9.	Stand-Alone Funds.....	36
10.	Market Conduct.....	41
	APPENDIX.....	57

1. Executive Summary

- 1.1. There were 985 registered occupational pension funds as at 31 March 2022, compared to 974 funds reported as at 31 March 2021.
- 1.2. The increase was due to newly registered funds over the period under review
- 1.3. Of these registered funds, 575 were active, thus constituting 58.38% of the industry funds. The remaining 41.62% are funds, which are either paid up or undergoing dissolution as per the Dissolution Directive issued by the Commission to dissolve inactive funds.
- 1.4. The industry's total membership, including beneficiaries slightly increased by 2.07% from 935,053 reported as at 31 March 2021 to 954,395 as at 31 March 2022.
- 1.5. The increase in total membership was attributable to the registration of new funds.
- 1.6. The industry's asset base grew in nominal terms by 175.59% to ZW\$488.12 billion from ZW\$177.12 billion recorded as at 31 March 2021 as the values for major asset classes adjusted in response to market fundamentals.
- 1.7. The industry's asset base of ZW\$488.12 billion translates to an average asset share per member (including beneficiaries) of ZW\$511,444.42 compared to ZW\$189,425.49 as at 31 March 2021. Given the annual rate of inflation of 72.7% for March 2022, the 169.99% increase in average asset share per member indicates that the asset values are generally tracking inflation. However, it is important to note that pension values are still very low, and the Commission is working together with the industry to improve members' benefits through various initiatives, which include the enforcement of the Guidance Paper in line with the 2019 Currency Reforms, the regulation of expenses, enhancing governance of pension funds and ensuring trustees are making prudent investment decisions.
- 1.8. The increase in the asset base was mainly driven by quoted equities and investment properties, which had a combined share of 83.98% of the industry's total assets. Quoted equities now constitute a larger portion of the investment portfolio for the pensions industry on account of the faster rate at which the portfolio revalues than other asset classes.

- 1.9. Quoted equities, which constituted 50.59% of the industry's asset portfolio, increased by 351.69% from ZW\$54.67 billion as at 31 March 2021 to ZW\$246.94 billion as at 31 March 2022.
- 1.10. Investment property grew by 124.62%, to ZW\$162.96 billion from ZW\$72.55 billion as at 31 March 2021. However, its contribution to the industry's total assets declined to 33.39% from 40.96% as at 31 March 2021 owing to the less frequent valuation of the direct property holding portfolio held by pension funds relative to the frequent valuation of listed equities.
- 1.11. Investments in prescribed assets by the industry stood at ZW\$18.11 billion up from ZW\$5.40 billion as at 31 March 2021. Notwithstanding the increase in the absolute amount, the prescribed assets ratio remains low at 3.72%, against the regulatory minimum requirement of 20%. The Commission, therefore, urges the industry to invest in approved instruments given the availability of such paper currently in the market.
- 1.12. Total income for the industry as at 31 March 2022 was ZW\$135.93 billion compared to ZW\$34.20 billion reported in the same period in 2021. Total income was mainly driven by fair value gains and interest from investments, which constituted 44.36% and 38.86% of total income, respectively.
- 1.13. Total industry expenditures for the period under review amounted to ZW\$7.70 billion, of which ZW\$5.56 billion (72.17%) went towards benefit payments.

2. Economic Developments

2.1. Global and Regional Economic Outlook

2.1.1. Global economic growth is projected at 3.6% in 2022, from 6.1% in 2021 (IMF, 2022), undermined by supply chain disruptions and the conflict between Russia and Ukraine. Table 1 summarises the global economic outlook projections.

Table 1: World Economic Outlook Projections (%).

	2021	2022	2023
World Output	6.1	3.6	3.6
Advanced Economies	5.2	3.3	2.4
USA	5.7	3.7	2.6
Euro Area	5.3	2.8	2.3
Emerging Markets and Developing Economies	6.8	3.8	4.4
China	8.1	4.4	5.1
Sub-Saharan Africa	4.5	3.8	4.0
Nigeria	3.6	3.4	3.1
South Africa	4.9	1.9	1.4
Zimbabwe	6.3	3.5	3.0

Source: April 2022 World Economic Outlook Update, IMF Projections

2.1.2. Similarly, growth in sub-Saharan Africa is projected to contract to 3.8% in 2022 and 4% in 2023, from 4.5% in 2021, due to climate shocks and a tightening of global financial conditions arising from the war in Ukraine.

2.2. Domestic Economic Outlook

2.2.1. The economy is expected to grow by 5.5% in 2022 from 7.8% in 2021 (Ministry of Finance and Economic Development, 2021). Notwithstanding the subdued forecast, growth will be anchored on a pick-up in mining and buoyant construction. The International Monetary Fund, however, forecasts a lower growth rate in the

2.3. Exchange Rate Developments

2.3.1. The Zimbabwe dollar (ZW\$) depreciated against the US dollar, shedding 31%, from US\$1: ZW\$108.7 recorded at the end of the fourth quarter of 2021 to US\$1: ZW\$142.4, registered at the end of the quarter under review.

2.3.2. The local currency depreciation was mainly driven by the speculative behaviour of economic agents. The developments in exchange rates are shown in Figure 1.

**Figure 1: Interbank Exchange Rate March 2021 to March 2022
(US\$/ZW\$) – End of Period**

Source: Reserve Bank of Zimbabwe

2.4. Inflation Developments

2.4.1. The annual inflation rate rose to 72.7% in March of 2022, from 60.7% recorded as at 31 December 2021. The upward trend was partly driven by increased fuel and food costs and the foreign exchange rate volatility, following the widening gap between the auction and parallel market rates.

2.4.2. The month-on-month inflation stood at 6.3% as at 31 March 2022, up from 5.8% recorded as at 31 December 2021. Figure 2 illustrates the inflation trend from March 2021 to March 2022.

Figure 2: Inflation Profile (%), March 2021 to March 2022

Source: Zimbabwe National Statistics Agency

2.5. Zimbabwe Stock Exchange Performance

2.5.1. During the quarter under review, the Zimbabwe Stock Exchange maintained positive momentum, resulting in the All-Share Index, Top-10 index, and Medium-Cap index gaining 44%, 51%, and 26%, respectively.

2.5.2. The local bourse added 47% worth of capitalisation, from the previous quarter's value of ZW\$1.32 trillion to ZW\$1.94 trillion. The gains in the stock market are attributed to a combination of inflation, the good financial performance of underlying companies, and the growing demand for equities as a value-preserving asset. Table 2 shows the quarterly change in the key stock market indicators.

Table 2: Changes in the Key Stock Market Indicators

ZSE Indicator	Dec-2021	Mar-2022	Change (%)
All-share index (points)	10, 822.4	15, 581.9	44
Top-10 Index (points)	6, 811.4	10, 296.7	51
Medium-Cap Index (points)	20, 407.3	25, 692.6	26
Small Cap Index (points)	402,753.1	399,696.2	-.8
Market Capitalisation (ZW\$ billion)	1, 317.2	1, 935.2	47
Shares traded (million)	26.8	30.3	13
Market turnover (ZW\$ mil)	831.6	2, 189.5	163

Source: Zimbabwe Stock Exchange

2.6. Victoria Falls Stock Exchange (VFEX) Performance

2.6.1. VFEX ended the quarter with a total turnover amounting to US\$5.3 million, compared to US\$114, 544.74 recorded in the fourth quarter of 2021. However, market capitalisation declined in the quarter by 2.35% to US\$253.7 million.

2.7. Money Market Developments

Savings Deposit Rates

2.7.1. The annual inflation rate continues to be higher than the average savings deposit rates, which were below 20% during the quarter, against an inflation rate of 72.7%. This implies that the real returns on money market investments remain negative.

2.8. COVID-19 Updates

2.8.1. The global Covid-19 cumulative cases reached 479.3 million at the end of March 2021, indicating a 72% increase from 278.9 million cases confirmed at the end of December 2021.

2.8.2. Pandemic-related deaths also increased from 5.4 million to 6.1 cases (WHO, 2021). The resurgences of Covid-19 and lockdowns in several Chinese cities are of concern.

2.8.3. The total Covid-19 cases in Zimbabwe increased from 213, 258 as at 31 December 2021 to 246, 286 recorded as at 31 March 2022. The recovery rate also rose from 85% to 96% over the same period.

2.8.4. The Covid-19 related deaths also increased from 5, 004 to 5, 444 cases. As at 31 March 2022, a total of 3, 529, 646 people had received their second dose.

2.9. Covid-19 Impact on Insurance and Pensions Industry

2.9.1. The Covid -19 pandemic provided impetus for insurance companies to increasingly adopt emerging technologies to drive efficiency, enhance cybersecurity, and expand capabilities.

The focus is to improve customer experience by streamlining processes with automation as well as providing customised services where needed or preferred.

3. Regulatory Developments for the Period Ending 31 March 2022

3.1. Circulars/Directives/ Frameworks Issued

3.1.1. During the period under review, the Commission issued the following circulars:-

Document	Release date	Content
Circular 1 of 2022	12 January 2022	2019 Compensation: Criterion for distributing the USD400,000 Kuvimba Mining House Dividend
Circular 2 of 2022	18 January 2022	Issuance of Revised Investment Guidelines for the Pensions Industry.
Circular 6 of 2022	11 February 2022	Standards Regarding Direct Remission of Pension Contributions to Pension Funds.
Circular 7 of 2022	11 February 2022	Standards for the Pensions Industry on Receipt and Payment of Gifts and Other Items of Value.
Circular 10 of 2022	4 March 2022	Guidance Paper Implementation: Clarification on the roles of Fund Administrators, Actuaries, Accountants and Asset Managers.
Circular 11 of 2022	16 March 2022	Standards on reporting requirements for Pension Fund Administrators
Circular 13 OF 2022	18 March 22	Notification of the Publication of the Insurance and Pensions (Levy) Regulations and Insurance (Amendment) Regulations 2022
S.I. 46 of 2022	March 2022	Insurance and Pensions Commission (Levy) Regulations.
Circular 16 of 2022	23 March 2022	Registration of Insurance and Pensions Industry players on the GoAML

3.1.2. These circulars, culminated from engagements with industry and related stakeholders, research and adoption of best practices, all aimed at protecting pension fund member rights and interests.

3.2. Registration of Funds

3.2.1. The Commission registered 6 new funds in the 3 months ended 31 March 2022.

4. Prescribed Assets

During the period under review, three (3) prescribed assets were approved by the Ministry of Finance and Economic Development as shown in Table 3 below:-

Table 3: Approved Prescribed Asset Instruments

Issuer	Amount	Purpose
Nhaka Life	USD\$10,000,000.00	Cattle Backed Investments
Mangwana Opportunities Pvt Ltd	USD\$5,000,000.00	To finance productive sectors of the economy namely agriculture, mining and tourism.
Equinox	USD\$9,000,000.00	Solar energy project

5. Fund Administrators

5.1. There were 12 independent fund administrators registered with IPEC during the quarter.

5.2. The fund administrators act as agents providing fund administration services to the pension funds who prefer to outsource these services.

5.3. Below is a table showing the fund administrators, number of funds under administration and their administration fees.

Table 4: Fund Administrators

SELF ADMINISTRATION FUNDS						
	Number of funds	Number of members	Adminis- tration fees	Contributions	Average fee / member	Average fee / contributions
			ZW\$ (million)	ZW\$ (million)	ZW\$	
Bright Employee Benefits	40	25,589	17.8	264.3	696.0	6.74%
Capitol Insurance Brokers	1	37	-	-	-	0.00%
Comarton Consultants	26	22,394	25.2	180.2	1,124.0	13.97%
Minerva Benefits Consulting	65	49,777	74.1	1,125.6	1,489.5	6.59%
Zimbabwe Insurance Brokers	5	371	0.1	1.2	330.4	9.92%
CBZ Life Assurance Company	-	-	-	-	-	0.00%
Fidelity Life Assurance Company	1	55	0.2	-	3,459.8	0.00%
First Mutual Life Assurance	6	6,952	5.8	177.6	839.5	3.29%
Nyaradzo Life Assurance Company	3	1,454	0.4	35.0	254.2	1.06%
Old Mutual Life Assurance Company	19	23,050	28.1	895.7	1,219.3	3.14%
ZB Life	1	29,119	0.2	26.3	6.4	0.71%
Zimnat Life Assurance Company	2	300	1.4	25.4	4,522.3	5.35%
Total	169	159,098	153.3	2,731.3	963.5	5.61%
INSURED FUNDS						
	Number of funds	Number of members	Adminis- tration fees	Contributions	Average fee / member	Average fee / contributions
			ZW\$ (million)	ZW\$ (million)	ZW\$	
CBZ Life Assurance Company	6	335	2.2	2.4	6,542	90.60%
Fidelity Life Assurance Company	38	13,048	3.0	76.3	228	3.91%
First Mutual Life Assurance	132	38,799	11.9	177.4	306	6.69%
Nyaradzo Life Assurance Company	-	-	-	-	-	0.00%
Old Mutual Life Assurance Company	351	279,202	105.4	1,365.9	377	7.72%
ZB Life	108	17,105	2.4	29.4	143	8.30%
Zimnat Life Assurance Company	166	14,948	5.2	109.2	350	4.79%
Total	801	363,437	130.1	1,760.7	357.98	7.39%

KEY

Red	Average administration fees / contribution above 5% set as threshold in expenses framework
Green	Average administration fees / contribution below 5%

- 5.4. As can be seen from the table above, 7 of the fund administrators are registered life companies and 2 are insurance brokers which have employee benefit divisions. The remaining 3 are employee benefit consultants.
- 5.5. Total administration fees for insured funds, amounting to ZW\$130.10 million, were lower than those for self-administered funds, amounting to ZW\$153.29, even though the number of members under insured funds and number of insured funds were lower, showing that the insured fund model had lower administration costs per member.
- 5.6. Of the self-administered funds, Zimnat Life Assurance, Fidelity life Assurance Company and Minerva Benefits Consulting charged the highest average fee per member of ZW\$4,522.30, ZW\$3,459.82 and ZW\$1,489.49 respectively compared to other administrators.
- 5.7. Of the insured funds, CBZ Life Assurance charged far more per member on average compared to the other administrators as it charged an average fee of ZW\$6,541.96 per member while the second highest, Old Mutual charged ZW\$377.49 per member.

6. Industry Overview

6.1. Key Performance Indicators

- 6.1.1. The key performance indicators for the pensions industry as at 31 March 2022 are depicted in the table below: -

Table 5: Key Highlights of the Pensions Industry as at 31 March 2022

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Self-Administered Funds	Total
Number of Funds	801	170	14	985
DB	13	18	8	39
DC	788	152	6	946
Active funds	427	134	14	575
Members (Incl Beneficiaries)	363,437	159,098	431,868	954,403
Members (Excl Beneficiaries)	362,209	153,974	410,828	927,011
Share of total membership	38%	17%	45%	100%
Total Income (Billion \$)	52.34	52.27	31.33	135.93
Total Contributions (Billion \$)	1.76	2.73	2.90	7.40
Rental Income (Billion\$)	0.00	0.15	0.87	1.02
Investment Income (Billion\$)	50.25	39.83	27.82	117.89
Total Expenditure (Billion \$)	2.90	2.85	1.95	7.70
Total Benefits Incurred (Billion \$)	2.42	2.16	0.98	5.56
Expenses/Contributions	26.51%	24.17%	25.29%	25.17%
Expenses/Total Income	0.89%	1.26%	2.34%	1.37%
Total Assets (Billion \$)	133.85	164.11	189.81	488.12
Total Assets per member	368,280	1,031,525	439,519	511,078
Percentage of Total Assets	27.44%	33.65%	38.91%	100.00%
Prescribed Assets (Billion \$)	6.83	9.71	1.57	18.11
Prescribed Assets Ratio	5.11%	5.91%	0.82%	3.71%
Contribution Arrears (Billion \$)	0.50	0.86	4.16	5.53

Notes:

1. Total Investment income is made up of rental income, dividends, interest on investments, profit on disposal of assets and fair value gains.
2. Total Expenditure for the industry includes benefits paid, transfer to reserves, revaluation losses and provisions.
3. Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation losses.

- 6.1.2. As shown on the table above, there were 985 registered occupational pension funds as at 31 March 2022, compared to 974 funds reported as at 31 March 2021.
- 6.1.3. Registered pension funds increased on account of new funds which were registered since March 2021. Most of the new funds converted from being participating employers under umbrella funds to fully registered funds under different administrators.
- 6.1.4. Of these 985 registered funds, 575 were active, thus constituting 58.38% of the industry funds.
- 6.1.5. Of the 410 inactive funds, 84.39% of these funds have already been earmarked for dissolution whilst 15.61% have prospects to resume contributions.
- 6.1.6. In order to avoid further erosion of value for members under these inactive funds, the Commission is closely monitoring the level of expenses as stipulated in the expense framework issued through circular 41 of 2021.

6.2. **Membership**

- 6.2.1. The industry's total membership, including beneficiaries slightly increased by 2.07% from 935,053 reported as at 31 March 2021 to 954,395 as at 31 March 2022.
- 6.2.2. The increase in membership was largely attributable to the registration of funds over the comparative period. However, the Commission is working with the funds that transferred from being participating employers to set up their own funds to eliminate the possibility of double counting of membership.
- 6.2.3. The breakdown of membership as at 31 December 2021 and comparative period is shown in Table 6 below: -

Table 6: Breakdown in Membership

Membership Class	Membership as at ...	
	31 March 2022	31 March 2021
New Entrants	8,827	8,075
Actives excluding new entrants	347,138	329,279
Pensioners	39,660	33,869
Deferred Pensioners	372,706	357,216
Suspended Pensioners	12,310	12,546
Unclaimed Benefits	146,370	168,642
Total Membership (excluding beneficiaries)	927,011	909,627
Beneficiaries	27,384	25,426
Total Membership (including beneficiaries)	954,395	935,053
Exits	4,400	3919

- 6.2.4. The number of deferred pensioners increased by 4.34% between the inter-comparative periods. The resignation of employees from some sponsoring employers was the main driver for the increase in deferred pensioners as well as dissolution of some pension funds.
- 6.2.5. There was a decrease in members with unclaimed benefits from 168,642 in March 2021 to 146,370 in March 2022, translating to 13.21%. The decrease in unclaimed benefits is a step in the right direction following the ongoing awareness campaigns by the Commission targeting members of the public to come forward and claim their benefits. It is also

on account of efforts being made by funds in reaching out to those with unclaimed benefits. This also follows the enforcement of compliance with the Treating Customers Fairly framework as well as Know Your Customer (KYC) requirements by the Commission.

6.2.6. The Commission will continue to enforce compliance with regulations to ensure that unclaimed benefits maintain a downward trend.

6.2.7. There was a slight increase in the number of pensioners by 6.34% mainly due to members of pension funds reaching retirement age over the review period

6.3. **Asset Quality**

6.3.1. The industry's asset base grew in nominal terms by 175.56% to ZW\$488,12 billion from ZW\$177,12 billion recorded in March 2021. The share of listed equities to total assets has increased on account of revaluation of the portfolio. The figure below shows the industry's asset base trend from 31 March 2021 to 31 March 2022: -

Figure 3: Trend in Industry Assets Growth (ZW\$)

- 6.3.2. Contribution arrears increased by 146%, to ZW\$5.53 billion from ZW\$2.25 billion reported as at 31 March 2021. The increase was mainly on account of continued non-remittance of contributions by some sponsoring employers as they faced viability challenges as well as timing differences between end of reporting period and due date for remitting contributions.
- 6.3.3. The proportion of contribution arrears to total assets decreased to 1.13% from 1.52% as at 31 March 2022. Contribution arrears remain a topical issue within the pensions industry as they negatively impact on asset quality and financial soundness of the funds. The Commission will continue to engage the industry to find a lasting solution to ensure that there is timely investment of contributions for the benefit of the fund members.
- 6.3.4. Out of the ZW\$5.51 billion contribution arrears as at 31 March 2022, 75.36%, which translates to ZW\$4.16 billion, is owed to stand-alone funds, the biggest three contributors being the Mining Industry Pension Fund (22.91%), Local Authorities Pension Fund (21.13%), followed by the National Railways Contributory Pension Fund (12.10%) in that order.
- 6.3.5. Quoted equities and prescribed assets registered the highest growth rate over the comparative period with magnitudes of 352% and 235%, respectively.
- 6.3.6. Quoted equities now constitute more than half of the share of the total asset base of the pensions industry with a proportion of 50.59% increasing by 351.57% to 246.94 billion as at 31 March 2022 while unquoted equities decreased by 50.87% to ZW\$14.37 billion during the period under review. The increase in quoted equities indicates the industry's preference to preserve value through quoted equity investments.

- 6.3.7. Though investment in prescribed assets registered the second biggest jump of 235% since March 2021, it is important to note that the compliance ratio is still far below the prescribed minimum of 20%.
- 6.3.8. Investment property grew by 125%, to ZW\$162,96 billion as at 31 March 2022 from ZW\$72,55 billion reported as at 31 March 2021. However, its share of the total industry assets decreased by 7.57 percentage points from 40.96% as at 31 March 2021.
- 6.3.9. The magnitude of investments in property and listed equities means that there is concentration risk because of lack of diversification. The industry needs to look at their investment strategies and align investments to the thresholds in the revised investment guidelines that were issued during the quarter.
- 6.3.10. Funds' value of investments in equities and investment property in absolute terms has been on an upward trend as shown in the figure below:

Figure 4: Listed Equities and Investment Property Trend

6.3.11. The total amount invested in prescribed assets increased by 235.29% to ZW\$18.11 billion from ZW\$5.40 billion reported in March 2021. The increase in the absolute amount invested by the pensions industry in prescribed assets translated to a slight increase in the compliance ratio from 3.05% to 3.72% between the comparative periods. The compliance level remains low given that the minimum prescribed ratio is 20%, despite approval of a number of instruments in the market with prescribed asset status. The industry is urged to consider all the available instruments in the market as investment options to ensure that they comply with prescribed asset requirements.

6.3.12. The Table below shows the Prescribed assets compliance levels for 2022 and 2021.

Table 7: Compliance Levels for Prescribed Assets

Sector	31 March 2022		31 March 2021	
	Amount (ZW\$ b)	Ratio (%)	Amount (ZW\$b)	Ratio (%)
Stand-Alone Funds	1.57	0.83%	0.51	0.67%
Self-Administered Funds	9.71	5.89%	1.66	2.94%
Insured	6.83	5.11%	3.22	7.35%
Total/Average Ratio	18.11	3.62%	5.40	3.05%

6.4. Earnings

6.4.1. Table 8 below indicates the key income and expenditure indicators: -

Table 8: Key Income Indicators

Indicator	March 2022 (billion)	March 2021 (billion)
Total Contributions (ZW \$billion)	7.40	2.86
Investment Income (ZW\$ billion)	117.89	30.34
Total Income(ZW\$ billion)	135.92	34.20
Total Benefits (ZW\$ billion)	5.56	1.40
Total Expenditure (ZW\$ billion)	7.69	2.28
Expenses to Contribution Ratio	25.17%	24.10%
Expenses/Total Income Ratio	1.37%	2.02%
Expenses/Total Realised Income	2.46%	5.92%

6.4.2. For the period under review, fair value gains, interest from investments and total contributions remain top income drivers with proportions of 44.36%, 38.86% and 5.44% of the industry's total income, respectively.

6.4.3. Total expenditure increased by 237.28% from ZW\$2.28 billion to ZW\$7.69 billion as at 31 March 2022. Total benefits paid, investment management expenses and administration expenses were the top three drivers of total expenditure with proportions of 72.17%, 8.06% and 5.83%, respectively.

6.4.4. Expenses to contributions ratio was 25.17%, whilst the expenses to total income ratio was 1.37% for the year ended 31 March 2022. Furthermore, expenses to realisable income also decreased to 2.46% from 5.92% reported during the same period in the previous year.

- 6.4.5. The improving expense ratios in the industry are a positive response to the issued expenses guideline to cap various expense categories as a measure to preserve member benefits.
- 6.4.6. Figures 5 and 6 below show the trend in expense ratios for the period 31 March 2021 to 31 March 2022: -

Figure 5: Expenses to Contribution Ratio

Figure 6: Expenses to Total Income Ratio

6.5. As shown on the graph above, the expenses to income ratio is beginning to slow down following the intervention of regulatory measures.

6.6. Forex Business

6.6.1. The total foreign currency-denominated income received by the pensions industry as at 31 March 2022 was USD\$11.96 million with total expenditure amounting to USD\$0.77 million. Dividends from forex investments and contributions were the major drivers of income on foreign currency business constituting 53.22% and 43.05%, respectively.

6.6.2. The pensions industry had a total USD-denominated asset base of USD\$114.23 million as at the reporting date, which was largely concentrated in quoted equities, prescribed assets and money market. The total asset base in forex grew by 19.50% from the previous quarter. The distribution of assets as at 31 March 2022 is shown below: -

Figure 7: Forex Assets Distribution

The distribution of forex business across sectors is shown below: -

Figure 8: Forex Assets Distribution Per Admin Model

6.6.3. As shown above, self-administered funds have the largest portion of the forex business followed by life companies and lastly stand-alone funds. Following the gazetting of S.I. 280 of 2020, there has been significant uptake of business in forex in the pensions industry.

Prudential

7. Insured Schemes

7.1 Sector Architecture

7.1.1 There were 6 life companies administering 801 pension funds as of 31 March 2022, increasing from 790 as reported at 31 March 2021. The increase¹ was due to newly registered funds over the period under review.

7.1.2 The distribution of the pension funds among insurers as at 31 March 2022 and 31 March 2021 is shown in Table 9.

¹ OMLAC (), FML ()

Table 9: Distribution of Insured Pension Funds

Life Assurer	31 March 2022	31 March 2021
CBZ life	6	6
Fidelity Life	38	38
First Mutual Life	132	130
Old Mutual Life	351	341
ZB life	108	109
Zimnat Life	166	166
Total	801	790

Note: The change on the number of pension funds under ZB Life was due to ZIMTA provident fund, which was being erroneously recorded as an insured fund, instead of a self-administered fund.

- 7.1.3 It is important to note that, of the 801 funds administered, only 426 were active, constituting 53.18% of the total insured funds. The high number of inactive funds, totalling 375 was attributed to viability challenges currently being faced by the sponsoring employers, as well as loss of confidence in the pensions industry, which has seen many funds applying for paid up status or dissolutions.
- 7.1.4 As for the 46.19% inactive funds, the Commission has since issued a Dissolution Directive issued through Circular 34 of 2021 targeting to dissolve inactive funds. However, not all funds identified under the directive are going to be dissolved since some have indicated that they will resume contributions as shown in Table 10.

Table 10: Pension Funds to be Dissolved Under the Dissolution Directive

Name	Funds Earmarked Under the Dissolution Directive	Funds Which the Boards of Trustees have agreed To Dissolve
ZIMNAT LIFE	177	177
FIDELITY LIFE	1	10
OLD MUTUAL LIFE	35	12
FIRST MUTUAL LIFE	40	31
ZB LIFE	103	116
Total	356	346

Note: Where funds agreed to be dissolved are greater than the number earmarked for dissolution, it means that the administrator has further identified more inactive funds, otherwise, the difference is explained by number of funds committed to resume their contributions or to remain in paid-up status.

7.2 Membership

- 7.2.1 Total membership, excluding beneficiaries, for insured funds increased by 1.35% to 362,209 as of 31 March 2022 from 348,071 reported as at 31 March 2021.
- 7.2.2 The increase in total membership was mainly attributed to new members who joined either from newly registered funds, funds that transferred from other fund schemes or new recruitments by sponsoring employers.
- 7.2.3 The membership for insured funds as of 31 December 2021 and 30 December 2022 is shown in the Table 11.

Table 11: Membership Classes

Membership Class	31 March 2022	31 March 2021
New Entrants	3,194	5,918
Active members (excluding new entrants)	97,364	101,339
Pensioners (Excluding beneficiaries)	8,050	8,182
Deferred Pensioners	236,126	224,560
Suspended Pensioners (Excluding beneficiaries)	1,704	1,499
Unclaimed benefits (number)	15,771	6,573
Total Members excluding beneficiaries	362,209	348,071
Total Number of Exits	1,806	2,267

7.2.4 As shown in the Table above, there was a decrease in active members from 101,339 as of 31 March 2021 to 97,364 as of 31 March 2022. This can be explained by the corresponding increase in deferred pensioners as members who leave employment will have their benefits being deferred pending retirement age.

7.2.5 There was also a decline in pensioners which was mainly attributed to members who were paid full commutations² on account of inadequate accumulations to purchase an annuity. Furthermore, there was an increase in unclaimed benefits due to data integrity challenges prevailing in the industry and some companies which went under.

7.3 Asset Quality

7.3.1 Insured funds reported assets valued at ZW\$133.85 billion as of 31 March 2022, which was a 33.90% increase from ZW\$99.96 billion reported during the same period in the previous year.

² OMLAC (302 full commutations), FML (1 full commutation)

7.3.2 The increase was mainly due to fair value gains on equities, acquisition of new equities as well as revaluation of properties in line with the prevailing economic environment.

7.3.3 The asset trend for insured fund assets from 31 March 2021 to 31 March 2022 is shown in the Figure 9.

Figure 9: Insured Funds Asset Trend

7.3.4 As shown in Figure 9, the asset base for insured funds has been on an upward trajectory from March 2021 to March 2022.

Figure 10: Composition of Insured Fund Assets as at 31 March 2022

7.3.5 From the pie chart above, Investment property constituted ZW\$39.8 billion which was 30% of total assets. Prescribed assets totalling ZW\$6.8 billion constituted 5% of the sector's total asset base as at 31 March 2022. Quoted and unquoted equities were ZW\$83.38 billion which was 62% of the assets base.

Contribution Arrears

7.3.6 Insured funds reported contribution arrears that amounted to ZW\$472.48 million of which a major proportion of 66,33% was from Old Mutual Life Assurance Company, followed by First Mutual Life Assurance with a share of 30.13%.

7.3.7 A bigger portion of contribution arrears of 42.13% were between 31 and 90 days old, followed by those which are 30 days old and below, while 34.39% of the contribution arrears were older than 90 days.

7.3.8 Contribution arrears, which were less than 30 days old were mainly due to the difference between administrators' end of trading period and IPEC returns submission due dates. Those contribution arrears which were older than 30 days were due to sponsoring employers failing to remit their contributions to the administrators.

7.3.9 There is need for Board of Trustees of the respective pension funds to follow-up on contributions whenever they fall due and payment plans should be put in place so that the arrears are cleared in the shortest possible time, given the inflationary economic environment. The breakdown of the contribution arrears is given in Table 12.

Table 12: Debtors Age Analysis for Insured Funds

	CBZ Life	Fidelity Life	First Mutual Life	Old Mutual Life	ZB Life	Zimnat Life	2022 Q1 Total
30 Days and below	1,042,664	4,482,732	25,547,562	76,637,198	79,187	3,192,227	110,981,570
between 31 days and 90 days	1,675,854	1,707,130	30,341,410	162,893,907	550	2,423,302	199,042,154
between 91 days and 180 days	789,785	52,246	21,505,015	56,188,999	550	166,597	78,703,192
181 days and above	87,075	41,839	64,971,975	17,693,984	669,117	295,904	83,759,894
Total at end of Reporting Period	3,595,379	6,283,947	142,365,962	313,414,088	749,404	6,078,030	472,486,810
Opening Quarterly figure	0	3,811,530		234,198,197	687,136	0	238,696,863

7.4 Earnings

7.4.1 The total income amounted to ZW\$52.34 billion for the period January to March 2022 compared to ZW\$9.45 billion during the same period in 2021. Interest from investments totalling ZW\$49.79 billion contributed 95% of total income for the period under review.

7.4.2 Insured funds paid ZW\$2.42 billion in benefits for the 3 months ended 31 March 2022, constituting 83.41% of the sector's total expenditure.

7.4.3 The sector's administrative expenses totalled ZW\$133.43 billion and were driven by investment management expenses and administration charges which constituted 9.51% and 4.60%, respectively.

The administrative expenses translated to 16.59% of total expenditure while contributions constituted 3.36% of total income.

7.5 Forex Business

7.5.1 There were 381 pension funds which reported foreign currency denominated income during the quarter ending 31 March 2022. Of these, there were only 19 funds receiving contributions in US\$ in the first quarter of 2022, with 10 being under Old Mutual, 5 under Zimnat Life, 2 under First Mutual Life, 1 under Fidelity Life, and 1 under ZB Life. Other funds have assets denominated in foreign currency and are earning interest income in foreign currency.

7.5.2 In total, the funds involved in forex business had an asset base of US\$49.38 million as of 31 March 2022, having increased by 12.48% from US\$43.9 million as at 31 December 2021. The increase is attributable to fair value gain. The assets are distributed in the following categories as shown in figure 11.

Figure 11: USD Asset Distribution

7.5.3 As shown in figure 11, the total asset portfolio was mainly invested in quoted equities constituting 74% (US\$36.33 million), followed by unquoted equities constituting 10%. Prescribed assets, money market and cash at bank, and investment property constituted 7%, 6%, and 3% respectively. These are quoted equities trading on the Victoria Falls Stock Exchange and these are Padenga, Caledonia Mining, SeedCo International and Bindura Nickel.

7.5.4 As shown in figure 12, the total USD income for the period under review was US\$5.87 million, mainly driven by interest from investments (US\$4.77 million), constituting 81%, followed by contributions (US\$1.07 million), constituting 18%. Rental income was US\$15,178.20 and other income was only US\$10,175.08.

Figure 12: Distribution of US\$ Investment Income

8. Self-Administered Funds

8.1. Sector Architecture

8.1.1. The number of self-administered pension funds remained at 169 as at 31 March 2022 which was the same number reported as at 31 March 2021. Whilst there were new registrations under ZB Life Assurance and First Mutual Life, OMLAC declined by two funds, leaving the total number of funds at 169 as per the previous period.

8.1.2. The breakdown of self-administered pension funds per administrator as at 31 March 2022 is shown in the table below: -

Table 13: Distribution of Funds for Self-Administered Section

Name of Administrator	31 March 2022	31 March 2021
Professional Administrators		
Capitol Insurance Brokers	1	1
Comarton Consultants	26	26
Bright Employee Benefits	40	40
Minerva Benefit Consulting	65	65
Zimbabwe Insurance Brokers	5	5
Sub total	137	137
Life Companies		
Fidelity Life Assurance Company	1	1
First Mutual Assurance Company	6	5
Old Life Assurance Company	19	21
Nyaradzo Life Assurance	3	3
Zimnat Life Assurance Company	2	2
ZB Life Assurance	1	-
Sub total	32	32
Grand Total	169	169

8.1.3. As shown on the above table, 81.07% of the self-administered pension funds were administered by Fund Administrators, whereas 18.9% were administered by Life Assurers. Although there were 11 administrators for self-administered pension funds, it is important to note that two Fund Administrators administered 105 pension funds, accounting for 62.20% of the total number of self-administered funds.

8.2. MEMBERSHIP

8.2.1. The total number of members under self-administered funds increased by 26.43% from 121,784 as at 31 March 2021 to 153,974 members as at 31 March 2022. The increase in total membership for the sector was on account of new entrants and the registration of ZIMTA over the review period. The membership distribution per class of membership is shown in the table below:

Table 14: Membership Distribution for Self-administered funds excluding pensioners

Membership class	Number of Funds as at...	
	31 March 2022	31 March 2021
New entrants	3,472	2,363
Active members (excluding new)	98,553	71,030
Pensioners	9,535	5,942
Deferred Pensioners	30,380	28,684
Suspended Pensioners	3,717	3,388
Unclaimed Benefits	8,317	10,377
Total membership	153,974	121,784
Exits	2,356	2,351

8.2.2. Deferred pensioners increased by 5.91% from the 28,684 reported as at 31 March 2021 to 30,380 as at 31 March 2022. The number of pensioners for self-administered funds increased by 60.46%. The increase in the number of pensioners was mainly on account of understatement of pensioners figures in the previous quarter wherein members with annuity benefits were omitted.

8.3. ASSET QUALITY

8.3.1. The diagram below shows the distribution of assets under self-administered pension funds: -

Figure 13: Distribution of Self-Administered Assets

8.3.2. The total asset base for the self-administered pension funds increased by 189.79% in nominal terms from ZW\$56.63 billion as at 31 March 2021 to ZW\$164.11 billion as at 31 March 2022. The growth in asset base was mainly driven by investments in quoted equities and property which accounted for 66% and 17% of the total asset base, respectively.

8.3.3. Equities and investment property remain attractive to the industry with equities taking the lead as there has been a general shift from other asset classes to equity due to its nature of tracking inflation, hence preservation of value.

8.3.4. Arrear contributions increased from ZW\$ 0.23 billion as at 31 March 2021 to ZW\$ 0.86 billion as at 31 March 2022. As a share of the total asset base, arrear contributions accounted for 0.41% and 0.52% as at March 2021 and March 2022, respectively. As the economic environment continues to pose

viability challenges to the sponsoring employers, remission of contributions remains a challenge as evidenced by the continuous increase in arrear contributions. Some pension funds have been applying for paid-up status, with some considering dissolving their funds.

8.3.5. There was a sharp decline in unquoted equities by 96.62% between March 2021 and March 2022. Unquoted equities are generally regarded as risky investments as compared to quoted equities and investment property.

8.3.6. The investments in prescribed assets increased from ZW\$0.66 billion as at 31 March 2021 to ZW\$9.70 billion as at 31 March 2022. Prescribed assets investments translated to a ratio of 5.91% of total assets compared to 2.94% of total assets reported as at 31 March 2021.

8.3.7. Overall, there was a marginal sectoral increase in the prescribed assets ratio though it was still below the prescribed threshold of 20%. The Commission has approved a number of instruments with prescribed asset status and the industry is encouraged to consider these in order to meet the prescribed minimum. Whilst there is a sectoral improvement in prescribed asset ratio, most pension funds are still below the prescribed threshold.

8.4. EARNINGS

8.4.1. The total income for the period ending 31 March 2022 was ZW\$ 52.27 billion, compared to ZW\$13.99 billion reported as at 31 March 2022. The main driver of total income was mainly fair value gains and interest from investments, which collectively contributed ZW\$37.08 billion, being 70.95% of the total income.

8.4.2. Total expenditure for the period under review was ZWL\$ 2.9 billion and has increased by 300% from ZW\$0.70 billion reported as at 31 March 2021. Payment of benefits constituted 75.84% of the total expenditure. Out of the total income for the first quarter of 2022, only 29% was realisable and 71% was unrealised income.

8.4.3. Administrative expenses totalled ZW\$0.7 billion for the period under review, compared to ZW\$0.23 billion for the same period in 2021. The inflationary environment is the main driver of operational costs as service providers adjust their charges to keep pace with the prevailing environment. The expenses resulted in average expense ratios of 1.32% compared to 1.63% for the same period in 2021.

8.5. Liabilities

8.5.1. Arrear pension benefits increased by 194% from ZW\$12.30 million as at 31 March 2021 to ZW\$36.09 million as at 31 March 2022, whilst unclaimed benefits increased by 139.14% from ZW\$93.25 million as at 31 March 2021 to ZW\$223.04 million as at 31 March 2022. The increase in arrear pension benefits is not a desirable situation as it indicates that benefits are not being paid on time.

8.5.2. There is a continuous upward trend in both arrear pension benefits, and unclaimed benefits which is worrisome, as it connotes failure by administrators to meet the Know Your Customer (KYC) requirements. Suspended pensioners and unclaimed benefits are supposed to be traced using the information submitted at inception and updated records collected each time pensioners submit existence certificates.

9. Stand-Alone Funds

9.1. Overview of Stand-Alone Pension Funds

9.1.1. The number of Stand-alone funds for the quarter ending 31 March 2022 was 14. The sector now comprises 8 defined contribution schemes and 6 parastatal-affiliated, defined benefit schemes. Of all the defined benefit schemes, none was adequately funded based on latest submitted actuarial valuation reports as at 31 December 2020.

9.2. Membership

9.2.1. Total membership (excluding beneficiaries) for stand-alone pension funds decreased by 1.7 % from 417,874 members as at 31 March 2021, to 410,828 members as at 31 March 2022. The distribution of membership by class as at 31 March 2022 and 31 March 2021 is shown in Table 15 below. The slight decrease in membership is mainly attributable to exits and transfers to other pension schemes during the period under review.

Table 15: Membership statistics for Stand-Alone Pension Funds as at 31 March 2022.

Membership category	Q1 2022	Q1 2021
New Entrants	2,161	2,886
Active members (excluding new entrants)	151,221	146,513
Pensioners (Excluding beneficiaries)	22,075	21,097
Deferred Pensioners	106,200	97,209
Suspended Pensioners (Excluding beneficiaries)	6,889	7,421
Unclaimed benefits (number)	122,282	142,748
Total membership Excluding Beneficiaries	410,828	417,874
Beneficiaries	21,040	20,905
Total membership Including Beneficiaries	431,868	438,779

9.3. Asset Base

9.3.1. Stand-Alone pension funds' assets increased by 147.66% from \$76.6 billion as at 31 December 2021 to \$189.8 billion as at 31 March 2022.

9.3.2. The increase in the asset base was mainly attributed to quoted equities and investment property which increased by 291.72% and 124.48%, respectively. The regulated entities continued to invest more in quoted equities over the period under review mainly due to the nature of quoted equities in tracking inflation and value preservation as compared to other investment classes.

9.3.3. The movements in assets for stand-alone funds is shown in Figure 14 below:

Figure 14: Assets Trend for Stand-Alone Funds.

9.3.4. Investment in prescribed assets increased to ZW\$1.57 billion as at 31 March 2022 from ZW\$0.6 billion in the first quarter of the previous year. The share of prescribed assets to total stand-alone funds' assets declined to 0.82% from 1.51%. The compliance rate for prescribed assets investment was below the minimum threshold percentage of 20% because of continuous revaluation of investment property as well as injection of more funds into stocks which happen to be the major value preserving asset class at the moment.

9.3.5. Notwithstanding the continuous revaluation of investment property and equities, stand-alone funds remain the lowest in terms of compliance with prescribed assets and the Commission will be going after all non-compliant entities to ensure that compliance is met.

9.3.6. Contribution arrears increased by 126.51% to ZW\$4.16 billion as at 31 March 2022 from ZW\$1.08 billion recorded as at 31 December 2021. The proportion of contribution arrears to total assets as at 31 March 2022 was 2.19% as compared to 0.97% recorded as at 31 December 2021. The slight increase was due to late payment interests being levied on outstanding contributions in line with requirements of the Guidance Paper. The Commission is concerned with the sponsoring employers who continue to default on their obligations to the funds as this conduct prejudices fund members in terms of forgone income from investment.

9.3.7. The Pension and Provident Funds Bill will bring relief to the pensioners as it includes a provision that empowers the Commission to garnish defaulting employers. Meanwhile, the Commission continues to engage sponsoring employers through moral suasion to ensure that contribution arrears are cleared in the shortest time possible. The aim is to see every sponsoring employer up to date on remitting monthly contributions.

9.3.8. The distribution of the assets for the stand-alone funds is shown in the Figure below:

Figure 15: Distribution of assets for Stand Alone Funds as at 31 March 2022

9.4. Earnings

- 9.4.1. Stand-alone pension funds reported surplus income over expenditure of ZW\$29.3 billion, for the quarter ending 31 March 2022 with fair value gains accounting for 83.07% of the total income.
- 9.4.2. Contributions accounted for 9.27% of total income, while rental income and interest on arrears contributed 2.78% and 0.81%, respectively.
- 9.4.3. Total Expenditure for the period January to March 2022 amounted to ZW\$1.95 billion. Of that amount, ZW\$0.98 billion, accounting for 50.09%, were benefits payments.
- 9.4.4. Administration expenses for the period under review amounted to ZW\$0.97 billion. These were mainly driven by staff costs, provision for bad debts and property expenses that accounted for 29.23%, 23.60% and 10.04% respectively.
- 9.4.5. Stand-alone pension funds' total expenditure amounted to ZW\$ 3.3 billion for the quarter ending 31 March 2022 where pension benefits accounted for 49.9% of the total expenses. The administration expenses were 35.90% of contributions and 3.11% of total income, as well as 45.25% of realised income.

9.5. Liabilities

- 9.5.1. Arrear pension benefits increased by 779.30% from ZW\$99.2 million as at 31 March 2021 to ZW\$0.87 billion as at 31 March 2022. On the other hand, unclaimed benefits increased by 132.53% from ZW\$1.52 billion as at 31 March 2021 to ZW\$3.55 billion as at 31 March 2022.
- 9.5.2. Continuous growth of unclaimed benefits remains a great concern to the Commission and administrators are urged to improve on their Know Your Customer (KYC) requirements so that members can be contacted to get their pension benefits.

9.5.3. Furthermore, funds with high unclaimed benefits are urged to comply with requirement for remittance to the Guardian Fund and also institute measures to trace beneficiaries

9.6. **Forex Business**

9.6.1. Out of 14 Stand-alone funds, 4 reported forex business as at 31 March 2022. The forex business written by stand-alone pension funds amounted to USD\$1.64 million in contributions with rental income at USD\$13,630 that was reported by the Construction Industry Pension fund.

9.6.2. The Commission notes with concern, a significant amount of contribution arrears for foreign business which amounts to USD\$1.7 million of which the majority was reported by Mining Industry Pension Fund and Motor Industry Pension Fund. The Commission continues to urge the participating employers to fully remit contributions for the members to the respective pension funds.

9.6.3. Stand-Alone funds recorded a surplus income over expenditure of USD\$1.63 million for the quarter ending 31 March 2022 with the contributions amounting to USD\$1.64 million of the total income.

10. Market Conduct

Tracking Pension Benefits

10.1. Distribution of Pensioners

10.1.1. The figure below shows the distribution of pensioners across the defined monthly pension benefit ranges during the first quarter of 2022.

Figure 16: Industry Overview of Pension Benefits

Figure 17: Spread of Pension Benefits Paid

10.1.2. As shown in the figure above, 37% of pensioners are getting monthly benefits below ZW\$3,000 which is a decrease from the 51% that was reported as at 31 December 2021. The average benefit within this group

was ZW\$2,236. Forty-three (43%) of pensioners were earning between ZW\$3,000 and ZW\$10,000 with an average pension of ZW\$8,432. The pensioners earning above ZW\$10,000 accounted for 20% of total pensioners, which is the same as the 20% reported in the last quarter. The average benefit within this group stood at ZW\$34,119.

10.2. The figure below shows the trend in pension averages over the period.

Figure 18: Industry Average:

10.2.1. The industry's average monthly pension benefits as at 31 March 2022 was ZW\$14,928 increasing significantly from the December 2021 average of ZW\$9,900. Given the inflation trend, the increase is insignificant to cushion pensioners. The insignificant increases in Q1/2022 may be attributed to the pending finalisation of 2021-year end audits and valuations which will inform any pension increases.

10.2.2. The poverty datum line as of 31 March 2022 was ZW\$9,708 per individual whilst the industry average benefit for a pensioner was ZW\$14,928.

10.3. Stand-Alone Funds

10.3.1. The bulk of the pensioners under Stand-alone funds were earning between **ZW\$3,000 and ZW\$10,000**. This group constituted 46% of pensioners

as at 31 March 2022. The pensioners earning **less than ZW\$3,000** constituted 36%, while those earning above ZW\$10,000 accounted for 18% of the pensioners. Going forward, the industry will be segmenting benefits being paid to principal members, from beneficiary members such as spouses and children to have a better appreciation of the average benefits.

10.3.2. The figures below show the distribution of pensioners under stand-alone funds and then the sector's average benefit per each class:

Figure 19: Stand-Alone Pension Funds Distribution

Figure 20: Stand-Alone Pension Funds Average:

10.3.3. The figure above shows that the monthly averages for the period under review remained constant, showing that there were no increases effected during the quarter under review. These exposes pensioners given the obtaining economic environment and standalone funds are urged to award interim pension increases on a regular basis.

INSURED FUNDS

10.3.4. The figure below illustrates the spread of pensioners in terms of the amount of monthly pension.

Figure 21: Insured Funds Distribution:

10.3.5. As can be noted from the table above, the bulk of the pensioners under insured funds were also located in the group of pensioners earning between **ZW\$3,000 and ZW\$10,000**, followed by those earning **less than ZW\$3,000**.

10.3.6. The group earning between **ZW\$3,000 and ZW\$10,000** stood at 45% in March 2022 while those earning less than ZW\$3,000 constituted 32%. Few pensioners were earning **above ZW\$10,000** and they constituted 23% of the pensioners under insured funds.

Figure 22: Insured Funds Average:

10.3.7. There was no significant movement in the monthly average pension being paid during the quarter under review, with the average for those earning **below ZW\$3,000** translating to ZW\$1,289.06. The average for those between **ZW\$3,000 and ZW\$10,000** was ZW\$5,751.62 while for pensioners **above ZW\$10,000**, the average started at ZW\$15,519.35 in January 2022, increased to ZW\$17,249.90 in February and settled at ZW\$17,690.93 in March 2022. Therefore, insured funds are urged to ensure that benefits are adjusted in line with investment performance.

Self-Administered Funds

Figure 23: Self- Administered Funds Distribution:

10.3.8. An analysis of the Self-Administered Industry shows that 44% of the pensioners were still earning **below ZW\$3,000**, while 28% were between **ZW\$3,000 and ZW\$10,000** and only 28% were earning **above ZW\$10,000**.

10.3.9. The average pension of the Self-administered funds is shown below:

Figure 24: Self- Administered Funds Average Pension

10.3.10. The average pension for those in the less than ZW\$3,000 category was ZW\$1,013.26, while those between ZW\$3,000 and ZW\$10,000 averaged ZW\$5,407.70. Pensioners earning above ZW\$10,000 were averaging ZW\$27,336.12 for the First quarter of 2022.

10.4. Measures to Improve Benefits

10.4.1. The Commission has adopted the following to improve the benefits received by members:

- ✓ continued enforcement of the Guidance Paper on Currency Reforms to ensure benefit improvement.
- ✓ regulation of administration expenses and investment management fees to facilitate improvement of benefits.
- ✓ allowing part payment of benefits in forex if the pension fund's income is denominated in forex.
- ✓ engagement with trustees of pension funds to have benefits tracking as a permanent agenda of their Boards
- ✓ reviewed investment guidelines to facilitate investment in alternative assets, including offshore investments to diversify sovereign risk.

10.5. Update on the 2019 Compensation

10.5.1. The 2019 compensation was a government initiative to alleviate pensioners' plight occasioned by the currency reforms of 2019.

10.5.2. A total of 3,375 pensioners were identified from the lowest earning bracket to be the first beneficiaries of the first dividend declared of US\$400 000. The figure below shows the collection rate:

Figure 25: 2019 Compensation uptake:

10.5.3. Poor data integrity resulting in incorrect contact details being availed to the Commission by the fund administrators, was noted as the major cause for the failure to realise a 100% collection rate since the exercise started in January 2022.

10.5.4. The figure below shows the findings from the direct calls that were made to the fund members by the Commission.

10.5.5. Of the pensioners called, 77%, were not available or not reachable on the mobile network platforms using the contact details supplied by the fund administrators. This is a significant number and alludes to the data challenges in the industry.

10.5.6. The Commission is developing guidelines on Data and Record Keeping which will guide the industry on data requirements to minimize the continued incidence of poor record keeping practices.

10.6. **Capacity building and Awareness Raising Initiatives**

10.6.1. The Commission participated in the commemoration of the Global Money Week and Consumer Rights Day. In addition, the Commission appeared on the Mai Chisamba Show to raise awareness on various pension issues including the challenge of contribution arrears.

10.6.2. Various industry trainings targeting the Trustees and Pension Fund Administrators were also held during the quarter.

10.7. **Complaints Handling**

Walk in clients report for quarter ended 31 March 2022

10.7.1. The first quarter of 2022 was characterised by an increased volume of traffic to the Commission offices.

10.7.2. The statistics below also include Bulawayo office, which recorded 53 clients in January, 87 in February and 167 in March 2022.

10.7.3. The consolidated summary of walk-in clients served in the quarter under review is shown in the graph below:-

Figure 26: Clients Served- Q1

Pensions Complaints

- 10.7.4. In line with its mission to protect consumers, the Commission continued to sensitise and educate consumers about IPEC's complaint recourse mechanisms.
- 10.7.5. This resulted in an increase in the number of complaints lodged and a change in the types of channels used to lodge them. Notable among these channels was the WhatsApp platform, which saw an increase, while using traditional modes such as face-to-face also witnessed a huge increase in the same period, resulting in total clients of 674 being served in the quarter being reviewed.
- 10.7.6. During the quarter ended 31 March 2022, the Commission received a total of 436 valid pensions complaints, out of which 86 were resolved, 31 were under investigation and 319 were not resolved since they related to the pending conclusion of the Commission of Inquiry's recommended compensation.

10.7.7. Those under investigation related to unremitted contributions, where members still await the remission of their contributions by former employers.

10.7.8. The graph below summarises the breakdown of the complaints as explained above:

Figure 27: Summary of Complaints:

Figure 28: Nature of Complaints Received

10.7.9. The figure above shows that 55% of the complaints related to low pension values occasioned by the currency conversion of 2009 with most pensioners following up on the Commission of Inquiry recommendations.

10.7.10. Non-payment of benefits accounted for 20% of the complaints received in the quarter, whilst late payment of benefits, accounted for 10% in the period under review. Unremitted contributions were another source of complaints which constituted 15% of the complaints received in the period under review.

10.7.11. The Commission continues to encourage pension funds to firm up on payment plans agreed with sponsoring employers who have contribution arrears.

10.8. **Unclaimed Benefits**

10.8.1. Total unclaimed benefits for the quarter ended 31 March 2022 amounted to ZW\$4.4 billion, up from ZW\$1.67 billion as of 31 March 2021 representing a 163.5% increase.

10.8.2. Total membership with unclaimed benefits declined to 146,370 from 168 269 in the same period last year representing a 13% decline in the number of members who have not yet claimed their benefits.

10.8.3. Whilst the decline in membership is a positive sign, it remains worrisome to note that 64% of the unclaimed benefits have remained so for over 10 years, with a membership of 111 384 and valued at ZW2.7 billion (63%).

10.8.4. The analysis reveals that 77% of membership has not claimed their benefits for 6 years and above. In an inflationary environment like the one obtaining now, the members benefits continue to be eroded.

10.8.5. The graph below depicts the tabulated information:

Figure 29: Unclaimed Benefits:

10.8.6. It was observed that one pension fund, Clothing Industry Pension Fund, had the highest number of members with unclaimed benefits, totalling 97 629 as at 31 March 2022. This constituted 66% of the total membership with unclaimed benefits of 146,370. In monetary value terms, the fund had unclaimed benefits of ZW\$1.3 billion, that accounted for 30% of the industry total of ZW\$4.2 billion. Further, the fund's total membership of 74 525 in the more than 10 years range accounted for 69% of the sectional total of 107,877 and 67% of industry total.

Insured Funds

10.8.7. As at 31 March 2022, insured funds had unclaimed benefits of ZW\$417.5 million, representing 9.5% of total industry unclaimed benefits attributed to 15 771 members. The figure below shows the age analysis for insured funds

Figure 30: Unclaimed Benefits age analysis

Stand-Alone

10.8.8. It was observed that stand-alone funds accounted for 80% of total unclaimed benefits, with a value of ZW\$3.4 billion as of 31 March 2022 owed to 120,394 members.

10.8.9. The membership constituted 82% of total industry, a sign that this section has challenges with tracing and paying benefits to their members.

10.8.10. More disturbing is the fact that ZW\$2.6 billion has remained unclaimed for over 10 years and this accounts for 74% of the sectional total and 58% of the industry total. A total of 107,877 members have not accessed their benefits in the over 10 years range and this represents 67% of total industry membership with unclaimed benefits.

Figure 31: Age Analysis Stand Alone Funds

Self-administered funds

10.8.11. Self-administered funds recorded unclaimed benefits of ZW\$588 million in the review period ended 31 March 2022 owed to 10,205 members.

10.8.12. The figure below shows that the largest group of members with unclaimed benefits falls in the 2 to 5 years range whilst 11% of members had not claimed their benefits for over 10 years.

Figure 32: Stand-Alone Age Analysis

10.9. The following have been flagged as the major drivers of unclaimed benefits:

- ✓ poor record keeping by pension funds.
- ✓ lack of consumer awareness on the existence of the benefits.
- ✓ failure to update contact details by pensioners.
- ✓ Migration of pensioners e.g., pensioners moving to other countries or even transfers to other funds without claiming their benefits.
- ✓ failure by principal members to update their dependents or beneficiaries.
- ✓ Lack of knowledge and literacy about retirement funds among employees.
- ✓ Members may move to many companies and end up forgetting their pension.
- ✓ Arrear contributions which mean, there is nothing to claim, just paper money.
- ✓ Members may lack knowledge of who their administrator is.
- ✓ Closure of companies abruptly and the employer failing to give the employees exit forms to the administrator.
- ✓ Loss of documents as in the cases of the Clothing Industry Pension Fund.
- ✓ Low values may discourage some pensioners from taking their pension.

10.9.1. Therefore, the Commission is working with pension funds and administrators to address the problem of unclaimed benefits holistically. Central to the ongoing initiatives is the need to improve on Management Information Systems, Record-keeping, and data preservation to enable tracing of beneficiaries of unclaimed benefits.

10.9.2. The Commission continues to encourage the industry to improve its record keeping from inception and continuous updates of member contact details and working with sponsoring employers in the process.

APPENDIX

Annexure 1: Consolidated Industry Statement of Comprehensive Income for the 3 months ended March 2022

	Insured Funds	Self Administered Funds	Stand Alone Funds	Total
Income				
Year to date Contributions (Including arrears)	1,760,652,549	2,731,272,733	2,904,761,396	7,396,686,678
