SECTION A

EXECUTIVE SUMMARY

1. Executive Summary

Total Gross Premium Written (GPW) by short-term insurers amounted to ZW\$9.95 billion, reflecting a 262.84% nominal increase from ZW\$2.74 billion reported for the comparative period in 2020.

The total business written by short-term reinsurers increased from ZW\$1.25 billion for the half year ended 30 June 2020 to ZW\$5.22 billion for the period under review, which is a nominal increase of 317.60%.

Total assets for short-term insurers increased by 21.94% in nominal terms from ZW\$11.44 billion reported as at 31 March 2021 to ZW\$13.95 billion as at 30 June 2021.

Investments in prescribed assets by short-term insurers increased by 35.94% from ZW\$354.72 million as at 31 March 2021 to ZW\$482.22 million as at 30 June 2021. Only one (1) out of the eighteen (18) short-term insurers was compliant with the minimum prescribed asset ratio of 10% as at 30 June 2021.

All eighteen (18) short-term insurers reported capital positions, which were above the minimum capital requirement (MCR) of ZW\$37.5 million as at 30 June 2021.

Short-term reinsurers had an asset base of ZW\$9.51 billion as at 30 June 2021, reflecting a 25.23% increase from the ZW\$7.59 billion reported as at 31 March 2021.

Investments in prescribed assets by short-term reinsurers increased by 14.63% from ZW\$1.23 billion as at 31 March 2021 to ZW\$1.41 billion as at 30 June 2021. As at 30 June 2021, two (2) out of eight (8) short-term reinsurers were compliant with the minimum prescribed asset ratio of 10% and all the registered short-term reinsurers reported capital positions that were above the minimum capital requirement of \$75 million.

The total GPW by micro-insurers amounted to ZW\$208.00 million for the period under review. The micro-insurers had total assets of ZW\$263.49 million as at 30 June 2021. The two operating micro-insurers were compliant with the minimum capital requirement of ZW\$4.5 million.

Brokers wrote a total GPW of ZW\$5 billion registering an increase of 283% in nominal terms during the half year ended 30 June 2021, compared to the same period in 2020. The broking industry held total assets amounting to ZW\$140 million as at 30 June 2021.

SECTION B

ABOUT THE COMMISSION

2. About The Commission

The Insurance and Pensions Commission (IPEC) is a statutory body mandated with regulating, supervising and developing the insurance and pensions industry for the protection of policyholders and pension scheme members in Zimbabwe. This report outlines IPEC's various activities consistent with its statutory mandate for the six months period ending 30 June 2021 as well as the state of the short-term insurance industry for the same period.

Terms of Reference

The activities of the Commission are guided by the following acts and their regulations:

- Insurance and Pensions Commission Act [Chapter 24:21]
- Pension and Provident Funds Act [Chapter 24:09]
- Insurance Act [Chapter 24:07]
- Money Laundering and Proceeds of Crime Act [Chapter 09:24]
- Finance Act [Chapter 23:04]
- Public Entities and Corporate Governance Act [Chapter 10:31]
- Public Finance Management Act [Chapter 22:19]
- Public Procurement and Disposal of Public Assets Act [Chapter 22:23]

Architecture of the Short-Term Insurance Industry

There were nine hundred and twenty-six (926) registered entities/persons in the short-term insurance industry as at 30 June 2021. The architecture of the industry is as shown in Table 1:

Table 1: Architecture of the Short-Term Insurance Industry

Type of Institution	Number of Registered Entities/Persons as at....		
	30-June 2019	30-June 2020	30-June 2021
Insurance Companies*	18	18	18
Micro-insurers	2	1	2
Reinsurance Companies**	8	8	8
Underwriting Management Agencies	2	2	2
Insurance Brokers***	31	32	31
Reinsurance Brokers	7	7	7
Loss Assessors	36	36	36
Corporate Agents	122	140	157
Sole Agents	530	480	651
Total	756	724	912

* Two insurers namely FBC Insurance Company and Alliance Insurance Company are composite insurers, however the figures in this report pertain to their short-term business only.

**Five reinsurers namely Emeritus Reinsurance Company, FBC Reinsurance Company, First Mutual Reinsurance Company, Grand Reinsurance Company and Zep Re are composite reinsurers who also write life business. However, the figures in this report pertain to their short-term business only.

*** The number of insurance brokers went down to 31 following the cancellation of the licence for Ambassador Insurance Brokers during the first half of 2021.

A close-up photograph of a man with a mustache, wearing a light blue button-down shirt, focused on working with small wooden blocks on a table. The image is overlaid with a semi-transparent blue filter. The text 'SECTION C' is centered over the man's face.

SECTION C

ECONOMIC DEVELOPMENT

3. ECONOMIC DEVELOPMENTS

3.1 COVID-19 Update

Globally COVID-19 incidences remain very high, with the cumulative number of cases reaching in excess of 180 million and the number of deaths nearly 4 million as at 30 June 2021 (WHO, 2021). The battle to contain COVID-19 pandemic is still ongoing with vaccines continuously being administered to various population groups. According to the IMF (2021), as of the end of June 2021, about 3 billion doses had been administered worldwide, nearly 75 percent of those are in advanced economies and China. In low-income countries, less than 1% of the population had received one dose. This indicates that the rollout of vaccines is highly unequal and skewed more towards advanced economies. Procurement and logistical hurdles continue to cripple vaccination efforts at global level. This leads to a slower pace of vaccination than anticipated.

As at 30 June 2021, Zimbabwe had 49 864 confirmed cases, 39 121 recoveries and 1 789 deaths. A total of 777 161 people had been vaccinated against COVID-19. The second quarter national recovery rate was 78%, 16 percentage points lower than Q1 recovery rate of 94%.

3.2 Covid-19 Impact on Businesses at Global and National Level

The COVID-19 pandemic has accelerated digital transformation across the board, with businesses adjusting operations to cope with lockdowns, restricted movement of staff and supply interruptions.

The pandemic continues to have a dampening effect on tourism-reliant economies and is further exacerbating domestic challenges in low-income countries. Covid-19 related controls continue to disrupt business operations due to reduction in operating hours, constrained investment, and disrupted schooling.

In Zimbabwe, total tourist arrivals declined by 90% to 65,882 recorded in the first quarter of 2021 compared to the 639,356 arrivals registered in the corresponding period in 2020. All the regions in the country suffered declines in the average in hotel occupancies ranging from 5% to 28%, with no region recording average room occupancies exceeding 25%. The Victoria Falls region, a prime tourist destination in the country, recorded the worst decline of -28% followed by Bulawayo region which had -19%. Thus, tourism sector players are operating below full capacity, and some have retrenched part of their workforce as a way of cutting operating costs.

The pandemic also impacted the real estate sector in which the insurance and pensions industry is significantly invested in, as remote working becomes the new normal. Working from home reduced the demand for office space in the real estate sector leading to low turnover based rentals for retail properties.

The Confederation of Zimbabwe Industries anticipates the manufacturing sector capacity utilisation to increase to 61% in 2021 from 47% in 2020, on the backdrop of increased COVID-19 vaccination drive amidst other factors such as exchange and price stability.

3.3 Regulatory responses to Covid-19

Financial sector regulators including IPEC adapted to the new normal of doing business through the facilitation of remote working for staff, enhanced offsite monitoring, and conducting of virtual meetings and workshops. Regulators have been monitoring the implementation of business continuity plans and offering regulatory relief measures, allowing for flexibility on statutory deadlines to ensure that insurance companies and pension funds continue to offer uninterrupted service delivery in the face of Covid-19. Risk monitoring of supervised entities continues to be enhanced particularly on their solvency and liquidity conditions in light of the pandemic.

Regulators have also been advocating for enhanced consumer protection and support of policyholders or pension members adversely affected by the Covid-19 pandemic. Some of the support measures include an extension of premium payments grace periods to avoid policy lapses and allowing members experiencing financial hardships, to temporarily access part of their retirement savings to cushion them from the effects of the Covid-19 pandemic. Regulators have also been encouraging the regulated entities to strengthen their cybersecurity measures.

3.4 Global and Regional Growth Prospects

The world economy is experiencing an exceptionally strong but uneven recovery. The IMF projects the global economy to grow by 6.0% in 2021 and 4.9% in 2022. The IMF projected growth rates are more optimistic when compared to those of the World Bank of 5.6% in 2021 and 4.3% in 2022. The growth forecasts could, however, be undermined by inefficacy of Covid-19 vaccines being rolled out against the emerging variants, and delays in vaccinations.

The revised growth rates for advanced economies were forecast to reach 5.6% in 2021 and 4.4% in 2022 (IMF, 2021). The growth prospects are being driven by fiscal support and monetary accommodation in the United States and countries within the Euro area.

However, vaccine hesitancy and global spill-overs may undermine advanced economies GDP growth in 2021 and 2022 by about 0.75 percentage points.

The emerging markets and developing economies (EMDEs) growth is expected to reach 6.3% in 2021 and 5.2% in 2022 (IMF 2021). The improvement in external demand and higher commodity prices lifts the overall aggregate activity in EMDEs. However, the rate of growth is low because of the resurgence of new COVID-19 cases, lagging vaccination, and partial withdrawal of macroeconomic policy support. Table 2 summarizes the global economic outlook projections.

Table 2: Changes in Key Stock Market Indicators

	2020	2021*	2022*
World Output	-3.3	6.0	4.9
Advanced Economies	-4.7	5.6	4.4
USA	-3.5	7.0	4.9
Euro Area	-6.6	4.6	4.3
Emerging Markets and Developing countries	-2.2	6.3	5.2
China	2.3	8.1	5.7
Sub-Saharan Africa	-1.9	3.4	4.1
Nigeria	-1.8	2.5	2.6
South Africa	- 7.0	4.0	2.2
Zimbabwe	-4.1	7.8	5.4

Source: July 2021 World Economic Outlook Update, IMF. * Projections

Economic activity in Sub-Saharan Africa is expected to expand by 3.4% in 2021 and 4.1% in 2022. Positive spill-over effects from strengthening global activity, improved international control of COVID-19, and strong domestic activity in agricultural commodity exports are expected to drive the growth. Nonetheless, the recovery is rather slow compared to the rest of the world in 2021 and is anticipated to remain fragile due to subdued capital inflows into the region and uncertainty concerning the course of the pandemic. Tourism based countries were the most affected due to subdued tourist inflows. For example, significant declines were experienced in international tourists arrivals in countries such as Namibia (-87%), South Africa (-73%) and Zimbabwe (-90%) during the first quarter of 2021 compared to similar period in 2020 (Zimbabwe Tourism Authority, 2021).

3.5 Domestic Economic Performance

The Ministry of Finance and Economic Development projects growth of 7.8% in 2021 and 5.4% in 2022 with forecast growth underpinned by:-

- (i) Covid-19 recovery,
- (ii) firming international mineral prices,
- (iii) resumption of global economic activity,
- (iv) good agricultural season,
- (v) domestication of value chains, and
- (vi) enhanced revenue collection among others.

The 2021 growth projection is premised on the revised sectorial growth projections: agriculture, hunting and fishing and forestry (34.0%), mining and quarrying (2.0%), electricity (13.9%), manufacturing (7.0%), construction (7.7%), accommodation and food services (6.4%), transportation and storage (4.9%), finance and insurance (4.5%), and real estate activities (1.1%).

The International Monetary Fund projected a 6% growth rate for Zimbabwe in 2021. Thus, almost doubling its economic growth forecast for the country when compared to 3.1% projected in April 2021. The World Bank¹ projected lower economic growth rates for the country of 3.9% in 2021 and 5.1% in 2022.

3.6 Exchange Rate Movements

The Zimbabwe dollar traded steadily against the US dollar during the second quarter. It depreciated marginally by 1.2%, from a rate of ZW\$84.4 per US\$1 on 1 April 2021 to ZW\$85.4 per US\$1 as at 30 June 2021. The monetary targeting framework has helped to contain money supply growth, which in turn has stabilised the exchange rate and eased inflationary pressures in the economy. The exchange rate stability enables the industry to make long term investment decisions, allows for the efficient allocation of resources, improves economic growth predictability and ensures local currency value preservation. The interbank exchange rate movements during the period June 2020 to June 2021 are illustrated in Figure 1.

¹ June 2021 World Bank Zimbabwe Economic Update: Overcoming Economic Challenges, Natural Disasters, and the Pandemic: Social and Economic Impacts

Figure 1: Interbank Exchange Rate June 2020 to June 2021 (US\$/ZWL) – End of Period

Source: Reserve Bank of Zimbabwe

3.7 Inflation Developments

The annual headline inflation stood at 106.6% in June 2021, down from 194.1% registered in April 2021, supported by a conservative monetary policy, prudent fiscal policy and stable exchange rate. The annual blended inflation was also on the negative trend during the quarter under review, registering a rate of 40.9% in June 2021, which is 53.8 percentage points lower than the rate of April 2021 of 94.7%. The annual inflation is expected to decline to levels between 22% and 35% by December 2021 (*Ministry of Finance and Economic Development, 2021*).

The month-on-month inflation rate increased from 1.6% in April 2021 to 3.9% in June 2021 driven by the increase in food, non-food, and non-alcoholic beverages inflation. The month-on-month food and non-alcoholic beverages inflation rate stood at 3.21% in June 2021, gaining 2.26 percentage points on the May 2021 rate of 0.95% while the month-on-month non-food inflation rate stood at 4.38%, gaining 0.63 percentage points on the May 2021 rate of 3.75%. Figure 2 illustrates the inflation profile for the period of June 2020 to June 2021.

Figure 2: Inflation Profile (%), June 2020 - June 2021

Source: Zimbabwe National Statistics Agency

The high levels of inflation have impacted on investment asset mix of regulated entities. Asset managers tend to reduce investments in fixed income instruments because they yield negative real returns. Thus, the regulated entities must be active in creating assets which meet prescribed asset requirements whilst offering good returns.

3.8 Zimbabwe Stock Exchange (ZSE) Performance Highlights

The ZSE, which is a major investment destination for insurance companies and pension funds exhibited a bullish trend as equities continued to benefit from inflation hedge attractiveness during the period under review. Currency depreciation and uncertainties posed by the pandemic on the economy continue to favour equities. Despite the current overvaluation on the ZSE, equities remain a better choice of investment for investors holding the local currency. The increase in liquidity also continues to drive gains on the market.

The second quarter of 2021 saw the equities market performing strongly, resulting in all major indices registering gains. The All Share and Top 10 indices registered increases of 39.8% and 22.2% to close at 6194.88 and 3154.44 points during the quarter respectively. The volume of shares traded increased by 63.89% to ZW\$45.71 million in the second quarter of 2021. Table 3 shows the changes in the key stock market indicators.

Table 3: Changes in Key Stock Market Indicators

ZSE Indicator	Mar-2021	June-2021	Change (%)
All share index (points)	4432.50	6194.88	39.8 ↑
Top 10 Index (points)	2580.33	3154.44	22.2 ↑
Medium Cap Index (points)	10487.48	17293.13	64.9 ↑

Market turnover (ZW\$ million)	463.29	743.61	60.51 ↑

Source: Zimbabwe Stock Exchange (ZSE)

The All-Share Index and Top 10 Index registered gains during the quarter under review. Figure 3 illustrates the performance of these two indices between June 2020 and June 2021.

Figure 3: All Share and Top 10 Indices Performance

Source: Zimbabwe Stock Exchange

Market capitalization increased by 40.15% during the quarter under review. The increase in market capitalisation emanated from a rise in share prices. Figure 4 illustrates market capitalization developments for the period June 2020 to June 2021.

Figure 4: Daily Market Capitalisation in ZW\$ Billions

Source: Zimbabwe Stock Exchange

3.9 Victoria Falls Stock Exchange (VFEX) Performance Highlights

Seedco International was the only counter trading at the Victoria Falls Stock Exchange during the quarter under review. As at 30 June 2021, the counter registered US\$30,958.50 worth of trades, with a cumulative volume of trades of 119,982 shares. The total capitalisation stood at US\$ 61,047,642.10 and five trades were recorded during the quarter.

3.10 Money Market Developments

3.10.1 Savings Deposit Rates

Whilst the annual inflation rate declined to 106.64% at 30 June 2021, nominal interest rates were below 15%. Resultantly, real returns were negative during the entire quarter under review, albeit at lower levels when compared to the previous quarter. The average nominal savings deposit rates increased from 4.04% as at 1st of April 2021 to 4.24% as at 25 June 2021, with an end of quarter real return of -50%. The one-month nominal deposit rate increased from a maximum of 10.83% as at 1 April 2021 to 10.72 % as at 25 June 2021, translating to an end of quarter real return of -46%. The three-month nominal deposit rate decreased from a maximum of 11.80% as at 1st of April 2021 to 11.72% as at 25 June 2021, giving an end of quarter real return of -46%.

INSURANCE

SECTION D

SHORT TERM INSURANCE COMPANIES

Short-Term Insurance Companies

Please refer to Appendix 1A-C for detailed statistics for each of the short-term insurers.

4. Performance in Terms of Business Written

The total GPW by short-term insurers amounted to ZW\$9,95 billion, reflecting a 262.84% nominal increase from ZW\$2,74 billion reported for the comparative period in 2020. Figure 5 below shows the trend in the volume of business generated by short-term insurers from 2017 to 2021.

Figure 5: Trend in Short-Term Insurance Written Business (June 2017 – June 2021)

The sizeable jump in the nominal volume of business written by the short-term insurance companies between 2019 and 2021, as seen in Figure 5 above, was on account of premiums tracking inflation following currency reforms.

Table 4 below shows the percentage growth in GPW for different classes of business.

Table 4: Short-Term Insurers' GPW by Class of Business

Class of Business	Gross Premium Written (ZW\$ MILLION)			Nominal % change	Inflation adjusted % change
	30-Jun-20	30-Jun-21	30-Jun-21		
		Inflation Adjusted	Nominal		
Aviation	0.37	59.01	121.95	32859.62%	15849.95%
Bonds/Guarantee	93.68	214.89	444.07	374.02%	129.39%
Engineering	715.97	548.14	1,132.70	58.20%	-23.44%
Farming	43.84	218.36	451.22	929.25%	398.08%
Fire	795.70	979.12	2,023.30	154.28%	23.05%
Hail	10.76	53.52	110.60	927.89%	397.42%
Marine	55.12	86.47	178.69	224.18%	56.88%
Misc Accident	60.78	125.52	259.39	326.77%	106.52%
Motor	807.15	2,097.15	4,333.64	436.91%	159.82%
P-Accident	119.05	220.06	454.75	281.98%	84.85%
P Liability	32.07	95.13	196.57	512.95%	196.62%
Others	6.40	115.24	238.13	3620.76%	1700.56%
Total	2,740.89	4,812.62	9,945.00	262.84%	75.59%

*Others comprise of directors' liability, health, hire purchase.

As shown in Table 4 above, the real increase in GPW during the half year ended 30 June 2021 was 75.59%, which shows that there was real growth in short-term insurance business. The GPW converted to US\$ using the RBZ official exchange rate was US\$47.79 million and US\$116.42 million for the half year ended 30 June 2020 and 30 June 2021 respectively, which is a percentage increase of 58.95%. Only one class of short-term insurance business namely engineering, experienced a decrease in the real Gross Premium Written.

The contribution of GPW by class of business for short-term insurance is illustrated in Figure 6.

Figure 6: Contribution of Short-Term Insurance GPW by class of business

**Others comprise of Aviation, Marine, Public liability, Directors' liability, Health, Hire Purchase*

Motor and fire insurance maintained their dominance as the major contributors in terms of GPW for the first half of 2021 with total combined contribution of 63.92% up from 58.48% for the first half of 2020.

5. Foreign Currency Denominated Business

Gross Premium Written in foreign currency for the half year ended 30 June 2021 was US\$54.90 million, as shown in Table 5 below. Foreign currency denominated business contributed 47.15% of the total business generated by the short-term players during the period under review.

Table 5: Short-Term Insurers' USD GPW By Class of Business

Class of Business	GPW	% Contribution
Aviation	1,405.44	2.56%
Bonds/Guarantee	1,632.81	2.97%
Engineering	1,993.47	3.63%
Fire	21,282.97	38.77%
Farming	2,277.52	4.15%
Hail	1,290.78	2.35%
Liability	1,341.49	2.44%
Marine	1,774.12	3.23%
Miscellaneous Accident	1,173.75	2.14%
Motor	16,638.73	30.31%
Personal Accident	2,830.75	5.16%
Others	1,255.22	2.29%
Total	54,897.04	100.00%

*Others include Health and Directors' liability.

The contribution of foreign currency denominated business by class of business is shown in Figure 7 below:

Figure 7: Short-Term Insurance USD GPW Contribution by Class of Business

Consistent with the trends in Zimbabwe dollar-denominated business, motor and fire insurance business classes were the major contributors of foreign currency denominated business for the short-term insurance sector, accounting for 69.08% of foreign currency denominated GPW for the half year ended 30 June 2021.

6. Capitalisation

All eighteen (18) insurers reported capital positions that were above the minimum capital requirement of ZW\$37.5 million as at 30 June 2021. The reported capital positions were computed without accounting for non-admissible assets as stipulated in Statutory Instrument 95 of 2017. The reported capital positions are shown in Table 6.

Table 6: Reported Capital Positions for Short-Term Insurers

Name of Insurance Company	Reported Capital Position (ZW\$ Million)	
	30-Jun-20	30-Jun-21
Alliance	80.33	576.79
Allied	151.09	205.59
CBZ	145.11	206.64
Cell	199.15	233.59

Key

	Above minimum capital requirement of ZW\$37.5 million
	Below minimum capital requirement of ZW\$37.5 million

7. Asset Quality

Total assets for short-term insurers increased by 21.94% in nominal terms from ZW\$11.44 billion reported for the period ended 31 March 2021 to ZW\$13.95 billion reported as at 30 June 2021. The increase in assets is mainly attributable to an increase in reinsurers' share of outstanding claims and premium debtors.

Reinsurers' share of outstanding claims increased by 823.48% from ZW\$27.56 million reported as at 31 March 2021 to ZW\$254.51 million as at 30 June 2021. The increase in reinsurer's share of outstanding claims is mainly attributable to increase in risk transferred to reinsurers.

Premium debtors rose significantly from ZW\$3.08 billion reported as at 31 March 2021 to ZW\$4.06 billion as at 30 June 2021, reflecting a nominal increase of 31.82%. The undesirable continued increase in premium debtors is a sign of weak credit risk management by the sector. To this end, the Commission has engaged the Ministry of Finance and Economic Development to finalise the promulgation of the No Premium No Cover regulations to protect both the industry and policyholders against the negative impact of the issuance of cover on credit.

Investments in prescribed assets increased by 35.94% from ZW\$354.72 million as at 31 March 2021 to ZW\$482.22 million as at 30 June 2021. Only one of the eighteen short-term insurers, was compliant with the minimum prescribed asset ratio of 10%.

The Prescribed Asset Investments Working Group is finalising its recommendations on the prescribed asset framework that will take into consideration sector needs to ensure the preservation of value to both investor and policyholder funds. In view of these developments, the Commission will escalate the enforcement of the provisions of Statutory Instrument 206 of 2019 to cause compliance, given the olive branch extended to the industry.

The contribution of various asset classes to total assets as at 30 June 2021 is shown in Figure 8 below:

Figure 8: Short-Term Insurers Contribution of various assets as at 30 June 2021

*Other Assets include Mortgages, Loans, Fixed Deposits, Investments in Associated Companies, Intangible Assets and Related Party Receivables.

Premium receivables, investment in properties and equipment and equities were the three major asset classes accounting for 70.58% of total assets. Property and equipment alone constituted 22.18% against a limit of 10% while premium debtors contributed 29.14% against a limit of 5% in violation of Circular 2 of 2013 on investment limits for short-term insurers. To address the challenge of premium debtors in the industry, the Commission is seeking the legislation of No Premium No Cover for the protection of both policyholders and insurers.

Short term insurance players are encouraged to ensure that they structure their investment portfolios in a way that not only enables preservation of policyholder value but also ensures a balanced investment mix in line with the Commission's investment limits. Figure 9 shows the trend in short-term insurance industry assets from 2017 to 2020.

Figure 9: Short-Term Insurance Industry Assets Trend (June 2017-June 2021)

The sizeable jump in total industry assets between 2018 and 2021 as shown in Figure 9 above was on account of revaluation gains.

8. Reinsurance

The industry's average retention ratio increased from 42.44% for the half year ended 30 June 2020 to 52.95% for the half year ended 30 June 2021. This shows an average increase in the risk appetite by the direct short-term insurers. Retention ratios for individual insurers ranged from 11.24% to 98.90%.

The average reinsurance share of outstanding claims to gross outstanding claims ratio was 42.95% as at 30 June 2021, compared to 145.14% reported as at 30 June 2020. This shows that reinsurance companies have significantly improved their payment of claims and the bulk of the outstanding claims are now due to the direct insurers. (See Appendix 1C for more indicators).

9. Actuarial Matters

The short-term insurance industry reported a significant increase of 25.97% in total technical liabilities from ZW\$1.94 billion as at 31 March 2021 to ZW\$3.13 billion as at 30 June 2021.

The average liquid assets to total technical reserves ratio for the period under review was 61.35% as compared to 140.44% for the previous comparative period in 2020. The ratio measures the degree to which an insurer can cover its technical obligations by holding cash and other liquid investments to meet unexpected cash needs without the sale of investments that may result in substantially realised losses. This drop shows the decrease in caution by industry players as less liquid assets were set aside for unexpected claims. (See Appendix 1C for the performance indicators of insurance companies in terms of Actuarial matters).

10. Earnings

The short-term insurers reported total profit after tax of ZW\$1.36 billion for the half year ended 30 June 2021, which was a 2.26% nominal increase from ZW\$1.33 billion reported in the comparative period in 2020. This nominal increase is significantly lower than the rise in inflation showing that in real terms, total profit after tax has decreased. The real decrease is mainly due to the increase in operating expenses, net commission incurred and net claims incurred by 428.32%, 2607.02% and 370.36% respectively and a nominal decrease in investment income of 88.33%. In real terms, operating expenses, net commission incurred and net claims incurred increased by 155.72%, 1313.46% and 126.67% respectively and investment income decreased by 94.35%. The negative impact on profit due to the movement of these four (that is, operating expenses, net commission incurred, net claims incurred and investment income) amounting to ZW\$3.37 billion was much more than the increase in earned premium of ZW\$2.37 billion.

There was a significant increase in the combined ratio for the short-term insurers from 78.20% for the half year ended 30 June 2020 to 100.49% for the period under review. Generally, a combined ratio of above 100% is undesirable as it indicates that the insurers are making underwriting losses while the opposite is true for a ratio below 100%. As at 30 June 2021, the underwriting profit of the short-term insurers was ZW\$158.68 million as compared to ZW\$182.30 million reported in the previous year, loosely translating to a nominal decrease of 12.96%. Six (6) out of the eighteen (18) short-term insurers posted underwriting losses during the period under review.

The average net commission ratio was 17.12% for the period under review compared to -3.35% for the first half of 2020. This increase shows that the industry paid more commission to intermediaries as compared to the comparative 2020 reporting period. The highest net commission paid by a short-term insurer for the period under review was 66.38% of earned premiums. The high commission rates resonate with the Commission's findings of the Offsite Inspection on Commissions. The short-term insurers are urged to pay commissions in line with Circular 2 of 2009. (For individual short-term insurers' net commission ratios, please refer to Appendix 1C).

The industry's average return on assets (ROA) and return on equity (ROE) were 19.57% and 46.21% respectively for the period under review, compared to 46.38% and 96.88% respectively for the half year ended 30 June 2020. The decrease in ROA shows that the short-term insurance sector is not fully utilising its investment assets to increase profitability. (For more performance indicators on profitability refer to Appendix 1C under earnings).

11. Liquidity

Total cash and near cash assets in the form of money market instruments was constant at ZW\$1.77 billion as at 31 March 2021 and 30 June 2021. Twelve of the eighteen short-term insurers had negative working capital ratios while the industry's acid test ratio averaged 23.13% as at 30 June 2021. The low ratio is a cause for concern as short-term insurers face a high liquidity risk leading to low capacity to meet short-term financial obligations Appendix 1C.

12. Market Share for Short-Term Insurers

Cell Insurance, Nicoz Diamond, Old Mutual and Zimnat Lion were the market leaders in terms of GPW with a combined market share of 63% for the half year ended 30 June 2021.

Old Mutual, Nicoz Diamond and Zimnat Lion were the market leaders in terms of NPW. Figure 10 below shows market share in terms of GPW and NPW for all insurers:

Figure 10: Market Share for Short Term Insurers in Terms GPW and NPW as at 30 June 2021

*Others comprises of Allied, Credsure, ECGC, Evolution, Hamilton, Quality, Safel and Sanctuary.

In terms of total assets, Old Mutual, Cell Insurance and Nicoz Diamond were the market leaders with a combined market share of 40.23% as shown in Figure 11:

Figure 11: Market Share for Short-Term Insurers in Terms of Total Assets as at 30 June 2021

*Others comprise of Allied, Champion, Credsure, Hamilton, Sanctuary and Quality

13. Market Share for Short-Term Insurers in terms of Foreign Currency Denominated Business

During the half year ended 30 June 2021, Cell Insurance, Old Mutual and Zimnat Lion were the market leaders in terms of foreign currency denominated business with a combined market share of 60.09%. The market share of foreign currency denominated business is shown in Figure 12 below.

Figure 12: USD Business Market share for Short-Term Insurers as at 30 June 2021.

*Others comprise of Credsure, Quality, ECGC, Allied, Sanctuary, Clarion, Safel and Hamilton.

The background of the entire page is a solid dark blue. Overlaid on this background is a semi-transparent image of two hands, one from the top right and one from the bottom left, cupping a stylized white icon of a house. The house icon has a simple roofline and a small square representing a window. The hands are rendered in a lighter blue, semi-transparent style, making them blend into the background while still being clearly visible.

SECTION E

REINSURANCE COMPANIES

14. Performance in Terms of Business Written

The total business written by short-term reinsurers increased by 317.60% in nominal terms from ZW\$1.25 billion for the half year ended 30 June 2020 to ZW\$5.22 billion for the period under review. The increase is in line with the 262.84% nominal growth in the business written by short-term insurers in the two comparative periods. Figure 13 below shows the trend in volume of business written by short-term reinsurers from 2017 to 2021:

Figure 13: Short-Term Reinsurers Trend in Business Written (2017-2021)

The significant increase in business written for the first half of 2021 is attributed to premium reviews in line with inflation developments. Table 7 below shows the percentage growth in GPW for different classes of business.

Table 7: Short-Term Reinsurers' GPW By Class of Business for the half year ending 30 June 2021.

Class of Business	Gross Premium Written (ZWL MILLION)			Nominal % change	Inflation adjusted % change
	30-Jun-20	30-Jun-21	30-Jun-21		
		Inflation adjusted	Nominal		
Aviation	36.32	101.45	209.63	477.26%	179.35%
Bonds/Guarantee	3.19	29.67	61.30	1820.62%	829.43%
Casualty	-	73.48	151.84	100.00%	100.00%
Engineering	54.22	101.13	208.98	285.44%	86.53%
Farming	73.42	153.03	316.23	330.69%	108.42%
Fire	621.46	1,153.76	2,384.17	283.64%	85.65%
Liability	10.83	27.71	57.26	428.90%	155.95%
Health	0.20	12.15	25.11	12367.44%	5933.29%
Hail	21.01	10.72	22.16	5.46%	-48.96%
Marine	29.85	59.84	123.66	314.23%	100.45%
Misc Accident	97.07	196.16	405.36	317.61%	102.09%
Motor	230.33	359.89	743.70	222.89%	56.25%
P-Accident	72.12	223.37	461.59	540.03%	209.73%
Others	0.50	23.43	48.42	9563.52%	4576.41%
Total	1,250.51	2,525.80	5,219.41	317.38%	101.98%

As shown in Table 7 above, the Gross Premium Written by short-term reinsurers during the half year ended 30 June 2021 grew by 101.98% in real terms. Only one (1) class of short-term reinsurance experienced a decrease in income.

Table 8: Reinsurers GPW Contribution by Class of Business for the half year ending 30 June 2021.

Class of Business	Gross Premium Written (ZWL Million)	
	30-June-20	Market share
Fire	2,384.17	45.68%
Motor	743.70	14.25%
P-Accident	461.59	8.84%
Misc Accident	405.36	7.77%
Aviation	209.63	4.02%
Farming	316.23	6.06%
Marine	123.66	2.37%
Engineering	208.98	4.00%
Casualty	151.84	2.91%
Other	214.26	4.11%
Total	5,219.41	100%

*Other comprises of farming hire purchase, bonds/guarantee, health, hail and liability insurance business.

Fire and motor classes of business were the major sources of reinsurance business in terms of GPW contributing 59.93% of the overall business written for the half year ended 30 June 2021.

15. Foreign Currency Denominated Business

GPW written in foreign currency for the half year ended 30 June 2021 was US\$41.35 million as shown in Table 9. This amounted to 67.68% of the total GPW by the reinsurers for the period under review.

Table 9: Short-Term Reinsurers' USD GPW by Class of Business for the Quarter ending 30 June 2021.

Class of Business	GPW (US\$'000)
Aviation	2,337.02
Bonds/Guarantee	525.05
Casualty	1,006.15
Engineering	1,356.73
Farming	2,632.97
Fire	18,695.05
Health	222.67
Hail	262.40
Marine	1,352.43
Miscellaneous Accident	2,635.58
Motor	4,469.24
P/Accident	5,032.43
P/Liability	427.79
Other	394.91
Total	41,350.40

Figure 14 below shows the contribution to foreign currency GPW for short-term reinsurers by class of business.

Figure 14: Contribution of Short-Term Reinsurers' USD GPW by Class of Business

Fire, personal accident and motor were the major contributors of foreign currency denominated business for short-term reinsurance, accounting for a combined 68.19% of GPW for the half year ended 30 June 2021.

16. Capitalisation.

As at 30 June 2021, all the registered short-term reinsurers reported capital positions above the minimum capital requirement of ZW\$75 million.

However, these reported capital positions were not adjusted in line with the provisions of Statutory Instrument (SI) 95 of 2017, which among other things, discounts non-permissible assets. The reported capital positions as at 30 June 2020 and 30 June 2021 for short-term reinsurers are shown in Table 10 below.

Table 10: Reported Capital Positions for Short-Term Reinsurers

Name of Reinsurance Company	Reported Capital Position (ZW\$ MILLION)	
	30-Jun-20	30-Jun-21
Emeritus Re	131.65	311.48
FBC Re	387.77	719.88
First Mutual Re	182.64	673.81
Grand Re	121.60	312.34
Tropical Re	181.47	458.59
Waica Re	90.37	468.16
ZB Re	383.18	623.36
ZEP RE	718.03	741.31
Total	2,196.71	4,308.92

Key

	Above minimum capital requirement of ZW\$75 million
	Below minimum capital requirement of ZW\$75 million

17. Asset Quality

The asset base for short-term reinsurers increased by 25.23% from ZW\$7.59 billion reported as at 31 March 2021 to ZW\$9.51 billion as at 30 June 2021. Investments in prescribed assets slightly improved from ZW\$1.23 billion as at 31 March 2020 to ZW\$1.41 billion as at 30 June 2021. However, only two (2) out of eight (8) reinsurers were compliant with the requisite prescribed asset threshold of 10%.

Premium receivables rose from ZW\$1.54 billion as at 31 March 2021 to ZW\$2.32 billion as at 30 June 2021, indicating a nominal increase of 50.65% translating to a real increase of 39.22%. The increase in premium receivables continues to be a huge challenge and the Commission encourages

players to ensure that they continuously design effective credit control systems to manage credit risk. It is the Commission's expectation that deliberations on the No Premium No Cover issue will provide a lasting solution to the challenge of premium debtors especially to reinsurance business. The contribution of various asset classes to total assets as at 30 June 2021 is shown in Figure 15 below:

Figure 15: Short-Term Reinsurers' Total Assets: Contribution by Asset Class

*Others comprise of investment in associated companies, intangible assets and other receivables.

Cash & money market instruments, premiums receivables and equities were the major asset classes making up 59.98% of total assets.

18. Actuarial Matters

Total technical liabilities increased from ZW\$2.25 billion as at 31 March 2021 to ZW\$3.14 billion as at 30 June 2021. Unearned Premium Reserves, which amounted to ZW\$1.70 billion accounted for 54.22% of the total technical liabilities.

19. Retrocession

The sector's average retention ratio was 63.63% for the half year ended 30 June 2021 compared to 63.27% that was reported for the comparative period in 2020. This reflects a slight decrease in risk appetite by short-term reinsurance companies. The individual reinsurers' reported retention ratios ranged from 43.61% to 83.90% for the period under review.

20. Earnings

Total profit after tax for short-term reinsurers had a nominal decrease of 23.97% from ZW\$1.46 billion for the period ended 30 June 2020 to ZW\$1.11 billion for the period ended 30 June 2021. The significant contributors to the decrease in profit are the nominal increases in operating expenses and net commissions incurred by 350.32% and 425.48% respectively.

The average net commission ratio was 39.29% for the period under review compared to 29.51%

for the first half of 2020. This shows that the average commission paid by short-term reinsurers increased when compared to the same period in 2020. The high commission rates are not only consistent with the high commissions paid by the short-term insurers but also resonate with the Commission's findings of the Offsite Inspection on Commissions. The highest net commission ratio paid by a short-term reinsurer for the period under review was 63.23% of earned premiums.

The average combined ratio for the short-term reinsurers increased from 119.59% for the half year ended 30 June 2020 to 109.21% for the period under review. The decrease indicates improved operational profitability by the sector. The combined ratio and other ratios that relate to profitability for short-term reinsurers is shown in Appendix 2C under earnings.

21. Liquidity

Liquid assets held by short-term reinsurers decreased from ZW\$1.83 billion as at 31 March 2021 to ZW\$1.74 billion as at 30 June 2021. The average acid test ratio for individual short-term reinsurers fell from 109.97% as at 30 June 2020 to 33.90% as at 30 June 2021. The significant drop in the average acid test ratio is a cause for concern as this indicates an increase in liquidity risk for short term reinsures. The acid test ratios for short-term reinsurers are shown on Appendix 2C under liquidity.

22. Market Share for Reinsurers

As shown in Figure 16 below, the market leaders in terms of GPW were Zep Re, ZB Re, Waica Re, Emeritus Re and ZB Re. These reinsurers controlled 56% of Gross Premium Written (GPW) for the six months ended 30 June 2021. The market leaders in terms of Net Premium Written (NPW) were Emeritus Re and FBC Re who collectively controlled 32% of the NPW for the six months ended 30 June 2021.

Figure 16: Market Share for Short -Term Reinsurers in Terms of GPW and NPW

In terms of market share based on total assets, FBC Re, Zep-Re, FMRE and Emeritus Re were the market leaders for the half year ended 30 June 2021, with a combined market share of 58% as depicted in Figure 17.

Figure 17: Market Share for Short-Term Reinsurers in Terms of Total Assets

23. Foreign Currency Denominated Business

The market leaders in terms of foreign currency denominated GPW were Zep Re, Waica Re and Grand Re. These reinsurers controlled 48.02% of Gross Premium Written (GPW) for the half year ended 30 June 2021 as shown in Figure 18 below.

Figure 18: Market Share for Short-Term Reinsurers in Terms of USD Business Written

A hand is holding a small, detailed model of a two-story house with a gabled roof, multiple windows with shutters, and a small porch. The background is a solid blue color with faint, stylized white clouds. The text 'SECTION F' is overlaid in large, white, sans-serif capital letters.

SECTION F

MICRO INSURANCE COMPANIES

There were two (2) micro-insurance companies that were operating during the half year ended 30 June 2021, which are Coverlink Microinsurance and Golden Knot Microinsurance. EBA Microinsurance was registered in the second quarter of 2021 and was not yet operational by the end of the quarter.

24. Business Written

The total GPW by the two (2) micro-insurers in the half year ended 30 June 2021 is ZW\$208.00 million. Foreign currency denominated business written by Coverlink amounted to US\$768.70. Golden Knot did not write any foreign currency denominated business during the half year ended 30 June 2021.

25. Capitalisation

As shown in table 11 below, both micro-insurers were compliant with the minimum capital requirement of ZW\$4.5 million as at 30 June 2021.

Table 11: Reported Capital Positions for Micro-insurers

Microinsurer	Reported Capital Position (ZW\$ MILLION)
	30-06-21
Coverlink	143.12
Golden Knot	42.41
Total	185.54

26. Asset Quality

The micro-insurers reported a total asset base of ZW\$263.49 million as at 30 June 2021, which is an increase of 28.24% from the ZW\$205.47 million reported as at 31 March 2021.

Premium receivables significantly increased from ZW\$2.01 million as at 31 March 2021 to ZW\$3.66 million as at 30 June 2021, indicating a percentage change of 82.09%. The contribution of various asset classes to total assets as at 30 June 2021 is shown in Figure 19 below:

Figure 19: Microinsurance: Breakdown to Total Assets by class

Investments in properties and equipment was the major asset class, constituting 75.10% of total assets.

27. Earnings

The micro-insurers recorded total profit after tax of ZW\$65.38 million for the period under review.

28. Liquidity

The micro-insurers had cash and near cash assets amounting to ZW\$26.65 million and an acid test ratio of 61.47% as at 30 June 2021 from ZW\$5.29 million and 15.82% as at 31 March 2021. The increase in liquidity levels show that the micro-insurers' liquidity position has improved.

29. Market Share for Micro-Insurers

As shown in Figure 20 below, the market leader in terms of GPW was Coverlink which controlled 65.47% of Gross Premium Written (GPW) for the half year ended 30 June 2021.

Figure 20: Market Share for Micro-insurers in Terms of GPW

In terms of market share based on total assets, Coverlink was the market leader for the half year ended 30 June 2021, with a market share of 79.16% as depicted in Figure 21.

Figure 21: Market Share for Micro-insurers in Terms of Total Assets

SECTION G

INSURANCE BROKERS

This section analyses the business performance of the insurance brokers for the half-year ending June 30, 2021. During the period under review, no new brokers were either registered or deregistered. Despite Covid-19 induced restrictions, the operating environment is slowly improving as most entities have now embraced digitalisation as the new norm of doing business. Out of the 31 registered insurance brokers, 29 submitted their second quarter returns with the Commission

30. Business Written by Insurance Brokers

Gross premium receivable by insurance brokers increased by 283% in nominal terms during the half-year ending June 30, 2021, compared to the same period in 2020. The high growth rate is attributable to premiums tracking inflation, despite the relatively stable macroeconomic environment ushered by disinflation.

Table 12: Key Indicators for the business for the half year ended June 2021.

Indicator	30 June-2020 (ZWL \$000)	30 June-2021 (ZWL \$000)	Percentage Change
Gross Premium Receivable	1,305,416	4,995,940	283%
Gross Premium Payable	1,114,498	4,205,616	277%
Brokerage Commission	189,163	786,619	316%
less Commission paid	11,532	91,485	693%
Net Brokerage Commission	179,746	698,838	289%
Other Income	3,521	23,153	557%
Operating Expenses	94,083	436,071	363%
Profit Before Tax	83,608	307,619	268%
Taxation	24,293	57,612	137%
Profit After Tax	59,385	250,008	321%

The business generated by insurance brokers increased by 283% from ZW\$1.3 billion during the half-year ending 30 June 2020 to ZW\$5 billion during the comparative period in 2021. Commission paid by the insurance brokers however, increased by 693% from ZW\$11.5 million in 2020 to ZW\$91.5 million during the comparative period in 2021. The unproportionate increase in the two indicators resonates with the Commission's findings of Offsite Inspection on Commissions which found out high commission rates above those specified in Circular 2 of 2009. Insurance brokers are urged to stick to the commission rates stipulated in the above circular.

31. Capitalisation

Despite the negative impact of the Covid-19 pandemic on overall economic performance, brokers managed to maintain their capital positions above the minimum threshold of \$1.5 million except for Rainbow Insurance Brokers, Auto and General and Revival Insurance Brokers, which have continuously struggled to meet the minimum capital requirement. The Commission will continuously work closely with the troubled entities to find ways on how to enforce compliance with statutory requirements.

Table 13: Capital Positions for Insurance Brokers as at June 2021.

Name	30-Jun-21	30-Jun-20

	Above minimum capital requirement of ZW\$1.5 million

32. Asset Distribution

As at June 30, 2021 the broking industry held total assets amounting to ZW\$140 million. The majority of these assets were held in land and buildings, as shown in the graph below.

Figure 22: Asset distribution for insurance brokers for the quarter ended June 2021.

33. Earnings

For the first half year ended 30 June 2021, insurance brokers reported a combined after-tax profit of ZW\$250 million, representing a nominal increase of 321% from the same period in 2020. The primary contributors to the significant increases in profit during the period under review were premium adjustments tracking inflation developments.

Market Share for Insurance Brokers in terms of Gross Premium and Commission

The graph below depicts the distribution of market share among insurance brokers for the half-year ending June 30, 2021. In terms of Gross Premium Written, Minerva, Firstlink, HRIB, CBZ Risk Advisory, and Marsh Insurance Brokers, dominated the market during the period under review.

Figure 23: Market share for insurance brokers for the half-year ended June 2021

34. Foreign Currency Business by Insurance Brokers

Only sixteen out of the twenty-nine insurance brokers that filed their returns managed to file their USD returns with the Commission for the half-year ended June 30, 2021. The sixteen short-term insurance brokers recorded a total of US\$15 million Gross Premium Written for the period under review. The graph below shows the USD market share for the sixteen short-term insurance brokers who submitted their USD returns as at 30 June 2021.

Figure 24: Short-term Insurance Brokers USD-Denominated Market Share for the half-year ended June 2021.

The following entities did not submit their USD returns: Amour Khan, Eureka, Firstlink, Capitol, First Sun Alliance, Marsh, Care, Entwide, L.A. Guard, Paul Mkondo, SATIB and Broksure Insurance brokers. The Commission will take regulatory measures against non-complaint entities to ensure they comply with Circular number 15 of 2020, which provides for the submission of information on foreign currency-denominated business by registered insurance entities.

SECTION H

REINSURANCE BROKERS

Please refer to Appendix 3A-B for detailed statistics
for each of the short-term insurers.

35. Premium Written

During the half-year ended 30 June 2021, reinsurance brokers reported a significant nominal increase in GPW of \$3.4 billion representing an increase of 307% from \$826 million recorded during the comparative period in 2020. Table 14 below displays key indicators of business written by reinsurance brokers.

Table 14: Key Performance Indicators for Reinsurance Brokers for the half year ended 30 June 2021.

Indicator	30-June-2020 (ZWS 000)	30-June-2021 (ZWS 000)	Percentage change
Gross Premium Receivable	825,616	3,358,221	307%
Gross Premium Payable	248,652	2,600,878	946%
Brokerage Commission	83,013	757,343	812%
less Commission paid	70,818	627,846	787%
Net Brokerage Commission	10,953	129,497	1082%
Other Income	20,038	3,283	-84%
Operating Expenses	11,427	76,570	570%
Profit Before Tax	19,564	63,294	224%
Taxation	4,987	13,188	164%
Profit After Tax	14,577	50,107	244%

The business generated by reinsurance brokers increased by 307% from ZW\$826 million during the half-year ending 30 June 2020 to ZW\$3.4 billion during the comparative period in 2021. Commission paid by the reinsurance brokers however, increased by 787% from ZW\$70.8 million in 2020 to ZW\$627.8 million during the comparative period in 2021. As noted under insurance brokers, there was an unproportionate increase in the two indicators confirming the Commission's findings of Offsite Inspection on Commissions, which found out high commission rates above those specified in Circular 2 of 2009. Reinsurance brokers are urged to stick to commission rates stipulated in the above circular.

36. Capitalisation

As at 30 June 2021, all reinsurance brokers reported capital positions above the minimum capital requirement of ZW\$1.5 million. The capital positions reported by all reinsurance brokers are shown in Table 15 below.

Table 15: Capitalisation for Reinsurance Brokers as at June 2021.

Name of Reinsurance Broker	30-Jun-20 (ZW\$)	30-Jun-21 (ZW\$)
Capitol_Reinsurance_Brokers	3,265,720	10,074,388
Reinsurance_Brokers_International	2,671,046	4,264,079

Afro-Asian_Reinsurance_Brokers	27,868,509	11,331,817
Pan_African__Brokers_(Pvt)_Ltd	6,020,000	10,860,002
Classic_Reinsurance_Brokers	409,040	12,029,897

Key:

	Above minimum capital requirement of ZW\$1.5 million
	Below minimum capital requirement of ZW\$1.5 million

37. Market Share for Reinsurance Brokers (GPW & Brokerage Commission)

Fig 25 below shows the total gross premium written and the market share for Reinsurance Brokers as at June 2021.

Figure 25: Market Share for Reinsurance Brokers for the half year ended June 2021.

38. Foreign Currency-denominated business

Only three reinsurance brokers submitted foreign currency-denominated returns in line with Circular Number 15 of 2020, which provides for the submission of information on foreign currency-

denominated business by registered insurance entities. The reinsurance brokers reported US\$19.8 million in gross premium generated during the half-year ending 30 June 2021. The figure below shows US\$ premiums received from the three entities. The Commission will take corrective measures on entities, which failed to submit their US\$ returns, which are Marsh, Pan African, Afro Asian and Reinsurance Brokers International.

Figure 26: Gross Premium in US\$ for Reinsurance Brokers for the half year ended June 2021.

SECTION I

REGULATORY DEVELOPMENTS

39. Circulars and Statutory Instruments

The Commission issued the following circulars and Statutory Instruments for the review period: -

Circular/Statutory Instrument (SI)	Date Issued/ Gazetted	Purpose
S.I. 85 of 2021	26 March 2021	Revision of fees payable to the Commission
S.I. 86 of 2021	26 March 2021	Revision of levies payable to the Commission
Circular 23 of 2021	30 June 2021	ZICARP Framework.
Circular 21 of 2021	11 June 2021	Launch of ZICARP framework.
Circular 18 of 2021	31 May 2021	Issuance of the revised guideline on adjusting insurance and pensions values in response to the 2019 currency reforms.
Circular 17 of 2021	07 May 2021	Requests for inputs into the 2021 mid-term budget and economic review and the 2022 budget strategy paper.
Circular 15 of 2021	27 April 2021	Postponement of the launch of ZICARP.
Circular 14 of 2021	16 April 2021	Request for information on externalised risks.
Circular 13 of 2021	09 April 2021	Industry feedback session on the implementation of the Guidance Paper.
Circular 12 of 2021	29 March 2021	Notification of publication of IPEC Levy regulations.
Circular 11 of 2021	09 March 2021	ZICARP Programme – Own Risk and Solvency Assessment (ORSA).
Circular 10 of 2021	05 March 2021	Deadline extension for the submission of 2020 Audited Financial Statements and Actuarial Valuation Reports.
Circular 9 of 2021	04 March 2021	Submission of monthly management accounts by funeral assurers to the Commission
Circular 8 of 2021	24 February 2021	Issuance of the Treating Customers Fairly Framework
Circular 5 of 2021	17 February 2021	2021 Global Money Week Commemorations
Circular 4 of 2021	28 January 2021	Request for currency reforms compensation framework proposals
Circular 3 of 2021	19 January 2021	Request of information on foreign currency denominated business
Circular 2 of 2021	12 January 2021	Delivery of electronic mail to IPEC
Circular 1 of 2021	04 January 2021	Provision of necessary services during lockdown.

40. Capacitation of the Industry

In line with the Commission's mandate of capacitating the industry, technical assistance was offered to individual entities that requested for assistance on the e-filing of returns.

The following workshops were done with the industry:

- International Financial Reporting Standard (IFRS) 17 training.
- Zimbabwe Integrated Capital and Risk Programme (ZICARP) – Unpacking the framework and launch.
- Improving STR/SAR Quality Online by Egmont Centre of FIU Excellence and Leadership (ECOFEL).
- Guidance Paper on Currency Reforms Review.
- Real Estate Investment Trusts and dematerialization of shares hosted by Chengetedzayi Depository Company (CDC), ZSE and IPEC.

41. International Engagements

The Commission actively participated in regional and international activities under the auspices of the International Association of Insurance Supervisors (IAIS), African Insurance Organisation (AIO) and the Committee of Insurance, Securities and Non-banking Financial Authorities (CISNA). These included participation in surveys, meetings, workshops and training.

SECTION J

COMPLAINTS

42. Complaints

The commission received 18 short-term related complaints during the period under review, of which 10 of them were resolved while the other eight (8) were still under investigation.

The major source of complaints was the delay in settlement of claims, followed by claims repudiation and lastly conversion of USD-denominated policies.

The delay in settlement was attributed to investigations by insurers where there were suspicions of fraudulent claims or where there was insufficient documentation to enable claim settlement.

However, while insurers must be vigilant in handling claims in the face of fraudulent claims, this should not be at the expense of policyholders given the obtaining inflationary environment. The Commission, therefore, urges insurers to expedite their assessments and investigations to enable timeous settlement of admitted claims.

Figure 27: Distribution of the short term insurance complaints received.

The other source of complaints was the treatment of USD denominated policies written at the beginning of 2019 that were affected by SI 142 of June 2019, which introduced ZW\$ as the sole currency in Zimbabwe.
