EXECUTIVE SUMMARY

1. Executive Summary

- 1.1 The report provides an analysis of the performance of the short-term insurance sector, key economic indicators, investment markets, and highlights of the Commission's regulatory activities for the half year ended 30 June 2023.
- 1.2 The consolidated Gross Premium Written (GPW) by the short-term insurers increased by 880.23% in nominal terms from ZW\$29.84 billion in June 2022 to ZW\$292.50 billion during the comparative period in 2023. In real terms, the GPW increased by 255%. Foreign-currency denominated business increased by 33% from US\$66.68 million reported during the half year ended 30 June 2022 to US\$88.94 million during the comparative period in 2023.
- 1.3 The absolute ZW\$ gross premium written by short-term insurers for the half year ended 30 June 2023 amounted to ZW\$66.48 billion. This accounted for 23% of the total business written, while the remaining 77% of the total business was written in foreign currency.

- 1.4 The combined business written by short-term reinsurers increased by 1,346% from ZW\$15.20 billion to ZW\$219.77 billion during the period under review. In terms of foreign currency-denominated business, the reinsurers reported a 72% increase in GPW from US\$52.53 million to US\$90.26 million, with US\$80.06 written from the local market while US\$10.20 million was from the regional market.
- 1.5 The absolute ZW\$ gross premium written by short-term reinsurers for the half year ended 30 June 2023 amounted to ZW\$11.75 billion. This translated to 5% of the total business written in the half year, while the remaining 95% of the total business was written in foreign currency.
- 1.6 Total assets reported by short-term insurers increased by 1,427% in nominal terms from ZW\$58.25 billion to ZW\$889.22 billion. Investments in prescribed assets by short-term insurers increased by 2,711% from ZW\$1.94 billion to ZW\$54.53 billion. Eight (8) out of the twenty (20) short-term insurers were compliant with the minimum prescribed asset ratio of 10%. All the short-term insurers reported capital positions above the minimum capital requirement (MCR) of ZW\$37.5 million.
- 1.7 Short-term reinsurers had an asset base of ZW\$672.46 billion as at 30 June 2023, reflecting a 1,803% increase from the ZW\$35.34 billion reported as at 30 June 2022. Investments in prescribed assets by short-term reinsurers increased by 1,311% in nominal terms from ZW\$5.95 billion as at 30 June 2022 to ZW\$83.93 billion. Three (3) out of the ten (10) short-term reinsurers were compliant with the minimum prescribed asset ratio of 10%. As at 30 June 2023, all the short-term reinsurers were compliant with the minimum capital requirement of ZW\$75 million.
- 1.8 The total Gross Premium Written by the three (3) operational micro-insurers increased by 669% in nominal terms from ZW\$619.21 million reported during the half year ended 30 June 2022 to ZW\$4.76 billion reported for the period under review.
- 1.9 Insurance brokers' gross premiums increased by 1,053% from ZW\$14.26 billion reported during the half year ending 30 June 2022 to ZW\$164.32 billion during the comparative period in 2023. Reinsurance brokers' gross premiums decreased by 8% from ZW\$118.34 billion reported during the half year of 2022 to ZW\$109.07 billion during the comparative period of 2023.

SECTION B:

ECONOMIC OVERVIEW

2. Economic Overview

2.1 Global and Regional Economic Outlook

- 2.1.1 The global economy is projected to grow by 2.8% in 2023, a slower growth rate than the 2.9% initially projected, due to the continued geopolitical tensions in Europe and elevated debt levels, and the impact of tight monetary policies.
- 2.1.2 However, the Sub-Saharan Region is projected to grow at a faster rate of 3.6% in 2023, with Ethiopia expected to grow at 6.1%, respectively, due to the ongoing impact of global shocks and increases in global financial lending rates.

2.2 Domestic Economic Outlook

- 2.2.1 The Zimbabwean economy is projected to grow by 5.3% in 2023 mainly anchored by strong growth in tourism and food services (20%), agriculture (9.7%) mining (4.8%).
- 2.2.2 Regarding the financial service sector, Government instituted bold policy intervention measures to address transitory price and exchange rate volatility, hence the financial sector has since begun to experience stability, and the sector is expected to grow at 6.5% in 2023.

2.3 Inflation Developments

- 2.3.1 Weighted annual inflation was generally slowing throughout the year until May 2023, when prices increased significantly in June to 175.8%. However, prices have begun to fall, with month-on-month inflation for July standing at -15.3%, while year-on-year growth has slowed to 101.3%.
- 2.3.2 Inflation is expected to slow further in response to a slew of measures implemented by the government in May and June 2023 to instil confidence, boost demand for the local currency, and promote market discipline. However, whilst the biggest post-election risk is the Monetary Policy Stance, the Commission is optimistic that the current relative economic stability will be maintained.

2.4 Stock Market Development

- 2.4.1 The Zimbabwe Stock Exchange (ZSE) was characterized by high speculative tendencies during the first half of 2023, as investors sought safe haven in some selected stocks with strong balance sheets, in line with limited investment options on the money market. As a result, all the major indices gained, with the ZSE All Share, and Top 10, gaining 779.30% and 655.69%, respectively, to close the half year at 171 408.90 points and 93 034.57 points, up from 19 493.85 points, 12 311.13 points. Accordingly, Market Capitalisation increased by 582% at the beginning of the year to close the first half at an all-time high point of 13. 948 trillion.

Figure 2: Stock Market Development

2.5 Victoria Falls Stock Exchange Market

2.5.1 During the period under review, the Victoria Falls Stock Exchange (VFEX) was characterized by bearish sentiments. As a result, the VFEX All Share index fell 30.56% to close at 76.17 points, down from 109.69 points in December 2022. The VFEX All Share index fell 33.99% year on year, from 115.39 points in June of last year.

SECTION C:

ABOUT THE COMMISSION

3. About the Commission

The Insurance and Pensions Commission (IPEC) is a statutory body mandated with regulating, supervising, and developing the insurance and pensions industry for the protection of policyholders and pension scheme members in Zimbabwe. This report outlines the short-term insurance sector developments and IPEC's various activities consistent with its statutory mandate for the half year ended 30 June 2023.

3.1 Term of Reference

The activities of the Commission are guided by the following Acts:

- 3.1.1 Insurance and Pensions Commission Act [Chapter 24:21];
- 3.1.2 Pensions and Provident Funds Act [Chapter 24:32];
- 3.1.3 Insurance Act [Chapter 24:07];
- 3.1.4 Money Laundering and Proceeds of Crime Act [Chapter 09:24];
- 3.1.5 Finance Act [Chapter 23:04];
- 3.1.6 Public Entities and Corporate Governance Act [Chapter 10:31];

3.1.7 Public Finance Management Act [Chapter 22:19]; and

3.1.8 Public Procurement and Disposal of Public Assets Act [Chapter 22:23]

3.2 The Architecture of the Short-Term Insurance Industry

3.2.1 There were one thousand, two hundred and twenty-six (1,226) registered entities/persons in the short-term insurance industry as at 30 June 2023 which is a 25% increase from the 977 entities reported during the same period in 2022. The increase is attributable to the number of sole agents which increased by 31% from 680 in June 2022 to 893 in June 2023. The architecture of the industry is shown in Table 1 below:

Table 1: Architecture of the Short-Term Insurance Industry

DIRECT INSURANCE COMPANIES

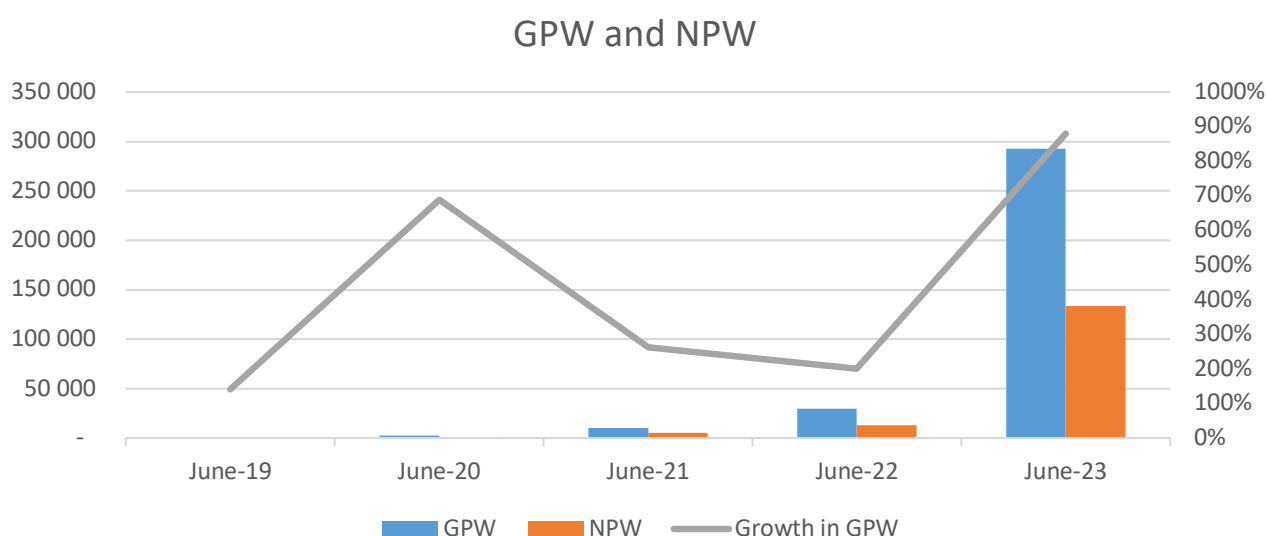

4. Insurance Companies

4.1 Performance in terms of Business Written

4.1.1 Consolidated ZW\$ GPW by short-term insurers increased by 880.23% in nominal terms from ZW\$29.84 billion reported for the half year ended 30 June 2022 to ZW\$292.50 billion during the comparative period in 2023.

4.1.2 Figure 3 below shows the trend in the volume of business generated by short-term insurers from June 2019 to June 2023.

Figure 3: Short-Term Insurers Growth Trend in Business Written (June 2019 – 2023)

4.1.3 The significant increase in business written between June 2022 and June 2023 is attributed to premium reviews as insurers sought to align with inflation and exchange rate developments.

*Other comprises of Fidelity guarantee, credit, business all risk, health, travel, casualty, directors' liability, and money all risks.

4.1.4 As per Table 3 above, the real increase in GPW during the half year was 255%. All lines of business experienced positive real growth.

4.1.5 Figure 4 below shows the breakdown of GPW by line of business.

Figure 4: Breakdown of GPW by line of business for Short-Term Insurers

% Contribution to GPW by Line of business for the half year ended 30 June 2022 and 30 June 2023

*Other comprises of Fidelity guarantee, credit, business all risk, health, travel, casualty, directors' liability, and money all risks.

4.1.6 Motor and fire insurance maintained their dominance as the major sources of business, contributing a combined 68% of the combined GPW during the reporting period, an increase from 63% recorded during the comparative period in 2022.

4.1.7 Given the continued dominance of the motor insurance business as a mandatory class of insurance business, it is critical that all stakeholders coordinate their efforts to address legacy issues that undermine public confidence in the insurance industry. Increasing understanding of the value of insurance as a tool for risk management rather than as a burden on business operations is one aspect of this.

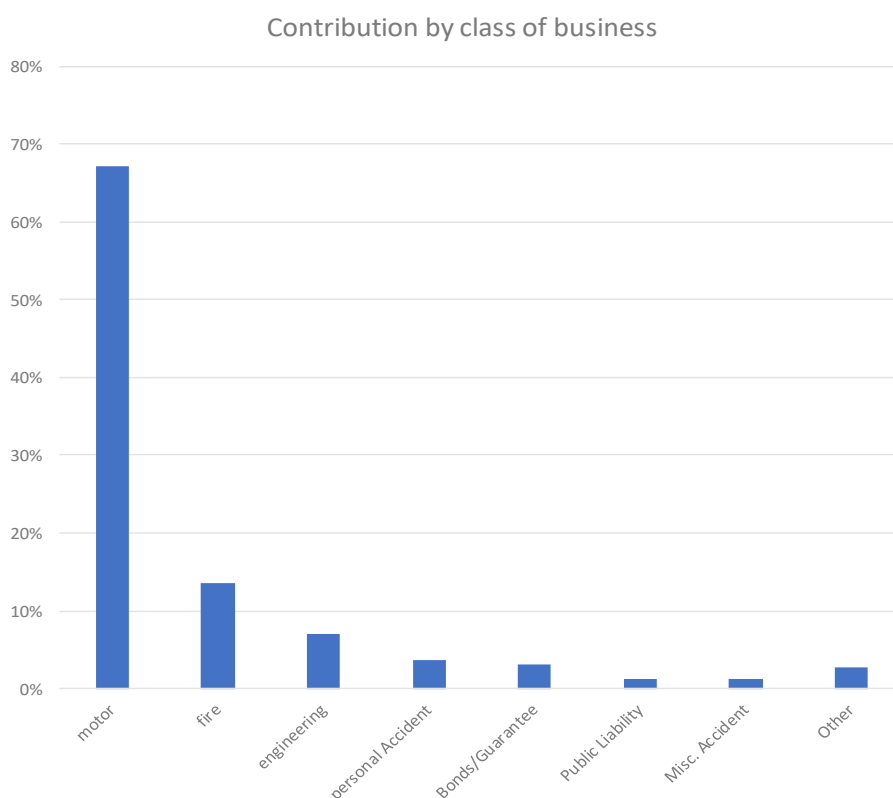

4.2 Absolute ZW\$ Business

4.2.1 The absolute ZW\$ gross premium written by short-term insurers for the half year ended 30 June 2023 amounted to ZW\$66.48 billion. This accounted for 23% of the total business written, down from 35% recorded during Q1 of 2023. The remaining 77% was written in foreign currency.

4.2.2 While 77% of the combined business written by the short-term insurance industry was foreign currency denominated when most of the business comes from motor insurance which is mostly third-party (ZW\$ business), it should be noted that motor insurance contributed 39% of forex business vis-à-vis 68% in absolute ZW\$ business. The high contribution of forex as compared to absolute ZW\$ business is on account of exchange rate distortions.

4.2.3 Figure 5 below shows the breakdown of absolute ZW\$ business by line of business.

4.3 Foreign-Currency-Denominated Business

4.3.1 Gross Premium Written in foreign currency for the half year ended 30 June 2023 increased by 33% from US\$66.68 million reported in the comparative period in 2022 to US\$88.94 million, contributing 77% of the total business written by short-term underwriters.

4.3.3 As shown in Table 5 above, and in line with trends in the Zimbabwean dollar-denominated business, the major sources of foreign-currency denominated business for short-term insurers were motor and fire, contributing a combined 62% of the total business written for the period ending June 2023.

4.4 Capitalisation

4.4.1 All the twenty (20) short-term insurers reported capital positions above the minimum capital requirement of ZW\$37.5 million as at 30 June 2023. The reported capital positions were, however, computed without accounting for non-admissible assets as stipulated in Statutory Instrument 95 of 2017. The reported capital positions are as below.

Key

Above minimum capital requirement of ZW\$37.5 million

Below minimum capital requirement of ZW\$37.5 million

4.4.2 All players are reminded to adequately prepare for the implementation of the risk-based capital regime under the auspices of the Zimbabwe Integrating Risk and Capital Programme.

4.4.3 One (1) out of the twenty (20) short-term insurers was not compliant with the minimum solvency margin of 25% as stipulated in Section 24(1a) (ii) of the Insurance Act [Chapter 24:07] as shown in Appendix 1C.

4.5 Asset Quality

4.5.1 Total assets for short-term insurers increased by 1,427% from ZW\$58.25 billion reported as at 30 June 2022 to ZW\$889.22 billion reported as at 30 June 2023. Investment property constituted the largest portion of total assets at 24%.

4.5.2 Premium debtors increased by 1,097% to ZW\$180.40 billion from ZW\$15.07 billion. Industry players are encouraged to operationalise the No Premium No Cover regulations gazetted through Statutory Instrument (SI) 83 of 2023.

4.5.3 The Commission expects all players to be working on the clearance of all legacy premium debtors to ensure clearance of the same by 31 December 2023.

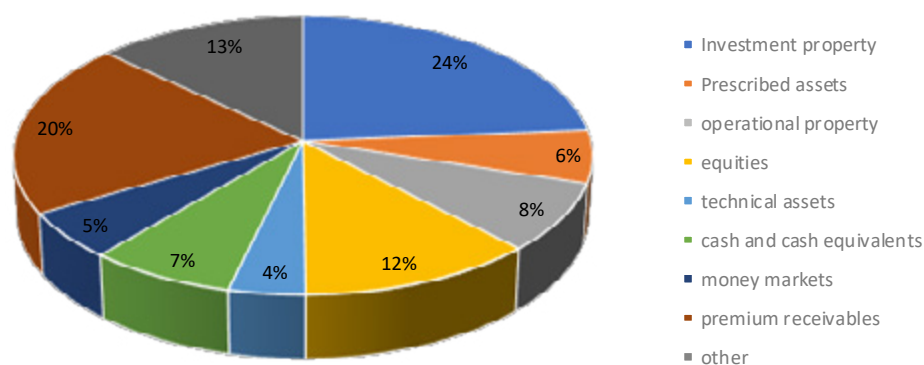

4.5.4 Investments in prescribed assets increased by 2,711% from ZW\$1.94 billion as at 30 June 2022 to ZW\$54.53 billion as at 30 June 2023. Despite the increase in prescribed asset investments, only eight (8) of the twenty (20) short-term insurers were compliant with the minimum prescribed asset ratio of 10%.

4.5.5 Compliance with prescribed asset requirements remains very low. However, the Commission has started engaging entities with prescribed asset ratios below the minimum threshold to submit compliance road maps.

4.5.6 The breakdown of total assets by asset class as at 30 June 2023 is shown in Figure 6 below:

Figure 6: The Breakdown of Total Assets by Class

Contribution by asset class to total assets

*Other include intangible assets, long term fixed deposits, other receivables

4.5.7 Investment property and premium debtors were the two major asset classes accounting for 44% of total assets. Investment property alone constituted 24% against a limit of 10%, while premium debtors and other assets contributed 20% and 13% respectively against limits of 5% as stipulated in the IPEC Investment Guidelines issued in terms of Circular 2 of 2013.

4.5.8 Short-term insurance players are encouraged to structure their investment portfolios in ways that enable not only the preservation of policyholder value, but also promote a balanced investment mix in line with the Commission's investment limits and asset/liability profiles.

4.6 Reinsurance

4.6.1 The industry's average retention ratio slightly increased from 43% to 46%, indicative of an increase in the average risk appetite by the direct short-term insurers.

4.6.2 Retention ratios for individual insurers during the period under review ranged from 9.81% to 99.77%. The dearth of innovation has seen mandatory motor insurance dominating the short-term insurance business. This has resulted in insurers writing predominantly motor insurance retaining 100% of their book given the statutory limits in Third Party motor insurance liabilities.

4.7 Technical Position

4.7.1 Technical liabilities for the short-term insurers increased by 686% from ZW\$15.07 billion to ZW\$118.43 billion. The average liquid assets to technical reserves for the period under review increased from 82% in June 2022 to 167.18% during the comparative period in 2023. The increase in the average ratio demonstrates a more cautious approach in setting aside liquid assets for unexpected claims.

4.7.2 The technical assets for the short-term insurance sector increased by 337% from ZW\$7.90 billion as at 30 June 2022 to ZW\$34.54 billion as at 30 June 2023. Technical assets were ZW\$83.89 billion lower than the technical liabilities. The low technical assets to technical liabilities is attributed to Third Party Motor Insurance being the major source of business for short-term insurers. Ordinarily, insurers do not make any reinsurance arrangements for third-party motor insurance because of the low statutory limits on claims. The highest proportion of technical liabilities was accounted for by the gross outstanding claims. The industry is encouraged to improve claims settlement patterns to reduce outstanding liabilities.

4.8 Earnings

4.8.1 Short-term insurers reported total profit after tax of ZW\$254.57 billion for the half year ended 30 June 2023, indicating a nominal increase of 2,670% from the ZW\$9.19 billion reported during the comparative period in 2022.

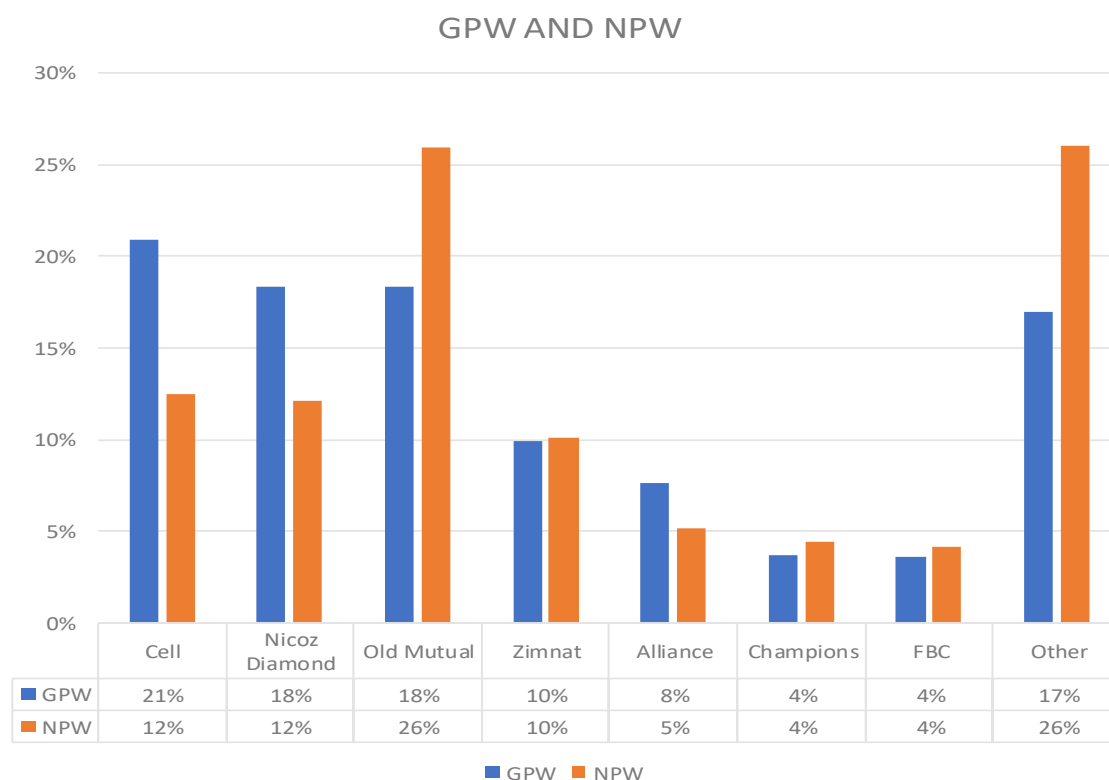

- 4.8.2 The combined ratio for short-term insurers decreased to 101% as at 30 June 2023 from 106% reported during the period ended 30 June 2022.
- 4.8.3 The short-term insurers made an underwriting loss of ZW\$24.46 billion compared to an underwriting loss of ZW\$2.20 billion during the comparative period in 2022. This means that the insurers are paying out more in claims, operating expenses, and other costs than they are receiving in premium revenue.
- 4.8.4 It is important to note that despite the undesirable underwriting position and high combined ratio, the short-term underwriters posted a profit during the period under review. The contradicting financial positions may be attributed to exchange rate distortions.
- 4.8.5 Nine (9) out of twenty (20) short-term insurers reported underwriting losses during the reporting period in 2023.
- 4.8.6 The average net commission ratio was -7.61% during the period under review compared to 4% during the comparative period in 2022. The decrease bears testimony to the Commission's corrective measures for the industry to pay commission rates as outlined in Circular 2 of 2009. The highest net commission paid by a short-term insurer during the period under review was 149% of earned premiums compared to 24% during the same period in 2022. (For more performance indicators, please refer to Appendix 1C).
- 4.8.7 The industry's average return on assets (ROA) and return on equity (ROE) were 57% and 116% respectively for the period under review, compared to 31% and 85% respectively. The increase in ROA shows that the industry is fairly utilising its investment assets to increase profitability. (For more profitability indicators on refer to Appendix 1C under earnings).

4.9 **Liquidity**

- 4.9.1 Liquid assets in the form of cash and money market instruments increased by 1,909% from ZW\$5.72 billion as at 30 June 2022 to ZW\$114.94 billion as at 30 June 2023. Four (4) out of the twenty (20) short-term insurers reported negative working capital ratios while the industry's acid test ratio averaged 39%.
- 4.9.2 The low ratio is a cause for concern as short-term insurers face a high liquidity risk arising from low capacity to meet short-term financial obligations. The acid test ratio for insurers as at 30 June 2023 ranged from 4% to 356% as shown in Appendix 1C.

4.10 **Market share**

- 4.10.1 The market leaders in terms of the consolidated GPW position were Cell Insurance Company, Nicoz Diamond and Old Mutual Insurance Company with a combined market share of 57%. The market leaders in terms of NPW were Old Mutual, Nicoz Diamond and Cell Insurance with a combined market share of 50%. REINSURANCE COMPANIES

5. Reinsurance Companies

5.1 Performance in Terms of Business Written.

5.1.1 The consolidated business written by short-term reinsurers increased by 1,346% from ZW\$15.20 billion for the half year ended 30 June 2022 to ZW\$219.77 billion for the comparative period in 2023 in nominal terms. Figure 10 below shows the trend in the volume of business written by short-term reinsurers from June 2017 to June 2023.

Figure 10: Short-Term Reinsurers' Growth Trend in Business Written: June 2019 – June 2023.

5.1.2 This growth is mainly attributable to insurance premiums tracking inflation developments.

Table 7 below shows the percentage growth in GPW for different business lines.

Table 7: Short-Term Reinsurers' GPW by Line of Business

Total	79,698	219,770	15,197	1346%	424%

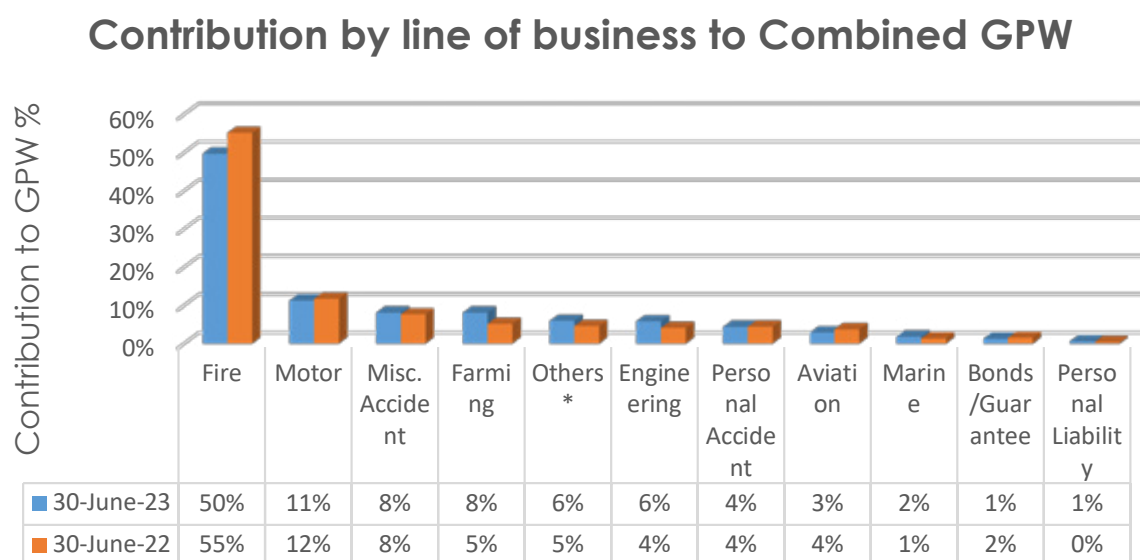

*Others comprise hire purchase, terrorism, PVT, health, directors' liability, casualty, and hail.

5.1.3 As shown in Table 7, the real increase in GPW between June 2022 and June 2023 was 424%.

In terms of real growth, all classes of business had positive growth rates.

5.1.4 Figure 11 below shows the contribution to GPW by line of business for short-term reinsurers.

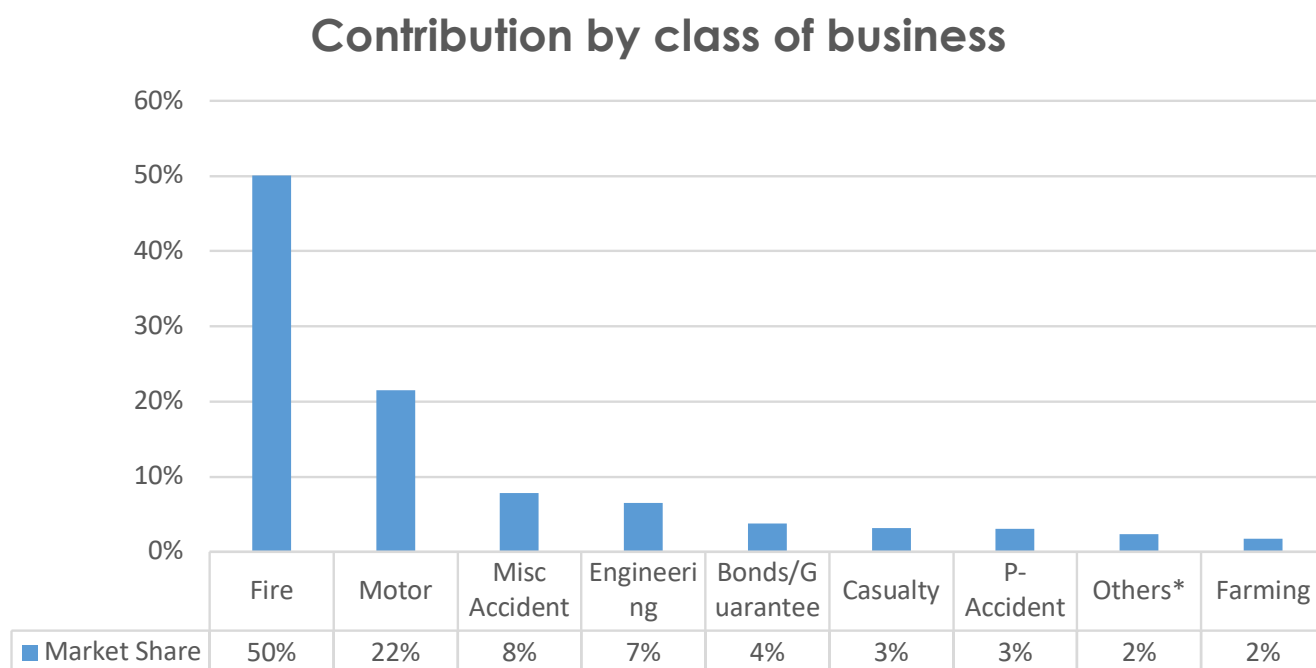

Figure 11: Short-Term Reinsurers Contribution to Total GPW by Line of Business

Others* comprise hire purchase, terrorism, PVT, health, directors' liability, and hail.

- 5.1.5 Fire, motor, miscellaneous accident, and farming lines were the major sources of business for both periods ending June 2023 and June 2022 respectively. The four (4) lines of business contributed a combined 77% of the total GPW for the half year ended June 2023, from 80% during the same period in 2022. While fire insurance was the major source of business for reinsurers, motor insurance was the major source of business for direct underwriters, indicating that direct underwriters retained the major portion of motor insurance, hence confirming third-party motor insurance as remained the major source of business in the local market.
- 5.1.6 The gross premium written in absolute ZW\$ by short-term reinsurers amounted to ZW\$11.75 billion. This translated to 5% of the consolidated business written in the half year while the remaining 95% was written in foreign currency.
- 5.1.7 The composition of foreign currency denominated business and absolute ZW\$ business for short-term reinsurers suggests that direct short-term underwriters ceded more foreign currency denominated business than absolute ZW\$ business.
- 5.1.8 Figure 12 below shows the breakdown of absolute ZW\$ business by line of business for the half year of 2023.

Others* include PVT, hail, marine, aviation, P/liability, Directors' liability and hire purchase.

5.2 Foreign-Currency Denominated Business

5.2.1 The total foreign-currency denominated business written by short-term reinsurers increased by 72% from US\$52.53 million reported during the half year ending June 2022 to US\$90.26 million during the comparative period in 2023 with US\$80.06 written locally and US\$10.20 written abroad.

5.2.2 Table 8 shows the GPW by line of business for the June 2022 and 2023.

Others* include terrorism, PVT, GIT, casualty, directors' liability, and hail.

5.2.3 As shown in Table 8 above, health, hire purchase and personal liability business had negative growth. Consistent with the June 2022 trend in foreign-currency denominated business, the major classes of business written by short-term reinsurers were fire, personal accident, farming, motor, and miscellaneous accident business, contributing a combined 84% of the gross premium written during the half year ended 30 June 2023.

5.2.4 Table 9 below shows the percentage contribution of each line of business to the total US\$ GPW.

Below minimum capital requirement of ZW\$75 million

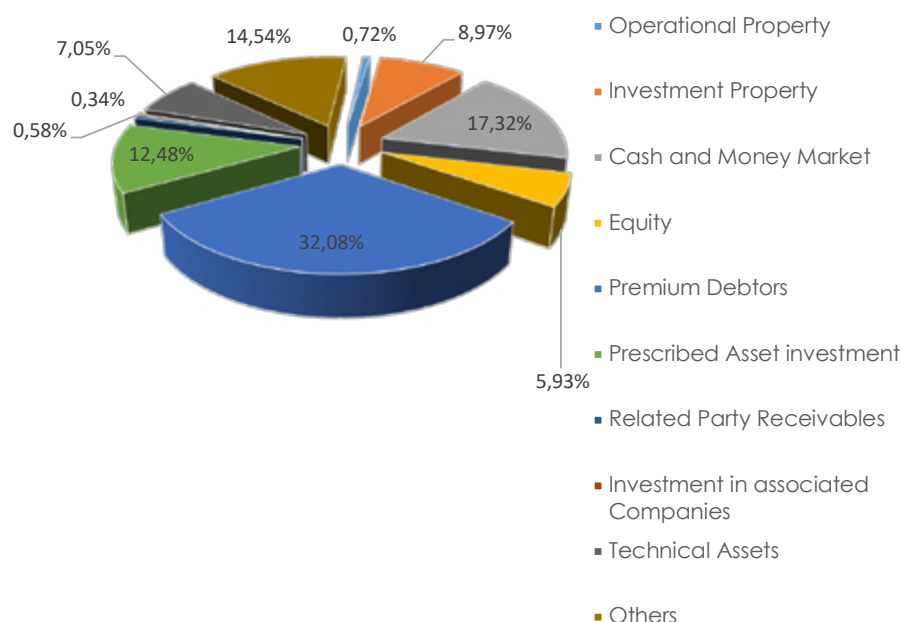

- 5.3.3 Reinsurers are urged to adequately prepare for the implementation of the risk-based capital regime, the Zimbabwe Integrating Capital & Risk Programme (ZICARP). Meanwhile, the Commission is working on the draft regulations for USD-indexed Minimum Capital Requirements.
- 5.3.4 All the reinsurers were compliant with the minimum solvency margin of 25% as stipulated in Section 24(1a) (ii) of the Insurance Act [Chapter 24:07]. The solvency margin for individual reinsurers as at 30 June 2023 ranged from 74% to 1,731% as shown in Appendix 2C.

5.4 Asset Quality

- 5.4.1 The asset base for short-term reinsurers increased by 1,803% from ZW\$35.34 billion reported as at 30 June 2022 to ZW\$672.46 billion as at 30 June 2023. Investments in prescribed assets increased from ZW\$5.95 billion to ZW\$83.93 billion. However, only three (3) out of the ten (10) reinsurers were compliant with the minimum prescribed asset threshold of 10%.
- 5.4.2 Premium receivables increased from ZW\$8.71 billion as at 30 June 2022 to ZW\$215.72 billion as at 30 June 2023, indicating an increase of 2,375%.
- 5.4.3 Industry players are encouraged to operationalise the No Premium No Cover regulations gazetted through Statutory Instrument (SI) 83 of 2023.
- 5.4.4 The Commission expects all players to be working on the clearance of all legacy premium debtors to ensure clearance of the same by 31 December 2023.
- 5.4.5 The contribution of various asset classes to total assets as at 30 June 2023 is shown in Figure 13 below:

Figure 13: Short-Term Reinsurers' Total Assets: Contribution by Asset Class

Contribution of various asset classes to total assets

*Other includes fixed deposits, intangible assets, unit trusts, mortgages and loans, and other receivables

5.4.7 Premium receivables and cash & money market instruments were the major asset classes, contributing 32% and 17% of total assets respectively. Additionally, the Commission expects no new premium debtors to accrue and all insurers to have collected the premium debtors on or before May 26, 2024 following the promulgation of Statutory Instrument 81 of 2023 on no premium, no cover restrictions to every insurer or broker.

5.5 Technical Position

5.5.1 Total technical liabilities increased from ZW\$11.48 billion as at 30 June 2022 to ZW\$116.21 billion as at 30 June 2023, indicating an increase of 912%. Gross Outstanding Claims, which amounted to ZW\$48.17 billion accounted for 41% of the total technical liabilities.

5.5.2 The technical assets increased from ZW\$2.71 billion as at 30 June 2022 to ZW\$47.38 billion as at 30 June 2023, an increase of 1,650%. Consistent with short-term direct underwriters,

technical assets for reinsurers were lower than the technical liabilities. The highest proportion of the reinsurers' technical assets comprised of the retrocessionaires' share of outstanding claims.

- 5.5.3 The industry is encouraged to improve on the claims settlement pattern to reduce outstanding claims liabilities.

5.6 Retrocession

- 5.6.1 Reinsurers' average retention ratio was 59% for the half year ended 30 June 2023, compared to 64% during the comparative period in 2022. This reflects a slight decrease in risk appetite by the short-term reinsurance companies.
- 5.6.2 Reinsurers reported retention ratios ranging from 28% to 93% for the period under review. (See Appendix 2C for more ratios).

5.7 Earnings

- 5.7.1 For the period under review, short-term reinsurers' nominal total profit after tax increased by 3,988%, from ZW\$4.47 billion to ZW\$182.57 billion. The average net commission ratio was 28% for the period under review. The highest net commission ratio paid by a short-term reinsurer during the period under review was 56% of earned premiums, in violation of the limits prescribed by Circular 2 of 2009.
- 5.7.2 The average combined ratio for the short-term reinsurers improved from 136% for the half year ended 30 June 2022 to 106% for the period under review. The decrease indicates an increase in underwriting profit. The combined ratio and other ratios that relate to profitability for short-term reinsurers are shown in Appendix 2C under earnings.
- 5.7.3 The industry's average return on assets (ROA) and return on equity (ROE) were 27% and 48% for the period under review, compared to 25% and 55% respectively for the half-year ended 30 June 2022. The decrease in ROE shows that the short-term reinsurance sector is not efficiently investing its capital to increase profitability. (For more performance indicators on profitability refer to Appendix 2C under earnings).

5.8 Liquidity

- 5.8.1 Liquid assets in the form of cash and money market instruments held by short-term reinsurers increased by 2,035% from ZW\$5.45 billion as at 30 June 2022 to ZW\$116.47 billion as at 30 June 2023. One (1) out of the ten (10) short-term reinsurers had a negative working capital ratio

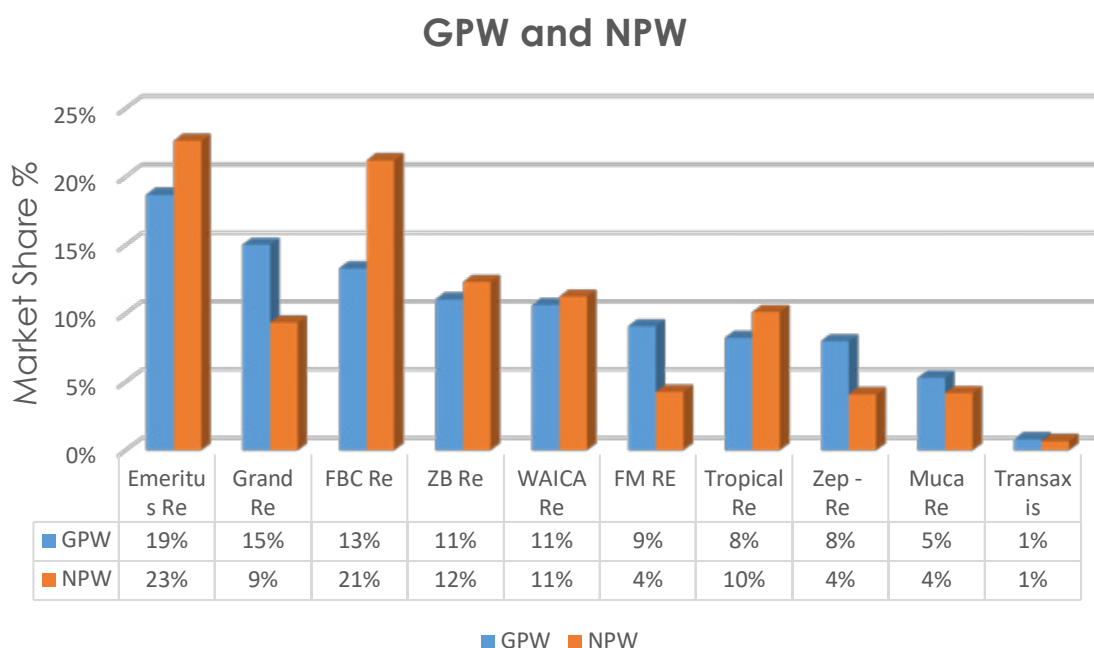

and is encouraged to invest in liquid assets to ensure the timely settlement of claims.

5.8.2 The average acid test ratio for short-term reinsurers increased from 34% as at 30 June 2022 to 81% as at 30 June 2023. The increase indicates a decrease in liquidity risk for short-term reinsurers. The acid test ratios for short-term reinsurers are shown in Appendix 2 C under liquidity.

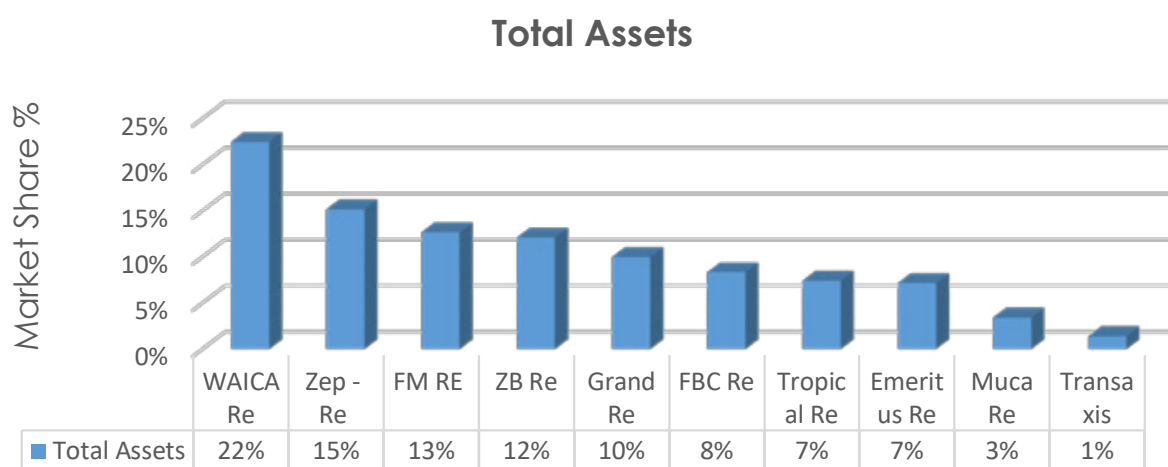

5.9 Market Share for Reinsurers

5.9.1 As shown in Figure 14 below, the market leaders in terms of GPW were Emeritus Re, Grand Re, FBC Re, ZB Re, and Waica Re. These reinsurers controlled 69% of the market share during the half year ended 30 June 2023. The market leaders in terms of the Net Premium Written (NPW) were Emeritus Re, FBC Re, ZB Re, and WAICA Re, collectively controlling 67% of the market.

Figure 14: Market Share for Short-Term Reinsurers in Terms of GPW and NPW

5.9.3 In terms of total assets, WAICA Re, Zep Re, FM Re, ZB Re and Grand Re were the market leaders with a combined market share of 72% as depicted in Figure 15.

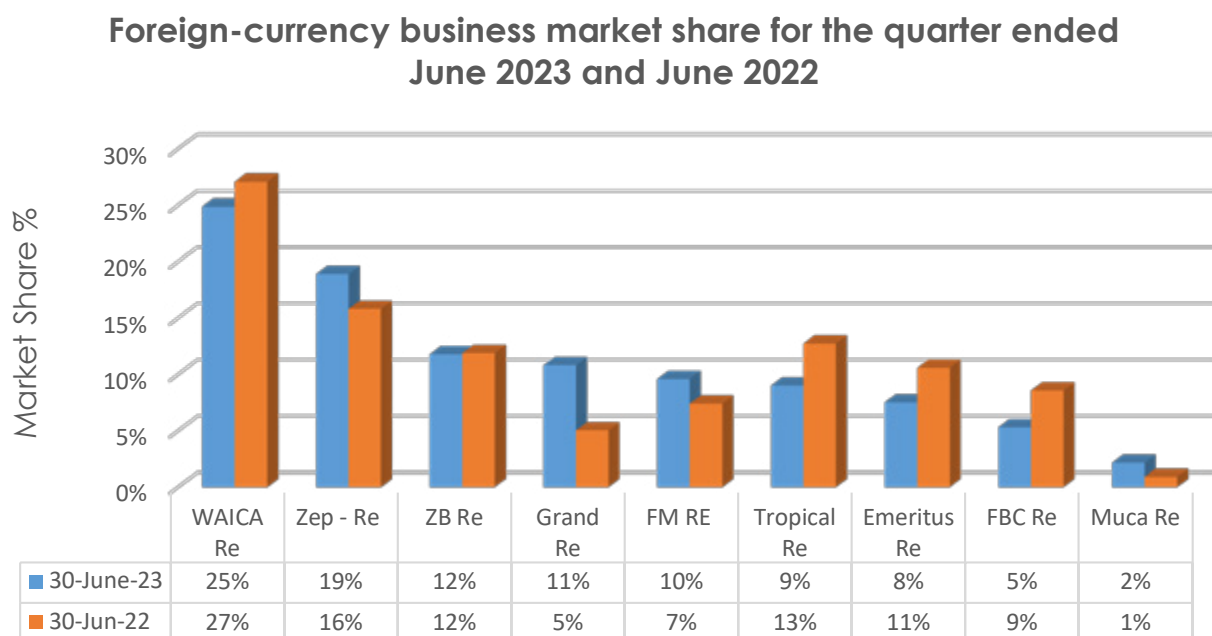

Figure 15: Market Share for Short-Term Reinsurers in Terms of Assets**Foreign-Currency Denominated Business**

5.9.4 In terms of foreign-currency denominated GPW, Waica Re, Zep Re, ZB Re, Grand Re and FM Re, were the market leaders, controlling 76% of the market as shown in Table 11 below.

Total	12,202.92	660.37

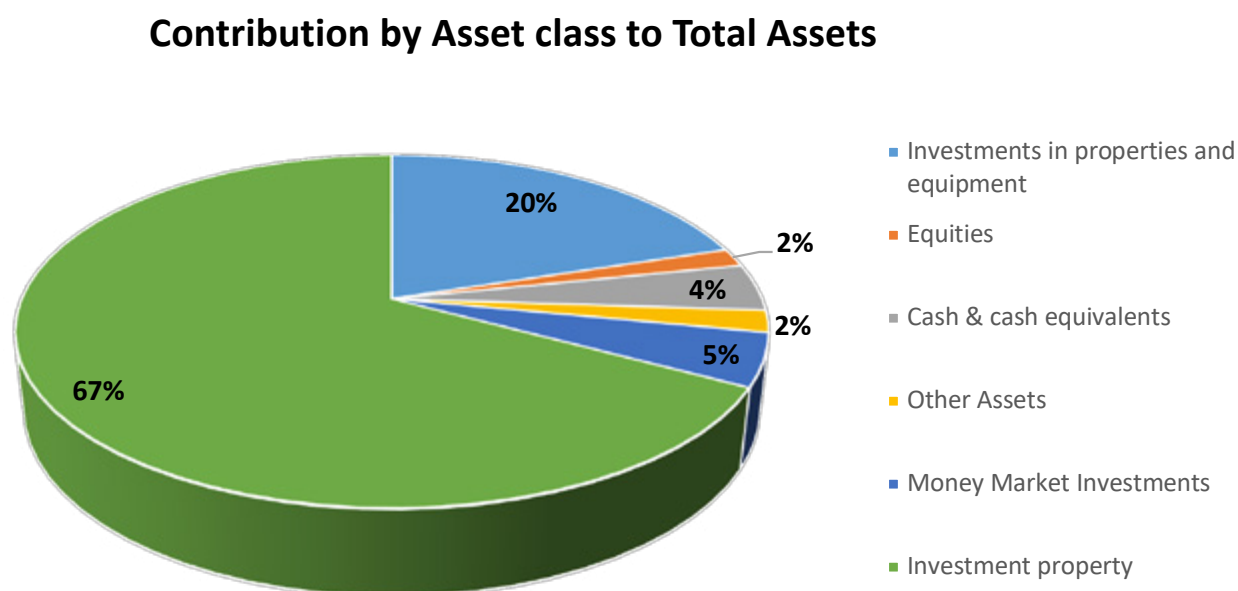

6.3.2 Micro-insurers are also urged to adequately prepare for the implementation of the risk-based capital regime, the Zimbabwe Integrating Capital & Risk Programme (ZICARP). Further, the Commission is working on the draft regulations for USD-indexed Minimum Capital Requirements.

6.4 Asset Quality

6.4.1 The micro-insurers reported a total asset base of ZW\$28.77 billion as at 30 June 2023, which is a nominal increase of 2,539% from ZW\$1.09 billion reported as at June 2022.

6.4.2 The contribution of various asset classes to total assets as at 30 June 2023 is shown in the Figure 17:

Figure 17: Breakdown of Total Assets by Class

Other assets include premiums receivables and other assets

6.4.3 Investment property and investments in properties and equipment were the major assets class, constituting 67% and 20% respectively. Money market investments had a percentage share of 5%. Cash and cash equivalents constituted 4% of the total assets. The minimum contributor was equities and other assets, each holding 2%.

6.4.4 Premium receivables significantly increased from ZW\$1.12 million as of 30 June 2022 to ZW\$11.81 million as at 30 June 2023 indicating a nominal increase of 954.5%.

6.5 Earnings

6.5.1 The three (3) micro-insurers recorded total profit after tax of ZW\$13.06 billion for the half year ended 30 June 2023, compared to ZW\$98.90 million reported during the same period in 2022.

6.6 Liquidity

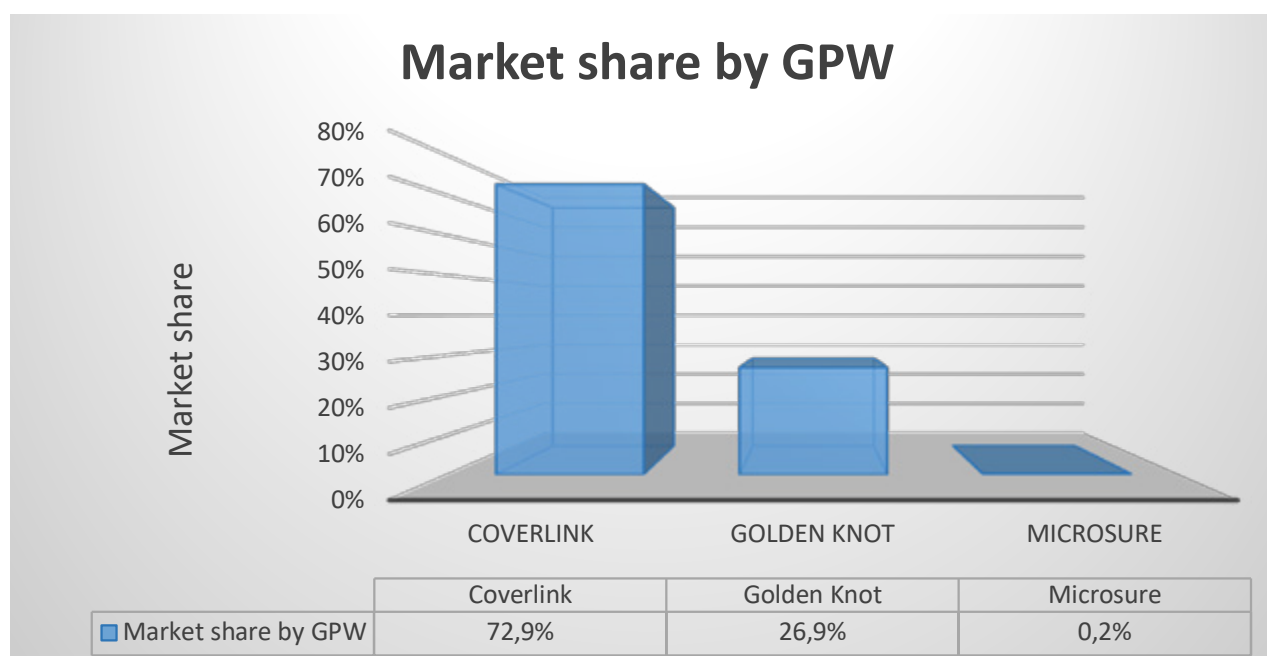

6.6.1 The three (3) micro-insurers reported cash and near-cash assets amounting to ZW\$1.24 billion at the end of 30 June 2023 which was a nominal increase of 823% from the ZW\$134.19 million reported as at the comparable date in 2022. The current ratio as at 30 June 2023 was 180%.

6.7 Market Share for Micro-insurers

6.7.1 As shown in Figure 18, Coverlink Microinsurance Company has remained the market leader in terms of Gross Premium Written, controlling 72.9% of the market during the half year ended 30 June 2023.

6.7.2 Golden Knot Micro-insurance had a market share of 26.9%, while Micro-sure Microinsurance had the least market share of 0.2%.

Figure 18: Market Share for Micro-insurers in Terms of GPW

6.7.3 From Figure 19 below, in terms of total assets, Coverlink Microinsurance had the biggest market share controlling 92% of the market, followed by Golden Knot and Micro-sure with 6% and 2% respectively.

INSURANCE BROKERS SECTION

7. Insurance Brokers

7.1 Introduction

- 7.1.1 This section examines the insurance brokers' performance within the period that ended on 30 June 2023.
- 7.1.2 During the second quarter of 2023, there were no new registrations of insurance brokers.
- 7.1.3 All insurance and reinsurance brokers managed to submit their online returns, together with the disaggregated returns for the absolute ZW\$ and US\$ business.

7.2 Business Written by Insurance Brokers

- 7.2.1 During the period under review, insurance brokers reported gross premiums amounting to ZW\$164.32 billion. This was a 1,053% increase from ZW\$14.255 million reported during the comparative period of 2022. This increase was a result of insurers adjusting premiums to keep up with inflation and exchange rate developments.
- 7.2.2 To operationalise the No Premium No Cover issued in terms of SI 81 of 2023, all insurance brokers are expected to remit insurance premiums within seven (7) working days, in line with Section 6.7.4 of the Broker and Agents Guidelines issued in terms of Circular 14 of 2022.

8. Reinsurance Brokers

8.1 Business Written by Reinsurance Brokers

8.1.1 During the first half of 2023, reinsurance brokers reported gross premiums totalling ZW\$109.07 billion. This represented an 8% decrease from the comparative period in 2022. This means that direct insurers retained more business than the previous comparative period of 2022. Table 17 shows the performance indicators for reinsurance brokers.

8.2 Earnings

8.2.1 Reinsurance brokers reported a 55% increase in profit after tax from ZW\$2.8 billion for the period ended 30 June 2022 to ZW\$4.4 billion for the period ended 30 June 2023. The industry average on the return on equity (ROE) and return on assets (ROA) for the period ended 30 June 2023 were 50% and 2% respectively.

8.3 Capitalisation

8.3.1 As at 30 June 2023, all reinsurance brokers reported capital positions that were above the minimum capital requirement of ZW\$1.5 million stipulated in terms of Statutory Instrument 59 of 2020. Table 18 shows the capital positions for reinsurance brokers during the period under review.

	Non-compliant with ZW\$1.5 million MCR

8.3.2 Reinsurance brokers are urged to prepare for US\$ indexed MCR. The draft regulations for the US\$ indexed MCR await approval and gazetting. The proposed minimum requirement for reinsurance brokers is US\$100,000 or ZW\$ equivalent.

8.4 Asset Quality

8.4.1 For the period ended 30 June 2023, reinsurance brokers reported total assets amounting to ZW\$194.92 billion. Premium receivables and cash and cash equivalents accounted for most of the assets, at 92% and 6% respectively. The unfavourably high figure of premium receivables is set to be resolved by the No Premium No Cover regulations whose implementation is expected to witness premium debtors being expunged by December 2023. A breakdown of the assets is illustrated in the diagram below.

SECTION I:

COMPLAINTS HANDLING

9. Complaints Handling

9.1 Short-term insurance

9.1.1 For the half year ended 30 June 2023, the Commission received 53 complaints against short-term insurance companies. Delays in settlement of claims was the major source of complaints, constituting 61% of the total complaints. Tobacco related constituted 21% while unsatisfactory service, and repudiations both constituted 18% of the total complaints.

Table 19: Breakdown of Complaints by Nature

Nature of Complaint	Number of Complaints	Percentage of Total
Delays in Settlement	32	61%
Tobacco	11	21%
Repudiations	5	9%
Not satisfied with service	5	9%
Total	53	100%

9.1.2 Delays in claim settlement remains the major source of complaints at 61% of the total complaints. The Commission continues to underscore the need for insurers to settle claims within agreed timeframes to protect claimants from loss of value. Treating customers fairly is important for building sector reputation and confidence, and players should strive for fair treatment of their policyholders. Insurers should also embrace treating customers' fairly principles.

9.2 Breakdown of Complaints by Player

9.2.1 For the half year ended 30 June 2023, 58% of complaints were against 3 players, namely Econet Insurance, Zimnat Lion Insurance and Champions Insurance with 26%, 17%, and 15% respectively. Table 20 below shows the breakdown of complaints by entity.
