DISCLAIMER

Disclaimer

This report, including enclosures and attachments, has been prepared by the Insurance and Pensions Commission (IPEC) solely for informative purposes to the pension industry stakeholders, and may not be reproduced, redistributed, communicated to a third party or relied upon by any other person for any other purpose without the Commission's prior written consent. The Commission does not accept any liability, if this report is used for any other purposes other than the above-mentioned intended purpose.

This report highlights major developments in the pension industry and does not cover the public-sector pension scheme and the National Social Security Authority (NSSA). The report is based on unaudited financial statements of insured, stand-alone self-administered funds, as well as self-administered funds under insurers and professional fund administrators.

1. Executive Summary

- 1.1. There were 985 registered occupational pension funds as at 31 December 2021, compared to 967 funds reported as at 31 December 2020.
- 1.2. The increase in registered pension funds was as a result of new registrations and the correction by Old Mutual Life Assurance Company who had stopped reporting funds under dissolution.
- 1.3. Of these 985 registered funds, 606 were active, thus constituting 61.52% of the industry funds. The remaining 38.48% are funds, which are either paid up or funds undergoing dissolution as per directive issued by the Commission to dissolve inactive funds.
- 1.4. The industry's total membership, excluding beneficiaries increased from 881,336 reported as at 31 December 2020 to 916,991 as at 31 December 2021. The increase was largely attributable to new entrants and reinstatement of members for the purpose of allocating revaluation gains.
- 1.5. The industry's asset base grew in nominal terms by 189% to ZW\$318.96 billion from ZW\$110.24 billion recorded in December 2020 as the values for major asset classes adjusted in response to inflation.
- 1.6. The industry's asset base of ZW\$318.96 billion translates to an average asset share per member (including beneficiaries) of ZW\$337,824.58 compared to ZW\$121,852 as at 31 December 2020. Given the annual rate of inflation of 24.9% for December 2021, the 177% increase in average asset per member indicates that the asset values are generally tracking inflation. However, it is important to note that pension values are still very low, and the Commission is working together with the industry to improve member's benefits through various initiatives.
- 1.7. The increase in the asset base was mainly driven by quoted equities and investment properties, which had a combined share of 81.15% of the industry's total assets. Quoted equities now constitute a bigger portion of the investment portfolio for the pensions industry. New contributions are being channelled to

the stock market since equity has proven to be a value preserving asset in an inflationary environment. The Zimbabwe Stock Exchange is on record for surpassing inflation and the best performing stock market within the Southern African region.¹

- 1.8. Quoted equities, which constituted 55% of the industry's asset portfolio, increased by 318.45%.
- 1.9. Investment property grew by 87.36%, to ZW\$96.74 billion from ZW\$51.63 billion as at 31 December 2020. Its contribution to the industry's total assets declined to 30.33% from 46.84% as at 31 December 2020.
- 1.10. Investments in prescribed assets by the industry stood at ZW\$13 billion as at 31 December 2021, translating to a prescribed assets ratio of 4.08%, which is below the prescribed regulatory minimum of 20%. The Ministry of Finance and Economic Development has approved a number of bankable instruments on prescribed assets, which is expected to go a long way in enhancing availability of instruments to ensure that the industry comply with prescribed asset requirements.
- 1.11. Total income for the industry as at 31 December 2021 was ZW\$174.57 billion compared to ZW\$79.21 billion reported in the same period in 2020. It is important to note that the increase in total income for the pensions industry is mainly driven by fair value gains which are not realised income.
- 1.12. Total industry expenditures for the period under review amounted to ZW\$17.77 billion, of which ZW\$9.98 billion (56%) went towards benefit payments.

2. The Insurance and Pensions Commission At Glance

The Insurance and Pensions Commission (IPEC) is a statutory body mandated to regulate, supervise, and develop the insurance and pensions industry for the protection of policyholders and pension scheme members in Zimbabwe. This report outlines industry developments and IPEC's various activities in the pensions industry consistent with its statutory mandate for the quarter ending 1 December 2021.

3. Terms of Reference

The activities of the Commission are guided by the following Acts and the respective Regulations: -

- ❖ Insurance and Pensions Commission Act [*Chapter 24:21*];
- ❖ Pension and Provident Funds Act [*Chapter 24:09*];
- ❖ Insurance Act [*Chapter 24:07*];
- ❖ Money Laundering and Proceeds of Crime Act [*Chapter 09:24*];
- ❖ Finance Act [*Chapter 23:04*];
- ❖ Public Entities and Corporate Governance Act [*Chapter 10:31*]; and
- ❖ Public Finance Management Act [*Chapter 22:19*].

4. Economic Developments

4.1. COVID-19 Updates

- 4.1.1. Global Covid-19 cumulative cases reached 278.7 million at the end of December 2021, up from 79.2 million cases confirmed at the end of December 2020. The pandemic-related fatalities rose to 5.4 million from 1.7 million over the same period (WHO, 2021).
- 4.1.2. The total Covid-19 cases in Zimbabwe rose to 213,258 as at 31 December 2021, from 13,867 recorded for the corresponding period in 2020. Covid-19 related deaths increased to 5,004 cases from 363 cases in the prior year. The national recovery rate stood at 85% and a total of 3,135,175 people had been fully vaccinated by year end.

4.2. Covid-19 Impact on Insurance and Pensions Industry

4.2.1. In the outlook, the emergence of the new Covid-19 variants could prolong the pandemic and induce renewed economic disruptions. Meanwhile, Zimbabwe welcomes the opening up of the country's borders, as this is expected to boost economic activity and address liquidity challenges faced by the insurance and pensions industry. The pandemic affected employers and employees in hard-hit sectors such as tourism and hospitality services. It also contributed to increased operating expenses as insurance companies and pension funds sought to capacitate staff to work remotely.

4.2.2. The renewed economic activity through opened borders is, therefore, expected to contribute to improved household and business incomes needed to facilitate the payment of premiums and pension contributions. Ultimately, this will assist in reducing the level of premium debtors' policy lapses, and contribution arrears.

4.3. Global and Regional Economic Outturn and Outlook

4.3.1. The International Monetary Fund (IMF) estimated global output growth of 5.9% in 2021, and a subdued projection of 4.4% in 2022 due to economic disruptions caused by the Omicron variant. The World Bank on the other hand estimated a growth of 5.5% in 2021 and 4.1% in 2022, reflecting continued Covid-19 flare-ups, and persistent supply bottlenecks. The growth rates in other regions are illustrated in Table 1.

Table 1: World Economic Outlook Projections

	2021	2022	2023
World Output	5.9	4.4	3.8
Advanced Economies	5.0	3.9	2.6
USA	5.6	4.0	2.6
Euro Area	5.2	3.9	2.5
Emerging Markets and Developing Economies	6.5	4.8	4.7
China	8.1	4.8	5.2
Sub-Saharan Africa	4.0	3.7	4.0
Nigeria	3.0	2.7	2.7
South Africa	4.6	1.9	1.4
Zimbabwe	5.1	3.1	-

4.4. Domestic Economic Performance Outturn and Outlook

4.4.1. The domestic output growth for 2021 is estimated to reach 7.8%, reflecting a strong rebound from -5.3% registered in 2020. In 2022, the economy is projected to grow by 5.5%, underpinned by higher output in mining, manufacturing, agriculture, and construction.

4.5. Exchange Rate Developments

4.5.1. The Zimbabwe dollar depreciated against the US dollar in the fourth quarter, shedding 31.44% to close at an average of US\$1: ZW\$108.7. The marginal depreciation was due to high foreign exchange demand as businesses were gearing for re-stocking ahead of the festive season. Figure 1 shows the exchange rate trend since January 2021.

Figure 1: Interbank Exchange Rate January to December 2021
US\$/ZW\$) – End of Period

Source: Reserve Bank of Zimbabwe

4.6. Inflation Developments

4.6.1. The annual inflation decreased to 60.7% in December 2021, down from 362.6% registered in January 2021. The month-on-month inflation spiked in June and October 2021 due to acceleration in food and non-food inflation before slowing down towards the end of 2021 on account of tight monetary policy, and fiscal policy consolidation measures. Figure 2 illustrates the inflation trend from January to December 2021.

Figure 2: Inflation profile (%), January to December 2021

Source: Zimbabwe National Statistics Agency

4.7. Zimbabwe Stock Exchange Performance

4.7.1. The fourth quarter of 2021 experienced positive trading, with the Top 10, and All-Share indices gaining 40.2%, and 26.1%, respectively. The local bourse increased by 40.13% worth of capitalisation to close at ZW\$1.3 trillion, from ZW\$940.02 billion recorded in the third quarter of 2021. The level of activity on the stock exchange driven by the demand for equities as a value-preserving asset. Table 2 shows the quarterly change in the key stock market indicators.

Table 2: Changes in the Key Stock Market Indicators

ZSE Indicator	Sept-2021	Dec-2021	Change (%)
All share index (points)	8,580.16	10,822.36	26.1
Top 10 Index (points)	4,857.20	6,811.43	40.2
Medium Cap Index (points)	20,599.24	20,407.26	-0.9
Small Cap Index (points)	25,4232.9	40,2753.1	58.4
Market Capitalisation (ZW\$ billion)	940.02	1,317.21	40.1
Shares traded (million)	69.39	26.79	-61.4
Market turnover (ZW\$ mil)	1,403.07	831.60	-40.7

Source: Zimbabwe Stock Exchange

Victoria Falls Stock Exchange (VFEX) Performance:

4.7.2. The VFEX registered trades worth US\$114,544.74 in the fourth quarter, a decline of 75.8% when compared to US\$473,336.01 recorded in the third quarter of 2021. Two mining companies, Caledonia Mining, and Bindura Nickel were listed on the VFEX during the quarter, bringing the total number of counters to four. The total market capitalisation level as at 31 December 2021 was US\$ 259,743,936.20.

4.8. Money Market Developments - Savings Deposit Rates

4.8.1. During the quarter under review, the average savings deposit rates were below 20% while the annual inflation rate closed at 60.7%. Thus, in the entire quarter, the real returns on money market investments continued to be in the negative territory.

5. Regulatory Developments for the Period Ending 31 December 2021

5.1. Circulars/Directives/ Frameworks Issued

5.1.1. During the period under review the Commission issued the following circulars:-

Document	Release date	Content
Circular 28 of 2021 Income Drawdown Framework	01 October 2021	Guidelines and Principles in the development and marketing of Income Drawdown Products
Circular 34 of 2021	11 November 2021	1. Directive for Dissolution of inactive Funds; and 2. Guideline for smoothed pooled investments.
Circular 41 of 2021 Framework on Expenses	10 December 2021	Guideline on prescribed thresholds and basis of charging expenses

5.1.2. The Circulars were meant to address gaps that had been identified by the Commission during inspections and on analysis of quarterly returns.

5.2. Registration of Funds

5.2.1. The Commission registered 7 funds, out of which 4 were full registrations. There were also 2 name changes, namely Marsh Employee Benefits Zimbabwe to Bright Employee Zimbabwe and Nissan Clover Leaf Pension Fund to Zimbabwe Motor Investments Company Pvt Limited Pension Fund.

5.3. Prescribed Assets

5.3.1. During the fourth quarter of 2021, 8 applications were conferred with prescribed asset status as shown in the table below:-

Table 3: Approved Prescribed Assets

Issuer	Issue Amount	Purpose
IDBZ	US\$ 100 million	Infrastructure development (road rehabilitation, upgrading & equipping health facilities and irrigation infrastructure)
Agrowth Pvt Ltd	ZW\$ 750 million (review from ZW\$650 million)	To finance the 2021/2022 Agriculture season
Untu Capital	US\$ 5 million	Onward lending to SMEs
NMB	ZWL 2 billion	To finance agriculture
Trade and Development Bank	US\$15 million to US\$20 million annually	Issuance of Class B Shares
Eastern and Southern Africa Trade Fund	US\$15 million to US\$20 million annually	Redeemable Participating Shares
AFC	ZW\$ 13.5 billion	To finance the 2021/2022 Agriculture season
Victory Tobacco	US\$20 million	Tobacco Contract Farming

The industry is urged to subscribe to the instruments to ensure compliance with prescribed asset requirements.

Complaints Handling

Below is a summary of walk-in clients during the 4th quarter of 2021:

Figure 3: Walk-in clients

5.4. Pensions Complaints

5.4.1. During the quarter ended 31 December 2021, the Commission received a total of 123 complaints relating to Pensions, out of which, 43 were resolved, 15 were under investigation and 65 related to the pre-2009 compensation, which requires implementation of the Commission of Inquiry's recommended compensation framework.

5.4.2. Those under investigation related to unremitted contributions, additional information required from pensioners and investigations by pension funds on payments made through cheques submitted to members' former employers.

Table 4: Status of Pension Complaints

Total Received	Resolved	Under investigation	Commission of Inquiry
123	43	15	65

5.4.3. The bulk of cases that remain outstanding relate to non-remittance of contributions by employers and low values at conversion in 2009.

5.4.4. The graph below summarises the breakdown of the complaints as explained above:

Figure 4: Summary of Customer Complaints

5.4.5. The Commission noted the following as the general challenges facing the pensions industry during the quarter under review:

- i. Non-payment of pension benefits.
- ii. Low values caused by hyperinflation and dollarisation in February 2009.
- iii. Late payment of benefits.

5.4.6. The graph below shows that 53% of the complaints related to low pension values occasioned by the currency conversion of 2009 with most pensioners following up on the Commission of Inquiry recommendations. Therefore, the Commission is seized with putting in place various measures to improve benefits. These include regulation of administration and investment management expenses, enhancing governance of pension funds and allowing offshore investments to diversify sovereign risk, among others.

5.4.7. Non-payment of benefit accounted for 24% of the complaints received in the quarter, whilst late payment of benefits, accounting for 15% in the last quarter of 2021.

5.4.8. Unremitted contributions complaints is another category of complaints, which constituted 8% of the complaints received in the period under review.

5.4.9. The Commission continues to encourage pension funds to follow up on payment plans agreed with sponsoring employers who have outstanding contributions.

Figure 5: Nature of Pensions Complaints

- 5.4.10. Trustees should ensure that annual benefit statements are sent out to members so that they are aware of their benefits status and contribution arrears, if any.
- 5.4.11. Other complaints related to the delays in processing of benefits by pension funds, mostly owing to inadequate information on the part of beneficiaries.
- 5.4.12. Pension fund members are advised to regularly update their details, particularly contact details as well as their nominated beneficiaries.
- 5.4.13. Another source of complaints related to the suspension of benefits due to non-submission of life certificates. The Commission urges pension funds and administrators to raise awareness on this requirement as many beneficiaries seem not to be aware of this requirement.
- 5.4.14. The Commission's programme to assist members check their pension status using a search engine has been commended by members of the public as it has addressed some unanswered questions.
- 5.4.15. However, the issue of compensation as recommended by the Justice Smith-led Commission of inquiry remains outstanding as members seek a final solution to the long outstanding programme.
- 5.4.16. The Commission is seized with putting in place a Framework for pre-2009 Compensation in line with recommendations of the Commission of Inquiry to bring closure on the compensation of the members who lost their pension values.

6. Industry Overview

6.1. The key performance indicators for the pensions industry as at 31 December 2021 are depicted in the table below: -

Table 5: Key Highlights of the Pensions Industry as at 31 December 2021

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Self-Administered Funds	Total
Number of Funds	799	171	15	985
Members	353,345	148,246	415,400	916,991
Share of total membership	39%	16%	45%	100.00%
Total Income (Billion ZW\$)	58.57	68.91	47.09	174.57
Total Contributions (Billion ZW\$)	3.72	5.55	7.14	16.41
Rental Income (Billion ZW\$)	0.01	0.36	2.09	2.46
Investment Income	55.41	51.04	34.81	141.26
Investment Income/Total Assets	55.43%	46.59%	31.80%	44.29%
Total Expenditure (Billion ZW\$)	4.49	5.42	7.86	17.77
Total Benefits Incurred (Billion ZW\$)	3.42	3.88	2.68	9.98
pension benefits per pensioner (Thousand ZW\$)	77.93	83.80	48.59	58.65
Expenses/Contributions	28.39%	25.01%	68.03%	44.48%
Expenses/Total Income	1.80%	2.02%	10.31%	4.18%
Income/ Surplus (Deficit) Billion ZW\$	54.08	63.49	39.23	156.80

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Self-Administered Funds	Total
Total Assets (Billion ZW\$)	99.96	109.53	109.47	318.96
Total Assets per member	282,105	717,433	250,907	337,825
Percentage of Total Assets	31.34%	34.34%	34.32%	100.00%
Prescribed Assets (Billion ZW\$)	3.66	8.18	1.16	13.00
Prescribed Assets Ratio	3.66%	7.47%	1.06%	4.08%
Contribution Arrears (Billion ZW\$)	0.39	0.72	3.16	4.27
Arrears Pension Benefits	-	117,908,680	489,412,685	607,321,365

Notes:

1. Total membership excludes fund beneficiaries (spouse and children of the deceased members).
2. Total Investment income is made up of rental income, dividends, interest on investments, profit on disposal of assets and fair value gains.
3. Total Expenditure for the industry includes benefits paid, transfer to reserves, revaluation losses and provisions.
4. Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation losses.

- 6.2. As shown in Table 5, there were 985 registered occupational pension funds as at 31 December 2021, compared to 967 funds reported as at 31 December 2020.
- 6.3. Registered pension funds increased on account of new registrations and rectification by Old Mutual Life Assurance Company who previously excluded funds under dissolution from the previous statistics. This position has since been corrected since funds under dissolution should be part of the reported funds until all the assets have been distributed.
- 6.4. Of these 985 registered funds, 606 were active, thus constituting 61.52% of the industry funds.
- 6.5. In order to resolve the issue of inactive funds, the Commission is enforcing the implementation of Directive for Dissolution of Inactive Funds issued through Circular 34 of 2021.

7. Membership

7.1. The industry's total membership, excluding beneficiaries increased from 881,336 reported as at 31 December 2020 to 916,991 as at 31 December 2021.

The increase was largely attributable to new entrances and reinstatement of members for the purpose of allocating revaluations gains.

7.2. The breakdown of membership as at 31 December 2021 and comparative period is shown in Table 5 below: -

Table 6: Breakdown in Membership

Membership Class	Membership as at ...	
	31 December 2021	31 December 2020
New Entrants	6,587	9,379
Actives excluding new entrants	342,556	316,576
Pensioners	35,569	33,208
Deferred Pensioners	368,933	350,537
Suspended Pensioners	12,093	12,773
Unclaimed Benefits	151,253	158,863
Total Membership (excluding beneficiaries)	916,991	881,336
Beneficiaries	27,170	23,374
Total Membership (including beneficiaries)	944,161	904,710
Exits	10,750	7,257

7.3. There was an increase in deferred pensioners between the inter-comparative periods mainly due to some sponsoring employers scaling down as a result of covid-19 induced economic hardships.

7.4. Unclaimed benefits registered a slight decrease of 5% in members from 158,863 to 151,253 as at 31 December 2021. The Commission urges the industry to continuously trace all the members with unclaimed benefits through the implementation of the framework for treating customers fairly.

8. Asset Quality

8.1. The industry's asset base grew in nominal terms by 189% to ZW\$318.96 billion from ZW\$110.24 billion recorded in December 2020. The growth in asset base was mainly driven by revaluation of assets as the Commission continues to enforce the guidance paper on currency reforms. Capital gains on equity is also a major driver in growth of industry assets, as the stock market mirrors inflation movements in the economy.

8.2. The industry's asset base of ZW\$318.96 billion translates to an average asset per member (including beneficiaries) of ZW\$337,824.58, this translates to a penetration rate of 13% based on the projected GDP for 2021.

8.3. The figure below shows the industry asset base trend from 31 December 2020 to 31 December 2021: -

Figure 6: Trend in Industry Assets Growth (ZW\$billion)

8.4. Investment property grew by 87.36%, to ZW\$96.74 billion from ZW\$51.63 billion as at 31 December 2020. The share of investment property to the total industry assets increased by 3 percentage points from 47% in 2020.

8.5. Quoted and unquoted equities increased by 318.45% and 238.21%, respectively. Quoted equities increased to ZW\$158.27 billion from ZW\$37.82 billion, while unquoted equities increased to ZW\$10.95 billion from ZW\$3.24 billion during the period under review. Listed equities held by the pensions industry accounted for 12.02% of the ZSE market capitalisation, indicating the significant role played by the industry on the capital market.

8.6. The distribution of the industry's assets as at 31 December 2021 is shown in Figure 8 below: -

Figure 7: Distribution of Pension Industry Assets as at 31 December 2021

8.7. Funds' value of investments in equities and investment property in absolute terms has been on an upward trend as shown in Figure 9 below:

Figure 8: Listed Equities and Investment Property Trend

8.8. Investment in quoted equities continued to dominate the investment portfolio for the pensions industry.

8.9. Contribution arrears increased by 155.06%, to ZW\$4.27 billion from ZW\$1.68 billion reported as at 31 December 2020. The increase is mainly driven by continued non-remittance of contributions by some sponsoring employers as they faced viability challenges as well as timing differences between end of reporting period and due date for remitting contributions .

8.10. The proportion of contribution arrears to total assets decreased to 1.34% from 1.52% as at 31 December 2020. Contribution arrears remain a topical issue within the pensions industry and the Commission will continue to engage the industry to find a lasting solution to the matter such that there is timeous investment of contributions for the benefit of the fund members.

8.11. Out of the ZW\$4.27 billion contribution arrears as at 31 December 2021, 74.03%, which translates to ZW\$3.16 billion, is owed to stand-alone funds the biggest contributor being the Local Authority Pension Fund (23.9%), followed by the Mining Industry Pension Fund (23.3%) and National Railways of Zimbabwe Pension Fund (11.8%) in that order.

8.12. The total amount invested in prescribed assets increased by 84.14% to ZW\$13 billion from ZW\$7.06 billion reported in December 2020. Though there was an increase in the absolute amount invested by the pensions industry in prescribed assets, the compliance level remains low at 4.06%, which is way below the minimum prescribed ratio of 20%.

8.13. The Table below shows the Prescribed assets compliance levels for 2020 and 2021.

Table 7: Compliance Levels for Prescribed Assets

Sector	31 December 2021		31 December 2020	
	Amount (ZW\$ b)	Ratio (%)	Amount (ZW\$b)	Ratio (%)
Stand-Alone Funds	1.16	1.06%	0.58	1.51%
Self-Administered Funds	8.18	7.47%	3.35	8.98%
Insured	3.7	3.66%	3.13	9.07%
Total/Average Ratio	13.04	6.39%	7.06	6.52%

Figure 9: Prescribed Assets Compliance Level

8.14. The graph above shows that compliance with prescribed assets has been on a downward trend since December 2020. In order to improve compliance level, various bankable projects have been accorded prescribed assets status as they meet both the developmental and value preservation requirements of insurers and pension funds. The Commission urges the industry to regularise the non-compliance position.

9. Unclaimed Benefits

9.1. Unclaimed benefit liabilities increased significantly by 381.79% from ZW\$0.62 billion as at 31 December 2020 to ZW\$2.97 billion as at 31 December 2021. The increase in unclaimed benefits is mainly as a result of revaluation gains on assets supporting such liabilities.

9.2. There was an overall decrease in members with unclaimed benefits by 4.79%, to 151,253 from 158,863 reported in the same period last year. The Commission is urging all the industry players to strengthen their KYC requirements so that it becomes easy to trace members with unclaimed benefits. In addition, the industry should intensify efforts to locate members whose benefits have been unclaimed for a long time.

10. Earnings

10.1. Table 7 below indicates the key income and expenditure indicators: -

Table 8: Key Income Indicators

Indicator	December 2021 (billion)	December 2020 (billion)
Total Contributions (ZW \$billion)	16.41	5.25
Investment Income (ZW\$ billion)	141.26	71.54
Total Income(ZW\$ billion)	174.57	79.21
Total Benefits (ZW\$ billion)	9.98	3.28
Total Expenditure (ZW\$ billion)	17.77	5.00
Expenses to Contribution Ratio	44.48%	32.91%
Expenses/Total Income Ratio	4.18%	2.18%
Expenses/Total Realised Income	7.79%	5.70%

10.2. The main drivers for income during the period under review were fair value gains, interest from investments and total contributions, which constituted 44.23%, 30.79% and 9.40% of the industry's total income, respectively.

10.3. Total expenditure increased by 255.40% from ZW\$5.00 billion to ZW\$17.77 billion as at 31 December 2021. Total benefits paid, investment management expenses and administration expenses were the three top drivers of total expenditure which constituted 56.18%, 7.65% and 5.22%, respectively.

10.4. Expenses to contributions ratio was 44.48%, whilst the expenses to total income ratio was 4.18% for the year ended 31 December 2021. Furthermore, expenses to realisable income also increased to 7.79% from 5.70% reported during the same period in the previous year. The deteriorating expense ratios is a cause for concern as it affects the growth in accumulation for members.

10.5. In an effort to contain the high expenses, the Commission issued an Expenses Framework, which prescribed expense thresholds for different administration models. The prescribed expense ratios are effective from 1 January 2022 and the expectation is full compliance by 30 June 2022.

10.6. Figures 11 and 12 below show the trend in expense ratios for the period 31 December 2020 to 31 December 2021: -

Figure 10: Expenses to Contribution Ratio

Figure 11: Expenses to Total Income Ratio

10.7. As shown on the graph above, the expenses to income ratio is on an upward trend, hence the need for the afore-mentioned regulatory intervention.

11. Monthly Pension Benefits

11.1. The industry's average monthly pension benefits as at December 2021 was ZW\$9,900 up from ZW\$5,684 reported as at September 2021.

11.2. The monthly pension benefits were on an upward trend from the period January to December 2021. The increase was mainly due to the distribution of revaluation gains that were distributed to members for the period under review.

11.3. The figure below shows the average monthly pension benefits for the industry: -

Figure 12: Industry Average Monthly Pension Benefits

11.4. Notwithstanding the increase in monthly pension benefits, the Commission is still concerned with low benefit levels members are still getting.

11.5. The distribution of benefits is as shown in the figure below: -

Figure 13: Industry Average Monthly Pension Benefits

- 11.6. As shown in the figure above, more than 50% of pensioners are getting monthly benefits below ZW\$3 000. This is notwithstanding the minimum monthly pension of ZW\$3 000, which is stipulated Circular 25 of 2021.
- 11.7. There is, therefore, need to increase awareness to pensioners so that they become aware of their eligibility to fully commute their benefits. However, the Commission is also seized with interrogating reasons for low benefit values and measures of improving them before facilitating commutations.
- 11.8. Furthermore, the Commission has also noted that most of the members receiving such low are under inactive funds, which the Commission has already earmarked for dissolution through a directive. The Commission, therefore, call upon administrators to expedite the implementation of the dissolution directive so that members do not continue to lose value.

12. Forex Business

The total income received by the pensions industry as at 31 December 2021 was USD\$25.17 million with total expenditure amounting to USD\$1.70 million, resulting in a total surplus of USD\$23.46 million. Contributions and interest from investments were the major drivers of income on foreign business constituting 65.20% and 33.76%, respectively.

The pensions industry had a total USD-denominated asset base of USD\$95.6 million as at the reporting date, which was mainly concentrated in quoted equities, prescribed assets and money market. The distribution of assets as at 31 December 2021 is shown below: -

13. Insured Schemes

13.1. Sector Architecture

13.1.1. There were 6 life companies administering 799 pension funds as at 31 December 2021, increasing from 786 as reported at 30 December 2020. The increase was due to new funds registrations over the period under review and also the re-introduction of funds that were undergoing dissolution.

13.1.2. The distribution of the pension funds among insurers as at 30 December 2020 and 31 December 2021 is shown in Table 8 below.

Table 9: Distribution of Insured Pension Funds

Life Assurer	31 December 2021	30 December 2020
CBZ Life	6	6
Fidelity Life	38	38
First Mutual Life	129	129
Old Mutual Life	351	339
ZB Life	109	109
Zimnat Life	166	165
Total	799	786

13.1.3. It is important to note that of the 799 funds administered, only 459 were active, constituting only 57.45% of the total insured funds. The high number of inactive funds, totalling 340 was attributed to viability challenges currently being faced by the sponsoring employers as a result of the Covid pandemic, as well as loss of confidence in the pensions industry, which has seen many funds applying for paid up status of dissolutions.

13.2. Membership

13.2.1. Total membership, excluding beneficiaries, for insured funds declined to 354,335 as at 31 December 2021 from 355,079 as at 30 December 2020 as most companies were not hiring new staff during the Covid period.

13.2.2. The membership for insured funds as at 31 December 2021 and 30 December 2020 is shown in the Table 9 below.

Table 10: Membership Classes

	Number of members as at...	
Membership Class	31 December 2021	30 December 2020
New Entrants	1,635	5,494
Active Members (Excluding new Entrants)	97,747	97,946
Pensioners	7,152	7,605
Deferred Pensioners	231,280	227,357
Suspended Pensioners	1,378	1,669
Members with unclaimed Benefits	14,153	15,008
Total Number of Beneficiaries	990	1,058
Total	354,335	365,137
Exits	7,295	4,441

CBZ, ZB, Zimnat FML to provide figures for beneficiaries

13.2.3. As shown in the table above, the decline in total membership from 365,137 as at 30 December 2020 to 354,335 as at 31 December 2021 was mainly due to members who were exiting pension funds through full commutations

13.2.4. The number of active members declined from 97,946 members as at 30 December 2020 to 97,747 members as at 31 December 2021. There was also a decrease of the number of pensioners from 7,605 as at 30 December 2020 to 7,152. The decline in active members and pensioners was attributed to members who were paid full commutations. Furthermore, the number of deferred members also declined from 227,357 as at 30 December 2020 to 231,280.

13.3. Asset Quality

13.3.1. Insured funds reported assets valued at ZW\$99.96 billion as at 31 December 2021, which was a 190.74% increase from \$34.50 billion reported during the same period in the previous year. The increase was mainly due to equities and revaluation of properties in line with the prevailing economic environment, which accounted for 94.10% of the total assets.

13.3.2. The asset trend for insured fund assets from 30 December 2020 to 31 December 2021 is shown in the figure below.

Figure 14: Insured Asset Trend, December 2020 to December 2021

13.3.3. As shown in the figure above, the asset base for insured funds has been on an upward trajectory from 30 December 2020, mainly on account of revaluations and inflation following currency reforms. The composition of insured funds' investments is shown in the figure below.

Figure 15: Composition of Insured Fund Assets as at 31 December 2021

13.3.4. Investment property and equities totalling \$99.96 billion, constituted 84.84% of all the assets for the Insured funds. Investments in prescribed assets totalling \$3.66 billion, constituted only 3.66% of the sector's total asset base as at 31 December 2021.

13.4. Contribution Arrears

13.4.1. Insured funds reported contribution arrears that amounted to \$390,361,312.00, with 97.178% being owed to Old Mutual Life Assurance Company and First Mutual Life Assurance Company. Two thirds (66.61%) of the arrears were accrued in the past 90 days, prior to end of quarter, with 35% of the arrears being for the last 30 days, which is mainly because of timing differences.

13.4.2. There is need for life companies to follow-up on contributions whenever they are due and payment plans should be put in place so that the arrears are cleared in the shortest possible, given the inflationary operating environment. The breakdown of the contribution arrears is given in the table below.

Table 11: Debtors Age Analysis for Insured Funds

	CBZ Life	Fidelity Life	First Mutual Life	Old Mutual Life	ZB Life	Zimnat Life	2021 Q4 Total
30 Days and below	845,349	3,184,195	25,728,654	104,631,491	3,434	3,008,907	137,402,030
Between 31 days and 90 days	855,375	413,993	30,845,066	90,064,718	6,868	429,515	122,615,535
Between 91 days and 180 days	487,304	214,349	22,396,526	16,561,509	10,026	98,177	39,767,891
181 days and above	429,186	48,695	65,673,596	22,940,479	688,070	272,990	90,053,016
Total at end of Reporting Period	2,617,214	3,861,232	145,166,682	234,198,197	708,397	3,809,590	390,361,312

13.5. Unclaimed Benefits

13.5.1. The 6 life companies reported unclaimed benefits that amounted to \$598,400,906.91, which corresponded to 15,811 members. About 70% of the unclaimed benefits were under FML while 20% of the unclaimed benefits were under Old Mutual. A quarter of the unclaimed benefits were more than 10 years old while half were less than 2 years.

13.5.2. The breakdown of insured funds' unclaimed benefits as at 31 December 2021 is shown in the table below.

Table 12: Unclaimed Benefits as at 31 December 2021

Administrator	Less than 2 years		From 2 - 5 years		From 6 - 10 years		More than 10 years		Total	
	No. of Members	Amount	No. of Members	Amount	No. of Members	Amount	No. of Members	Amount	No. of Members	Amount
Zimnat	958	43,578,028			3,300	1,842,061			4,258	45,420,089
CBZ Life	29	819,072	14	76,554					43	895,625
ZB Life	12	949,543	73	8,462,589	78	4,286,991	103	2,798,963	266	16,498,085
FML	3,819	244,780,781	2,882	99,004,591	855	25,844,129	2,909	48,484,644	10,465	418,114,145
Fidelity	4	24,652	1	7,440	40	46,060			45	78,152
Old Mutual	1	16,507	46	1,012,494.32	71	13,127,356	616	103,238,455	734	117,394,811
Total	4,823	290,168,581	3,016	108,563,668	4,344	45,146,596	3,628	154,522,062	15811	598,400,906.91

13.6. Earnings

13.6.1. Insured schemes reported a surplus of ZW\$54.08 billion for the 12 months ending 31 December 2021. The ZW\$54.08 billion is mainly attributed to interest from investment and fair value gains on equities totalling ZW\$54.49 billion, compared to ZW\$23.12 billion in 2020, with ZW\$49.79 billion of the total interest from investment being attributable to Old Mutual Life.

13.6.2. The total income for the period ending 31 December 2021 amounted to \$58.57 billion compared to ZW\$24.89 billion during the same period in 2020.

13.6.3. Insured funds paid ZW\$3.42 billion in benefits for the 12 months ending 31 December 2021, constituting 76.10 % of the sector's total expenditure of \$4.49 billion. The sector's administrative expenses totalled ZW\$1.07 billion and were driven by investment management expenses totalling ZW\$757.35 million.

13.6.4. Administrative expenses translated to 28.85% and 1.83% of contributions and total income, respectively, as compared to 19.91% and 2.26% of contributions and total income, respectively, for 2020 fourth quarter.

13.7. Forex Business

13.7.1. There were 33 insured funds receiving contributions in US\$ in the fourth quarter of 2021, with 23 under Old Mutual, 7 under Zimnat Life, two under First Mutual Life and one under Fidelity Life.

13.7.2. These funds had a forex asset base of US\$43.9 million as at 31 December 2021, thus constituting 45.9% of the total industry's asset base.

13.7.3. The total asset portfolio was mainly invested in money market investments at US\$9 million and cash at bank at US\$9 million and USD15 million in prescribed assets. The remainder is invested in counters that are currently listed on the Victoria Falls Stock Exchange.

13.7.4. The total income for the period under review was mainly driven by contributions (56.81%), and investment income (31.83%).

Figure 16: Monthly Pension Benefits

13.7.5. The total number of pensioners paid under insured funds were 16,645 as at 31 December 2021. Out of that number, 53.72% of the pensioners are earning below the minimum pension of ZW\$3,000 per month. The average monthly pension for the sector was ZW\$5,135. The Commission is interrogating the low pension values being paid and is seized with the review of the minimum pension and preservation amounts.

14. Self-Administered Funds

14.1. There were 171 self-administered funds as at 31 December 2021, compared to 166 funds reported as at 31 December 2020. The increase was due to new funds registrations under Comarton Consultants, Minerva Benefits Consulting and Nyaradzo Life Assurance, and the onboarding of ZB Life Assurance in the self-administered business. There are only 10 DB funds all under the administration of Minerva Benefits Consulting.

14.2. The number of self-administered pension funds per administrator as at 31 December 2021 are shown in the table below: -

Table 13: Number of Funds Per Administrator as at 31 December 2021

Name of Administrator	31 December 2021	31 December 2020
Professional Administrators		
Capitol Insurance Broker	1	1
Comarton Consultants	26	25
Bright Employee Benefits	40	40
Minerva Benefit Consulting	66	64
Zimbabwe Insurance Brokers	5	5
Sub total	138	135
Life Companies		
Fidelity Life Assurance Company	1	1
First Mutual Assurance Company	5	5
Old Life Assurance Company	21	21
Nyaradzo Life Assurance	3	2
Zimnat Life Assurance Company	2	2
ZB Life Assurance	1	-
Sub total	33	31
Grand Total	171	166

14.3. As at 31 December 2021, 80.7% of the self-administered pension funds were administered by Fund Administrators, compared to 19.3% being administered by Life Assurers. It is also important to note that two Fund Administrators administered 106 pension funds, accounting for 76.81% of the total number of self-administered funds.

15. Membership

15.1. The total membership for self-administered funds increased by 24.73% from 118,854 as at 31 December 2020 to 148,246 members as at 31 December 2021. The noted increase in membership was because of new entrants from the newly registered funds. The membership distribution per class of members is shown in the table below:

Table 14: Distribution of membership for Self-Administered

Membership class	Number of members as 31 December 2021	Number of members as at 31 December 2020
New entrants	2,544	2,354
Active members (excluding new)	97,219	70,754
Pensioners	5,867	5,265
Deferred Pensioners	28,783	27,259
Suspended Pensioners	4,316	3,015
Unclaimed Benefits	9,517	10,207
Total membership	148,246	118,854
Exits	2,756	2,117

15.2. As shown in table above, the number of members with unclaimed benefits decreased by 1.07% during the period under review. The Commission embarked on regular publishing of unclaimed benefits, which has seen some members accessing their benefits.

15.3. Pensioners increased by 11% from the 5,265 reported as at 31 December 2020 to 5,867 as at 31 December 2021. There was also a notable increase in the number of deferred pensioners as member benefits were being preserved on withdrawal or resignation.

Figure 17: Asset Quality

15.4. The sector's asset base increased by 294.00% in nominal terms from ZW\$28,24 billion as at 31 December 2020 to ZW\$109,53 billion as at 31 December 2021. The growth in the asset base was mainly driven by investments in quoted equities and property which amounted to ZW\$80.35 billion, constituting 73.35% of the assets. Investments in the two asset classes remain attractive to the industry due to their characteristic of tracking inflation, hence preservation of value.

15.5. Investments in prescribed assets increased from ZW\$3.35 billion as at 31 December 2020 to ZW\$8.18 billion as at 31 December 2021. The prescribed assets investments translated to a ratio of 7.47% of total assets for the sector compared to 11.86% of total assets reported at 31 December 2020. There was a decline in compliance ratio for prescribed assets ratio between since 2020 mainly because of the slow uptake of some of the approved instruments, as well as the continuous increase in other asset classes which are tracking inflation from time to time.

- 15.6. Pension Funds have been investing in instruments with Prescribed Asset status in their quest to meet the regulatory requirements. Notwithstanding that the Commission has been approving a number of instruments in the market, the sector is still below the minimum threshold of 20%.
- 15.7. Contribution arrears increased from ZW\$0.22 billion as at 31 December 2020 to ZW\$ 0.72 billion as at 31 December 2021.
- 15.8. Minerva Benefits Consulting, FML and OMLAC, respectively, are leading in contribution arrears for the sector. The ratio of contribution arrears to total assets also increased from 1% reported 31 December 2020 to 3% as at 31 December 2021. This has been mainly due to financial hardships faced by employers as a result of the Covid 19 pandemic. Some funds have been applying for paid-up status, with some even folding up.

Figure 18: Debtors Age Analysis

- 15.9. From the table above, it can be noted that 63% of the contribution arrears were less than 30 days, which can be attributed to timing differences. However, 37% of contribution arrears were above 30 days, which is of concern to the Commission as it signals failure to remit contributions by employers and subsequent failure by the trustees and administrators in enforcing compliance with stipulated timelines in the remitting of contributions.

16. Earnings

- 16.1. Total income for the period ending 31 December 2021 was ZW\$68,91 billion, compared to ZW\$28.12 billion reported as at 31 December 2020. The total income was mainly driven by fair value gains and interest from investments totalling ZW\$46.07 billion, which translated to 66.85% of the total income.
- 16.2. Total expenditure was ZW\$ 5,42 billion for the period ending 31 December 2021, having increased by 284% from ZW\$ 1,91 billion reported as at 31 December 2020. Benefits payments constituted 72% of the total expenditure for the sector. Total income for the sector increased by 145% to ZW\$68.91 billion. The total income figure should be read with caution because the main driver of income is fair value gains which may not be realisable.
- 16.3. Administrative expenses totalled ZW\$1,52 billion for the period under review, compared to ZW\$ 0.80 billion for the same period in 2020. The expenses resulted in average expense to total income ratio of 2.23% compared to 2.85% for the same period in 2020.

17. Liabilities

- 17.1. Arrear pension benefits increased by 72.71% from ZW\$68.27 million as at 31 December 2020 to ZW\$117.91 million as at 31 December 2021, whilst unclaimed benefits increased by 204.60% from ZW\$109.87 million as at 31 December 2020 to ZW\$334.65 million as at 31 December 2021.
- 17.2. The perpetual increase in both arrear pension benefits, and unclaimed benefits has been of grave concern to the Commission, as it connotes failure by administrators in meeting the Know Your Customer (KYC) requirements.

Figure 19: Debtors Age Analysis

17.3. As depicted in the above graph, 87% of the unclaimed benefits for Self-Administered Pension Funds, are more than 2 years, with 48% being more than 10 years. Fund administrators are in breach of the rules relating to remittance of unclaimed benefits to the Guardian Fund as 61% of the unclaimed benefits are above 5 years. Benefits that remain unclaimed for a period more than 5 years should be transferred to the Guardian Fund as per regulations. Therefore, efforts are underway to cause compliance with the requirement to remit unclaimed benefits to the Guardian Fund.

18. Average Monthly Pension Benefits

18.1. The diagram below summarises the level of pension benefits being earned by pensioners on a monthly basis.

Figure 20: Average Monthly Benefits

18.2. As shown on the above graph, of the 5,867 pensioners under Self-Administered Pension Funds (27%) are earning below the minimum pension of ZW\$3,000 per month. The industry is encouraged to improve monthly pension benefits as this has a direct impact on confidence within the industry.

19. Stand-Alone Pension Funds

19.1. Overview of Stand-Alone Funds Sector

19.1.1. The number of Stand-alone funds for the year ended 31 December 2021 was 15. The sector now comprises 8 defined contribution schemes, and 7 parastatal affiliated, defined benefit schemes. Of all the defined benefit schemes, none is adequately funded based on the latest submitted actuarial valuation reports as at 31 December 2020.

19.2. Membership

19.2.1. Total membership (excluding beneficiaries) for stand-alone pension funds increased by 8.45 % from 407,389 members as at 31 December 2020, to 414,808 members as at 31 December 2021. The distribution of membership by class as at 31 December 2020 and 31 December 2021 is shown in Table 15 below. The slight increase in membership is mainly attributable to new members joining the pension schemes during the period under review.

Table 45: Membership Statistics for Stand-Alone Pension Funds as at 31 December 2021

Membership category	Q4 2021	Q4 2020
New Entrants	2,783	1,531
Active members (excluding new entrants)	149,022	147,870
Pensioners (Excluding beneficiaries)	22,550	20,338
Deferred Pensioners	106,471	95,921
Suspended Pensioners (Excluding beneficiaries)	6,399	8,089
Unclaimed benefits (number)	127,583	133,648
Total membership Excluding Beneficiaries	441,808	407,397
Beneficiaries	20,900	20,813
Total membership Including Beneficiaries	435,708	428,210
Total Number Of Exits	1,455	699

19.3. Asset Base

19.3.1. Stand-Alone pension funds' assets increased by 184.86% from \$38.44 billion as at 31 December 2020 to \$109, 5 billion as at 31 December 2021.

19.3.2. Growth in the asset base for was mainly driven by investment property and quoted equities which increased by 100.66% and 418.10%, respectively. Investment in quoted equities remains attractive to the sector as evidenced by continuous increase in equities from the previous year.

The movements in assets for stand-alone funds is shown in figure 21 below:

Figure 21: Asset Trend for Stand-Alone Funds

The distribution of the assets for the stand-alone funds is shown in the Figure below:

Figure 22: Distribution of Assets for Stand Alone Funds as at 30 September 2021

19.3.3. Investment in prescribed assets increased to ZW\$1, 2 billion as at 31 December 2021 from ZW\$581, 8 million in the previous year. Prescribed assets constitute 1,06% of the total asset base for Stand-Alone Pension Funds as at 31 December 2021, which is a decline from 1,51% in the previous year. It is important to note that continuous revaluation of investment property, as well as injection of more funds into stocks, is diluting the prescribed assets compliance ratio since the principal amount remains the same.

19.3.4. Contribution arrears increased by 143% to ZW\$3,2 billion from ZW\$1,3 billion recorded as at 31 December 2020. The proportion of contribution arrears to total assets as at 31 December 2021 was 2.89%, which was a decline of 0.5% from 3.39% from the previous year. Though LAPF and Mining Industry remain the largest contributors to the proportion of contribution arrears, the two have agreed on payment plans with their sponsoring employers which are currently being honoured.

19.3.5. Notwithstanding that there are payment plans in place, the rate at which sponsoring employers are paying off contribution arrears is still at a slower pace given that the target of the Commission is to have every sponsoring employer up to date in terms of remittance of contributions to the funds.

19.3.6. The Commission will continue to engage the sponsoring employers to ensure that contribution arrears are cleared in the shortest possible time so that fund members will not be prejudiced. The distribution of contribution arrears is shown below;

Figure 23: Distribution of Contribution Arrears by Administrator

19.3.7. As shown on the graph below, most of the contribution arrears for Stand-Alone Pension Funds are between 91 and 180 days due. The graph also shows that 21.73% of the total contribution arrears have accrued during the past 30 days from the end of the quarter. It indicates that some sponsoring employers are failing to remit contributions within the stipulated periods of time.

past 30 days from the end of the quarter. It indicates that some sponsoring employers are failing to remit contributions within the stipulated periods of time.

Figure 24: Debtors Age Analysis

19.4. Earnings

19.4.1. Stand-alone pension funds reported surplus income over expenditure of ZW\$39.2 billion, for the quarter ending 31 December 2022 with fair value gains accounting for 64.02% of the total income.

19.4.2. Income was mainly driven by fair value gains and interest on investment which amounted to ZW\$77.22 billion and ZW\$53.75 billion, that is, constituting 44.22% and 30.79% of total income respectively.

19.4.3. Contributions accounted for 15.15% of the total income, while rental income and interest on arrears contributed 4.45% and 1.53%, respectively.

19.4.4. Total Expenditure for the period January to December 2021 amounted to ZW\$7.9 billion. Benefit payments constituted 34.18% of the total expenditure for Stand Alone Pension Funds.

19.4.5. Administration expenses for the period under review, which amounted to ZW\$5.7 billion, were mainly driven by staff costs and the increase in actuarial liabilities by one of the Stand-Alone Pension Funds. Property expenses were 7.03% of the administrative expenses and increase in actuarial liabilities constituted 57.41%.

19.4.6. Stand-Alone Pension Funds' total expenditure totalled ZW\$ 7.86 billion for the year period ending 31 December 2021. The proportion of pension benefits to total expenses was 34.14%. The administration expenses were 72.52% of contributions and 10.99% of total income, as well as 30.54% of realised income.

19.5. **Liabilities**

19.5.1. Arrear pension benefits increased from ZW\$259.2 million as at 31 December 2020 to ZW\$489.4 million as at 31 December 2021. This marked an increase of 88.8% of arrear pension benefits. The industry is urged to ensure that they have adequate liquid resources at their disposal so that benefits that fall due are paid in the shortest possible time. Also, unclaimed benefits increased by 516.84% from ZW\$394.2 million as at 31 December 2020 to ZW\$2.04 billion as at 31 December 2021.

19.5.2. The spike of unclaimed benefits remains a great cause of concern to the Commission, administrators are urged to improve on their Know Your Customer (KYC) requirements so that members can be contacted to get their pension benefits.

19.5.3. Furthermore, funds with high unclaimed benefits are urged to comply with requirement for remittance to the Guardian Fund and institute measures to trace beneficiaries.

Figure 25: Unclaimed Benefits Age Analysis

19.5.4. As shown on the above graph, most of the Unclaimed Benefits for Stand-Alone Pension Funds are more than 10 years. The graph also shows that only 9.10% of the total unclaimed benefits are less than 2 years old. This indicates that some administrators are falling short in terms of meeting the Know Your Customer (KYC) requirements. In line with pensions regulations which govern unclaimed benefits, 83.29% of the unclaimed benefits are due for remittance to the Guardian Fund.

19.6. Monthly Pension Benefits

The summary of monthly pension benefits for the Stand-Alone funds is given below:

Figure 26: Unclaimed Benefits Age Analysis

19.6.1. As shown on the above graph, out of a total of 32,662 pensioners paid under Stand-Alone Pension Funds as at 31 December 2021, 55.10% are earning below the minimum pension of ZW\$3,000 per month. Low pension benefits is one of the main causes for low confidence in the pensions industry. As at 31 December 2021, the average monthly pension for the sector was ZW\$6,398. Whilst the average monthly pension for the sector is above the minimum pension, it is important to note that the calculation has been affected by outliers wherein the minimum paid amount was ZW\$42.63 and the highest paid was over ZW\$400,000 per month. The Commission is following up on reasons for such low values as ZW\$42.63, which is not adequate to meet transaction costs.

19.6.2. The Commission is challenging the industry to put in measures to ensure that the outcry over low benefits by pensioners is addressed through the improvement of monthly pension benefits which should see the restoration of confidence within the industry.

19.7. **Forex Business for Stand-Alone Funds**

19.7.1. As at 31 December 2021, the forex business written by stand-alone pensions funds amounted to USD\$5.5 million in contributions with interest from investments at USD\$8.49 million. More effort is still needed to develop the financial and capital market for foreign currency investments such that there will be more investment options available for the industry to invest in foreign denominated instruments. Currently, apart from the Victoria Falls Exchange where SeedCo International, Caledonia Mining, Bindura Nickel and Padenga are currently trading, the other option available is the fixed term deposits being offered by the RBZ though interest rates remain very low. The total asset base for the stand-alone funds in forex stood at USD\$2.29 million which translates to only 2% of the total industry base.
