Disclaimer

This report including enclosures and attachments, has been prepared by the Insurance and Pensions Commission (IPEC) solely for informative purposes to the pension industry stakeholders, and may not be reproduced, redistributed, communicated to a third party or relied upon by any other person for any other purpose without the Commission's prior written consent. The Commission does not accept any liability, if this report is used for any other purposes other than the above-mentioned intended purpose.

This report highlights major developments in the pension industry and does not cover the public-sector pension scheme and the National Social Security Authority (NSSA). The report is based on unaudited financial statements of insured, stand-alone self-administered funds, as well as self-administered funds under insurers and professional fund administrators.

Annexure 7: Consolidated Statement of Comprehensive Income for Stand-Alone Funds.....	19
Annexure 8: Consolidated Statement of Financial Position for Stand-Alone Funds.....	20

1. Executive Summary

1.1 The number of registered funds in the pensions industry stood at 974 as at 31 March 2021 compared to 959 funds reported as at 31 March 2020. Of the 974 registered funds, 622 were active, constituting 63.86% of the industry's funds.

1.2 Total membership, excluding beneficiaries was 909 627, having risen by 2.46% from 887 746 as at 31 March 2020.

1.3 The total asset base for the industry increased by 494.16% from ZW\$29.81 billion as at 31 March 2020 to ZW\$177.12 billion as at 31 March 2021 whilst annual inflation stood at 240.55%.

1.4 The increase in the asset base was mainly due to revaluation of investment property and quoted equities, which increased by 413.45% and 459.03%, respectively. These two major asset classes constituted 71.84% of total industry assets.

1.5 The value of prescribed assets increased in nominal terms by 135.81% to ZW\$ 5.40 billion from ZW\$ 2.29 billion reported as at 31 March 2020. Whilst there was an increase in the nominal value of prescribed assets investments, compliance was still low at 3.05% against the regulatory minimum of 20%.

1.6 Total income for the industry as at 31 March 2021 was ZW\$34.20 billion compared to ZW\$5.79 billion reported in the same period in 2020. The income was mainly driven by fair value gains, profit on disposal of investments and contributions, which accounted for 95.25% of the total income. The remaining 4.75% is accounted for by transfer from other funds and rental income.

1.7 Total industry expenditures for the period under review amounted to ZW\$2.28 billion, of which 61.55% went towards benefit payments.

1.8 Average expenses to total income ratio remained unchanged at 2.02%.

2. The Insurance and Pensions Commission at a Glance

2.1 The Insurance and Pensions Commission (IPEC) is a statutory body mandated to regulate, supervise and develop the insurance and pensions industry for the protection of policyholders and pension scheme members. This report outlines industry developments and IPEC's various activities in the pensions industry consistent with its statutory mandate for the quarter ending 31 March 2021.

3. Terms of Reference

3.1 The activities of the Commission are guided by the following Acts and the respective Regulations: -

- Insurance and Pensions Commission Act [Chapter 24:21];
- Pension and Provident Funds Act [Chapter 24:09];
- Insurance Act [Chapter 24:07];
- Money Laundering and Proceeds of Crime Act [Chapter 09:24];
- Finance Act [Chapter 23:04];
- Public Entities and Corporate Governance Act [Chapter 10:31]; and
- Public Finance Management Act [Chapter 22:19].

4. Economic Developments

4.1 COVID-19 Impact on Global Economic Developments

4.1.1 It is one year since World Health Organisation (WHO) declared COVID-19 a global pandemic. The accumulating death toll remains a concern despite the growth in the vaccine rollout coverage aimed at reducing the number of infections as well as COVID-19 related complications.

4.1.2 For the period January and March 2021, COVID-19 confirmed cases recorded globally were 46 135 152 and associated deaths 935 353. The first quarter 2021 cases were, however, 5.9 percent lower than those recorded in the fourth quarter of 2020, an improvement attributed to vaccine administration.

4.1.3 A high level of uncertainty surrounds global output in the outlook. Economic recovery is expected to be uneven across jurisdictions depending on vaccination rollouts, policy support measures and the adjustment by sectors to new ways of doing business.

4.2 Covid-19 Impact on Businesses

4.2.1 The pandemic accelerated the digitalisation of both supervisory processes and the insurance business value chain. For regulators, key learnings from the Covid-19 crisis have been used to future-proof supervision. Consequently, going forward some supervisory processes shall be streamlined to ensure agility effectively backed by resilient digital infrastructure.

4.2.2 For the industry, Covid-19 presented an opportunity to leapfrog digitalisation. However, as with the law of unintended consequences, the automation process resulted in increased operational efficiency and

excess staff. Redundancy risk leading to calls for voluntary retrenchments in the industry have heightened with corporate restructuring and streamlining of operations.

4.2.3 The Commission has noted that entities with clients offering tourism related activities have remained hamstrung due to the pandemic with some struggling to keep up with paying premiums and pension contributions. Others, in cross border transportation services have also reduced fleet size and retrenched work force. However, the full impact of the pandemic on the industry is still unfolding.

4.3 Global and Regional Economic Outlook

4.3.1 The International Monetary Fund projects global output to grow by 6.0% in 2021 from an estimated contraction of 3.3% in 2020, before moderating to 4.4% in 2022.

4.3.2 The growth forecasts are underpinned by additional fiscal support in large economies such as the United States, adaptation to the new ways of conducting business, and the anticipated vaccine-powered recovery. The World Bank's world output forecast for 2021 is slightly lower at 4% and is expected to moderate to 3.8% in 2022, weighed down by the pandemic's lasting damage to potential growth.

4.3.3 Advanced economies are expected to grow by 5.1% in 2021, a 0.8 percentage point's improvement from IMF's January 2021 projection of 4.3%. The expected growth is a reflection of business adapting to the challenging health situation through resorting to teleworking and improving COVID-19 containment measures.

1.9 GDP growth for emerging markets and developing economies is projected to expand by 6.7% in 2021 (IMF 2021). China remains the fastest growing economy and is expected to register a growth rate of 8.4% in 2021 and 5.6% in 2022, supported by strong policies and resilient exports. The global economic outlook projections are summarised in Table 1.

Table 1: World Economic Outlook Projections (Percentage Change)

	2020	2021*	2022*
World Output	-3.3	6.0	4.4
Advanced Economies	-4.7	5.1	3.6
USA	-3.5	6.4	3.5
Euro Area	-6.6	4.4	3.8
Emerging Markets and Developing Countries	-2.2	6.7	5.0
China	2.3	8.4	5.6
Sub-Saharan Africa	-1.9	3.4	4.0
Nigeria	-1.8	2.5	2.3
South Africa	-7.0	3.1	2.0

Source: April 2021 World Economic Outlook, IMF. * Projections

4.3.4 The Sub-Saharan Africa region is projected to grow by 3.4% in 2021 (IMF 2021). The World Bank sets the region's growth at between 2.3% and 3.4% in 2021 supported by improved exports and commodity prices, along with a recovery in both private consumption and investment. The episodes of virus resurgence and mutations may undermine the growth prospects for the SSA region in 2021.

4.4 Domestic Economic Outlook

4.4.1 The Zimbabwean economy is expected to recover from a projected contraction of 4.5% in 2020 to a growth of 7.4% in 2021 and 5.5% in 2022.

4.4.2 All sectors of the economy are expected to register growth in 2021, with the agriculture and mining sectors expected to record the highest growth rates of about 11% each, tourism (6.8%), and electricity (10%) finance, banking and insurance activities (7.1%), among the major sectors.

4.4.3 Economic activity is expected to improve in 2022, with GDP growing at around 5%, as consistent implementation of the National Development Strategy 1 reforms start bearing fruit.

4.4.4 The IMF and World Bank economic growth projections for the country in 2021 are conservatively set at 3.1% and 2.9%, respectively and that of 2022 at 4.0% and 3.1%.

4.5 Exchange Rate Movements

4.5.1 Exchange rate stability brought about by the foreign exchange auction system introduced on 23 June 2020 resulted in a more predictable foreign exchange market. During the first quarter of 2021, the Zimbabwe dollar depreciated marginally from an interbank rate of ZW\$ 82.7 as at 29 January to ZW\$83.9 as at 26 February, and further to ZW\$ 84.4 as at 26 March 2021.

4.5.2 The weakening of the local currency emanated from high foreign exchange demand, as businesses were gearing for re-stocking anticipating opening of the economy. Figure 1 shows the interbank exchange rate movements during the period March 2020 to March 2021.

Figure 1: Interbank Exchange Rate March 2020 to March 2021 (US\$/ZW\$)

Source: Reserve Bank of Zimbabwe

4.6 Inflation Developments

4.6.1 Annual inflation in January 2021 increased to 362.6% from the December 2020 figure of 348.6% mainly attributable to adjustments of electricity, fuel and rates at the beginning of the year.

4.6.2 However, stability was maintained in the rest of the quarter as inflation decreased to 240.6% in March 2021.

Similarly, the annual blended inflation rate decreased from 191.5% in January 2021, to 122.3% in March 2021. The changes in inflation rates for the period of March 2020 to March 2021 are illustrated in Figure 2.

Annual blended CPI inflation combines the average changes in price of goods and services sold in the two main currencies in circulation, namely the ZWL and USD.

Figure 2: Inflation profile March 2020 to March 2021.

Source: Zimbabwe National Statistics Agency

4.6.3 Month-on-month inflation rate declined from 5.4% in January 2021 to 3.5% in March 2021. Notable declines were registered in clothing and footwear from 104.2% in January 2021 to 103.21% in March 2021 and education from 116.0% to 113.70% over the same period.

4.6.4 Whilst the decline in inflation rate is commendable as it is assisting in boosting business and consumer confidence, more still needs to be done to bring down inflation to a single digit level (below 10%) as projected, by December 2021.

4.7 Zimbabwe Stock Exchange and Victoria Falls Stock Exchange Developments

4.7.1 Equity Market Highlights

4.7.1.1 Local equities were bullish in the first quarter of 2021, as investors continue with hedging activities as they seek a haven for their wealth in light of limited value preserving investment options.

4.7.1.2 The All-Share index went up by 68.11%, from 2636.34 points recorded in December 2020. Major indices recorded growth in the first quarter of 2021 with the Top 10, Medium-Cap and Small Cap indices gaining 54.37%, 90.98% and 297.2% to close at 2580.33 points, 10487.48 points and 47327.53 points, respectively. The quarter under review also witnessed a mining index gain of 33.82% to close at 5532.09 points.

4.7.1.3 However, the value of shares traded decreased by 16.17% in the first quarter of 2021 compared to the fourth quarter of 2020 and market turnover declined by 7.66% during the quarter under review. Table 2 illustrates the key stock market development indicators in the fourth quarter of 2020 and first quarter of 2021.

Table 2. Key Stock Market Development Indicators

ZSE Indicator	Dec-2020	Mar-2021	Change (%)
All-Share index (points)	2636.34	4432.50	68.11
Top 10 Index (points)	1671.47	2580.33	54.37
Medium Cap Index (points)	5491.09	10487.48	90.98
Small Cap Index (points)	11914.14	47327.53	297.2
Mining Index (points)	4134.09	5532.09	33.82
Volume of shares traded (ZW\$ million)	33.27	27.89	-16.17
Market turnover (ZW\$ m)	501.71	463.29	-7.66

Source: Zimbabwe Stock Exchange (ZSE)

4.7.1.4 On an annual basis, all the stock market indices recorded phenomenal gains, riding on the positive sentiments, as shown on Figure 3.

Figure 3: Zimbabwe Stock Exchange All-Share and Top 10 Indices

Source: Zimbabwe Stock Exchange

4.7.1.5 Market capitalisation further improved in the first quarter of 2021. The local bourse gained ZW\$204.46 billion, or 64.45% worth of capitalisation to ZW\$ 521.69 billion during the first quarter of 2021, from ZW\$ 317.23 billion recorded in December 2020. Figure 4 shows market capitalisation developments for the period 26 March 2020 to 26 March 2021.

Figure 4: Daily Market Capitalisation in ZW\$ Billions from March 2020 to March 2021

Source: Zimbabwe Stock Exchange

4.7.2 Victoria Falls Stock Exchange (VFEX)

4.7.2.1 Since the bourse was launched on the 23rd of October 2020, SeedCo International is still the only counter listed on the Victoria Falls Stock Exchange.

4.7.2.2 There were no trades on the Victoria Falls Stock Exchange in January and February of 2021. There were US\$2,686 worth of trades in SeedCo International VFEX in March 2021 resulting in the counter's share price going up by 11.1% to US\$0.2.

4.8 Money Market Developments

4.8.1 Savings and Deposit Interest Rates

4.8.1.1 Real interest rates remained negative during the quarter under review, following the high annual inflation rate which ended the quarter at 240.6% against nominal interest below 20%. The savings deposit rates registered declines in the quarter from a range of 1.68% -4.69% as at 31 December 2020 to 1.57% - 4.04% as at 26 March 2021, as shown in Table 3.

4.8.1.2 Notable improvements were recorded in One-month and Three-month deposit rates in the quarter. One-month nominal deposit rates improved from a maximum of 9.55% end of December 2020 to 10.83% as at 26 March 2021, while three-month deposit rates improved from a maximum of 9.46% to 11.80% over the same period.

Table 3: Average Rate Per Annum

Date	Savings Deposit (%)	One-Month Deposit Rates (%)	Three-Month Deposit Rates (%)
31-Dec-20	1.68-4.69	5.25-9.55	6.68-9.46
29-Jan-21	1.57-4.47	5.11-10.27	6.26-11.15
26-Feb-21	1.57-4.24	5.00-9.88	6.08-11.43
26-Mar-21	1.57-4.04	5.19-10.83	6.79-11.80

Source: Reserve Bank of Zimbabwe, 2021

4.9 Other Developments - Covid-19 Update

4.9.1 The World Health Organisation reported that between January and March 2021, there have been 46 135 152 confirmed cases of COVID-19, including 935 353 deaths globally. COVID-19 transmissions and deaths confirmed in the first quarter of 2021 were 5.9 percent lower than those recorded in the fourth quarter of 2020. A notable decrease in Covid-19 transmissions and deaths is attributed to vaccine doses being administered.

4.9.2 As at 31 March 2021, Zimbabwe had 36,882 cases of COVID-19, up from 36,089 cases recorded at the end of February 2021. The average number of daily cases slowed down significantly from 614 cases in January 2021, to 26 cases by end of March 2021, owing to the level 4 lockdown measures enforced between 3 January 2021 and 15 March 2021.

4.9.3 The country started rolling out vaccines towards the end of February 2021. Over 1.5 million of doses Sinovac, Siphopharm and Covax vaccines were received during the quarter. By 31 March 2021, a total of 76,995 people had received their first dose and 14,885 their second jab.

5. Regulatory Developments for the Period Ending 31 March 2021

5.1. Fund Registrations

5.1.1. The Commission registered five (5) funds in the first quarter of 2021, out of which four (4) funds were full registrations while one (1) was a provisional registration. The registered funds were: -

- Greyhound Payroll Pvt Ltd registered under Old Mutual
- Chivi RDC Pension Fund registered under Old Mutual
- Zimbabwe Teachers Association Provident Fund under ZB Life
- Amalgamated Preservation Pension Fund under Comarton
- Zimbabwe Women's Microfinance

5.1.2. The Commission also registered was one fund administrator, namely Econet Life.

5.2. Registrations of Redrafted Rules

5.2.1. As at 31 March 2021, 92% of rules for active funds had been re-registered by the Commission. The Commission will commence the process of registering redrafted rules for all inactive funds with a target finalisation date of 31 August 2021.

Re-registration of Funds

5.2.2. As at 31 March 2021, there were 679 re-registered funds. The deadline for the exercise is 30 June 2021. The re-registration is meant to establish a credible database of registered funds.

5.3. Prescribed Assets

5.3.1. In the first quarter of 2021, the Minister of Finance and Economic Development approved the following prescribed assets: -

- Silo Foods Pvt Ltd ZW\$ \$350 Million Debt Instrument
- First Mutual Microfinance ZW\$ 200 million for on-lending to MSMEs

5.3.2. Assessment of applications for prescribed asset status is ongoing and the industry should see more of the approved instruments on the market. This should assist industry in complying with the prescribed assets requirements.

5.4. Circulars and Statutory Instruments

5.4.1. The Commission issued the following circulars and Statutory Instruments for the review period: -

Table 4: Circulars and Statutory Instruments

Circular/SI	Date Issued/ Gazetted	Purpose
Circular 7 of 2021 on Certificates of Existence	24 February 2021	To give moratorium of 90 days before suspension of a pensioner for failing to submit a certificate of existence
S.I. 84 of 2021	26 March 2021	Revision of fees payable to the Commission
S.I. 86 of 2021	26 March 2021	Revision of levies payable to the Commission

5.5. Capacitation of the Industry

5.5.1. In line with the Commission's mandate of capacitating industry, a workshop was held on 29 January 2021 to train relevant personnel on electronic filing of returns. This was meant to ensure 100% electronic filing of quarterly returns. Technical assistance was also offered to individual entities that requested for it.

5.6. International Engagements

5.6.1. The Commission actively participated in activities of regional and international bodies such as the International Organisation of Pension Supervisors, the International Association of Insurance Supervisors. These include participation in surveys, meetings, workshops and training, thus putting IPEC on the international regulatory map.

5.7. Pensions Complaints handled

5.7.1. During the quarter-ended 31 March 2021, the Commission handled 55 complaints, out of which, 25 were resolved while 30 were yet to be resolved. Most of the unresolved complaints related to the compensation for the loss of values owing to the 2009 currency reforms and unremitted pension contributions by sponsoring employers, thus calling for expediency in resolving the legacy loss of value.

5.7.2. Other complaints that were yet to be resolved related to additional information required from pensioners following claims by pension funds that they made payments to the pensioners through cheques submitted to members' former employers.

5.7.3. The nature of complaints handled is as per the attached table below: -

Table 5: The nature of complaints handled:

Nature of complaints	Number of complaints
Low pension values	21
Non-payment of benefits	11
Late payment of benefits	13
Unremitted contributions	10
Total	55

5.7.4. As shown in table 5 above, low pension value complaints were due to loss of value associated with the adoption of the multicurrency system in February 2009. The Commission and key stakeholders are working flat out

to ensure compensation to policyholders and pension scheme members in line with the Commission of Inquiry's recommendation.

5.7.5. Non-payment and late payment of pension benefits were mainly due to beneficiaries providing inadequate information.

5.7.6. Non-remittance of pension contributions by sponsoring employers was the other cause of non-payment and late payment of pension benefits. The consequence of this is that members then retire into poverty as there will be no benefits for them, from the pension funds.

5.7.7. To address the problem of non-remittance of pension contributions, the Pension and Provident Funds Bill that is currently before Parliament, proposes penalising decision-makers such as chief executive officers and finance directors in their personal capacities. If passed into law, this is expected to go a long way in reducing incidences of non-remittance of contributions.

5.7.8. Further, the Revaluation Guidance following the 2019 currency reforms, insists on sponsoring employers paying the arrears.

5.7.9. The Commission also urges trustees to ensure sponsoring employers remit outstanding contributions.

6. Industry Overview

6.1 The key performance indicators for the pensions industry as at 31 March 2021 are depicted in Table 6 below: -

Table 6: Key Highlights of the Pensions Industry as at 31 March 2021

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Self-Administered Funds	Total
Number of Funds	790	169	15	974
Active funds	472	135	15	622
Members	357,385	134,368	417,874	909,627
Share of total membership	39%	15%	46%	100.00%
Total Income	9,448,142,871	13,999,870,178	10,753,913,439	34,201,926,489
Total Contributions (\$)	669,223,605	961,733,738	1,228,402,334	2,859,359,677
Rental Income (\$)	2,164,483	62,842,802	476,809,283	541,816,568
Investment Income (\$)	8,554,741,940	12,409,912,207	9,379,078,829	30,343,732,976
Investment Income over total assets	19.51%	21.91%	12.24%	17.13%
Total Expenditure (\$)	789,937,377	660,807,926	830,000,834	2,280,746,137
Total Benefits Incurred (\$)	643,001,519	431,711,858	329,023,302	1,403,736,679
pension benefits per pensioner (\$)	11,482.57	8,717.57	6,877.67	7,782.42
Expenses/Contributions	21.06%	22.26%	27.20%	24.10%
Expenses/Total Income	1.49%	1.53%	3.11%	2.02%
Income Surplus/Deficit (\$)	8,658,205,494	13,339,062,253	9,923,912,605	31,921,180,352
Total Assets (\$)	43,848,092,418	56,632,149,325	76,642,634,901	177,122,876,644
Total Assets per member (\$)	122,327	410,902	174,673	189,425
Percentage of Total Assets	24.76%	31.97%	43.27%	100.00%
Prescribed Assets (\$)	3,223,113,148	1,662,342,983	514,851,199	5,400,307,329
Prescribed Assets Ratio	7.35%	2.94%	0.67%	3.05%
Contribution Arrears (\$)	178,640,106	232,680,524	1,838,667,957	2,249,988,587

Notes:

1. Total membership excludes fund beneficiaries (spouse and children of the deceased members).

2. Total Investment income is made up of rental income, dividends, interest on investments, profit on disposal of assets and fair value gains.

3. Total Expenditure for the industry includes benefits paid, transfer to reserves, revaluation losses and provisions.

4. Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation losses.

6.2 As shown in table 6, there were 974 registered occupational pension funds as at 31 March 2021, compared to 959 funds reported as at 31 March 2020.

6.3 The increase was on account of new funds registrations during the period under review.

6.4 Of these 974 registered funds, 622 were active, thus constituting 63.86% of the industry funds.

6.5 The high number of inactive funds, which constituted 36.14%, are still a major concern to the Commission. In response, the Commission has revised the resolution framework for troubled funds to ensure a structured and efficient mechanism for resuscitating funds which can be resuscitated and directing dissolution of ng funds whose chances of resuscitation are minimum.

6.1. Membership

6.1.1 The industry's total membership, excluding beneficiaries increased by 2.46% to 909 627 from 887 746 as at 31 March 2020. The increase was largely attributable to new entrants.

6.1.2 The breakdown of membership as at 31 March 2021 and comparative period is shown in Table 7 below: -

Table 7: Breakdown in Membership

Membership Class	Membership as at ...	
	31 March 2021	31 March 2020
New Entrants	8,075	9,100
Actives excluding new entrants	329,279	323,576
Pensioners	33,869	38,907
Deferred Pensioners	357,216	354,976
Suspended Pensioners	12,546	16,958
Unclaimed Benefits	168,642	144,609
Total Membership (excluding beneficiaries)	909,627	887,746
Beneficiaries	25,426	17,356
Total Membership (including beneficiaries)	935,053	905,102
Exits	3,919	4,737

6.1.3 As shown in table 7 above, there was a decline in the number of pensioners and suspended pensioners. The decline in pensioners is mainly attributed to members getting their full benefits through commutation applications.

6.1.4 There was a 16.62% increase in members with unclaimed benefits, to 168 642 from 144 609 as at 31 March 2020 notwithstanding the Commission's awareness initiatives to reduce incidences of unclaimed benefits .

6.2. Asset Quality

6.2.1 The industry's asset base grew in nominal terms by 494.16% to ZW\$177.12 billion from ZW\$29.81 billion recorded in March 2020. There was also a growth in the industry's assets in USD terms to US\$2.10 billion from US\$1.19 billion reported in the same period last year largely on account of price discovery on major asset classes such as investment property and quoted equities.

6.2.2 In addition, contributions made for the period under review also contributed to the growth in assets.

6.2.3 The industry's asset base of ZW\$177.12 billion translates to a pension penetration rate of 16.54%, expressed as a percentage of the GDP . This significant proportion of assets to GDP confirms the important role played by the pensions industry in socio-economic development of the country.

6.2.4 In addition, the pensions industry's share of ZSE's market capitalisation as at 31 March 2021 was 10.29% implying that industry remains critical to the development of the country's stock market.

6.2.5 The figure below shows the industry asset base trend from 31 March 2020 to 31 March 2021: -

Figure 5: Trend in Industry Assets Growth

This is 2020 GDP as reflected in the 2021 National Budget Statement

6.2.6 The increase in the asset base was mainly driven by an increase in the values of investment properties, quoted equities and unquoted equities, which had a combined share of 88.34% of the industry's assets.

6.2.7 Investment property increased to ZW\$72.55 billion from ZW\$14.13 billion as at 31 March 2020. However, its contribution to the industry's total assets declined from 47.38% to 40.94% as the industry invested in other financial instruments, which include unquoted equities, to diversify their portfolios.

6.2.8 Unquoted equities increased by 3 851%, to ZW\$29.24 billion from ZW\$0.74 billion recorded in March 2020. This increase is also motivated by the industry's drive to look for value preserving instruments. Furthermore, the significant increase in the value of investments in this asset class was due to proper classification by one stand-alone fund which was previously misclassifying it.

6.2.9 However, given the challenges associated with unquoted equities, which include liquidity, valuation and corporate governance, the Commission will soon issue guidelines relating to investments in such an asset class.

6.2.10 Quoted equities increased by 459.03% to ZW\$54.69 billion from ZW\$9.78 billion as at 31 March 2020. Capital gains mainly account for the increase in quoted equities.

6.2.11 While the suspension of some major counters on the Zimbabwe Stock Exchange has continued, the valuation of such counters has not been affecting the values recorded as such counters are now being valued using the Johannesburg Stock Exchange (JSE) as a reference as per the Securities and Exchange Commission of Zimbabwe's Directive No SS 28/04/21, which was effective 31 December 2020.

6.2.12 The distribution of the industry's assets as at 31 March 2021 is shown in Figure 6 below: -

Figure 6: Distribution of Pension Industry Assets as at 31 March 2021

6.2.13 Funds' value of investments in equities and investment property in has been on an upward trend as shown in Figure 7 below:

Figure 7: Listed Equities and Investment Property Trend

6.2.14 Contribution arrears increased by 236%, to ZW\$2.25 billion from ZW\$ 0.67 billion reported as at 31 March 2020. The increase is mainly attributed to the application of interest on arrears as well as the continued non remittance of contribution arrears by some sponsoring employers.

6.2.15 Whilst there was an increase in contribution arrears, the proportion of contribution arrears to total assets declined from 2.26% as at 31 March 2020 to 1.27%.

6.2.16 Of the ZW\$2.25 billion, 81.72% (which translates to ZW\$1.84 billion) is owed to stand-alone funds. The Local Authorities Pension Fund, the Mining Industry Pension Fund and the Zimbabwe Electricity Industry Pension Fund constituted more than 75% of the industry's contribution arrears.

6.2.17 Notwithstanding the decline in the proportion of contribution arrears to total assets, sponsoring employers are urged to clear these contribution arrears so that pension scheme members do not lose their benefits through this unfunded portion.

6.2.18 The total amount invested in prescribed assets increased by 135.81% to ZW\$5.40 billion from ZW\$2.29 billion reported in March 2020. Notwithstanding the increase in the absolute amount invested by the pensions industry in prescribed assets, there was a huge decline in prescribed asset ratio as shown in Table 8 below: -

Table 8: Compliance Levels for Prescribed Assets

Sector	31 March 2021		31 March 2020	
	Amount (ZWS b)	Ratio (%)	Amount (ZWSb)	Ratio (%)
Stand-Alone Funds	0.51	0.67	0.12	1.61%
Self-Administered Funds	1.66	2.94	0.84	9.21%
Insured	3.22	7.35	1.33	10.19%
Total/Average Ratio	5.40	3.05%	2.29	7.67%

Figure 8: Prescribed Assets Compliance Level

6.2.19 The decline in the compliance level was mainly due to the revaluation of investment properties vis-à-vis the fixed income bearing prescribed assets which remains constant until maturity.

6.2.20 Engagements with the industry and Government are underway to explore all the possible ways to improve prescribed assets compliance in a way that can preserve value for pension scheme members.

6.3. Unclaimed Benefits

6.3.1 Unclaimed benefit liabilities increased significantly by 1,013% from ZW\$0.15 billion as at 31 March 2020 to ZW\$1.67 billion.

6.3.2 Whilst the increase in unclaimed benefits was mainly due to revaluation gains, the Commission is concerned with the high levels and calls upon the industry to scale up efforts in tracing the affected members.

6.4. Earnings

6.4.1 Table 9 below indicates the key income and expenditure indicators: -

Table 9: Key Income Indicators

Indicator	March 2021 (billion)	March 2020 (billion)
Total Contributions (ZW\$ billion)	2.86	0.44
Investment Income (ZW\$ billion)	30.34	5.28
Total Income (ZW\$ billion)	34.20	5.79
Total Benefits Paid (ZW\$ billion)	1.40	0.26
Total Expenditure (ZW\$ billion)	2.28	0.40
Expenses to Contribution Ratio	24.10%	26.56%
Expenses/Total Income Ratio	2.02%	2.02%
Expenses/Total Realised Income	5.92%	3.20%

6.4.2 The income for the period under review was mainly driven by fair value gains, interest from investments and total contributions amounting to ZW\$31.2 billion. These three income items constituted 91.23% of the industry's total income.

6.4.3 Total expenditure increased by 470% from ZW\$0.4 billion for the period ended 31 March 2020 to ZW\$2.28 billion. The increase was mainly driven by total benefits paid, investment management expenses and administration expenses which accounted for 61.55%, 8.38% and 8.36% respectively.

6.4.4 Expenses to contributions ratio was 24.1%, whilst the expenses to total income ratio was 2.02% for the year ended 31 March 2021, compared to 26.56% and 2.02% in 2020, respectively.

6.4.5 Whilst the expense to total income was 2.02%, the expenses to total realised income was, however, at 5.92% as shown on Table 5 above. This implies that part of the industry's income is not realisable and cannot be used to meet the expenses and other immediate obligations.

6.4.6 Figures 9 and 10 below show the trend in expense ratios for the period 31 March 2020 to 31 March 2021: -

Figure 9: Expenses to Contribution Ratio

Figure 10: Expenses to Total Income Ratio

6.4.7 High expenses remain a cause for concern as this has the impact of reducing benefits payable to members. To curb such high expenses, the Commission is working on a framework to guide industry on expenses charged to pension funds.

7. Insured Schemes

7.1 Sector Architecture

7.1.1 There were 6 life companies administering 790 pension funds as at 31 March 2021, increasing from 778 reported as at 31 March 2020. The increase was due to new registrations over the period under review.

7.1.2 The distribution of the pension funds among insurers as at 31 March 2020 and 31 March 2021 is shown in Table 10 below.

Table 10: Distribution of Insured Pension Funds

Life Assurer	31 March 2021	31 March 2020
CBZ Life	6	5
Fidelity Life	38	38
First Mutual Life	130	123
Old Mutual Life	341	339
ZB Life	109	108
Zimnat Life	166	165
Total	790	778

7.1.3 It is also important to note that of the 790 funds administered, 472 were active, constituting 59.75% of the total insured funds.

7.1.4 The high number of inactive funds is a concern to the Commission and was mainly attributed to viability challenges faced by the sponsoring employers.

7.2 Membership

7.2.1 Total membership, excluding beneficiaries, for insured funds increased by 2.68% to 357,385 from 348,071 reported as at 31 March 2020. The increase in total membership was mainly attributed to new members who joined either from newly registered funds as well as funds that transferred from other fund schemes to insured funds.

7.2.2 The membership for the two periods is shown in Table 11 below: -

Table 11: Membership Classes

Membership Class	Number of members as at...	
	31 March 2021	31 March 2020
New Entrants	2,566	5,918
Actives excluding new Entrants)	99,152	101,339
Pensioners	6,830	8,182
Deferred Pensioners	231,583	224,560
Suspended Pensioners	1,737	1,499
Unclaimed Benefits	15,517	6,573
Total Membership (excluding beneficiaries)	357,385	348,071
Exits	1,161	2,267

7.2.3 As shown in the table above, there was a decrease in the number of active members from 101,339 members as at 31 March 2020 to 99,152 members.

7.2.4 The decline in active members can be explained by the corresponding increase in deferred pensioners as members leave employment will have their benefits being deferred pending retirement age. Due to the Covid 19 pandemic, several sponsoring employers have faced viability challenges, which resulted in either closure or downsizing, consequently resulting in members being retrenched.

7.2.5 There was a 16.52% decline in pensioners, which was mainly attributed to members exiting the funds and being paid full commutations.

7.3 Asset Quality

7.3.1 The total asset base for insured funds was \$43.85 billion as at 31 March 2021, constituting 24.76% of the industry's total assets.

7.3.2 This was an increase of 237.05% from \$13.01 billion reported as at 31 March 2020. This was mainly due to revaluation gains on properties and equities.

7.3.3 Investment property increased by 152.47% from ZW\$6.08 billion as at 31 March 2020 to ZW\$15.35 billion whilst quoted equities increased by 339.40%, from ZW\$4.67 billion reported as at 31 March 2020 to ZW\$20.52 billion.

7.3.4 The asset trend for insured funds from 31 March 2020 to 31 March 2021 is shown in figure below:-

Figure 11: Asset trend

7.3.5 As shown in the figure above, the asset base for insured funds has been on an upward trajectory from 31 March 2020, although there was a 23.9% decline in the asset base, from September 2020 to December 2020, which is attributed to undervaluation of suspended counters as most reporting entities were using prices as at suspension date. As previously mentioned, the increase was mainly on account of revaluations.

7.3.6 The composition of insured funds' investments is shown in the figure below: -

Figure 12: Composition of Insured fund assets as at 31 March 2020

7.3.7 Investments in prescribed assets totalling \$3.2 billion constituted only 7% of the sector's total asset base as at 31 March 2021. Whilst the prescribed asset ratio for the sector is higher as compared to stand-alone and self-administered funds, the ratio is still below the minimum regulatory threshold of 20%.

7.4 Earnings

7.4.1 Total income amounted to \$9.45 billion for the period January to March 2021 compared to \$3.24 billion during the same period in 2020. The \$8.6 billion is mainly attributed to fair value gains on equities and interest from investment.

7.4.2 Interest from investments totalling \$7.72 billion contributed 81.68% of the total income for the period under review. Insured funds paid \$643.00 million in benefits for the 3 months ended 31 March 2020, constituting 81.40% of the sector's total expenditure.

7.4.3 The sector's administrative expenses totalled ZW\$0.15 billion and were driven by investment management expenses and administration charges which constituted

59.74% and 31.18%, respectively.

7.4.4 The administrative expenses translated to 21.06% and 1.49% of contributions and total income respectively, as compared to 21.16% and 1.01% for the same period in 2020.

7.4.5 The Statements of Comprehensive Income for insured schemes for the 3 months ended 31 March 2021 are shown on Annexure 3.

8 Self-Administered Funds

8.1 Sector Architecture

8.1.1 There were 169 self-administered funds as at 31 March 2021, compared to 165 reported as at 31 March 2020. The increase was attributed to new funds that were registered during the period under review.

8.1.2 The number of self-administered pension funds per administrator as at 31 March 2021 are shown in Table 12 below.

Table 12 : Number of Self-administered Funds

Name of Administrator/Insurer*	31 March 2021	31 March 2020
Professional Administrators		
Capitol Insurance Broker	1	1
Comarton Consultants	26	24
Marsh Employee Benefits	40	41
Minerva Benefit Consulting	65	64
Zimbabwe Insurance Brokers	5	5
Sub-total	137	135
Life Companies		
Fidelity Life Assurance Company	1	1
First Mutual Life Assurance Company	5	5
Old Mutual Life Assurance Company	21	20
Nyaradzo Life Assurance Company	3	2
Zimnat Life Assurance Company	2	2
Sub-total	32	30
Grand Total	169	165

*Not all registered life offices (life assurance companies) are involved in pension administration.

8.1.3 As shown in Table 12 above, 81.07% of the self-administered pension funds were administered by

Fund Administrators, compared to 18.93% under the administration of Life Insurers. It is also important to note that two Fund Administrators administered 105 pension funds, accounting for 62.13% of the total number of self-administered funds.

8.2 Membership

8.2.1 There was a 1.61% increase in total membership for self-administered funds to 121,784 from 119,855 members as at 31 March 2020. The increase was due to new fund registrations for the period under review.

8.2.2 The membership distribution per class of membership is shown in Table 13 below: -

Table 13: Distribution of Membership for Self - Administered Funds

Membership Class	Number of members as at.....	
	31 March 2021	31 March 2020
New Entrants	2,363	1,607
Active Members (excluding new)	71,030	65,424
Pensioners	5,942	7,099
Deferred Pensioners	28,684	32,321
Suspended Pensioners	3,388	3,505
Unclaimed Benefits	10,377	9,899
Total Membership	121,784	119,855
Exits	2,351	1,425

8.2.3 As shown in Table 13 above, the number of members with unclaimed benefits increased by 4.83% during the period under review. The increase in unclaimed benefits is mainly due to members not forth coming to claim their benefits due to their unawareness of the entitlements.

8.2.4 There was also a decline in the number of pensioners and deferred pensioners which was due to members exiting funds through full commutations, as well as deferred pensioners reaching the retirement age, thereby accessing their pension benefits.

8.3 Asset Quality

8.3.1 The sector's asset base increased by 524.37% in nominal terms from ZW\$9.07 billion as at 31 March 2020 to ZW\$56.63 billion. The increase was mainly attributable to revaluation of assets.

8.3.2 The two major drivers of the assets' growth were investment property and quoted equities which increased by 351.22% and 369.15%, respectively.

8.3.3 Contribution arrears increased by 454.26% for the period under review, the arrear contributions grew from ZW\$41.98 million as at 31 March 2020 to ZW\$232.68 million

8.3.4 The main reason for the increase in arrear contributions was the adjustment of arrear contributions to take into account late payment interest as per the Guidance Paper and sponsoring employers facing viability challenges.

8.3.5 Figure 13 below shows the distribution of self-administered funds' assets as at 31 March 2021.

Figure 13: Distribution of Self-Administered Funds Assets

8.3.6 As shown in Figure 13 above, quoted equities and investment property constitute 56.21% of the total asset base while unquoted equities contribute 24.48% of the total asset base. The quantum of investment in these asset classes reflects concentration of investments in classes that preserve value.

8.3.7 The amount invested in prescribed assets by the sector increased by 97.62%, up from ZW\$0.84 billion as at 31 March 2020 despite the increase in the decline in the prescribed asset ratio from 9.21% as at 31 March 2020 to 2.94%.

8.3.8 The Commission is concerned with such a decline given that it is way below the prescribed regulatory minimum requirement of 20%.

8.4 Earnings

8.4.1 The total income for the sector for the period January to March 2021 amounted to ZW\$14.0 billion compared to ZW\$1.7 billion reported during the same period in 2020. Total income was mainly driven by fair value gains, profit on disposal of investments and contributions, which had a combined proportion of 91.82% to the sector total income.

8.4.2 Total expenditure was ZW\$0.66 billion for the period ending 31 March 2021, increasing by 446% from \$0.15 billion reported at 31 March 2020. Total expenditure was mainly driven by benefits payments which constituted 65.33% of the total expenditure.

8.4.3 Administrative expenses totalled ZW\$0.21 billion compared to ZW\$0.03 billion as at 31 March 2020. The expenses resulted in average expense ratios of 1.53% and 22.26% to total income and total contributions, respectively, compared to 1.60% and 19.54% for the period ending 31 March 2020.

9 Stand-Alone Pension Funds

9.1 Overview of Stand-Alone Funds Sector

9.1.1 The number of Stand-alone funds as at 31 March 2021 remained at 15, comprising 9 defined contribution schemes and 6 defined benefit schemes.

9.2 Membership

9.2.1 Total membership for stand-alone pension funds declined by 0.47% from 419,820 members, as at 31 March 2020 to 417,874 members as at 31 March 2021. The distribution of membership by class as at 31 March 2020 and 31 March 2021 is shown in Table 14 below:-

Table 14: Membership Statistics for Stand-Alone Pension Funds

Membership Category	Q1 2021	Q1 2020
New Entrants	2,886	1,575
Actives excluding new entrants	146,513	156,813
Pensioners (Excluding beneficiaries)	21,097	23,626
Deferred Pensioners	97,209	98,095
Suspended Pensioners (Excluding beneficiaries)	7,421	11,574
Unclaimed benefits (number)	142,748	128,137
Total Membership (excluding beneficiaries)	417,874	419,820
Beneficiaries	2,905	13,550
Total Membership (including beneficiaries)	438,779	433,370
Exits	407	1,045

9.3 Asset Base

9.3.1 Stand-Alone pension funds' assets increased by 891.46%, to ZW\$76.64 billion from ZW\$7.73 billion as at 31 March 2020. The increase in the asset base was due to revaluations of assets as per guideline on currency reforms.

9.3.2 Investment property, quoted equities and unquoted equities significantly contributed to the asset base increase for the sector. Investment property increased by 790.97%, to ZW\$42.41 billion from ZW\$4.76 billion as at 31 March 2020.

9.3.3 Quoted equities increased by 1057.43%, to ZW\$17.13 billion from ZW\$1.48 billion as at March 2020.

9.3.4 It is also worth noting that unquoted equities' share of total assets has also been increasing as the industry is seeking to explore ways of preserving members' values. As at 31 March 2021, unquoted equities constituted 16% of the sector's assets.

9.3.5 The distribution of the assets for the stand-alone funds as at 31 March 2021 is shown in Figure 14 below: -

Figure 14: Distribution of Assets for Stand-Alone Funds as at 31 March 2021

9.3.6 As indicated on the diagram above, investment property, quoted equities and unquoted equities accounted for 93.69% of the total asset base.

9.3.7 Investment in prescribed assets increased by 325%, to ZW\$0.51 billion from ZW\$0.12 billion reported as at 31 March 2020. In spite of the increase in the absolute

amount invested in prescribed assets, the ratio declined from 1.61% to 0.67%, which is way below the regulatory minimum requirement of 20%.

9.3.8 Contribution arrears increased by 174.63%, to ZW\$1.84 billion from ZW\$0.67 billion as at 31 March 2020. Three funds, which namely the Mining Industry, the Local Authorities and the Zimbabwe Electricity Industry, constituted 79.23% of the sector's arrears and there is need for the funds to continuously engage the sponsoring employers to ensure clearance of such arrears.

9.3.9 Arrear pension benefits increased by 66.26%, from ZW\$ 59.7 million as at 31 December 2020 to ZW\$99.26 million. The increase in arrear pension benefits is attributable to exiting members whose benefits are due for payment, but the funds would not be having enough liquidity to pay the benefits.

9.3.10 Unclaimed benefits increased by 3 725% to ZW\$1.53 billion from ZW\$0.04 billion as at 31 March 2020. The increase was mainly due to revaluation of unclaimed benefits.

9.4 Earnings

9.4.1 The total income for the sector for the period January to March 2021 amounted to ZW\$10.75 billion compared to ZW\$0.85 billion reported during the same period in 2020. Total income was mainly driven by fair value gains, rental income and interest on contribution arrears which had a combined proportion of 87% to the sector total income. Stand-alone pension funds reported surplus income over expenditure of ZW\$9.92 billion for the quarter ending 31 March 2021.

9.4.2 Total expenditure was ZW\$0.83 billion for the period ending 31 March 2021, increasing by 591.67% from ZW\$0.12 billion reported at 31 March 2020. Total expenditure was mainly driven by benefits payments, staff costs and provision for bad debts which constituted 67.09% of the total expenditure.

9.4.3 Administrative expenses totalled ZW\$0.21 billion compared to ZW\$0.06 billion as at 31 March 2020. The expenses resulted in average expense ratios of 4.66% and 40.80% to total income and total contributions, respectively, compared to 6.74% and 38.88% for the period ending 31 March 2020.

Annexure 1: Consolidated Industry Statement of Comprehensive Income for the 3 months ended March 2021

	Insured Funds	Self Administered Funds	Stand Alone Funds	Total
Income				
Year to date Contributions (Including arrears)	669,223,605	961,733,738	1,228,402,334	2,859,359,677
