Section B | Economic Overview

2 Economic Overview

Introduction

This section presents highlights of the global and regional economic outturn during the year 2023.

2.1 Global and Regional Economic Outlook

According to the IMF, the global economy is estimated to have grown by 3% in 2023, which is lower than previously projected, due to the unprecedented tightening of global monetary conditions in response to high inflation. Considering this, global growth prospects are expected to deteriorate in the medium term.

Growth in advanced economies slowed down to 1.5% in 2023, down from 2.6% in 2022. Meanwhile, growth prospects for emerging markets and developing economies are estimated to have fallen slightly, from 4.1% in 2022 to 4% in both 2023 and 2024, reflecting a slowdown in Chinese growth. Sub-Saharan Africa's growth is expected to have fallen to 3.3% in 2023, from 4% in 2022.

2.2 Domestic Economic Outlook

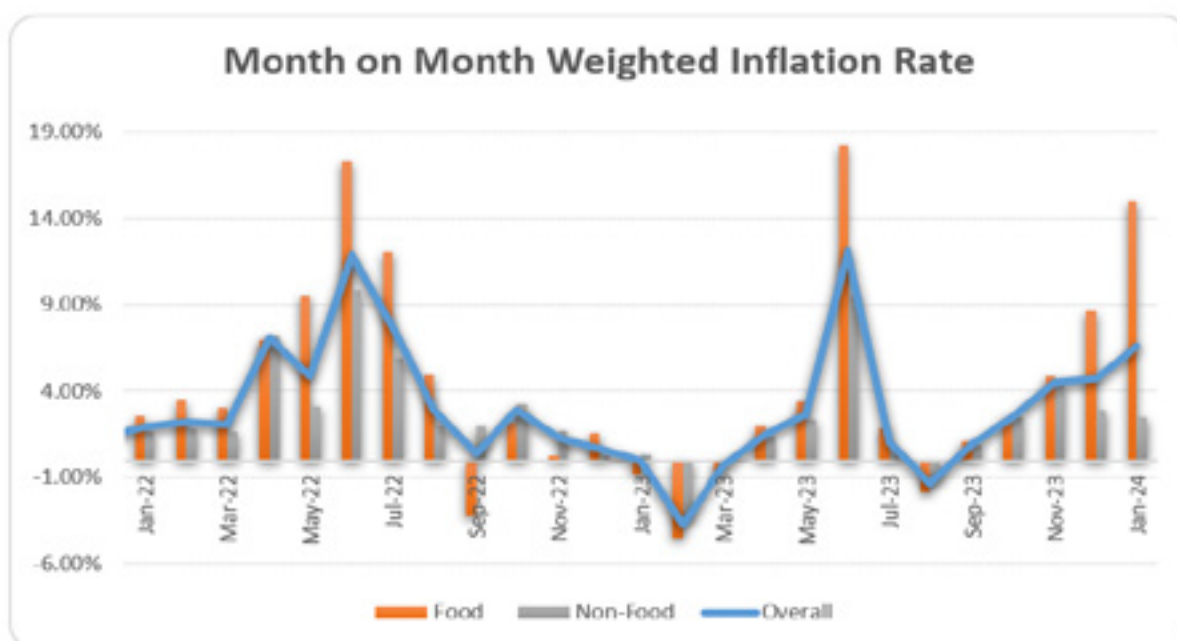

According to the Ministry of Finance and Economic Development, the domestic economy grew by 5.5% in 2023, a slight increase from the 5.3% projected in August, owing to higher-than-expected agricultural output, particularly tobacco, wheat, and cotton. Mining (+7.6%) and accommodation and food services (+6.9%) will drive the 3.5% growth in 2024, while agriculture is expected to contract (-4.9%).

2.3 Inflation Developments

Year-year-year inflation closed the year 2023 at 26%. The highest monthly inflation rate for the period was 12.1% recorded in June 2023, whereas the lowest inflation rate was -1.3% recorded in August 2023.

The Figure below shows the inflation trend from 2022 to January 2024.

Figure 1: Inflation Profile (%) Jan 2022 to Jan 2024

2.4 Stock Market Development

The ZSE recorded a total market turnover of ZW\$109 billion as at December 2023, a 295% increase from ZW\$27.8 billion in the previous year. The market capitalisation gained 723% from ZW\$2.04 trillion in December 2022, to close the year at ZW\$16.8 trillion. ZSE All-Share Index gained 982% from 19,494.85 points in 2022 to close at 210,833.92 points in 2023.

2.5 Victoria Falls Stock Exchange Market

The VFEX All-Share index fell 41% from 99.07 points in December 2022 to 70.48 points at the end of the year 2023. The VFEX market capitalisation gained 113% from the previous year to close at USD 1.2 billion.

Premium debtors constituted 5% of the total assets having decreased by 26% in nominal terms from ZW\$91.04 billion in September 2023 to ZW\$67.48 billion in December 2023. The operationalisation of No Premium No Cover has been effective in reducing industry premium debtors.

4.5 Prescribed Assets

4.5.1 Total prescribed assets by the short-term insurers amounted to ZW\$71.93 billion, translating to 5.23% average compliance level.

4.5.2 Nine (9) out of the 20 insurers were compliant with the minimum prescribed asset ratio of 10%.

4.5.3 The prescribed assets mainly composed of Treasury Bills, Corporate Bonds, and equities. The low uptake of prescribed assets is due to the investment vehicles' exposure to inflation and lack of value preservation.

- 4.7.5 The industry's average return on assets (ROA) and return on equity (ROE) were 23% and 51% respectively. For more performance indicators on profitability refer to Appendix 1C under earnings.
