1. Executive Summary

- 1.1. There were 978 registered occupational pension funds as at 30 June 2022 compared to 972 funds as at 30 June 2021.
- 1.2. The increase was mainly due to newly registered funds over the period under review.
- 1.3. 615 were active, constituting 63% of the industry funds. The remaining 37% were either paid up or undergoing dissolution as per the Dissolution Directive issued by the Commission to dissolve inactive funds.
- 1.4. The industry's total membership including beneficiaries, increased by 7% from 915,975 as at 30 June 2021 to 976,060 as at 30 June 2022. This was mainly as a result of the new funds.
- 1.5. The industry's assets as at 30 June 2022 stood at ZW\$800 billion, which was a nominal increase of 304% from a value of ZW\$198 billion as at 30 June 2021.
- 1.6. Investment properties accounted for ZW\$298.56 million as at 30 June 2022 compared to ZW\$74 million during the comparative period last year, which was a nominal increase of 303%.
- 1.7. Equities had a nominal increase of 250% from ZW\$343 million as at 30 June 2022 from ZW\$98 million as at 30 June 2021. This is mainly attributable to fair value gains and acquisition of equities from contributions received by pension funds.
- 1.8. Prescribed assets amounting to ZW\$63 billion, constituted 8% of the industry's total assets as at 30 June 2022. This was an increase of 772% from the prescribed assets investments of ZW\$7 billion as at 30 June 2021. The increase was mainly due to the industry investing in prescribed assets in compliance with regulatory requirement of 20%. As at 30 June 2022, 16 pension funds had met the required regulatory minimum requirements. The Commission continues to enforce industry compliance with the approved instruments.
- 1.9. The total income for the half year ending 30 June 2022 was ZW\$310 billion compared to ZW\$55 billion for the half year ending 30 June 2021. This translates to a nominal increase of 468% and a real increase of 95%. Total

income was mainly driven by fair value gains on investments, interest from investments and contributions, which constituted 59%, 20% and 7% of total income, respectively.

1.10. Total expenses amounted to ZW\$20 billion for the period-ended 30 June 2022, reflecting a nominal increase of 274% from expenses of ZW\$5 billion for the comparative period ending 30 June 2021. This translates to a real increase of 28%.

1.11. Benefit payments, administration expenses, including staff costs and investment management expenses were the major drivers of expenses constituting 71%, 11% and 7% of the industry's expenses, respectively.

2. Economic Overview

2.1. Global and Regional Economic Outlook

Global output growth has been revised downwards to 3.2% in 2022 and 2.9% in 2023 (IMF, 2022). The slow growth is mainly attributed to negative spill overs from the war in Ukraine and the associated sanctions that disrupted energy and food markets.

Table 1: World Economic Outlook Projections

	2021	2022	2023
World Output	6.1	3.2	2.9
Advanced Economies	5.2	2.5	1.4
USA	5.7	2.3	1.0
Euro Area	5.3	2.6	1.2
Emerging Markets and Developing Economies	6.8	3.6	3.9
China	8.1	3.3	4.6
Sub-Saharan Africa	4.5	3.8	4.0
Nigeria	3.6	3.4	3.2
South Africa	4.9	2.3	1.4
Zimbabwe	6.3	3.5	3.0

Source: July 2022 World Economic Outlook Update, IMF Projections

Growth in sub-Saharan Africa is projected at 3.8% in 2022, reflecting the effects of elevated fossil fuel and metal prices for some commodity-exporting countries.

2.2. Domestic Economic Outlook

The Ministry of Finance and Economic Development revised the 2022 economic growth for Zimbabwe from 5.5% to 4.6%, reflecting the impact of the external global environment and unique domestic circumstances. The 2022 growth projection is premised on improved mining and quarrying (9.5%), accommodation and food services (50%), electricity, gas, steam and air conditioning supply (12.2%), real estate activities (6.1%) among others, as shown in Table 2.

Table 2: Summary of Revised 2022 Sectoral Growth Projections

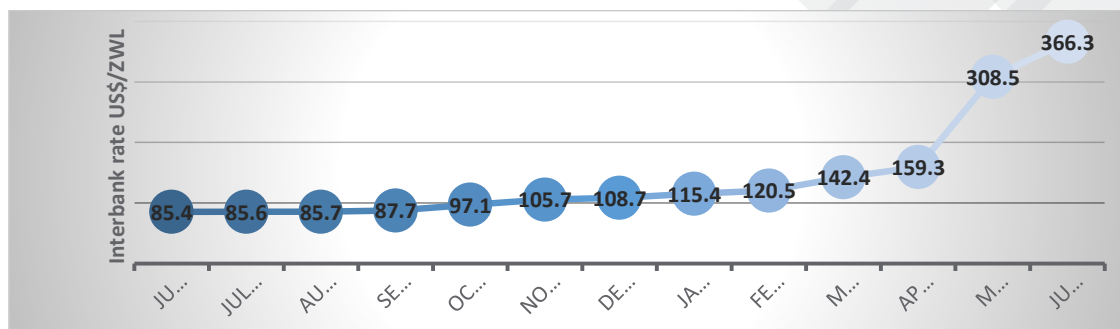

Sector	2022 Budget	2022 Revised
Agriculture, Hunting and Fishing and forestry	5.1	-5.0
Mining and quarrying	8.0	9.5
Manufacturing	5.5	3.6
Electricity, gas, steam and air conditioning supply	5.4	12.2
Construction	17.4	10.5
Accommodation and food service activities	18.8	50
Information and communication	2.4	5.3
Financial and insurance activities	5.3	5.2
Real estate activities	1.7	6.1
Education	2.9	4.8
Gross Domestic Product	5.5	4.6

Source: 2022 Mid-Term Budget Review

2.3. Exchange Rate Developments

The Zimbabwe dollar lost its value from an average of US\$1:142.4 as at 31 March 2022 to US\$1:ZW\$366.3 as at 30 June 2022. The depreciation was mainly driven by higher demand for foreign currency as a store of value, and forward exchange rate pricing due to high inflation expectations. Figure 1 displays the changes in exchange rates.

**Figure 1: Interbank Exchange Rate June 2021 to June 2022
(US\$/ZW\$) – End of Period**

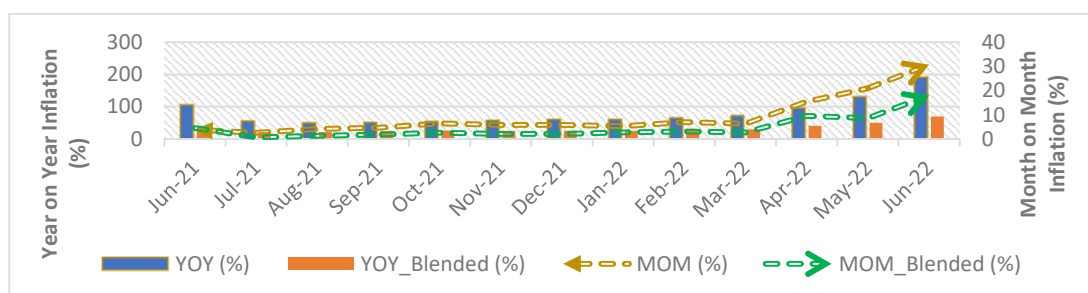

Source: Reserve Bank of Zimbabwe

2.4. Inflation Developments

The annual inflation rate increased to 191.6% in June of 2022, from 72.7% recorded at the end of March 2022, as driven by behavioural factors such as confidence, adverse future inflation expectations, and arbitrage behaviour and opportunities. The month-on-month inflation stood at 30.7% as at 30 June 2022, up from 6.3% recorded as at 31 March 2022. Figure 2 illustrates the inflation trend from June 2021 to June 2022.

Figure 2: Inflation Profile (%), June 2021 to June 2022

Source: Zimbabwe National Statistics Agency

2.5. Zimbabwe Stock Exchange Performance

The All-Share index, Top 10 index, and Medium Cap index experienced gains of 25%, 17%, and 58%, respectively, during the quarter under review. The stock market saw increases as a result of quick price changes and the success of businesses with listed stocks. The market capitalisation increased by 24% from ZW\$1.97 trillion in the previous quarter to ZW\$2.44 trillion as at 30 June 2022. Table 3 summarises changes in the key stock market indicators.

Table 3: Changes in the Key Stock Market Indicators

ZSE Indicator	March-2022	June-2022	Change (%)
All-share index (points)	15, 833.55	19,791.94	25
Top-10 Index (points)	10, 490.38	12, 273.75	17
Medium-Cap Index (points)	25, 692.6	40, 627.22	58
Small-Cap Index (points)	399,696.2	499,070.3	25
Market Capitalisation (ZW\$ trillion)	1.97	2.44	24
Shares traded (million)	578.9	660	14
Market turnover (ZW\$ billion)	20.5	35	71

Source: Zimbabwe Stock Exchange

Victoria Falls Stock Exchange (VFEX) Performance

The VFEX All-share index was also bullish, during the quarter under analysis gaining by 7.72% to close at 115.39 points. However, total turnover declined by 39.6% from US\$5.3 million recorded in the first quarter of 2022 to US\$3.2 million. Market capitalisation also declined in the quarter by 7.69% from US\$253.7 million to US\$273.2 million.

2.6. Money Market Developments

Savings Deposit Rates

The annual inflation rate at 192% as at 30 June 2022, remained higher than the rates on savings deposits, which were under 20%. This suggests that money market investments continued to yield negative real returns.

2.7. Covid-19 Updates

As at 30 June 2022, there were 541.3 million confirmed cases of Covid-19 worldwide, a 13% increase from the 479.3 million cases recorded at the end of March 2022. The total number of deaths caused by the pandemic rose from 6.1 million recorded as at 31 March 2022 to 6.3 million cases as at June 2022 (WHO, 2022).

The total number of Covid-19 cases reported in Zimbabwe rose from 246,286 as at 31 March 2022 to 255,586 cases reported as at 29 June 2022. Over the same period, the recovery rate increased from 96% to 97%. The number of deaths related to COVID-19 also increased, from 5,444 to 5,555 cases. A total of 4.6 million individuals were completely vaccinated as at 29 June 2022.

3. Regulatory Developments

3.1. During the second quarter, the Insurance and Pensions Commission issued additional circulars aimed at improving service delivery, primarily to pension fund members and the industry at large. Table 4 below shows the key circulars issued out during the second quarter.

Table 4: Circulars Issued in the Second Quarter of 2022

Document	Issue date	Content
Circular 18 of 2022	04 Apr 2022	Annual audited financial reporting requirements and template for pension and provident funds
Circular 20 of 2022	03 May 2022	Data request for the mortality tables development project.
Circular 23 of 2022	16 May 2022	Call and request for monthly, quarterly, and annual submission of asset managers' reports to monitor investment performance
Circular 25 of 2022	14 June 2022	Guidelines on: - • Transfer of fund business between funds and fund administrators; and • Revised expenses framework for pension funds prescribing limits to be observed in defining the basis and rate of charging expenses.
Circular 27 of 2022	16 June 2022	Standardised template for reporting fund business by pension fund administrators.

Prescribed Assets

3.2. As at 30 June 2022, the Commission had recommended six (6) applications for conferment of prescribed asset status to the Ministry of Finance and Economic Development.

3.3. During the period under review, the number of approved applications increased by three (3) from the previous quarter.

3.4. The instruments that were approved during the period under review are shown in Table 5 below: -

Table 5: Approved Prescribed Asset Instruments during the Year to 30 June 2022

Issuer	Amount	Purpose	Date approved
Zororo PA	USD\$45 000 000	Solar Energy Project	04 March 2022
Centragrid	USD\$29 500 000	Solar Energy Project	04 March 2022
Nhaka Life	USD\$10 000 000	Cattle Backed Investments	07 April 2022
Mangwana Opportunities Pvt Ltd	USD\$5 000 000	To finance productive sectors of the economy namely agriculture, mining and tourism.	07 April 2022
Equinox	US\$9 000 000	Solar Energy Project	18 May 2022
Agrowth	ZW\$2 000 000 000	Financing winter cropping season	27 June 2022

4. Independent Fund Administrators

4.1. There were 12 fund administrators registered with IPEC during the half year-ended 30 June 2022. Of the 12 administrators, seven (7) are also registered life assurance companies, 2 are insurance brokers and 3 are purely employment benefits consultants.

4.2. Of the 978 registered pension funds, only 14 stand-alone funds carried out their in-house administration and the rest, which are insured funds and self-administered funds, outsource the services to the fund administrators.

4.3. The table below shows the distribution of pension funds among the administrators.

Table 6: Distribution of Funds Administered by Professional Administrators.

Name of Administrator	30 June 2022		30 June 2021	
	Insured funds	Self Administered funds	Insured funds	Self-Administered funds
CBZ Life	6	-	6	-
Fidelity Life	38	1	38	1
First Mutual Life	132	6	129	5
Old Mutual Life	345	19	341	21
Nyaradzo Life	-	3	-	3
ZB Life	108	-	109	-
Zimnat Life	166	2	166	2
Comarton Consultants		26		26
Bright Employee Benefits	-	40	-	40
Minerva Benefit Consulting	-	65	-	68
Capitol Insurance Broker	-	1	-	1
Zimbabwe Insurance Brokers	-	5	-	5
Total	795	169	789	172

- 4.4. The increase in insured funds during the period under review was due to new registrations, which were more than the dissolved funds.
- 4.5. The decrease in self-administered funds was due to one dissolution and some funds being merged into umbrella funds.
- 4.6. The employee benefits consultants and employee benefits sections of the life companies and insurance brokers earned a total income of ZW\$3.35 billion during the half year-ended 30 June 2022. Of this income, 10% of the business, which is equivalent to US\$29 million, when converted at the interbank exchange rate as at 30 June 2022, was in forex.
- 4.7. Administration fees recorded for the period under review were ZW\$1 billion, constituting 32% of the total income. Only Capitol Insurance Brokers, out of the 12 registered fund administrators, did not report any business.
- 4.8. A total of ZW\$4 billion worth of expenses was incurred resulting in a loss of ZW\$608 million as at 30 June 2022 the major expense driver being staff costs. Of the administration fees earned during the period, ZW\$121 million remained due and collectible as at the date of reporting, with 57% being less than 30 days old. The summary of the administration fees aged analysis is shown in the table below: -

Table 7: Administration Fees Debtors Aged Analysis as at 30 June 2022

	30 days and below	between 31 days and 60 days	between 61 days and 90 days	91 days +	Total
Amount (ZW\$'Million)	69.04	21.89	13.68	16.79	121.40
Percentage of total	56.87%	18.03%	11.27%	13.83%	100%

5. Dissolutions

5.1. A total of 178 dissolutions were reported to be in progress as at 30 June 2022, however, the liquidation process was hindered by data integrity issues, which are currently being reconciled.

5.2. The dissolutions currently in progress date as far back as 2014. The list of funds undergoing dissolution is available in Annexure 9.

6. Registration of Funds

6.1. During the half-year to 30 June 2022, nine (9) applications for fund registrations were received of which seven (7) were from Old Mutual and two (2) from Minerva. Of these, eight (8) were fully registered while one (1) application was pending as at 30 June 2022.

7. Key Performance Indicators

7.1. The key performance indicators for the pensions industry for the half year-ended 30 June 2022 are shown in the table below:

Table 8: Key Performance Indicators

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Funds	Total
Number of Funds	792	172	14	978
DB	31	11	4	46
DC	761	161	10	932
Active funds	470	131	14	615
Members (Incl Beneficiaries)	362,059	179,737	434,264	976,060
Members (Excl Beneficiaries)	360,919	176,966	413,434	951,319
Share of total membership	37%	18%	44%	100%
Total Income (ZW\$' billion)	66.07	145.11	99.06	310.24
Total Contributions (ZW\$' billion)	5.50	7.93	8.39	21.82
Rental Income (ZW\$' billion)	0.02	0.37	2.52	2.91
Investment Income (ZW\$' billion)	61.96	133.30	88.43	283.69
Total Expenditure (ZW\$' billion)	6.27	7.67	5.73	19.67
Total Benefits Incurred (ZW\$' billion)	5.44	5.60	2.95	14.00
Expenses/Contributions	14.89%	25.41%	26.17%	23.05%
Expenses/Total Income	1.24%	1.39%	2.22%	1.62%
Total Assets (ZW\$' billion)	266.99	272.13	260.21	799.32
Average Total Assets per Member	737,412	1,514,039	599,190	818,927
Percentage of Total Assets	33.40%	34.04%	32.55%	100.00%
Foreign currency-denominated assets (US\$'million)	161.35	65.77	120.05	347.16
Prescribed Assets (ZW\$' billion)	37.17	21.19	4.32	62.69
Average Prescribed Assets Ratio	13.92%	7.79%	1.66%	7.84%
Contribution Arrears (ZW\$' billion)	0.99	1.68	6.36	9.04

Notes:

1. Total Investment income is made up of rental income, dividends, interest on investments, profit on disposal of assets and fair value gains.
2. Total Expenditure for the industry includes benefits paid, transfer to reserves, revaluation losses and provisions.
3. Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation losses.

8. Membership

8.1. The tables below show the distribution of members as at 30 June 2022 and as at 30 June 2021 across the different membership categories.

Table 9: Membership Classes as at 30 June 2022

	as at 30 June 2022			
Membership Class	Insured	Self-Admin	Stand Alone	Total
New Entrants	2,864	7,191	2,037	12,092
Active members (excluding new entrants)	97,461	117,096	155,507	370,064
Pensioners (Excluding beneficiaries)	8,036	9,493	22,448	39,977
Deferred Pensioners	239,836	31,195	130,547	401,578
Suspended Pensioners (Excluding beneficiaries)	1,750	3,957	6,536	12,243
Unclaimed benefits (number)	10,972	8,034	96,359	115,365
Total Members excluding beneficiaries	360,919	176,966	413,434	951,319
Widows and Children (Pensioners)	921	2,019	13,660	16,600
Widows and Children (suspended Pensioners)	219	752	7,170	8,141
Total Number of beneficiaries	1,140	2,771	20,830	24,741
Total members including beneficiaries	362,059	179,737	434,264	976,060
Exits	-	-	-	-
Exit on normal retirement with annuity purchased outside the fund	184	712	42	938
Exit on early retirement due to retrenchment or ill health	598	139	444	1,181
Exit on death	150	93	9,481	9,724
Transfer to other funds	1	119	-	120
Other (Specify) e.g., Full Commutation	2,813	809	842	4,464
Total Number of Exits	3,746	1,872	10,809	16,427

Table 10: Membership Classes as at 30 June 2021

Membership Class	as at 30 June 2021			
	Insured	Self-Admin	Stand Alone	Total
New Entrants	2,129	2,161	2,778	7,068
Active members (excluding new entrants)	96,473	68,966	148,682	314,121
Pensioners (Excluding beneficiaries)	6,721	6,355	21,374	34,450
Deferred Pensioners	235,170	28,574	96,858	360,602
Suspended Pensioners (Excluding beneficiaries)	1,494	3,403	7,215	12,112
Unclaimed benefits (number)	15,627	9,279	135,844	160,750
Total Members excluding beneficiaries	357,614	118,738	412,751	889,103
Widows and Children (Pensioners)	780	3,356	12,437	16,573
Widows and Children (suspended Pensioners)	274	534	8,691	9,499
Total Number of beneficiaries	1,054	3,890	21,128	26,072
Total members including beneficiaries	358,668	122,628	433,879	915,175
Exits	-	-	-	-
Exit on normal retirement with annuity purchased outside the fund	960	34	36	1,030
Exit on early retirement due to retrenchment or ill health	641	56	155	852
Exit on death	107	14	207	328
Transfer to other funds	150	-	71	221
Other (Specify) e.g., Full Commutation	598	1,388	161	2,147
Total Number of Exits	2,456	1,492	630	4,578

8.2. As shown in the tables above, there was a general increase in membership of pension funds from 915,175 as at 30 June 2021 to 976,060 as at 30 June 2022, mainly driven by the increase in active members and principal pensioners by 18% and 16%, respectively.

- 8.3. Stand-alone funds had 44% of total membership followed by insured funds, which constituted 37% and self-administered funds constituted 18% of the industry membership.
- 8.4. Self-administered funds had the highest increase in membership, with active members and pensioners increasing by 70% and 49%, respectively. As a result, the membership of self-administered funds constituted 18% of the total industry as at 30 June 2022 from 13% as at 30 June 2021.
- 8.5. Members with unclaimed benefits decreased by 28.23% due to transfers to the Guardian Fund amounting to ZW\$8,3 billion, proper classification of unclaimed benefits following regulatory guidance and some members claiming their benefits because of the Commission's regular publication of unclaimed benefits, as well as strengthened enforcement of Know Your Customer (KYC) requirements on regulated entities.
- 8.6. As at 30 June 2022, active members were 39% of total principal members.
- 8.7. The number of exits during the half year-ended 30 June 2022 of 16,427 was more than the number of new entrants of 12,092, which means the observed increase from 30 June 2021 to 30 June 2022 was attributable to the second half of 2021.
- 8.8. The number of active members constitutes 40% of Zimbabwe's formally employed individuals of 913,989¹, which means the majority of the formally employed population is not contributing to any private occupational pension scheme.
- 8.9. The number of beneficiaries decreased by 5%, which can be attributed mainly to some minor beneficiaries reaching adulthood, as such, no longer qualifying for pension and death of widows and widowers.

¹ Zimbabwe National Statistics Agency - 2022 First Quarter Labour Force Survey Results

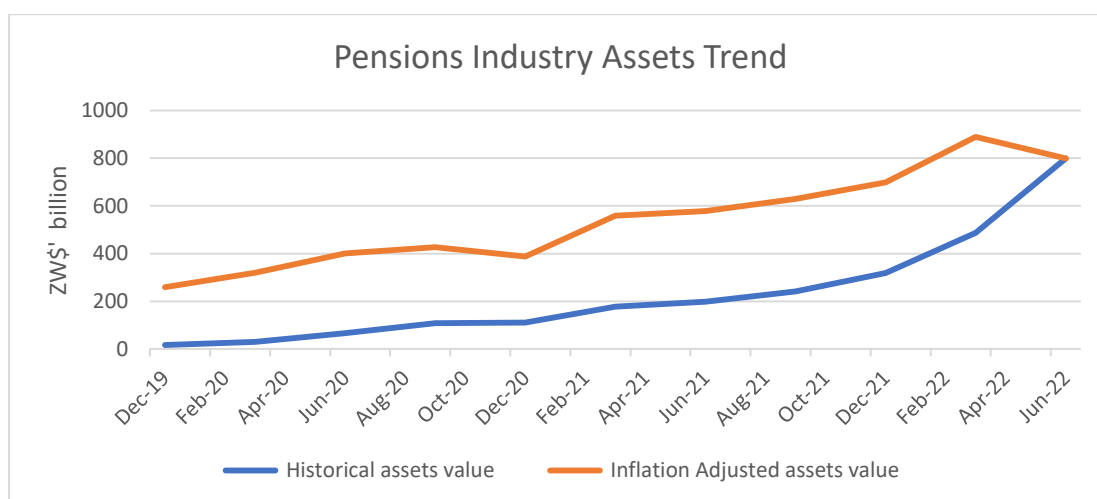

9. Assets

- 9.1. The total asset base for the pensions industry as at 30 June 2022 stood at ZW\$800 billion, which was an increase of over 300% from a value of ZW\$198 billion as at 30 June 2021. The major drivers for the increase were the increase in value of equities and property in line with the rise in inflation.
- 9.2. Foreign currency-denominated assets amounted to US\$347 million thereby constituting 16% of industry assets. The significant holding of foreign currency denominated assets helps in cushioning the assets from being eroded by inflation in the current hyperinflationary environment.

Asset Trend

- 9.3. The figure below shows the trend in asset values from December 2019 to 30 June 2022.

Figure 3: Pensions Industry Assets Trend

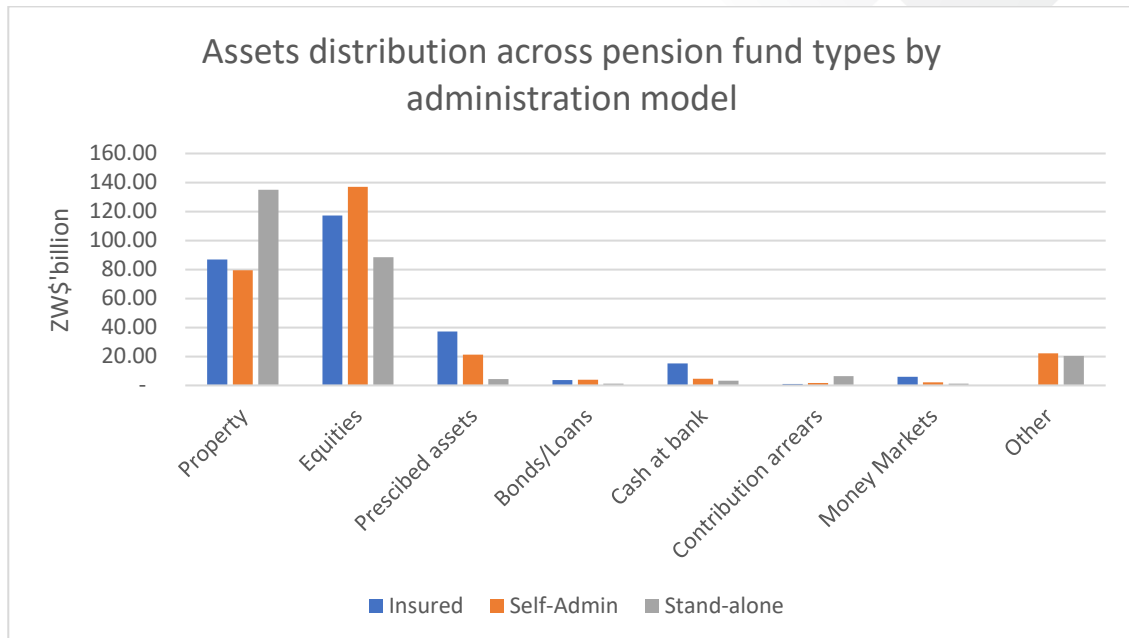

- 9.4. As can be seen in the graph above, pension industry asset values have been increasing in nominal terms consistently from December 2019 to June 2022, as the major assets have been revaluing in the inflationary environment.

An analysis of the inflation-adjusted figures shows that there has been real growth in assets during the period up to March 2022, after which there is a fall from April 2022 to June 2022. The fall has been due to the industry having one of its major investment classes, quoted equities on the stock market, experiencing a bear run since April 2022.

Assets Per Administration Model

9.5. The figure below shows the assets held by pension funds per administration model.

Figure 4: Pension Assets Distribution by Administration Model

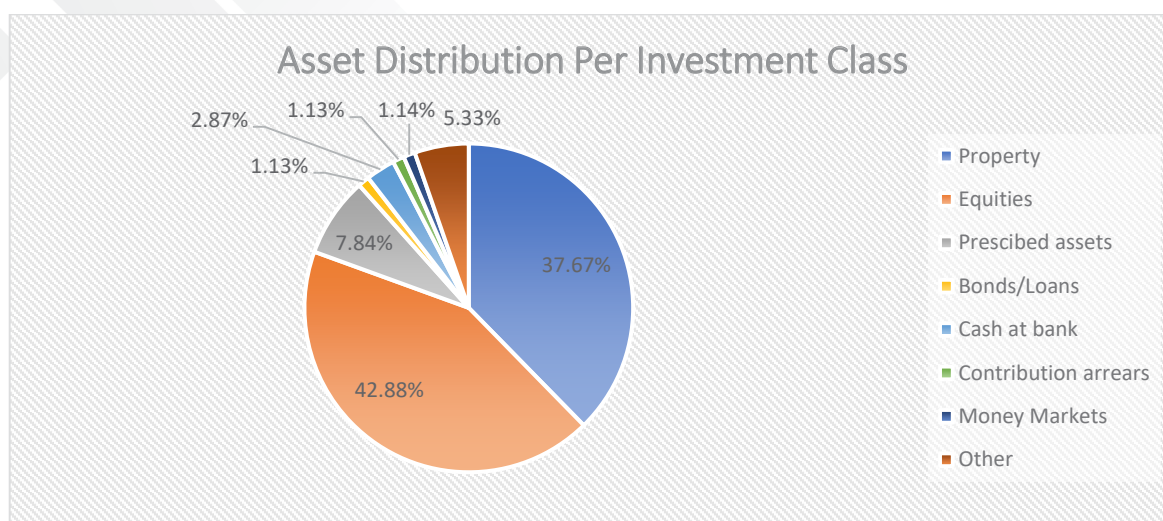

9.6. The insured funds, stand-alone funds and self-administered funds each constituted 33%, 34% and 33% of the industry's assets, respectively, as at 30 June 2022.

As can be seen in the figure above, insured funds and self-administered funds had the bulk of their investments in equities followed by properties, whilst stand-alone funds had the bulk of their investments in properties followed by equities whilst the residual assets for all the three were in the other asset classes. However, the share of investment property to total assets may be understated due to valuation challenges and less frequent valuation of direct property holdings.

Assets Composition

9.7. The figure below shows the asset distribution per asset class for the pensions industry as at 30 June 2022

Figure 5: Asset Distribution Per Asset Class as at 30 June 2022

- 9.8. As can be seen in the figure above, the major asset classes for the pensions industry as at 30 June 2022 were equities and properties with each constituting 43% and 38% of the industry's total assets, respectively. As a result, total investments in the two asset classes was over 80%. This trend is not different from 30 June 2021 where the major asset classes were equities and property, which constituted 49% and 38% respectively.
- 9.9. The industry should explore other investment options in order to increase diversification. While the two asset classes have been tracking inflation for most of the hyperinflationary period, the recent bearish trend on the ZSE has resulted in the fall in value of the equities, which is a demonstration that investing in this asset class is not risk-free. As such, diversifying asset classes can go a long way in protecting pension fund members.
- 9.10. Investment properties stood at ZW\$298 million as at 30 June 2022 from a value of ZW\$74 million as at 30 June 2021, which was a nominal increase of just over 300%.
- 9.11. Equities had a nominal increase of 250% to about ZW\$340 million as at 30 June 2022 from about ZW\$100 million as at 30 June 2021, attributable to fair value gains and acquisition of equities from contributions received by pension funds.

- 9.12. Prescribed assets amounting to ZW\$63 billion, constituted 8% of the industry's total assets as at 30 June 2022. This was an increase of about 800% from the prescribed assets investments of about ZW\$7 billion as at 30 June 2021. Notwithstanding the increase in the level of investments in prescribed assets, it is still below the statutory requirement of 20% of industry assets. The total number of funds, which complied with the prescribed assets requirement of at least 20% were 16 as at 30 June 2022. The increase in prescribed assets investments was mainly driven by the availability of foreign currency-denominated instruments approved by the Ministry of Finance and Economic Development, which have proven to be attractive to pension funds as they hedge against inflation. Given the industry interest to invest in the recently introduced gold coins, which have been granted prescribed asset status, the expectation is that this will result in increased compliance levels, subject to availability of the coins and uptake by pension funds.
- 9.13. Foreign currency-denominated prescribed assets investments by the pensions industry amounted to US\$84 million, translating to 50% of total prescribed assets.
- 9.14. Cash holding amounted to ZW\$23 billion as at 30 June 2022, of which 67% was in foreign currency. Foreign currency denominated cash amounted to US\$41 million. The high levels of cash means that the members are not gaining investment return from this cash, which could lead to low benefits.
- 9.15. Contribution arrears amounted to ZW\$9 billion as at 30 June 2022 compared to ZW\$3 billion as at 30 June 2021. This was a nominal increase of about 200% and a real increase of 2%. Pension funds are encouraged to ensure that they have certified repayment agreements with defaulting employers and the agreements are continuously adhered to.
- 9.16. As can be seen in the debtors' age analysis below, 42% of the contribution arrears were for 30 days and below, therefore not yet in default as the employers had a grace period of 14 days after the end of the quarter to make the payment.

9.17. Rental arrears amounted to ZW\$1.12 billion as at 30 June 2022, of which 54% of the amount was more than 30 days due. Pension funds are encouraged to carry out proper vetting of prospective tenants and active debt collection so that rentals are received on time and members are not short-changed.

Debtors Age Analysis

	Rental Arrears	Contribution Arrears
	ZW\$'billion	ZW\$'billion
30 Days and below	0.40	3.82
between 31 days and 90 days	0.23	1.89
between 91 days and 180 days	0.16	1.71
181 days and above	0.34	1.61
Total at end of Reporting Period	1.12	9.04

10. Income

- 10.1. The total income for the half year ending 30 June 2022 was ZW\$310 billion compared to ZW\$55 billion for the half year ending 30 June 2021. This translates to a nominal increase of about 470% and a real increase of 95%.
- 10.2. The main drivers of income were fair value gains on investments, interest from investments and contributions of ZW\$182 billion, ZW\$61 billion and ZW\$22 billion, respectively. These three (3) had real increases of 72%, 104% and 34%, respectively, compared to their values for the period ending 30 June 2021.
- 10.3. Overall, net assets increased by just over ZW\$290 billion in the half year-ended 30 June 2022.

11. Expenses

- 11.1. Total expenses amounted to ZW\$20 billion for the period-ended 30 June 2022, reflecting a nominal increase of 274% from just over ZW\$5 billion for the comparative period ending 30 June 2021, thereby translating to a real increase of 28%.
- 11.2. The major driver of the lower increase in expenses relative to increase in income is the issuance and implementation of the expenses framework, which has seen pension funds containing their expenses in an effort to adhere to the prescribed thresholds.
- 11.3. The Commission will continue to enforce compliance with the expenses framework by requesting compliance roadmaps from entities that have not yet fully complied as the compliance deadline was 30 June 2022.
- 11.4. Benefit payments, administration expenses, including staff costs and investment management expenses were the major drivers of expenses constituting 71%, 11% and 7% of the industry's expenses, respectively.
- 11.5. The figures below show the trend in expense ratios for the period 31 March 2021 to 30 June 2022

Figure 6: Expenses to Contribution Ratio

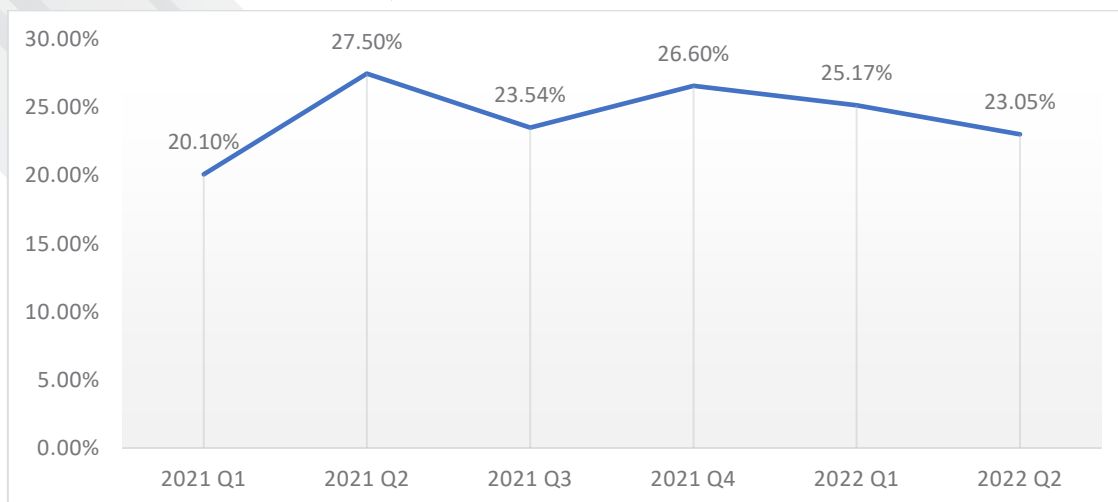

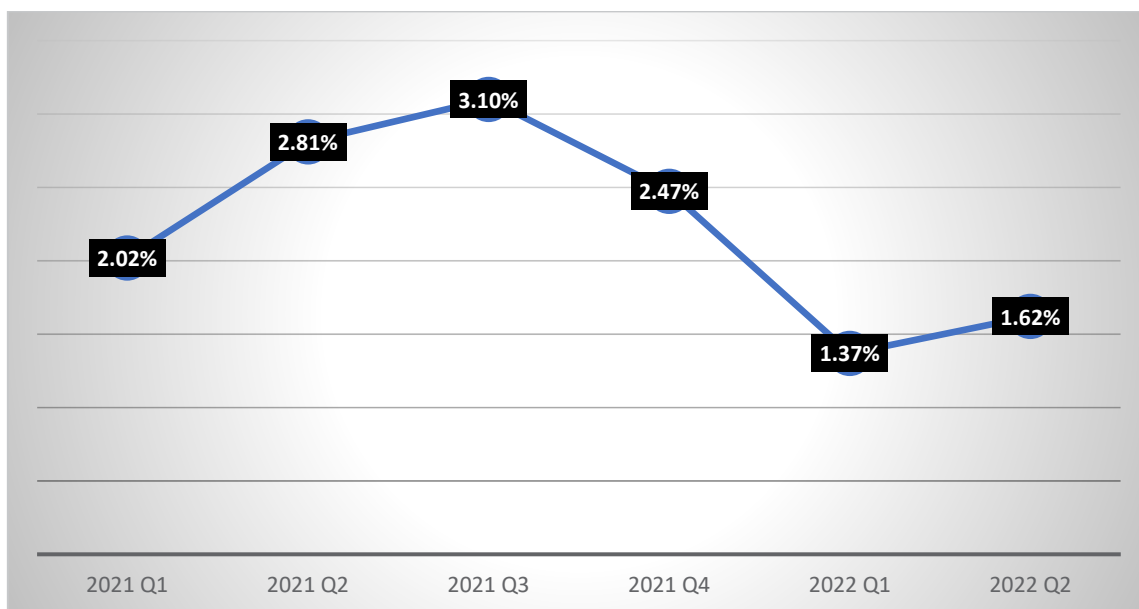

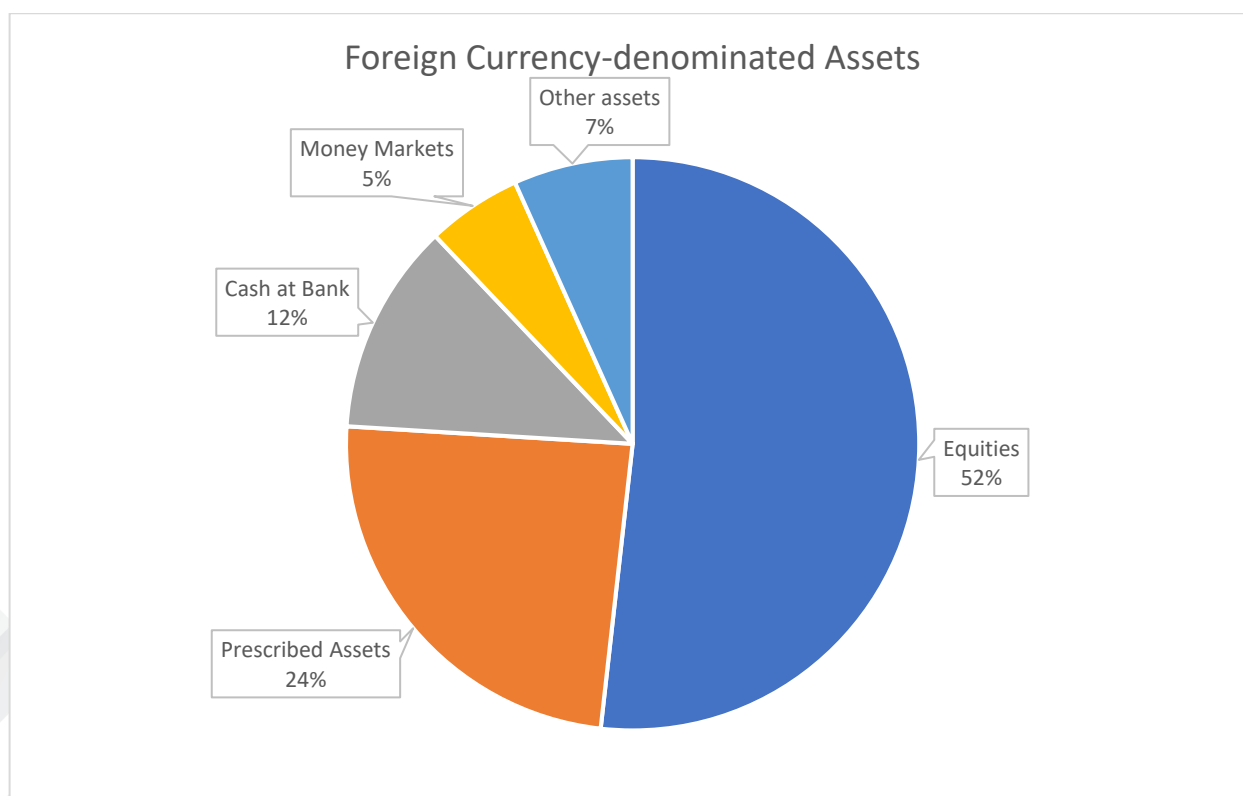

Figure 7: Expenses to Total Income Ratio

12. Foreign Currency Business

- 12.1. During the half year-ended 30 June 2022, total foreign currency denominated income amounted to about US\$29 million, with major contributors being interest from investments and contributions constituting 57% and 33%, respectively.
- 12.2. Foreign currency denominated expenses for the period under review were US\$1,5 million with major drivers being benefit payments, administration expenses and board expenses, accounting for 43%, 32% and 6%, respectively.
- 12.3. The total foreign currency denominated assets for the pensions industry amounted to US\$347 million as at 30 June 2022. The major asset classes were equities, prescribed assets and cash at bank constituting 52%, 24% and 12%. The Victoria Falls Stock Exchange, private equity, newly issued gold coins and offshore markets, are some of the investment opportunities available for foreign currency investments.
- 12.4. The distribution of the pension funds' foreign currency-denominated assets is shown in the figure below:

Figure 8: Foreign Currency-denominated Asset Distribution Per Asset Class as at 30 June 2022

13. Unclaimed Benefits

- 13.1.1. Total unclaimed benefits for the quarter-ended 30 June 2022 amounted to ZW\$4,3 billion, compared to ZW\$4,4 billion reported as at 31 March 2022. Total membership with unclaimed benefits for the period was about 106,000, compared to about 146,000 as at 31 March 2022.
- 13.1.2. The decline in unclaimed benefits was due to payments made to members as well as transfers to the Guardian Fund by some funds. This was also attributed to proper classification of members following issuance of the Revised Guideline on Unclaimed and Suspended Pensioners and the introduction of the revised reporting template.
- 13.1.3. The values paid to the members and the Guardian Fund were as shown below:

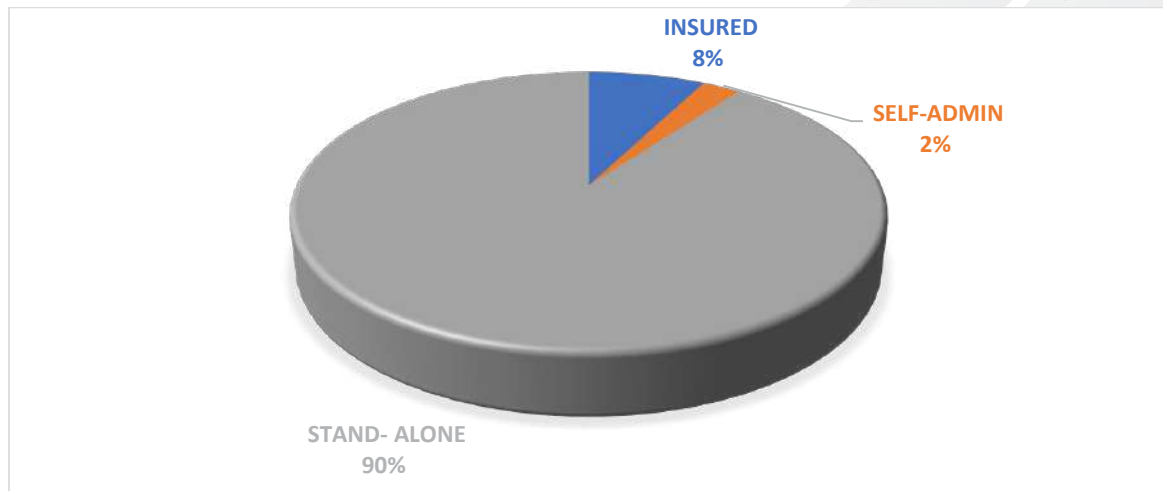

Name of Fund	Amount paid/transferred
Comarton	ZW\$3,180,370.82
NRZ	ZW\$2,944,881.24
CAIPF	ZW\$374,223.07
MIPF	ZW\$1,832,578.74
TOTAL	ZW\$8,332,053.87

- 13.1.4. An analysis of the unclaimed benefits data revealed that stand-alone funds have the largest proportion of unclaimed benefits, accounting for 90%, translating to about 96,000 members. On the other hand, insured funds and self-administered funds accounted for 8% and 2%, respectively.

13.1.5. The figure below shows the spread of unclaimed benefits :

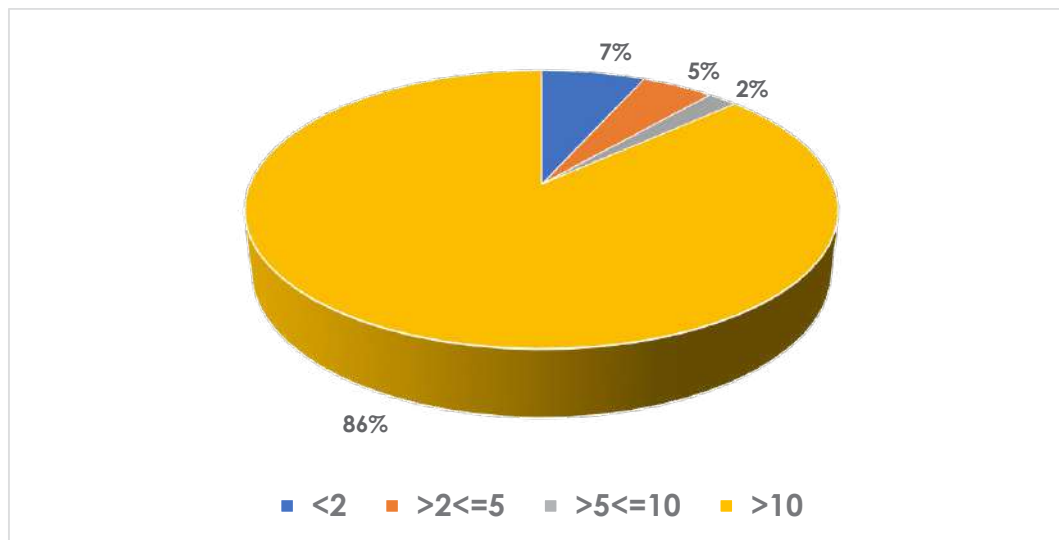

Figure 9: Distribution of Unclaimed Benefits

Age Analysis for Unclaimed Benefits

13.1.6. About 86% of the unclaimed benefits had accrued over a period in excess of 10 years, raising concerns over the traceability of the members entitled to the amounts. It also raises compliance issues, given the requirement to transfer unclaimed benefits aged over five (5) years to the Guardian Fund Guardian Fund under the Master of the High Court.

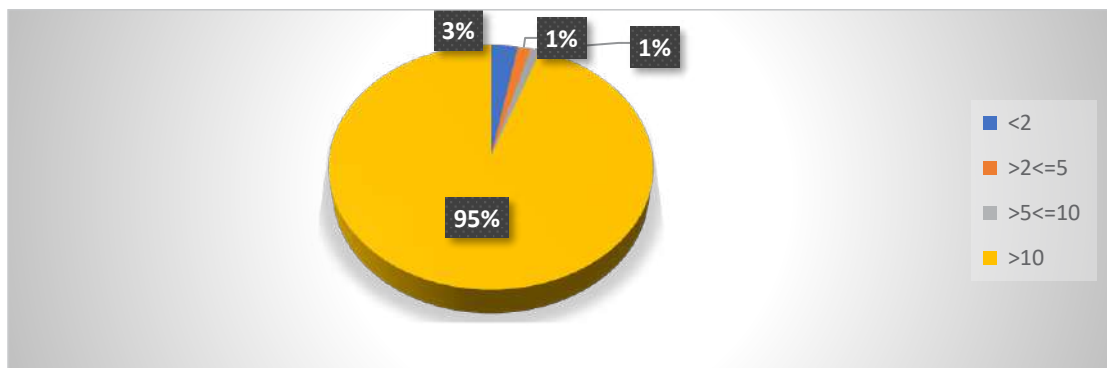

Figure 10: Industry Overview Age Analysis

13.1.7. About 95% of the unclaimed benefits have accrued for over 10 years, raising concerns on the ability of the funds to trace and pay the eligible members.

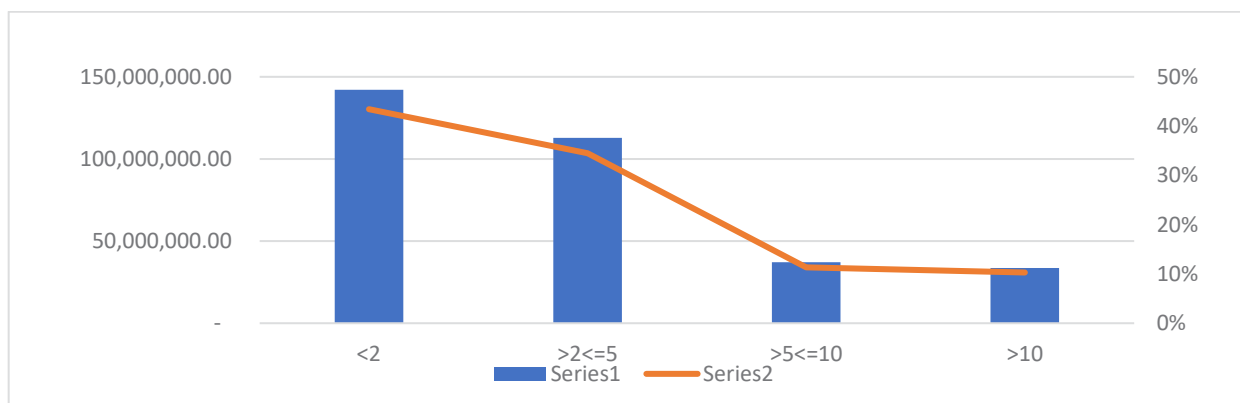

13.1.8. It is noteworthy that out of the ZW\$3,8 billion in unclaimed benefits under the stand-alone funds, ZW\$3,4 billion due to 89,088, members is attributable to the Clothing Industry Pension Fund Pension Fund alone. The unclaimed benefits have remained due for over 14 years, raising concerns on the traceability of the members

Figure 11: Age Analysis of Unclaimed Benefits for Stand-alone Funds

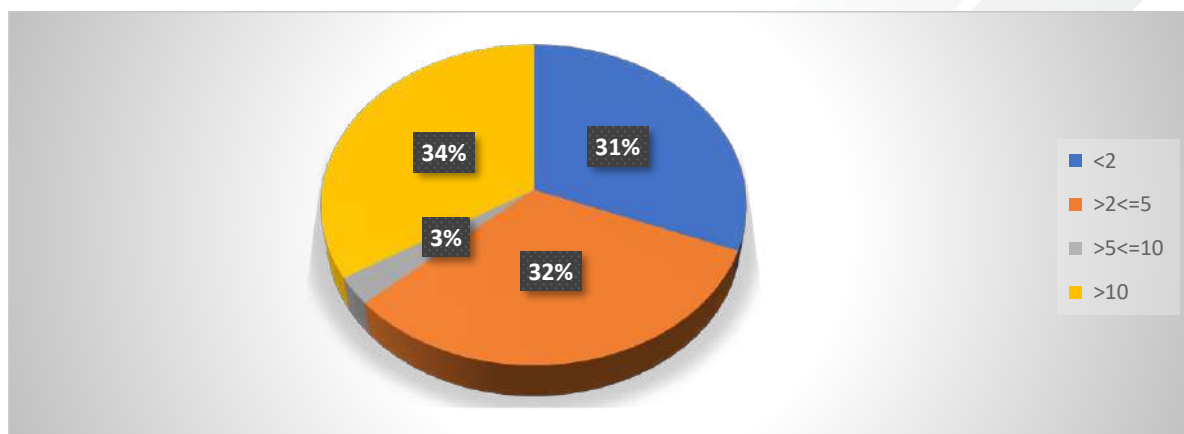

13.1.9. For insured funds, the bulk of the unclaimed benefits were aged below five (5) years accounting for 78% of unclaimed benefits. This points to the continued challenge of data integrity and the Commission will continue to engage the funds to ensure that the members are traced and paid their benefits.

Figure 12: Insured Age Analysis for Unclaimed Benefits

13.1.10. The value of unclaimed benefits for members under self-administered funds was about ZW\$107 million owed to 942 members. The sector accounted for 2% of industry unclaimed benefits.

Figure 13: Age Analysis for Self- Administered Funds

13.1.11. The Commission is conducting an onsite inspection focusing on data integrity to establish the possible causes of such high unclaimed benefits and find ways to significantly the reduce the same.

14. Suspended Pensioners

14.1. As at 30 June 2022, benefits for suspended pensioners were about ZW\$666 million. The stand-alone funds were also the sector with the highest proportion accounting for 85% of the benefits due to suspended pensioners. The table below shows the distribution:

Table 11: Distribution of Suspended Pensioners' Benefits

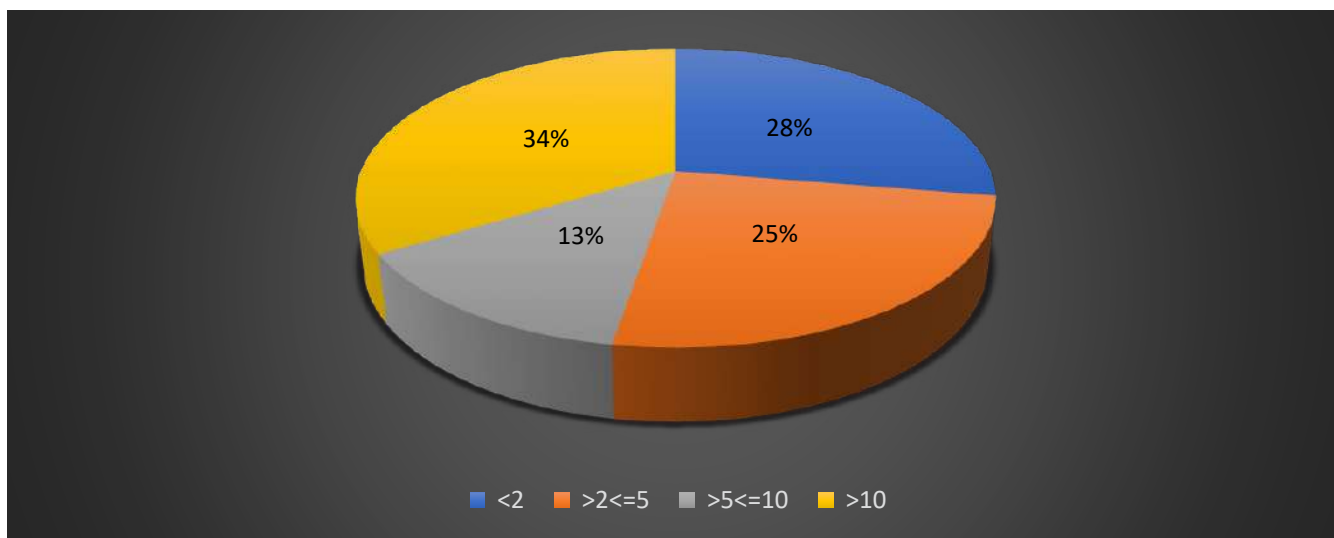

Fund Type	Amount (ZW\$)	Proportion
Insured	57,023,446.79	9%
Self-administered	42,861,963.82	6%
Stand-alone	566,058,515.22	85%
Total	665,943,925.83	100%

14.2. The high level of suspended pensioners and benefits reflects poor data management and lack of communication with the pensioners, resulting in suspension of pensioners. Thus, the Commission is working on record-keeping standards for the industry to improve on data integrity.

Age Analysis for Suspended Pensioners

14.3. The greatest portion of suspended benefits in terms of monetary value, have accrued to members who have been suspended for a period more than 10 years with a 34% of total liability. This shows that there could be some pensioners living in poverty because of lack of information.

Figure 14: Industry Overview Age Analysis for Suspended Pensioners

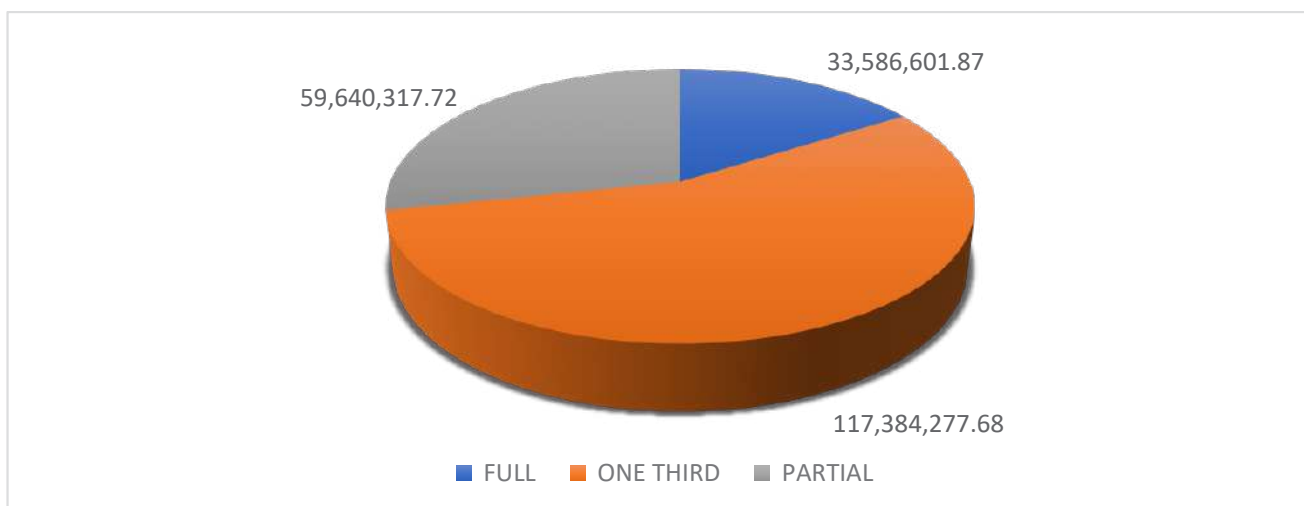

15. Commutations

Distribution of Commutations into Classes

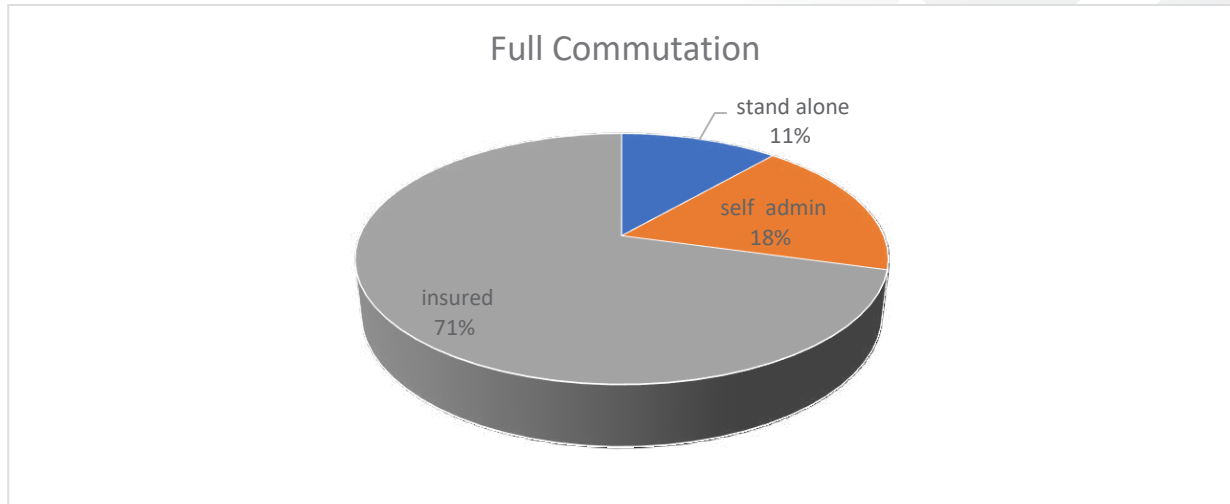

15.1. The total amount commuted during the period under review was about ZW\$211 million. The figure below shows the distribution of commutations per class in the industry during the second quarter of 2022.

Figure 15: Commutations Per Class

Full Commutations

15.2. Insured funds accounted for 71% of the full commutations while self-administered funds and stand-alone funds had 18% and 11%, respectively, for the period under review. The figure below shows the distribution of full commutations by scheme.

Measures to Improve Benefits

15.3. The Commission has adopted the following measures to improve the benefits received by members:

- ✓ continued enforcement of Guidance Paper on Currency Reforms to ensure benefit improvement.
- ✓ regulation of administration expenses and investment management fees to facilitate improvement of benefits.
- ✓ allowing part payment of benefits in forex if the pension fund's income is denominated in forex.
- ✓ engagement with trustees of pension funds to have benefits tracking as permanent agenda of their boards.
- ✓ reviewed investment guidelines to facilitate investment in alternative assets, including offshore investments to diversify sovereign risk.
- ✓ Enforcing the requirement for exit top ups for those commuting their pensions.
- ✓ Developing valuation guidelines for investment property and private equity in collaboration with other financial sector supervisors and in consultation with key stakeholders.

16.Complaints Handling

Pensions Complaints

16.1.The Commission received 422 valid complaints relating to pensions during the period under review, out of which 89 were resolved, 26 were under investigation, 109 emanated from the 2019 compensation and 198 related to the Commission of Inquiry's recommended compensation.

16.2.Those under investigation related to unremitted contributions, where members still await the remission of their contributions by former employers, additional information required from pensioners and investigations by pension funds.

Table 12: Number of Complaints Received

Total Received	Resolved	Under investigation	2019 Compensation	Commission of Inquiry
422	89	26	109	198

16.3.The Commission noted the following as the general challenges facing the pensions industry during the quarter under review:

- i. Non-payment of pension benefits.
- ii. Low values caused by hyperinflation and dollarisation in February 2009.
- iii. Near stagnant monthly pensions that have been eroded by inflation.
- iv. Late payment of benefits.

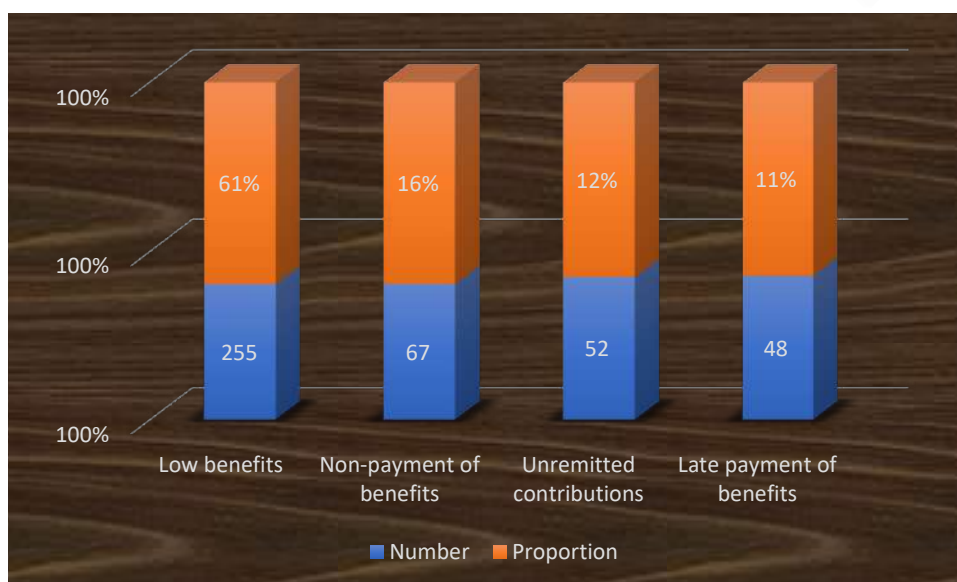

16.4.The figure below shows the distribution of complaints, with complaints related to low pension values occasioned by the currency conversion of 2009 accounting for 61% of the complaints received as most pensioners continued to follow up on the Commission of Inquiry recommendations.

16.5.Non-payment of benefit accounted for 16% of the complaints received during the quarter, whilst late payment of benefits, accounted for 11% during the same period.

16.6. Unremitted contributions is another source of complaints, which constituted 12% of the complaints received during the period under review.

16.7. The Commission continues to encourage pension funds to firm up on payment plans agreed with sponsoring employers who have contribution arrears.

Figure 16: Nature of Complaints

16.8. The Commission has emphasised, through training, that trustees should ensure that annual benefit statements are circulated to members so that they are aware of their benefits status and contribution arrears, if any.

16.9. Other complaints related to the delays in processing of benefits by pension funds, mostly owing to inadequate information on the part of beneficiaries, an issue that points to data integrity.

Another source of complaints related to the suspension of benefits due to non-submission of life certificates.

2019 Compensation Disbursements

16.10. The Commission began the 2019 compensation exercise on the 10th of January 2022, by disbursing the funds to 3,848 eligible members identified using a means test approach. The US\$100 disbursements were done through BancABC bank. It was envisaged that disbursements of the funds to all the members would be completed within three (3) months.

- 16.11. However, as of 8 July 2022, only 61.8% of the pensioners who had received the necessary communication from BancABC had collected their funds, translating to a cumulative disbursement of USD208,700. The Commission's interventions to improve the disbursements were continually hampered by the poor data that was supplied by the pensions industry.
- 16.12. It is against this background that the Commission resolved to close off the first tranche distribution as a result of the continued low uptake and initiate new disbursements for new cohorts of means-tested members.
- 16.13. A grace period up to 10 July 2022 was given to members to collect their funds, failure of which, the funds were to be channelled to other available members.
- 16.14. The Commission initiated a second phase targeted phone call exercise, as a way of verifying correctness of data supplied by the industry. This resulted in the identification of 1,592 members with correct and complete data from the list of means tested members. A total of 1,683 beneficiaries, including the reserve to beneficiaries from the first tranche, are set to benefit.

17. Anti-Money Laundering and Combating Financing of Terrorism And Proliferation Financing (AML/CFT/PF) Awareness Corner

Suspicious Transaction Reports

Introduction and Background

- 17.1. Following the removal of Zimbabwe from enhanced monitoring by the Financial Action Taskforce (FATF) International Co-operation Review Group, dubbed the 'Grey List' in March 2022, the country is now focusing more on improving effectiveness of AML/CFT/CPF measures.
- 17.2. One of the deficient areas identified in the 2nd Round Eastern and Southern Africa Anti-Money Laundering Group (ESAAMLG) Mutual Evaluation Report for Zimbabwe of 2016, was the low level of suspicious transactions reports (STRs) and activities filed with the Financial Intelligence Unit (FIU) by non-bank

financial institutions, including the insurance sector. The main reasons cited for the low reporting were:

- Majority of entities lacked awareness on the implementation of control measures; and
- A lack of understanding of the protection offered under the Money Laundering and Proceeds of Crime Act [Chapter 9:24] in relation to reporting suspicious transactions.

17.3. The 2016 Mutual Evaluation Report revealed that the insurance and pensions sector filed one (1) report in 2013 and four (4) reports in 2014. From January 2016 to April 2022, the FIU reported that only three (3) STRs had been reported by the sector.

17.4. It is, therefore, important to note that filing of STRs is a requirement in terms of the following Financial Action Task Force (FATF) Recommendations:-

Recommendation 20: All suspicious transactions, including attempted transactions, should be reported regardless of the amount of the transaction.

Recommendation 21: Financial institutions (FIs), their directors, officers and employees should be protected by law if they report their suspicions to the FIU. FIs should be prohibited by law from disclosing ("tipping-off") the fact that a suspicious transaction report (STR) or related information is being filed with the FIU.

17.5. Accordingly, requirements of Recommendations 20 and 21 of the FATF Recommendations were domesticated in the Money Laundering and Proceeds of Crime Act [Chapter 9:24], under section 30.

17.6. Therefore, filing of Suspicious Transactions is a legal requirement, which is part of transaction monitoring. The main goal of transaction monitoring is to ensure that proceeds of crime should be prevented from entering the financial and other sectors or are detected and reported by these sectors.

What Constitutes a Suspicious Transaction Report (STR)?

17.7. STRs must involve proceeds of crime or linked to or is to be used for terrorism acts or by terrorist organisations. Regulated entities must report any transactions, including attempted transactions, which could constitute proceeds of crime or be linked to terrorism or its financing.

17.8. A suspicious transaction report must be submitted directly to the FIU if there is reasonable ground to suspect that a financial transaction occurred or the attempted commission of an ML/TF/PF offence.

17.9. On 23 March 2022, the Commission issued Circular 16 of 2022 requesting regulated entities to register on GoAML a platform that facilitates communication with FIU and easy filing of STRs among other reporting obligations. All reporting entities must register on GoAML.

Typical Red Flags in the Pensions Sector

17.10. Entities should also be aware of elements of individual transactions and situations that might give rise to suspicion of money laundering and terrorist financing, also known as red flags.

17.11. Boxes 1 to 3 highlight typical examples of red flags relevant in the pensions sector. The lists are, however, not exhaustive.

Box 1: Pension Funds Red Flags

- Large cash voluntary contribution followed by substantial withdrawals of funds.
- Transfer of assets from an unrelated third party into a pension scheme.
- Contributions not matching the profile of the informally employed member – informal sector schemes
- Unrelated third-party paying contributions in cash on behalf of a member of a pension scheme.
- Funds or other assets transferred into a pension scheme which are inconsistent with the profile of the scheme member

Box 2: Customer Red Flags

Natural Persons

- Transactions involving persons residing in tax havens
- Transactions carried out on behalf of minors, incapacitated persons or other persons who may lack the economic capacity to make such purchases
- Transactions involving persons who are being tried or have been sentenced for crimes or who are publicly known to be linked to criminal activities involving illegal enrichment

Legal Persons

- Charities and other “not for profit” organisations, especially those operating on a “cross-border” basis).
- Legal persons with complex ownership structure which makes it difficult to identify the ultimate beneficial owner or controlling interests
- Transactions involving recently created legal persons when the amount is large compared to their assets.

Box 3: Geographic Red Flags

- Countries identified by UN, FATF and its FATF-style Regional Bodies such as ESAAMLG as having weak AML/CFT regimes.
- Cross border elements such as the insurer, the customer and the beneficiary of the contract being in separate jurisdictions.
- A request to insure goods or assets in transit to or situated in:-
 - Countries where there is terrorism
 - the production of drugs
 - drug trafficking or an organised criminal activity may be prevalent

Regulator's Role in STRs

17.12. No STR should be filed with the regulator IPEC. All STRs must be filed directly with the FIU.

17.13. However, IPEC as a competent supervisor is required in terms of Section 30 (4) of the MLPC Act to “.... inform the FIU if, in the course of discharging its responsibilities—

(a) it discovers facts that could be related to money laundering or terrorist financing; or

(b) it appears to the supervisory authority that a financial institution of which it is the supervisory authority, or any of their respective directors, officers or employees, is not complying or has not complied with the obligations set out in this section or the MLPC Act generally.”

Inapplicability of Confidentiality Provisions and Prohibition Against Tipping-off

17.14. Section 31 (1) of the MLPC Act stipulates that no secrecy or confidentiality provision in any other law shall prevent a financial institution or designated non-financial business or profession from fulfilling its obligations under section 30 or the other provisions of the MLPC Act.

17.15. Subsection (2) of the Act prohibits tipping off, and states that no financial institution nor any director, partner, officer, principal or employee thereof, shall disclose to any of their customers or a third party that a report or any other information concerning suspected money laundering or financing of terrorism will be, is being or has been submitted to the FIU, or that a money laundering or financing of terrorism investigation is being or has been carried out, except in the circumstances set forth in subsection (3) or when otherwise required by law to do so”.

17.16. The only exception is subsection (3) whereby, “a disclosure may be made to carry out a function that a person has relating to the enforcement of any provision of the MLPC Act or of any other enactment, or, in the case of a legal practitioner or accountant, when seeking to dissuade a client from engaging in illegal activity”.

Protection of identity of persons and information relating to suspicious transaction reports

17.17. Section 32 (1) of the MLPC Act states that except for the purposes of the due administration of the MLPC Act, no person shall disclose any information that will identify or is likely to identify the person who prepared or made a suspicious transaction report or handled the underlying transaction.

Exemption from Liability for Good Faith Reporting of Suspicious Transactions

17.18. Section 33 of the MLPC Act, stipulates that no criminal, civil, disciplinary or administrative proceedings for breach of banking or professional secrecy or breach of contract shall lie against a financial institution or their respective directors, principals, officers, partners, professionals or employees who, in good faith, submit reports or provide information in accordance with the provisions of the Act.
