1. Executive Summary

- 1.1. There were 988 registered occupational pension funds as at 30 September 2022 compared to 982 funds as at 30 September 2021.
- 1.2. The net increase was a result of newly registered funds during the period under review.
- 1.3. Of these, 560 were active, constituting 57% of the industry's funds. The remaining 428 were inactive, with 297 funds undergoing dissolution while the rest were in a paid-up status.
- 1.4. The industry's total membership including beneficiaries, decreased marginally to 907,778 as at 30 September 2022 from 912,355 as at 30 September 2021. The decrease was mainly attributable to members who exited pension schemes during the period under review.
- 1.5. The industry's assets stood at ZW\$906 billion, which was a nominal increase of 274% from the previously reported value of ZW\$242 billion.
- 1.6. Investment properties accounted for ZW\$427 billion compared to ZW\$84 billion during the comparative period last year, which was a nominal increase of 408%.
- 1.7. Equities had a nominal increase of 171% from ZW\$121 billion to ZW\$291 billion. This was mainly attributable to fair value gains and additional investments in equities from the contributions received by pension funds.
- 1.8. Prescribed assets amounting to ZW\$60 billion, constituted 7% of the industry's total assets. This was a nominal increase of 445% from the prescribed assets investments of ZW\$11 billion which constituted 5% of total asset. The increase was attributed to the additional investments, returns and fair value gains in prescribed assets investments.
- 1.9. Total income for the year to 30 September 2022 was ZW\$505 billion compared to ZW\$87 billion for the year to 30 September 2021. This translates to a nominal increase of 480% and a real increase of 53%. Total income was mainly driven by fair value gains on investments, interest from investments and contributions, which constituted 46%, 31% and 23% of total income, respectively.
- 1.10. Total expenses summing up to ZW\$40 billion reflected a nominal increase of 344% from ZW\$9 billion for the comparative period. This translates to a real increase of 17%.
- 1.11. The major drivers of the administration expenses were investment management expenses, administration fees and staff costs which constituted 28%, 15% and 13% of the industry's expenses, respectively.

2. Economic Overview

2.1. Global and Regional Economic Outlook

2.1.1. Global output growth forecast for 2022 was unchanged at 3%, whilst that of 2023 was revised down to 3% (IMF, 2022). Economic, geopolitical and ecological changes continue to impact on the global outlook. The souring global inflation exacerbated by the war in Ukraine has led to tightening of monetary policies and household budgets.

2.1.2. Advanced economies are expected to grow by 2% in 2022, and Emerging Markets by 4% (Table 1). Sub-Saharan Africa (SSA) growth is projected to grow to 3.6% in 2022, and marginally improve to 3.7% in 2023. The World Bank forecasts a slightly lower growth of 3% for SSA in 2022 on the back of slowing down of the global economy, tightening global financial conditions, rising food and fuel prices, adverse weather conditions, and rising risk of debt distress.

Table 1: World Economic Outlook Projections

	2021	2022	2023
World Output	6.0	3.2	2.7
Advanced Economies	5.2	2.4	1.1
USA	5.7	1.6	1.0
Euro Area	5.2	3.1	0.5
Emerging Markets and Developing Economies	6.6	3.7	3.7
China	8.1	3.2	4.4
Sub-Saharan Africa	4.7	3.6	3.7
Nigeria	3.6	3.2	3.0
South Africa	4.9	2.1	1.1
Zimbabwe	7.8	4.6	5.0

Source: October 2022 World Economic Outlook Update, IMF Projections

2.2. Domestic Economic Outlook

2.2.1. The economy is projected to grow by 5% in 2022, a downward revision from an initial 6% projection (Ministry of Finance, 2022). The 2022 growth projection is supported by increased activity in all the productive sectors except agriculture that was weighed down by the unfavourable 2021/22 rainfall season and high input costs. In the outlook, the economy is projected to continue the growth trajectory, with an expected growth of 5% in 2023 underpinned by favourable international commodity prices, stable macroeconomic environment, and improved production in all sectors of the economy.

2.3. Exchange Rate Developments

2.3.0. The Zimbabwean dollar depreciated against the US dollar from an average of US\$1: ZW\$366 as at 30 June 2022 to US\$1: ZW\$622 as at 30 September 2022. Higher demand for foreign currency as a store of value, as well as forward exchange rate pricing due to high inflation expectations, contributed to the exchange rate depreciation.

Figure 1: Interbank Exchange Rate September 2021 to September 2022 (US\$/ZWL) End of period

2.4. Inflation Developments

2.4.1. The year-on-year inflation rate increased to 280% in September of 2022, from 192% recorded in June 2022, driven by imported inflation and speculative behaviour by economic agents. The month-on-month inflation rate was 4% as at 30 September 2022, down from 31% recorded as at 30 June 2022 on account of the decrease in food and non-food inflation following the introduction of fiscal and monetary stabilisation measures during the period under review. Figure 2 illustrates the inflation trend from September 2021 to September 2022.

Figure 2: Inflation profile (%) September 2021 to September 2022

Source: Zimbabwe National Statistics Agency

2.5. Zimbabwe Stock Exchange Performance

2.5.0. The Zimbabwe Stock Exchange (ZSE) was characterized by bearish sentiments in the third quarter. Consequently, the All Share, Top 10, Top 15 indices and Medium Cap declined by 17%, 20%, 19%, and 12% to close the quarter at 13 705 points, 8 209 points, 9 199 points and 29 02 points, respectively. Similarly, the resources index shed 23% to close at 15 473 points. In the short to medium term, the bearish sentiments on the ZSE are expected to continue, on the back of the tight monetary and fiscal policy measures, which have significantly reduced speculative liquidity in the economy.

Figure 3: ZSE All Share and Top Ten Indices

Source: Zimbabwe Stock Exchange

2.5.1. The market capitalization closed at ZW\$1,819 billion in September 2022. On a year-on-year basis, ZSE capitalization rose by ZW\$787 billion, or 76%.

2.6. Victoria Falls Stock Exchange (VFEX) Performance

2.6.0. The VFEX was bullish in the third quarter which resulted in a 24% increase in the VFEX All Share Index to close the quarter at 143 points from 115 points recorded in the second quarter. Total market turnover declined by 81% to reach just below US\$1 million as at 30 September 2022, from US\$3 million in the previous quarter. The market capitalisation increased by 25% from the previous quarter, to end at US\$342 million.

2.7. Money Market Developments: Savings Deposit Rates

2.7.0. The annual inflation rate of 280% as at 30 September 2022, exceeds interest rates on savings deposits, which averaged around 20%. This suggests that money market investments continue to yield negative real returns.

3. Anti-money Laundering and Combating the Financing of Terrorism and Proliferation Financing

3.1. Implementation of Targeted Financial Sanctions Against Terrorist and Proliferation Financing

- 3.1.1. The Financial Action Taskforce (FATF) Recommendation 6 and 7 requires countries to implement the targeted financial sanctions regimes to comply with the United Nations Security Council resolutions (UNSCRs or resolutions) relating to the prevention and suppression of terrorism and terrorist financing¹ and proliferation financing².
- 3.1.2. The objective of the requirements is to prevent designated persons and entities involved in financing of terrorism or in proliferation of weapons of mass destruction from raising, moving and using funds.
- 3.1.3. In line with the country's international obligations as mandated by the United Nations and the Financial Action Task Force, Zimbabwe has in place the legal framework for implementation of targeted financial sanctions. The country enacted the Suppression of Foreign and International Terrorism Act [Chapter 11:21], and the supporting regulations statutory instruments SI.76 of 2014 and SI.110 of 2021 (which repealed SI. 56 of 2019).
- 3.1.4. The Financial Intelligence Unit (FIU) issued a Guidance on '*Targeted Financial Sanctions Relating to Financing of Terrorism and Financing Proliferation of Weapons of Mass Destruction*' in July 2021.
- 3.1.5. Recommendation 6 is intended to assist countries in implementing the targeted financial sanctions contained in the UNSCRs relating to the prevention and suppression of terrorism and terrorist financing:
- UNSCR 1267 (1999) and its successor resolutions (the Al-Qaida/Taliban sanctions regimes);
 - UNSCR 1373 (2001) (designated by the country); and
 - any future UNSCRs which impose targeted financial sanctions in the terrorist financing context.
- 3.1.6. The resolutions require countries to freeze, without delay, the funds or other assets of, and to ensure that no funds or other assets are made available, directly or indirectly, to or for the benefit of, any person or entity designated.
- 3.1.7. Targeted financial sanctions relating to proliferation financing are applicable to:
- persons or entities engaging in or providing support for, including through illicit

1 Terrorist financing is the financing of terrorist acts, and of terrorists and terrorist organisations.

2 Proliferation financing means the act of providing funds or financial services which are used, in whole or in part, for the manufacture, acquisition, possession, development, export, transshipments, brokering, transport, transfer, stockpiling or use of nuclear, chemical or biological weapons and their means of delivery and related materials (including both technologies and dual-use goods used for non-legitimate purposes), in contravention of national laws or, where applicable, international obligations.

means, proliferation-sensitive activities and programmes;

- persons acting on behalf of, or controlled by, or at the direction of designated persons or entities.
- persons or entities assisting designated persons or entities in evading sanctions or violating resolution provisions.

3.2. Sanctions Screening Obligations for IPEC Regulated Entities

3.2.1. All regulated entities have to comply with targeted financial sanctions directed at people or organisations sanctioned for reasons related to terrorism or the financing of proliferation.

3.2.2. All regulated entities are required to screen names and addresses against the consolidated list of designated persons and entities (including entities owned or controlled by them) published by the UN Security Council or its Committee in ensuring compliance with all elements of targeted financial sanctions.

3.2.3. Entities should apply targeted financial sanctions to persons/entities acting on behalf of or at the direction of designated persons/entities

3.2.4. They should also apply other preventative measures to combat increasingly prevalent use of sophisticated sanctions evasion techniques by proliferation networks (e.g., *the use of multiple shell and front companies*) in identifying and detecting the persons, entities, and transactions related to proliferation financing.

3.3. When Should Entities Conduct Screening

3.3.1. Regulated entities are required to review the UN Consolidated List and the Zimbabwe List prior to:

- conducting any transaction;
- undertaking any financial service; or
- entering into any relationship with any person or entity to ascertain whether or not the name of such a person or entity is on the Lists.

3.3.2. In line with Section 10 of SI 110 of 2021 Regulated entities should conduct sanctions screening:

- Whenever a new designation is announced by the UNSCR;
- When a new customer is being on boarded;
- When a walk-in customer or a customer who wants to engage in a once off transaction is being attended.

3.3.3. Where the name of a person or an entity is confirmed to be on the Lists, the regulated entity shall:

- freeze, without delay and without prior notice, the funds or other assets identified as belonging to the person or entity on the Lists, in accordance with subsections 8(1) and 9(1)-(2) of S.I 110 of 2021.
- ensure that;

- the accounts, properties or assets are not operated;
- no financial services are provided to the designated person;
- they forward to the FIU any "Suspicious Transaction Report" as well as reports or information on all actions taken to freeze the funds and other assets, and any attempted transactions, in accordance with subsection 9(4) of the MLPC Act.
- they file a nil return to the FIU where no positive matches have been identified.

3.4. Effective Screening and Monitoring Systems

- 3.4.1. Entities must maintain real-time sanctions screening systems in place for all cross-border transactions (both incoming and outgoing), that are capable of identifying a match against any internal and vendor supplied UNSCR lists maintained by the institution. Where an entity uses a screening list provided by a third-party vendor, the vendor's Service Level Agreement with the entity should ensure that the list is updated immediately upon any new designation as required.
- 3.4.2. The systems should be capable of screening and monitoring all aspects of customer onboarding as well as payment messages, including all additional information provided by the ordering institution or the customer when conducting wire transfers.

3.5. Internal Controls

- 3.5.1. Entities are required to develop and maintain adequate internal controls (including due diligence procedures and training programs as appropriate) to identify existing accounts, transactions, funds or other assets of designated persons and entities. The controls should guide the entity in fulfilling the obligation of immediately freezing any identified funds or other assets held or controlled by designated persons and entities.
- 3.5.2. Entities should implement reasonable procedures to prevent designated persons and entities from conducting transactions with or through them. Institutions should consider the level of risk when obtaining beneficial owners, signatories and powers of attorney information with respect to accounts or transactions when searching for activities by designated persons or entities.

3.6. Reporting

- 3.6.1. Section 12 of SI 110 stipulates that every financial institution and designated non-financial businesses and professions shall report to the FIU any assets frozen or actions taken in compliance with the prohibition requirements of the relevant UNSCRs, including attempted transactions, for review and utilization by the FIU.
- 3.6.2. A nil report will also be made to the FIU when no funds or other assets are identified. A nil report must also be submitted when a new listing is made by the UNSCR, and no match is found in the designated institution's books.

3.6.3. Where there is suspicion of TF/PF, a suspicious transaction report (STR) must be filed with the FIU.

3.6.4. ALL reports to the FIU should be submitted through the GoAML platform.

3.7. Record Keeping

3.7.1. Section 24 of the MLPC Act sets out the record-keeping obligations, prescribing what must be covered by such records as well as the minimum length of time for which such records should be kept. The record-keeping obligations are meant to assist the FIU and law enforcement agencies should the need arise to investigate a customer or a transaction.

3.8. Cooperation

3.8.1. Regulated entities are required to counter terrorist and proliferation financing through adequate cooperation and coordination between themselves and the FIU in order to ensure there is no sanction evasion.

3.9. Penalties for Non-Compliance with CFT/CPF Obligations

3.9.1. Non-compliance by regulated entity with any of the CFT/CPF obligations relating to the implementation of Targeted Financial Sanctions under Statutory Instruments 76 of 2014 and 110 of 2021, attracts either criminal sanctions or civil penalties (or both). Administrative penalties are enforceable by the FIU and competent supervisors under section 5 of the MLPC Act.

4. Regulatory Developments

4.1. During the third quarter, the Insurance and Pensions Commission issued 12 circulars specifically for the pensions industry. These circulars are targeted at guiding and informing the industry of the latest developments and regulatory expectations in pension fund management and administration with much focus on the interest of pension fund members. Table 2 shows the circulars issued to the industry during the third quarter.

Table 2: Circulars Issued in the Third Quarter of 2022

Document	Issue date	Content
Circular 28 of 2022	11 July 2022	Revised Guideline for the Classification and Treatment of Unclaimed Benefits and Suspended Pensioners.
Circular 29 of 2022	15 July 2022	Invitation to an engagement workshop with the industry on the 2009 Compensation regulations and sharing of regulator's expectations.
Circular 30 of 2022	20 July 2022	Call for comments and input to the Guideline on the Establishment, Operation, and Administration of In-house Funds to ensure sound governance and promote efficiency in the administration of pension funds.
Circular 31 of 2022	25 July 2022	Call for comments on the draft regulations for the pre 2009 compensation.
Circular 32 of 2022	30 August 2022	Call for Comments and Input on the Guideline for Fitness and Probity Standards for Trustees.
Circular 34 of 2022	12 August 2022	Revised Guideline for the Pension Industry in Financial Statements Reporting
Circular 36 of 2022	02 September 2022	Notification of the publication of the new act, the Pensions and Provident Fund Act [Chapter 24:32]
Circular 37 of 2022	25 August 2022	Guidance Paper implementation - removal of peer review requirements and waiver of the June actuarial valuations.
Circular 38 of 2022	14 September 2022	Request for inputs from the Insurance and Pensions Industry towards the 2023 National Budget.
Circular 39 of 2022	19 September 2022	The Commission's recommendation to the Insurance and Pension Industry to invest in gold coins.
Circular 40 of 2022	19 September 2022	Guideline on Record-keeping Standards, Determination of Preservation Amounts and Commutable Benefits and Appointment of Fund Liquidators for the Insurance and Pensions Industry.
Circular 41 of 2022	22 September 2022	Request for Self-assessment Compliance Reports on the state of Compliance with the new Pensions and Provident Funds Act [Chapter 24:32].

Prescribed Assets

4.2. From January to 30 September 2022, nine applications were recommended to the Ministry of Finance and Economic Development for conferment of prescribed asset status

4.3. Out of these, seven have since been granted prescribed asset status.

4.4. The instruments that were approved during the year to 30 September 2022 are listed in table 3 below: -

Table 3: Approved Prescribed Asset Instruments during the Year to 30 September 2022

Issuer	A m o u n t (millions)	Purpose	Date approved
Zororo PA	US\$45	Solar Energy Project	04 Mar 2022
Centragrid	US\$30	Solar Energy Project	04 Mar 2022
Nhaka Life	US\$10	Cattle Backed Investments.	07 April 2022
Mangwana Opportunities	US\$5	Financing of the agriculture, mining and tourism sectors.	07 April 2022
Equinox	US\$9	Solar Energy Project.	18 May 2022
Proganic (Private) Limited	US\$5	To establish facilities to produce button mushrooms.	28 July 2022
Agrowth	ZW\$2,000	Financing the winter cropping season.	27 September 2022

5. Independent Fund Administrators

5.1. As at 30 September 2022, there were 13 independent fund administrators registered with IPEC following the on boarding of Econet Life Assurance to the list. Of the 13 administrators, five are independent administrators and eight are registered life assurance companies.

5.2. Out of the 988 registered funds, only 14 stand-alone funds perform their own in-house fund administration business. The rest, which are insured and self-administered funds, outsource the services to fund administrators.

5.3. The distribution of pension funds under the management of the respective administrators is shown in table 4 below:

Table 4: Distribution of Funds Administered by Professional Administrators.

Name of Administrator	30 September 2022		30 September 2021	
	Insured funds	Self-Administered funds	Insured funds	Self-Administered funds
CBZ Life	6	-	6	-
Fidelity Life	38	1	38	1
First Mutual Life	132	5	130	5
Old Mutual Life	355	19	347	21
Nyaradzo Life	-	3	-	3
ZB Life	108	1	109	-
Zimnat Life	166	2	166	2
Econet Life	-	1	-	-
Comarton Consultants	-	26	-	26
Bright Employee Benefits	-	40	-	40
Minerva Benefit Consulting	-	65	-	67
Capitol Insurance Brokers	-	1	-	1
Zimbabwe Insurance Brokers	-	5	-	5
Total	805	169	796	171

5.4. The increase in insured funds during the period under review was due to new registrations while the decrease in self-administered funds was due to some funds being integrated into umbrella funds and others being dissolved.

5.5. Total income earned by fund administrators was ZW\$8 billion. Forex business worth US\$1 million, amounting to the local currency equivalent of ZW\$787 million as at the reporting date constituted 10% of total revenue earned.

5.6. Administration fees charged for fund administration services rendered for the period under review were ZW\$2 billion, constituting 23% of the total income. Of the administration fees charged, 13% was transacted in foreign currency. Capitol Insurance Brokers was the only fund administrator which did not conduct any business, either in forex or local currency.

5.7. A total of ZW\$9 billion worth of expenses was incurred, resulting in a loss of ZW\$766 million, the major expense driver being staff expenses. 14% of the administration fees earned for the year to date remained outstanding. The summary of the administration fees aged analysis is shown in table 5 below: -

Table 5: Administration Fees Debtors Aged Analysis as at 30 September 2022

	30 days and below	between 31 days and 60 days	between 61 days and 90 days	91 days +	Total
Amount (ZW\$'millions)	171	47	20	11	250
Percentage of total	69%	19%	8%	5%	100%

Transfer of Fund Business

5.8. During the third quarter of 2022, only Nestle Pension Fund transferred business from Bright Employee Benefits to Minerva Benefits Consulting.

Dissolutions

5.9. The number of funds undergoing dissolution increased from 178 as at 30 June 2022 to 297 as at 30 September 2022. The increase was due to an omission of 120 funds, in the prior quarter, under ZB Life currently undergoing dissolution. The data disclosed also lacked integrity as 80 funds undergoing dissolution, with assets worth ZW\$21 million, were reported to have no membership. The list of funds undergoing dissolution is available in Annexure 9.

6. Registration of Funds

6.1. During the quarter to 30 September 2022, nine applications for fund registrations were received. Of these, seven were successful bringing the total number of registrations for the year to date to 16. Of the nine, five were full registrations, three being provisional registrations while one remained pending for approval. Of the provisional registrations, two were approved ahead of the gazetting of the new Pension and Provident funds Act [Chapter 24:32] into law while one was rejected. The detailed breakdown of the status of applications and registration of funds is detailed in table 6 below: -

Table 6: Fund Applications and Registrations

Registration Status	New	Extension	Name Change	Conversion	Rejection	Total
Full	2	-	2	1	-	5
Provisional	1	1	-	-	1	3
Pending		-	1	-	-	1
Total	3	1	3	1		9

7. Key Performance Indicators

7.1. The key performance indicators for the pensions industry for the third quarter- ended 30 September 2022 are shown in table 7 below: -

Table 7: Key Performance Indicators

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Self-Administered Funds	Total
Number of Funds	805	169	14	988
DB	31	11	4	46
DC	774	158	10	942
Active funds	421	126	13	560
Members (Incl Beneficiaries)	360,952	126,963	419,863	907,778
Members (Excl Beneficiaries)	359,819	122,341	407,215	889,375
Share of total membership (%)	40	14	46	100
Total Income (Billion \$)	158	193	154	505
Total Contributions (Billion \$)	10	18	15	43
Rental Income (Billion\$)	0	1	5	6
Investment Income (Billion\$)	148	123	130	400
Total Expenditure (Billion \$)	11	19	9	40
Total Benefits Incurred (Billion \$)	9	16	4	29
Expenses/Contributions (%)	22	19	26	22
Expenses/Total Income (%)	7	10	6	8
Total Assets (Billion \$)	262	314	330	906
Total Assets per member	725,694	2,473,429	785,631	997,856
Percentage of Total Assets (%)	29	35	36	100
Prescribed Assets (Billion \$)	21	32	7	60
Prescribed Assets Ratio (%)	8	10	2	7
Contribution Arrears (Billion \$)	1	4	21	26

Notes:

1. Total Investment income is made up of rental income, dividends, interest on investments, profit on disposal of assets and fair value gains.
2. Total Expenditure for the industry includes benefits paid, transfer to reserves, revaluation losses and provisions.
3. Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation losses.

8. Membership

8.1. Tables 8 and 9 below show the detailed distribution of members as of 30 September 2022 and 30 September 2021, respectively.

Table 8: Membership Classes as at 30 September 2022

Membership Class	as at 30 September 2022			
	Insured	Self-Admin	Stand Alone	Total
New Entrants	2,871	4,567	3,499	10,973
Active members (Exc. new entrants)	96,563	68,448	154,096	319,107
Pensioners (Exc. beneficiaries)	7,852	5,577	16,280	29,709
Deferred Pensioners	239,795	31,568	131,238	402,601
Suspended Pensioners (Exc. beneficiaries)	1,600	4,268	5,795	11,663
Unclaimed benefits (number)	11,138	7,913	96,307	115,358
Total Members excluding beneficiaries	359,819	122,341	407,215	889,375
Widows and Children (Pensioners)	917	3,891	9,905	14,713
Widows and Children (suspended Pensioners)	216	731	2,743	3,690
Total Number of beneficiaries	1,133	4,622	12,648	18,403
Total members including beneficiaries	360,952	126,963	419,863	907,778
Total Number of Exits	6,249	3,273	1,218	10,740

Table 9: Membership Classes as at 30 September 2022

Membership Class	as at 30 September 2022			
	Insured	Self-Admin	Stand Alone	Total
New Entrants	3,071	1,864	4,794	9,729
Active members (Exc. new entrants)	94,995	68,895	151,466	315,356
Pensioners (Exc. beneficiaries)	6,958	6,107	20,140	33,205
Deferred Pensioners	230,848	29,209	95,744	355,831
Suspended Pensioners (Exc. beneficiaries)	1,430	3,882	6,680	11,992
Unclaimed benefits (number)	15,858	9,499	135,662	161,019
Total Members excluding beneficiaries	353,160	119,456	414,516	887,132
Widows and Children (Pensioners)	780	3,356	11,588	15,724
Widows and Children (suspended Pensioners)	274	534	8,691	9,499
Total Number of beneficiaries	1,054	3,890	20,279	25,223
Total members including beneficiaries	354,214	123,346	434,795	912,355
Total number of Exits	7,353	1,238	1,287	9,878

8.2. According to the statistics above, there was an overall decline of at most 1% in membership from 912,355 to 907,778, primarily due to an increase in the number of exits particularly within the category of beneficiaries.

8.3. Stand-alone funds accounted for 46% of total membership followed by insured funds, which constituted 40% and self-administered funds constituted 14% of the industry membership.

- 8.4. The Stand-Alone sector reported the greatest decline in the number of beneficiaries of 38% from 20,279 to 12,648. This can be attributed mainly to some minor beneficiaries reaching adulthood, as such, no longer qualifying them for pension as well as deaths of widows and widowers. Despite the increase in fund registrations, there was no corresponding increase in membership as some of the newly registered funds were plan sponsors prior to registration as funds.
- 8.5. Deferred pensioners increased by 12% when compared to the same period the previous year. Deferred pensioners are on the rise because of more people changing employment.
- 8.6. The number of active members accounted for 36% of Zimbabwe's formally employed individuals of 913,989³, implying that the majority of the formally employed population do not participate in any private occupational pension scheme.

9. Assets

- 9.1. The total asset base for the pensions industry as at 30 September 2022 stood at ZW\$906 billion, which was an increase of 274% from the value of ZW\$242 billion as at 30 September 2021. The major asset classes driving the increase were equities and property.
- 9.2. Foreign currency-denominated assets added up to a local currency equivalent of ZW\$142 billion (US\$228 million) thereby constituting 16% of industry assets. The holding of foreign currency denominated assets helps in cushioning the assets from being eroded by inflation in the current hyperinflationary environment.

Asset Trend

- 9.3. The table below shows the trend in industry assets from March 2021 to 30 September 2022.

Figure 4: Pensions Industry Assets Trend

- 9.4. As shown in the graph above, pension industry assets multiplied fourfold, in nominal terms, from the value reported during the same period in the previous year. However, in real terms, the industry assets shrunk by 2%.

9.5. The nominal increase was attributed to the revaluation of assets in line with the trends in the inflationary environment as well as resuscitation of the economy as most companies resumed operations following the decline in business due to the Covid-19 pandemic.

9.6. Figure 5 below shows the comparison between changes in industry asset values and the official exchange rate.

Figure 5: Comparison of Percentage Change in Assets to Change in Official Exchange Rate

9.7. The graph shows that the increase in asset values was generally greater than the increase in official exchange rate up to Q1 of 2022.

9.8. This trend changed from Q2 of 2022 up to Q3 of 2022 due to negative performance of listed equities on the stock exchange as that is one of the major classes of investment for the pensions industry.

Figure 6: Assets per Administration Model

9.9. The insured, self-administered, and stand-alone funds each constituted 29%, 35% and 36%, respectively of the industry's total assets as at 30 September 2022. As can be seen in the figure above, self-administered funds had the bulk of their investments in equities followed by properties, whilst stand-alone and insured funds had the bulk of their investments in properties followed by equities. The residual assets for all the three were in the other asset classes.

Asset Composition

9.10. Figure 7 below shows the asset distribution per asset class for the pensions industry as at 30 September 2022.

Figure 7: Distribution per Asset Class as at 30 September 2022

9.11. As shown in figure 7 above, the major asset classes for the pensions industry were equities and properties with each constituting 32% and 47% of the industry's total assets, respectively.

9.12. The inverse investment holding in the two major asset classes could be a response by industry following the recent bearish trend on the ZSE which resulted in the fall in the value of equities.

9.13. As a result, total investments in the two asset classes were about 80%. The industry's investments continue to be concentrated in these two classes. However, the industry should diversify its asset portfolio in line with investment guidelines as a way of spreading risk.

9.14. Investment properties stood at ZW\$427 billion as from a value of ZW\$84 billion reported in the comparative period in 2021, which was a nominal increase of 408%.

9.15. Equities had a nominal increase of 143% to about ZW\$291 billion as at 30 September 2022 from about ZW\$120 billion, attributable to fair value gains and acquisition of equities from contributions received by pension funds.

9.16. Prescribed assets amounting to ZW\$60 billion, constituted 7% of the industry's total assets. This was an increase of about 445% from the prescribed assets investments of about ZW\$11 billion as at 30 September 2021 which constituted 5% of total assets. Apart from the returns and capital appreciation, there was an increase in prescribed asset investments following the issuance by the Reserve Bank of Zimbabwe of gold coins, which bear prescribed asset status.

9.17. As at 30 September 2022, the industry had acquired 151 bullion coins worth ZW\$170 million, which constituted 2% of the coins sold by the Central Bank. The stand-alone sector was in possession of 75% of the coins acquired by the industry, indicating a growing confidence in the gold coins by the industry as an alternative store of value. With the introduction of smaller denominations of the gold coins, the expectation

is that this will result in increased compliance levels, subject to availability of the coins and uptake by pension funds. Notwithstanding the increase in the level of investments in prescribed assets, it is still below the statutory requirement of 20% of industry assets.

- 9.18. Foreign currency-denominated prescribed assets investments by the pensions industry amounted to US\$51 million, translating to 53% of total prescribed assets.
- 9.19. Cash holding amounted to ZW\$20 billion, of which 54% was in foreign currency. Foreign currency denominated cash amounted to US\$19 million. The high levels of cash in hand means that the members are not gaining investment return from this cash, which could lead to low benefits for USD contributing members.
- 9.20. Contribution arrears amounted to ZW\$26 billion compared to ZW\$3 billion reported as at 30 September 2021. This was an increase of about 767%. Pension funds are encouraged to ensure that they have certified repayment agreements with defaulting employers and the agreements are continuously adhered to.
- 9.21. As can be seen in the debtors' age analysis below, 36% of the contribution arrears were for 30 days and below, therefore not yet in default as the employers had a grace period of 14 days after the end of the quarter to make the payment.
- 9.22. Rental arrears amounted to ZW\$1.12 billion, of which 54% of the amount was more than 30 days due. Pension funds are encouraged to carry out proper vetting of prospective tenants and active debt collection so that rentals are received on time and members are not prejudiced.

Table 10: Debtors Age Analysis

	Insured	Self-Administered	Stand-Alone	Total
30 days and below	640	1,230	7,560	9,430
Between 31 and 90 days	185		7,700	7,885
Between 91 and 180 days	169		2,940	3,109
181 days and above	228	2,916	2,730	5,874
Total	1,222	4,146	20,930	26,298

Values in ZW\$ millions

10. Income

- 10.1. The total income for the year to 30 September 2022 was ZW\$505 billion compared to ZW\$87 billion for the year to 30 September 2021. This translates to a nominal increase of about 480% and a real increase of 53%.
- 10.2. The main income streams were fair value gains on investments, interest from investments and contributions amounting to ZW\$230 billion, ZW\$156 billion and ZW\$43 billion, respectively. These three had nominal increases of 423%, 729% and 373%, respectively, compared to their values for the period ending 30 September 2021.

11. Expenses

- 11.1. Total expenses amounted to ZW\$40 billion for the year to 30 September 2022, reflecting a nominal increase of 344% from just over ZW\$9 billion for the comparative period ending 30 September 2021, thereby translating to a real increase of 17%.
- 11.2. The major driver of the significantly lower increase in expenses relative to increase in income is the issuance and implementation of the expense's framework, which has seen pension funds containing their expenses to adhere to the prescribed thresholds.
- 11.3. The Commission will continue to enforce compliance with the expenses framework by requesting compliance roadmaps from entities that have not yet fully complied as the compliance deadline was 30 September 2022.
- 11.4. Benefit payments, administration expenses including staff costs and investment management expenses were the major drivers of expenses constituting 73%, 10% and 7% of the industry's expenses, respectively.
- 11.5. Figures 8 and 9 below show the trend of expense ratios for the period 31 March 2021 to 30 September 2022

Figure 8: Expenses to Contribution Ratio

Expenses used to calculate ratios exclude benefits, provisions and devaluation expenses

- 11.6. Figure 8 illustrates the trend of expense to contribution ratios. The ratio came off by 2% from 24% to 22% as a result of a greater nominal increase in contributions by about 275% during the review period.

Figure 9: Expenses to Total Income Ratio

Expenses used to calculate ratios exclude benefits, provisions and devaluation expenses

- 11.7. As indicated in the graph above, the ratio fell from 3.45% as at 30 September 2021 to 2.12% during the same period this year. However, the ratio of expenses to total income increased significantly between the third and fourth quarter of 2021 due to the rise in expenses to ZW\$7 billion from ZW\$3billion, which was an increase of 133%. This was followed by a sharp decrease of 1.5% in the first quarter of 2022.

12. Foreign Currency Business

- 12.1. Total foreign currency denominated income amounted to US\$54 million, with major contributors being interest from investments and contributions constituting 57% and 29%, respectively.
- 12.2. Foreign currency denominated expenses for the period under review were US\$2 million with major drivers being administration expenses, property expenses and staff costs, accounting for 51% and 13% apiece, respectively.
- 12.3. The total foreign currency denominated assets for the pensions industry amounted to US\$228 million. The major asset classes were equities, prescribed assets and cash as well as money market constituting 29%, 22% and 15%, respectively. The Victoria Falls Stock Exchange, private equity, gold coins and offshore markets, are some of the investment opportunities available for foreign currency investments.
- 12.4. The distribution of the pension funds' foreign currency-denominated assets is shown in figure 10 below:

Figure 10: Foreign Currency-denominated Distribution per Asset Class as at 30 September 2022

13. Financial Soundness

- 13.1. The Commission developed a tool with indicators to be used in assessing and determining the financial soundness of the pensions industry.
- 13.2. Financial soundness indicators provide insight into the financial health and condition of a pension fund or the pensions industry, as well as supporting financial stability analysis.

- 13.3. Financial soundness indicators can act as a trigger to identify, dictate and predict financial distress as well as the risks a fund or sector are susceptible to.
- 13.4. Following the use of the tool for the period ended 30 September 2022, the pensions industry was determined to be at a medium risk level.
- 13.5. The following risks were assessed in order to come up with the industry's risk rating: -

Solvency Risk

- 13.6. This applies to defined benefit plans. It is the risk that the pension fund's assets are insufficient to meet its liabilities.
- 13.7. Based on an assessment of the industry's position, this risk was found to be medium-low. This is because the industry's weighted average funding level was determined to be higher than the regulatory minimum of 75%.
- 13.8. The Commission will continue to engage the funds with low funding levels to ensure that the sponsoring employers inject capital into the pension funds to cater for the actuarial deficit.

Market Risk

- 13.9. When pension funds fail to diversify their investments and have investments in a few asset classes, they are exposed to market risk.
- 13.10. This is because if the few asset classes do not perform well, then the fund will be negatively affected.
- 13.11. Following assessment of the industry's investments, the risk rating was determined to be medium risk.
- 13.12. This is due to the bulk of the assets being invested in two asset classes of investment property and equities.

Credit Risk

- 13.13. This is the risk of default by debtors of the pensions industry, resulting in a loss from non-settlement of dues.
- 13.14. Given that the bonds, rental arrears, contribution arrears and other debts of the industry are a low proportion of the total assets, the risk was rated as low.

Investment Risk

- 13.15. This is the risk that investment returns are either negative or lower than inflation.
- 13.16. Following the assessment of the investment performance for the period ended 30 September 2022, the risk was rated as medium. This was as a result of average nominal returns being positive, but the real return was negative as inflation was above the returns.
- 13.17. The industry is advised to invest in assets that yield positive real returns so that member benefits increase in line with inflation.

Agency Risk

- 13.18. This is the risk that costs of services provided to the industry will be high such that they take a significant portion of the assets which will result in members being short-changed.
- 13.19. The risk was rated to be high as average expenses were above the prescribed threshold.
- 13.20. The Commission continues to encourage the industry to comply with the Expenses Framework.

Liquidity Risk

- 13.21. This is the risk of failure by the industry to make payments as they fall due because of lack of liquid assets that can be easily converted to cash.
- 13.22. The risk was rated to be low because of the high investments in liquid assets mainly listed equity, cash and money markets.

Systemic Risk

- 13.23. Risk of industry assets being concentrated in a few funds such that lack of performance of those funds will have a huge impact on the industry's reputation and stability.
- 13.24. This risk was determined to be medium as 48% of the industry assets are under Communication and Allied Industries, Mining Industry, National Railways of Zimbabwe Contributory Pension Fund (NRZ) and Old Mutual Insured Funds. This means that if anything happens to these 3 stand-alone funds and Old Mutual Life Assurance Company the impact on the industry will be severe.

Governance Risk

- 13.25. This is risk that the fund does not have proper governance structures to provide adequate oversight on the activities of the fund.
- 13.26. This was rated as medium-low following assessment of board compositions of pension funds.

Market Conduct

14. Unclaimed Benefits

- 14.1. Total unclaimed benefits as at 30 September 2022 amounted to ZW\$7 billion, compared to ZW\$4 billion reported as at 30 June 2022, representing an increase of 65%. Total membership with unclaimed benefits went up by 6% to 113,043 compared to about 106,000 as at 30 June 2022. The increase in unclaimed benefits was due to pension increases and bonuses which arose due to revaluation gains.
- 14.2. The unclaimed benefits amount was spread across the different administration models as shown below:

Figure 11: Distribution of unclaimed benefits across the three administration models.

- 14.3. Stand Alone funds had the highest value of unclaimed benefits, accounting for 50% of total industry unclaimed benefits with just over ZW\$3 billion attributable to the Clothing Industry Pension Fund and these unclaimed benefits are over 10 years.
- 14.4. Stand-alone funds also had the highest number of unclaimed member benefits accounting for 83% of the total number with unclaimed benefits translating to about 96,307 members. On the other hand, insured funds and self-administered funds accounted for 10% and 7%, respectively, of the total number with unclaimed benefits.
- 14.5. During the quarter under review there was no significant transfer of benefits to the Guardian Fund even though much of the unclaimed benefits have accrued for periods more than 5 years. Transfers to the Guardian Fund amounted to ZW\$329,627. Further, although the industry continues to explore various measures for tracing beneficiaries, the positive outcomes arising from these initiatives were minimal since in total, only ZW\$982,364 was paid to the members. The values paid to the members and transferred to the Guardian Fund are as shown in table 12 below: -

Table 11: Values paid to the members and transferred to the Guardian Fund

Name of Fund	Status	Amount
Construction Industry	Transferred to Guardian Fund	ZW\$329,627
ZB Life Assurance Company	Paid to Members	ZW\$982,364
Total		ZW\$1,311,991

- 14.6. Clothing Industry Pension Fund which was reported as having the highest unclaimed benefits as of 30 June 2022, continued to account for the highest level of unclaimed benefits, accounting for 48% as at 30 September 2022. However, there was no major change on the position of the Clothing Industry Pension Fund amounts and the number of unclaimed benefits since the last quarter.

Unclaimed Benefits Aged Analysis

14.7. In the quarter under review, 55% of the unclaimed benefits had accrued over a period of more than 10 years, raising concerns over the traceability of the members entitled to the amounts. After issuing the guideline on the Treatment of unclaimed benefits, the industry has been remitting unclaimed benefits to members and transferring those aged over five years to the Guardian Fund under the Master of the High Court. The graph depicted in figure 12 below, shows the aged analysis of the unclaimed benefits for the industry in the quarter being reviewed:

Figure 12: Unclaimed Benefits Age Analysis

Distribution by Type of Administration

- 14.8. The value of unclaimed benefits for members under stand-alone funds was about ZW\$4 billion owed to 91,165 members. As previously mentioned, the sector accounted for 51% of the total value of industry's unclaimed benefits in the review period.
- 14.9. The Commission is in continuous engagement with the funds to ensure that the members are traced and paid their benefits. Figure 13 below shows the unclaimed benefits amounts for stand-alone funds:

Figure 13: Unclaimed Benefits for Stand Alone Funds

- 14.10. For insured funds, the bulk of the unclaimed benefits was below five years and accounted for 78% of total unclaimed benefits in the industry. This points to the continued challenge of data integrity and the Commission will continue to engage the funds to ensure that the members are traced and paid their benefits. The figure below shows the aging of unclaimed benefits for insured funds: -

Figure 14: Unclaimed benefits aging Insured Funds

14.11. First Mutual accounted for the highest number of unclaimed benefits for this sector contributing ZW\$660 million accounting for 60% to the total insured funds unclaimed benefits amount. Figure 15 below shows the number of members with unclaimed benefits for Life Assurers.

Figure 15: Unclaimed Benefits Membership for Insured Funds

14.12. Although Zimnat Life Assurance had the greatest number of members with unclaimed benefits, the monetary values are not as high as expected. This could be attributed to non-compliance with the Guidance Paper on revaluation gains and pension increments to unclaimed benefits.

14.13. The value of unclaimed benefits for members under self-administered funds was slightly below ZW\$3 billion, which was owed to 11,243 members. The sector accounted for 35% of industry unclaimed benefits in the review period. Minerva Benefits Consulting contributed the highest proportion of unclaimed benefits for this sector with over ZW\$2 billion attributed to funds under its administration.

Figure 16: Unclaimed Benefits for Self-Administered Funds

15. Suspended Pensioners

15.1. As at 30 September 2022, benefits for suspended pensioners were about ZW\$988 million as compared to ZW\$666 million in June 2022 signifying a 48% increase in the suspended pensioners' liability. In terms of membership, there were 51,372 suspended pensioners. The figure below shows the distribution of suspended pensioners' amounts during the quarter under review:

Figure 17: Suspended Pensioners Distribution

15.2. Insured funds and stand-alone funds had the highest numbers of suspended pensioners. The graph below shows the distribution of suspended pensioners' membership by type of fund.

Figure 18: Suspended Members across all the administration models

15.3. Insured funds had the highest number of suspended members, closely followed by stand-alone funds. The Commission continues to monitor the industry's communication with members and beneficiaries whose benefits are suspended for want of life certificates.

Non-Resident Pensioners

15.4. During the third quarter of 2022, benefits for non-resident pensioners accumulated to ZW\$103 million. In terms of membership, there were 3,115 non-resident pensioners. The figure below shows the breakdown of amounts which were due to non-resident pensioners during the quarter under review:

Figure 19: Amounts due and paid to non-resident pensioners

15.5. Most non-resident pensioners reported were under stand-alone funds, which accounted for 55% of the submissions, followed by insured funds which accounted for 40% while self-administered funds accounted for only 5% of the non-resident pensioners. The figure below shows the distribution of membership for non-resident pensioners.

Figure 20: Distribution of membership for non-resident pensioners

- 15.6. Old Mutual Life Assurance Company and Mining Industry Pension Fund had the greatest number of non-resident pensioners with 1,144 and 1,057 non-resident pensioners, respectively. Old Mutual was the only administrator who indicated that they paid 471 non-resident pensioners during the quarter under review, these non-resident pensioners were paid locally.
- 15.7. Furthermore, the issue of unpaid non-resident members continues to be a challenge. An offsite inspection was done to determine the outstanding non-resident pension amounts and membership since 2019. The figure below shows the cumulative outstanding non-resident amounts as at 30 September 2022.

Figure 21: Outstanding Benefits due to Non-Resident Pensioners

- 15.8. As at 30 September 2022 the total cumulative amount due to non-resident pensioners was ZW\$264 million owed to about 3,115 non-resident pensioners, this amount was an increase from ZW\$161 million owed to 2,929 members as at 30 June 2022 that translates to a 64% increase in the amount owed to non-resident pensioners.
- 15.9. NRZ had 186 non-resident pensioners and the cumulative amount as at that date was ZW\$11 million, however the pensioners are paid half-yearly therefore the amount was not yet due.

16. Commutations

Distribution of Commutations into Classes

16.1. The total amount commuted during the period under review was about ZW\$2 billion compared to ZW\$211 million reported in the previous quarter translating to a nominal increase of 957%. The figure below shows the distribution of commutations per class in the industry during the quarter under review.

Figure 22: Distribution of Commutation by Class

16.2. An analysis of the total commutations approved in the quarter under review reveals that the 74% related to one third commutations, followed by full commutations accounting for 10%. A number of employers that downsized during the period under review as well as retirements were noted as the major sources of the payment of the 1/3 commutations.

Full Commutations

16.3. Insured funds accounted for 63% of the full commutations while stand-alone and self-administered had 19% and 18% respectively. There was a drop in the number of commutations under insured funds by 8% and the stand-alone and self-administered increased by 8% and less than 1% respectively. The figure below shows the distribution of full commutations by type of fund.

Figure 23: Distribution of full commutations among the administration models.

16.4. The top three reasons for commutations were retirement, retrenchment and lastly education which had a total of 1,812 members who were paid during the quarter under review. The figure below shows the various reasons for commutations.

Figure 24: Reasons for Commutations

16.5. A total of 89 members were paid their full commutations and these include those whose capital balances were below the minimum of ZW\$3,000 and those who requested for full commutation for the varied reasons stated above.

17. Pensions Complaints

17.1. The Commission received 249 valid complaints during the period under review, of which 122 were resolved. The table below shows the breakdown of the complaints received during the quarter under review: -

Table 12 : Complaints received during Q3 2022

Total Received	Resolved	2019 Compensation	Outstanding	Commission of Inquiry
249	122	98	17	112

17.2. The Commission noted the following as the general challenges facing the pensions industry during the quarter under review:

- Non-payment of pension benefits.
- Low values caused by hyperinflation and dollarisation in February 2009.
- Near stagnant monthly pensions that have been eroded by inflation.
- Late payment of benefits.

17.3. The figure below shows the distribution of complaints, with complaints related to low pension values occasioned by the currency conversion of 2009 accounting for 45% of the complaints received. Pensioners continued to follow up on the Commission of Inquiry recommendations after announcement of the approval of the Compensation Framework by Government.

Figure 25: Source of Complaints

- 17.4. Non-payment of benefits accounted for 11% of the complaints received during the quarter, whilst late payment of benefits, accounted for 2% and 2019 currency reforms account for 2% during the same period.
- 17.5. The members of the public also raised concerns about the criteria used to identify beneficiaries of the 2019 Compensation as well as timelines for the next payment for those left out from the first batch. This category constituted 39% of the complaints received in the quarter under review.

18. Annexures

Annexure 1: Consolidated Industry Statement of Comprehensive Income for the half year ended 30 September 2022

	Insured Funds	Self Administered Funds	Stand Alone Funds	Total
Income				
Year to date Contributions (Including arrears)	9,830,913,041	18,355,073,647	14,812,202,129	42,998,188,818
Interest on contribution arrears	7,321,548	2,561,725	2,063,762,661	2,073,645,934
Transfer from other funds	2,276,954,879	183,490,590	566,711	2,461,012,179
Transfer to other funds	(2,168,525,559)	1,465,351,523	-	(703,174,036)
Rental Income	61,041,475	1,331,830,231	4,694,781,712	6,087,653,419
Interest from Investments	139,720,488,407	13,967,306,863	1,887,773,605	155,575,568,875
Dividends from investments	95,992,308	2,178,006,416	647,119,726	2,921,118,450
GLA Premiums received	6,503,184	236,374,735	1,378,541	244,256,461
GLA Premiums (paid)	(561,561,915)	(424,701,415)	(14,692,078)	(1,000,955,408)
Profit/ (losses) on disposals investments	862,887,692	3,150,009,493	1,439,838,853	5,452,736,038
Fair value gains (Losses)	6,942,387,715	101,922,304,826	120,962,399,070	229,827,091,611
Other income : 1) Specify	1,058,190,368	5,375,284,001	2,026,956,498	8,460,430,867
Other income : 2) Specify	3,470,916	40,225,446,478	5,332,614,343	45,561,531,737
Other income : 3) Specify	-	4,886,775,830	(41,184,815)	4,845,591,015
Total Income	158,136,064,061	192,855,114,943	153,813,516,957	504,804,695,961
EXPENDITURE				
Benefits
