings

8.5.1 Total income for the period January to December 2020 was ZW\$26.19 billion compared to ZW\$10.12 billion reported for the same period

during the previous year. This income was mainly driven by fair value gains and contributions which constituted 84.28% and 7.74% of total income, respectively.

8.5.2 Rental income amounted to ZW\$ 0.85 billion, up from ZW\$ 0.08 billion reported for the same period in 2019. Thus, rental income for the 2020 financial year constituted 3.26% of total income.

8.5.3 As at 31 December 2020, stand-alone funds were however owed ZW\$0.28 billion in rentals and there is need for the funds to continue following up to ensure that tenants pay the rental arrears to avoid loss of value by scheme members.

8.5.4 Total expenditure for the period ending 31 December 2020 was ZW\$2.15 billion. Of this amount, ZW\$1.46 billion (representing 67.91% of total expenditure), was benefit payments to scheme members.

8.5.5 Administrative expenses for stand-alone pension funds totalled ZW\$0.55 billion for the period ending 31 December 2020. This translated to the sector's expense ratios of expenses to total income and to contributions of 2.10% and 27.09% respectively. The 2020 expense ratios of 1.70% and 27.43 for the same period in 2019. Furthermore, the sector's expenses to total realised income for the period under review was 17.96%.

9. Regulatory Developments

9.1 Fund Registrations

9.1.1 The Commission registered 27 funds during the 12 months to 31 December 2020. Of these funds, 24 were full registrations while 3 were provisional registrations.

9.2 Registrations of Redrafted Fund Rules

9.2.1 In view of the need to align fund rules with changes in legislation and emerging international best practice, the Commission embarked on registration of redrafted rules. As at 31 December 2020, redrafted rules for 542 out of the 592 active funds had been registered. Registration of redrafted rules targeting inactive funds has started with redrafted rules for 51 funds having been registered.

9.2.2 The Commission notes with concern the slow rate in responding to regulatory concerns raised after assessment of submitted rules which has hindered the conclusion of the exercise that was earmarked for finalisation by 31 December 2020. The Commission is, therefore, calling non-compliant entities to comply failure of which penalties will be imposed.

9.3 Re-registration of Funds

9.3.1 In a quest to establish a credible register of registered funds in the industry, the Commission embarked on an exercise of re-registering all funds. As at 31 December 2020, 586 funds had been registered out of the expected 939 funds.

9.3.2 Emerging issues from the re-registration exercise include the following: -

- Lost registration certifications – presenting legitimacy concerns on their registration status;
- Lack of IT capacity in some entities; and
- Provisional certificates that expired as far as back as 2014 calling for regularisation.

9.3.3 A significant number of funds were observed to be inactive and unviable. As a result, administrators and insurers are now calling for dissolution of unviable inactive funds.

9.4 Prescribed Assets

9.4.1 The following instruments were accorded prescribed asset status during the review period: -

Table 12 – Approved Prescribed Assets

Item	ISSUER	PURPOSE	AMOUNT	Currency	Date Approved
1	Agribank and FBC Agro Bills	Financing the 2019/20 Agricultural season	100 million	ZWL	16 Jun 2020
2	Agribank and FBC Agro bills	Financing the 2019/20 Agricultural season	200 million	ZWL	3 Sep 2020
3	Copper Meadows	Development of residential stand	400 million	ZWL	6 Jun 2020
4	Datvest – Coutic Investments (Pvt) Ltd	To construct a specialist hospital	3.5 million	USD	3 Sep 2020
5	Guruve Solar Park	Solar Energy Project in Dunavet, Guruve	4.75 million	USD	6 Jun 2020
6	IDBZ	To finance priority infrastructure projects	2 billion	ZWL	24 Jan 2020
7	IDBZ	To finance priority infrastructure projects	250 million	USD	24 Jan 2020
8	IH Advisory/ Innscor Africa Limited	To purchase stock feed for Innscor and Colcom and to finance contract farming	100 million	ZWL	2 Apr 2020
9	Mazvel Investments (Pvt) Ltd (IDBZ SPV)	Development of residential stands in Mt Pleasant, Harare	10.2 million	USD	3 Sep 2020
10	Northern Farming/CICADA	To support contract farming for the 2020 winter wheat farming season.	150 million	ZWL	8 May 2020
11	Untu Capital (Additional 40 million on prior amount)	Onward lending finance Micro, Small and Medium Enterprises.	40 million	ZWL	8 May 2020
12	Whakiwe (Pvt) Ltd (IDBZ SPV)	Development of residential stands in Wilsgrrove Park, Bulawayo	2.6 million	USD	3 Sep 2020
13	Zimbabwe Electricity Industry Pension Fund	Development of a specialist hospital and specialist psychiatric rehabilitation centre in Harare	4.695 million	USD	22 Oct 2020
14	Nurture BX Genetics	To purchase cattle, train farmers and breed improvement	Equivalent of up to 30 000 livestock units	USD	18 Nov 2020
15	New Glovers (Pvt) Ltd	solar Energy Project in Munyati, Kwekwe	8.3 million	USD	18 Nov 2020
16	Untu Capital (Additional 40 million on prior amount)	Onward lending finance Micro, Small and Medium Enterprises.	40 million	ZWL	18 Nov 2020

9.4.2 Given the low prescribed asset compliance levels of 6%, the Commission urges the industry to invest in approved prescribed assets to reach the minimum required level of compliance.

9.5 Implementation of the Guideline for the Insurance and Pensions Industry on Adjusting Insurance and Pension Values in Response to Currency Reforms

9.5.1 Pursuant to the issuance of the Guideline for the Insurance and Pensions Industry on Adjusting Insurance and Pension Values in Response to Currency Reforms, through Statutory Instrument 69 of 2020, the Commission continues to enforce and monitor implementation of the Guideline.

9.5.2 This is an important guideline which is meant to ensure that there is equitable distribution of revaluation gains among policyholders and pension fund members arising from currency reforms effected in 2019.

9.5.3 We urge those still non-compliant to ensure compliance given that submission for the 31 December 2020 measurement date is now due yet the reallocation for the prior measurement date of 31 December 2019 is yet to be finalised.

9.6 Capacitation of the Industry

9.6.1 In an effort to ensure that the industry is capacitated to comply with regulatory requirements, the Commission has been conducting training sessions with individual entities on various areas.

9.6.2 Furthermore, an industry wide workshop was also conducted on filing of returns through the SAP system as well as re-registration of funds.

9.7 Pensions Complaints Resolution Report

9.7.1 During the quarter ended 31 December 2020, the Commission handled 75 complaints relating to pensions, out of which 35 were resolved, 11 were under investigation as at 31 December 2020 and 29 related to implementation of the Commission of Inquiry recommendation on the compensation of pension scheme members owing to the loss of value occasioned by the 2009 currency reforms.

9.7.2 Those under investigation related to unremitted contributions, additional information required from pensioners and investigations by pension funds on payments made through cheques submitted to members' former employers.

9.7.3 The bulk of cases that remain outstanding relate to non-remittance of contributions by employers and low values at conversion in 2009.

9.7.4 Those to do with non-remittance are at various stages of resolution as some employers have submitted payment plans to respective fund administrators whilst others have started making part payments.

9.7.5 Figure 13 below summarises the breakdown of the complaints as explained above.

9.7.6 The Commission continues to encourage pension funds to follow up on payment plans agreed with sponsoring employers who have outstanding contributions.

9.7.7 Trustees should ensure that annual benefit statements are submitted to members so that they are aware of their benefits status and contribution arrears, if any. Pension fund members are advised to regularly update their details, particularly contact details as well as their nominated beneficiaries.

APPENDIX

Annexure 1: Consolidated Industry Statement of Comprehensive Income for the 12 months ended December 2020

	Insured Funds	Self Administered Funds	Stand Alone Funds	Total
Income				
Year to date Contributions (Including arrears)	1,343,838,884	1,879,738,870	2,026,256,755	5,249,834,509
Interest on contribution arrears	36,682	-	154,013,545	154,050,227
Transfer from other funds	710,727,679	116,225,539	524,992	827,478,210
Transfer to other funds	(264,125,380)	(32,004,404)	(803,726)	(296,933,510)
Rental Income	3,046,438	174,858,393	854,878,541	1,032,783,372
Interest from Investments	21,288,036,766	1,278,998,562	56,621,225	22,623,656,554
Dividends from investments	8,031,492	1,270,578,562	118,661,754	1,397,271,808
GLA Premiums received	9,090,696	18,003,404	2,566,688	29,660,789
GLA Premiums (paid)	(72,909,165)	(109,285,337)	(1,652,082)	(183,846,584)
