Disclaimer

- i. This report has been prepared by the Insurance and Pensions Commission (IPEC) solely to provide information to the pension sector stakeholders. It may not be reproduced, redistributed, communicated to a third party, or relied upon by any other person for any other purpose without the Commission's prior written consent.
- ii. The Commission does not accept any liability if this report is used for any other purposes other than the above-mentioned intended purpose.
- iii. This report relates to private occupational pension funds in the third quarter of 2024 and the figures are based on unaudited accounts submitted by regulated entities.
- iv. The statistics in this report were based on the International Accounting Standard 26 (IAS 26)-Accounting and Reporting by Retirement Benefit Plans.
- v. All ZWG amounts are expressed in nominal terms, except where specifically stated to be in real terms.
- vi. All monetary figures are in ZWG unless stated otherwise. There are no September 2023 ZWG comparatives since this currency was introduced on 5 April 2024. For September 2023 comparatives, the Commission converted the ZWL reported amounts to US\$ using the official average exchange rate and the closing rate for that period. Consequently, these amounts may reflect exchange rate distortions.
- vii. ZWG revenue and assets were converted to US\$ using the average exchange rate for the period under review of ZWG13.8405 and the closing rate of ZWG24.8831, respectively. It is important to note that the closing rate is significantly higher than the average rate due to a significant currency depreciation that occurred before the quarter ended. This has

resulted in a distortion as income and expenses are converted at lower rate and the assets and liabilities at a higher rate.

- viii. Except for the foreign business section, the amounts in this report are presented in US\$ equivalents, therefore, they are not pure US\$.

1. Executive Summary

- 1.1. The pensions industry consisted of 968 registered occupational pension funds as at 30 September 2024.
- 1.2. Out of the 968 registered funds, 485 were active, making up 50.1% of the industry's total. The remaining 483 funds, comprising 49.9%, were inactive. Out of the 483 inactive funds, 372 (77.0%) were earmarked for dissolution.
- 1.3. The industry's total membership, excluding beneficiaries was 986,746, an increase from 942,057 registered as at 30 September 2023. The 4.74% increase in membership was due to new entrants.
- 1.4. The total industry assets in the pensions sector amounted to ZWG 53.85 billion, roughly US\$2.16 billion at the official closing exchange rate of 24.8831. This represents an 11.3% increase from US\$1.94 billion as at 30 September 2023. However, this growth was primarily driven by revaluation gains on operating assets, as well as fair value gains on investment properties and equity instruments.
- 1.5. As at 30 September 2024, the value of investment properties was US\$961 million (ZWG 23.91 billion), representing 44.5% of total assets. This is a decrease of 12.6% from US\$1.1 billion, or 56.7% of total assets, in the comparative period.
- 1.6. Quoted, equity investments increased by 27.8%, from US\$406 million on 30 September 2023, to US\$519 million (ZWG 12.9 billion) on 30 September 2024. This increase was primarily due to fair value gains and new investments in this asset class.
- 1.7. On the other hand, unquoted equity investments declined by 17.5% from US\$86.4 million as at 30 September 2023 to US\$71.3 million (ZWG 1.77 billion) as at 30 September 2024. The decline is due to pension funds investing in value-preserving instruments such as gold backed digital tokens and gold coins coupled with the sudden increase of the exchange rate towards the end of the reporting period.
- 1.8. Prescribed asset investments increased by 62.3%, from US\$149 million on 30 September 2023, to US\$241.83 million (ZWG 3.41 billion) as at the reporting date. The increase was driven by revaluation gains and new investments. The Commission continues to enforce compliance with approved instruments to ensure the industry meets the 20% regulatory threshold.

1.9. The total income for the nine months ended 30 September 2024 was US\$2.61 billion (ZWG 36.15 billion) using the average rate for the period of 13.8405, a decrease of 14.6% from US\$3.06 billion during the same period last year. It's important to note that 79.4% (US\$2.07 billion) of the total revenue came from fair value gains, which is unrealised income.

1.10. Total expenditure amounted to US\$91.35 million (ZWG 1.26 billion), with 40% allocated to administrative expenses and 60% directed towards member benefits.

2. About the Commission

2.1. Overview

2.1.1. The Insurance and Pensions Commission (IPEC) is a statutory body mandated to regulate, supervise, and develop the insurance and pensions industry, for the protection of policyholders and pension scheme members in Zimbabwe.

2.1.2. This report outlines pensions industry developments and IPEC's supervisory activities in the pensions sector for the nine months to 30 September 2024, consistent with its statutory mandate.

2.1.3. The activities of the Commission are guided by the following Acts and their respective regulations:

- Insurance and Pensions Commission Act [*Chapter 24:21*]
- Pensions and Provident Fund Act [*Chapter 24:32*]
- Insurance Act [*Chapter 24:07*]
- Money Laundering and Proceeds of Crime Act [*Chapter 09:24*]
- Finance Act [*Chapter 23:04*]
- Public Entities and Corporate Governance Act [*Chapter 10:31*]
- Public Finance Management Act [*Chapter 22:19;*] and
- Public Procurement and Disposal of Public Assets Act [*Chapter 22:23*]
- Administration of Estates Act [*Chapter 6:01*].

3. Key Performance Indicators

3.1. The key performance indicators for the pensions industry as at 30 September 2024 are shown in the table below: -

Table 1: Key Performance Indicators

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Funds	Total 30 September 2024
Number of Funds	801	153	14	968
DB	21	9	4	34

Prescribed Assets (Million ZWG)	1,445	2,352	2,222	6,019
Prescribed Assets Ratio	10.35%	14.13%	9.56%	11.18%
Contribution Arrears (Million ZWG)	145	303	891	1,339

Notes:

**Total investment income is made up of rental income, dividends, interest on investments, profit on disposal of assets and fair value gains.*

***Total expenditure for the industry includes benefits paid, transfer to reserves, revaluation losses and provisions.*

****Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation losses.*

4. Economic Overview**4.1. Economic Growth Developments**

- The government projects a slowdown in Zimbabwe's economic growth for 2024, revising its initial projection of 3.5% to 2%. This downward revision is primarily attributed to the adverse effects of the El Niño weather phenomenon on agricultural output, a key sector of the Zimbabwean economy.
- The mining sector is also expected to experience subdued growth due to lower international mineral prices. However, a rebound in agricultural production and ongoing capital projects in the manufacturing sector are anticipated to drive recovery in 2025.
- However, Financial and Insurance Activities were projected to grow by 4.8% in 2024 up from 2.4% in 2023.

4.2. Inflation Developments

- In April 2024, Zimbabwe introduced the Zimbabwe Gold (ZWG) currency as part of efforts to stabilise the economy and curb inflation. The ZWG, a structured currency backed by a basket of foreign currency and precious metals (mainly gold), resulted in the country experiencing varying inflation trends:
- **Deflation in April and May:** The initial months saw a period of deflation, likely due to the introduction of the new currency and its impact on market stabilisation.
- **Resurgence of Inflation:** From June, inflation began to rise steadily, reaching its peak in September.

- The figure below shows inflation trends for the period between April to September 2024.

Figure 1: Inflation Rate in USD terms

4.3. Exchange Rate Developments

- The quarter was characterised by economic volatility as the ZWG depreciated on the alternative exchange resulting in the exchange rate trading around US\$1: ZWG13.84 on the official currency.
- To restore stability and curtail inflationary pressures, the Reserve Bank of Zimbabwe, devalued the ZWG by 43% in September 2024 to ZWG24.88.
- Maintaining exchange rate stability will be crucial for the pension sector, as it fosters confidence and encourages long-term investment.

Figure 2: Official Exchange Rate

4.4. Stock Market Performance

4.4.1. Zimbabwe Stock Exchange (ZSE)

- The introduction of the ZWG had a significant impact on the performance of the ZSE with the following key trends:
- **Market Capitalisation:** The market capitalisation of the ZSE increased steadily from ZWG 28.6 billion in April to ZWG 74.5 billion in September 2024, reflecting inflation developments in line with the exchange rate movement.
- **Turnover:** The turnover on the ZSE also showed significant growth, from ZWG16.6 million in April to ZWG 273.9 million in September 2024, demonstrating increased trading activity and liquidity. This increased activity can be attributed to factors such as the influx of foreign investors, the stabilisation of the economy, and the overall improvement in market sentiment.
- **All-Share Index:** The All-Share Index, a key indicator of overall market performance, experienced significant growth during the period. This reflects the positive performance of most listed companies on the ZSE.

4.4.2. Victoria Falls Exchange (VFEX)

- The market capitalisation of the VFEX experienced fluctuations throughout the period. This suggests that investor sentiment and market dynamics were influenced by various factors, including economic conditions, currency stability, and global events.
- The turnover on the VFEX also showed fluctuations, indicating varying levels of trading activity. Higher turnover in certain months may be attributed to factors such as new listings, corporate actions, or increased investor interest.
- The VFEX All Share Index exhibited a relatively stable trend, with some periods of growth and decline. This suggests that the overall performance of listed companies on the VFEX was mixed.

5. Regulatory Developments

5.1. The Insurance and Pensions Commission issued 3 circulars for the pensions industry in the third quarter of 2024. These circulars were targeted at guiding the industry on the conduct of annual general meetings and AML/CFT/PF guidelines from the Financial Intelligence Unit.

The table below shows the circulars issued to the industry in Q3/2024.

Table 2: Circulars Issued for the Quarter ended 30 September 2024

Circular	Issue date	Content
Circular 12 of 2024	02 July 2024	Guideline to funds on Conduct of Annual General Meetings.
Circular 13 of 2024	12 July 2024	Financial Intelligence Unit Directive on High-Risk Jurisdictions and Countries under Increased Monitoring for Terrorist Financing and Proliferation Financing of Weapons of Mass Destruction.
Circular 14 of 2024	05 September 2024	Financial Intelligence Unit Directive on Implementation of Targeted Financial Sanctions.

Prescribed Assets Applications

5.2. During the third quarter of 2024, the Minister of Finance, Economic Development and Investment Promotion granted prescribed asset status to five applications.

5.3. The table below lists the instruments that were approved during the nine months to 30 September 2024: -

Table 3: Approved Prescribed Asset Instruments for the Nine Months to 30 September 2024

Issuer	Amount (millions)	Currency	Purpose	Date Approved
Lamcent	41.1	US\$	Infrastructure development - Five-star hotel	17-Jan-24
NMB	8	ZW\$	Agriculture – Summer cropping	18-Jan-24
	10	US\$		
Okavhango	13	US\$	Solar Energy	18-Jan-24
Fidelity Asset Manager	60	US\$	REIT	6-Feb-24
Mining Industry PF	25.7	US\$	Infrastructure development - Student accommodation and residential stands	6-Feb-24
Dabuka Village	45	US\$	Infrastructure development - Superstructures	6-Feb-24
Sunrise	12.8	US\$	Agriculture	8-Mar-24
UCPF	4.5	US\$	Infrastructure development -	16 Apr 2024

Issuer	Amount (millions)	Currency	Purpose	Date Approved
			Hotel	
Akribos	4	US\$	Infrastructure development - Residential properties	3 May 2024
Mining Industry PF	8.2	US\$	Infrastructure development - Shopping mall	6 May 2024
Penhalonga Energy	3.25	US\$	Hydro-power generation	14-May-24
Silverback/Mombemari	6.76	US\$	Agriculture - Cattle project	21-May-24
ZEIPF	49.3	US\$	REIT	7-June-24
AFC	35	US\$	Agriculture – Winter cropping	8 July 2024
FBC	3.6	US\$	Infrastructure development - Residential properties	26 Aug 2024
CAIPF	22	US\$	Infrastructure development - Residential properties	11 Sep 2024
Ruzawi Solar	4.4	US\$	Solar Energy	11 Sep 2024
Tokwe Mukosi	15.2	US\$	Hydro Power Energy	17 Sep 2024

5.4. The approved prescribed assets offer the industry an opportunity to diversify its portfolio while supporting investments in projects that drive national growth and align with the National Development Strategy (NDS1). Consequently, the industry is encouraged to invest in prescribed assets to meet the regulatory minimum requirement of 20% of total assets.

5.5. The Commission would want to reiterate that it is the responsibility of the pension fund to do proper due diligence before investing pensioners' funds in such various projects. Regular project performance monitoring by the fund in line with agreed investment terms remains important.

6. Registered Pension Funds

6.1. There were 968 registered occupational pension funds as at 30 September 2024 compared to 969 funds as at 30 September 2023.

6.2. The decrease was a result of 10 dissolutions which were finalised during the year. In addition, there was one merger and 10 new funds, which were registered during the period under review. *Refer to table 5*

- 6.3. Of the 968 funds, 485 were active, accounting for 50.1% of the industry's funds. The remaining 483 funds were inactive as they were either paid up or earmarked for dissolution. Of the total funds, 34 pension funds were defined benefit schemes whilst 3 were hybrids and the remainder were defined contribution schemes.
- 6.4. Of the 968 registered funds, 14 manage their funds in-house. The rest, comprising 801 insured funds and 153 self-administered funds, outsource the services to fund administrators.
- 6.5. As at 30 September 2024, there were 14 fund administrators registered with IPEC. Of these, five are independent, while the remaining nine are registered life assurance companies engaged in fund administration.
- 6.6. The table below shows the distribution of pension funds managed by the respective administrators: -

Table 4: Distribution of Funds Administered by Type of Administration Model

Name of Administrator	30-September-24		30-September-23	
	Insured funds	Self-Administered funds	Insured funds	Self-Administered funds

Stand-alone ¹	-	14	-	14
Total	801	167	800	169

¹Refer to Annexure 5 for the comprehensive schedule of Stand-alone funds

Fund Registrations

- 6.7. Ten pension funds were registered during the nine months to 30 September 2024: Lupane Local Board, Gutu RDC, Mberengwa Provident Fund, Chipper, Nkayi RDC, Econet life drawdown, Bubi RDC, Contact Family Counselling Centre Provident Fund, Donhodzo Micro-Pension Fund, and Medical and Allied Industry. Most of the registered funds were set up by sponsoring employers who were part of the United Councils Pension Fund.
- 6.8. Pension scheme sponsors and administrators should ensure funds are registered with the Insurance and Pensions Commission and obtain a valid registration certificate. Fund registration should precede any remittance of contributions and commencement of fund administration activities or operations and should be reported on regardless of status and position.

Transfer of Fund Business

- 6.9. During the 9 months under review, the Commission approved three transfers and one merger. The transfers and a merger are shown in the table below: -

Table 5: Fund Transfers and Mergers

Pension Fund	From	To
Powerspeed	Old Mutual	Minerva
Girls College	FML	Minerva
RTG	Old Mutual	First Mutual
Mergers		
Mandel Training Centre	Old Mutual	Delta under Old Mutual

- 6.10. The Commission will maintain oversight of the transfer of business between administrators to ensure they comply with the Pension and Provident Funds Act and the guidelines on the transfer of business.

Dissolutions

- 6.11. A total of 372 funds were earmarked for dissolution as at the reporting date. The Commission has, however, put the dissolutions affected by pre-2009

compensation in abeyance pending the conclusion of the compensation to ensure fairness among members.

Membership

6.12. The table below shows the distribution of members as at 30 September 2024 and 30 September 2023, respectively.

Table 6: Membership Classes as at 30 September 2024

Membership Class	Insured Funds	Self-Administered Funds	Stand Alone Funds	Total Q3 2024	Total Q3 2023
New Entrants	23,714	2,740	3,068	29,522	8,459
Active members (excluding new entrants)	99,606	108,378	151,210	359,194	376,765
Pensioners (Excluding beneficiaries)	6,468	4,968	17,246	28,682	35,260
Deferred Pensioners	225,677	45,625	181,382	452,684	436,776
Suspended Pensioners(Excluding beneficiaries)	4,486	4,355	4,941	13,782	14,877
Unclaimed benefits (number)	11,633	5,774	85,475	102,882	95,619
Total Members excluding beneficiaries	371,584	171,840	443,322	986,746	967,756
Total Number of beneficiaries	1,617	4,461	13,417	19,495	24,703
Total members including beneficiaries	373,201	176,301	456,739	1,006,241	992,459
Total Number of Exits	2,629	3,461	1,373	7,463	4,400

6.13. There was an increase of 1.39% in total membership (including beneficiaries) from 992,459 to 1,006,241. This increase was mainly attributed to new entrants.

6.14. The membership trend for the past five years is shown below:-

Figure 3: Trend in Membership

6.15. Membership has steadily increased over the past five years. The change can be attributed to regulatory changes such as the new Pensions and Provident Funds Act and the increased scrutiny on pension fund administration which has improved confidence in the sector.

7. Assets

- 7.1. As at 30 September 2024, the industry's total assets were US\$2.16 billion (ZWG 53.85 billion), reflecting an 11.3% increase from US\$1.94 billion reported on 30 September 2023.
- 7.2. Contribution arrears were US\$53.81 million (ZWG1.34 billion), constituting 2.5% of the industry's assets. This was an increase of 53.04% from US\$35.16 million in the prior year wherein contribution arrears constituted 1.81% of total industry assets.
- 7.3. The increase, though affected by exchange rate distortions, is also an indicator of a growing challenge of non-remittance of contributions by fund sponsors as they fall due. Section 16(8) of the Pensions and Provident Act gave the Commission powers to garnish bank accounts of sponsoring employers who are not remitting contributions to the fund. The Commission has since commenced instituting processes to garnish the accounts of defaulting employers as required by the Act.
- 7.4. The asset composition of the industry is as shown in the figure below:

Figure 4: Asset Composition

- 7.5. As illustrated above, the pension industry's assets were heavily concentrated in investment properties and quoted equities, which together made up 69% of the total asset portfolio.
- 7.6. As at 30 September 2024, investment properties were valued at US\$961 million (ZWG 23.91 billion), representing 45% of total assets. This is a decrease from US\$1.1 billion, which accounted for 56.7% of total assets in the comparative period. The decrease was due to the channelling of investments to other asset classes as well as the reclassification of some investment property to prescribed assets.
- 7.7. Quoted equities increased by 27.8% in US\$ terms, from US\$406 million on 30 September 2023 to US\$519 million (ZWG 12.91 billion) on 30 September 2024. This increase was primarily due to fair value gains and new investments.
- 7.8. Investments in unquoted equities decreased to US\$71.36 million (ZWG 1.78 billion) from US\$ 86.42 million during the same period last year. This resulted in a drop in the proportion of unquoted equities to total assets from 4.45% to 3.3%. The decrease largely emanates from investing in other value-preserving instruments such as prescribed assets.
- 7.9. The five-year asset trend is depicted in the diagram below: -

Figure 5: Trend in Assets (US\$ Equivalent)

- 7.10. The significant increase in asset values in 2021 was attributed to the artificially low official exchange rate used for converting local currency to USD. This rate

remained unchanged for extended periods, despite not reflecting the actual economic conditions.

7.11. Prescribed assets surged by 62.3%, rising from US\$149 million on 30 September 2023 to US\$241.83 million as of the reporting date, due to revaluation gains and new investments in the approved assets. As at 30 September 2024, prescribed assets made up 11.2% of the industry's total assets against a prescribed ratio of 20%, up from 7.7% in the previous year.

7.12. The industry is encouraged to invest in a variety of instruments that have been granted prescribed asset status to achieve the required threshold.

7.13. The number of gold coins of various denominations, held by the pensions industry marginally declined from 1,995 in the previous quarter to 1,993. The value of the coins, however, increased by 5.97% to \$US5.39 million as at 30 September 2024 up from \$US4.70 million reported as at 30 June 2024. This increase in value was driven by gains in the price of gold. The tables below show the extent of gold-backed investments by the industry: -

Table 7: Gold Coin Investments

Denomination	Insured	Self Admin	Standalone	Total
0.1Oz	0	2	18	20
0.25Oz	0	1	32	33

8. Income

- 8.1. The total income for the nine months to 30 September 2024 was US\$2.61 billion (ZWG36.15 billion). This was a decrease of 14.7% compared to the US\$3.06 billion reported at same period last year. Of the total income earned, US\$149.53 million was in foreign currency, thus constituting 5.72% of the industry's total income.
- 8.2. The major source of income were fair value gains on investments, constituting 79% of total income, amounting to US\$2.07 billion (ZWG28.69 billion).
- 8.3. Contributions constituted 6% of total income with a total of US\$155 million (ZWG2.15 billion).

The general trend in contributions is shown in the figure below.

Figure 6: Trend in Contributions (US\$ Equivalent)

9. Expenditure

- 9.1. Total expenditure for the period under review was US\$91.35 million (ZWG1.26 billion), compared to US\$118 million in the prior year. A total of US\$55 million (ZWG762 million), which made up 60% of total expenditure, was incurred towards benefits expenditure.
- 9.2. Total administrative expenses were US\$36 million (ZWG503 million), the major driver being administration fees, staff costs, investment management fees and property expenses, which collectively contributed 65% towards total expenditure. The Commission will continue to enforce compliance with the Expenses Framework.
- 9.3. The trend for expenses is shown in the figure below: -

Figure 7: Trend in Expenditure in US\$ Equivalent

- 9.4. Expenditure rose steadily as depicted by the low gradient of the trendline, though yearly expenditure has been declining since 2022 in a bid to align with the Expenses Framework.
- 9.5. Industry expense ratios for all funds are shown in Annexure 3 against set thresholds in the Expense Framework.
- 9.6. The table below shows the industry proportion of total expenditure to total contributions and contribution arrears to total assets.

Table 9: Proportion of Expenses and Contribution Arrears

	Q3 2020	Q3 2021	Q3 2022	Q3 2023	Q3 2024
Contributions (US\$ millions)	35.79	130.87	69.14	164.15	155.53
Administrative Expenses (US\$ millions)	10.87	36.61	17.21	60.74	36.32
Administrative Expenses/Contributions	30%	28%	25%	37%	23%
Contributions Arrears (US\$ millions)	15.69	38.57	42.29	35.16	53.81
Total Assets (US\$ millions)	1,326.73	2,756.54	1,456.57	1,941.78	2,164.40
Contribution Arrears/Total Assets	1%	1%	3%	2%	2%

- 9.7. There was a significant decrease in the administrative expenses to contributions ratio from 37% to 23%, however, the ratio remains higher than expected.
- 9.8. Despite fluctuations over the years, the average rate of contribution arrears relative to total assets has remained around 2%. This suggests that fund sponsors do not prioritize paying contributions. The Commission has since commenced instituting processes to garnish the accounts of defaulting employers as required by the Section 16(8) of the Pensions and Provident Funds Act [Chapter 24: 32].

10. Forex Assets

- 10.1. Foreign currency-denominated assets increased by 60%, from US\$326 million on 30 September 2023 to US\$521.6 million on 30 September 2024, now representing 24.1% of the total industry assets. The increase arose from reinvestment of returns from already existing forex assets and making new investments with the residual forex income.
- 10.2. The major asset classes were quoted equities, investment property, prescribed assets, contribution arrears and money market investments, which constituted 32%, 28%, 11%, 7.7% and 7.6%, respectively. These asset classes constitute 86% of the total forex assets in the period.
- 10.3. The table below shows the asset composition in foreign currency business.

Figure 8: Foreign Currency Assets

- 10.4. Holding foreign currency-denominated assets has helped cushion investment portfolios from being eroded by inflation.
- 10.5. Pension funds must ensure that the income from foreign currency-denominated assets is fairly distributed among members to enhance their benefits and savings.
- 10.6. Contribution arrears as at 30 September 2024 stood at US\$39.39 million, constituting 8% of the industry's foreign currency-denominated assets. Pension

funds are encouraged to verify whether the sponsoring employer has the contribution liability reported in their audited financial statements.

- 10.7. Contribution arrears increased by 5% from US\$37.5 million compared to the previous quarter. Fund Boards and employers are encouraged to address the issue of US\$ arrears, as they negatively affect members' reasonable expectations.
- 10.8. Ensuring timely remittance of contributions is essential for managing pension funds and securing employees' financial futures. The Board of Funds should set clear guidelines and work with sponsoring employers to ensure contributions are consistently and promptly remitted, protecting members' interests.

11. Foreign Currency Income and Expenditure

- 11.1. Total foreign currency income for the nine months to 30 September 2024 amounted to US\$149.5 million compared to US\$79 million reported at 30 September 2023. This was an 89% increase from 30 September 2023. The realised income amounted to US\$138.6 million, which is 93% of total income.
- 11.2. Total forex contributions amounted to US\$84 million up from US\$34 million. For the period under review, forex contributions accounted for 56% of the total forex income.
- 11.3. Total forex benefits expenditure for the nine months ended 30 September 2024, amounted to US\$28.14 million compared to US\$22.49 million of the previous year, an increase of 25.1%.
- 11.4. The proportion of administrative expenditure to total expenditure was 38%. This compared fairly well with benefit expenditure as 62% of foreign currency resources were directed towards the core function of industry, that is payment of benefits.
- 11.5. The table below shows key forex business matrices: -

Table 10: Key Indicators

Indicator	US\$ (Millions)
Total contributions	83.85
Total income (Includes contributions, rental income, dividends, fair value gains etc)	149.53

Indicator	US\$ (Millions)
Total benefits expenditure	28.14
Total administrative expenditure	17.32
Total expenditure	45.46
Total assets	521.57

12. Pension Fund Administrators

12.1. Total income earned by fund administrators from fund administration business for the period was US\$10.5 million (ZWG145.32 million) compared to US\$32.49 million as at 30 September 2023. Previously, fund administrators used to include income from non-pension businesses in the total income. The requirement is now to only submit the pension business income. Of the total income, forex income was US\$3.97 million (ZWG54.99 million), thus constituting 37.84% of total income earned. During the period under review, 11 out of the 14 administrators recorded US\$ business.

12.2. Income from fund administration fees earned by administrators for services rendered was ZWG67.16 million, constituting 46% of the total income. The table below shows the sources of income earned by administrators for the period under review.

Table 11: Sources of Income for Administrators

Source of income	ZW\$ 'millions'	USD - (ZWG Equivalent in millions)	Total (ZWG millions)	%age of total income
Administration Fees	38.08	29.07	67.16	46.21%
Investment Income	19.94	14.43	34.36	23.65%
Cost of Guarantee	13.87	-	13.87	9.54%
Unrealised Gains	12.93	0.02	12.95	8.91%
Commission	2.00	6.53	8.53	5.87%
Actuarial Fees	1.39	3.58	4.96	3.42%
Consultancy Fees	1.83	-	1.83	1.26%
Other Income	0.08	0.71	0.79	0.54%
Rentals	0.09	0.40	0.50	0.34%
Ill Health Fees	0.02	0.25	0.26	0.18%
Profit on Disposals	0.10	-	0.10	0.07%

Source of income	ZW\$ 'millions'	USD - (ZWG Equivalent in millions)	Total (ZWG millions)	%age of total income
Total	90.33	54.99	145.32	100%

12.3. As of 30 September 2024, the total expenditure amounted to ZWG158.79 million. This expenditure primarily included salaries and wages, operating expenses, commissions, rentals, and management fees, leading to a loss of ZWG13.5 million. The table below outlines the main cost drivers and their respective proportions of the total expenses.

Table 12: Major Cost Drivers for Fund Administrator

Expense Item	Amount (ZWG)	% of Total Expenses
Salaries & Wages	77,882,965.79	49%
Admin Expenses	26,731,838.93	17%
Commissions	8,412,021.63	5%
Rental	7,221,303.92	5%
Management Fees	6,432,413.94	4%

12.4. Administrators are encouraged to align expenditures with the current operating environment to maintain sustainable expense levels. Notably, 43% of the administration fees earned were transacted in foreign currency. The table below details the administration fees as a portion of the total income for each administrator and indicates the extent to which these fees are in foreign currency.

Table 13: Administrators' Administration Fees

Administrator	ZWL Income	Administration Fees			Proportion of Forex component to Total Admin Fees
		Combined USD + ZW\$	USD	USD Converted

ZIB	8,638.32	-	0%
Zimnat	13,736,798.61	270,752.02	27%
Bright	8,749,193.12	333,412.95	53%
Old Mutual	56,736,847.27	1,064,505.05	26%
Total	145,315,896.68	3,972,788.26	38%

12.5.Total assets for independent administrators, excluding life assurers and brokers, were ZWG52.52 million and US\$119,186 with only property, debtors and cash denominated in US\$.

12.6.The breakdown of assets for independent administrators is as shown in the following table:

Table 15: Independent Administrators' Asset Distribution

Asset class	ZWG	US\$ (Converted)	% of Total assets
Property and Equipment	26,332,590.83	38,455.00	49%
Equities	15,052,075.00	-	27%
Debtors	3,080,843.36	78,763.09	9%
Stock	3,281,214.99	-	6%
Money market investments	1,635,455.00	-	3%
Bank and cash balances	579,057.22	6,865.00	1%
Staff loans	2,526,297.87	5,105.52	4%
Other	42511.24	208.36	0%
Total	52,524,860.87	119,185.93	55,490,576.29

12.7. The major asset class for independent administrators remained property and equipment although the proportion of this asset class declined from 78% in the prior quarter to 49%. On the other hand, the share of equity investments grew from 6% to 27% within the quarter.

12.8. Property investments continued to garner the greatest proportion as these are considered the safest investments.

13. Unclaimed Benefits

13.1. Unclaimed benefits as at 30 September 2024 amounted to US\$10.18 million (ZWG253.39 million) compared to US\$6.04 million reported as at 30 September 2023, representing a nominal increase of 69%.

13.2. Additionally, the total membership with unclaimed benefits increased by 7.6% to 102,882 members, compared to 95,619 members as at 30 September 2023.

13.3. The nominal increase in the number of unclaimed benefits is attributed to under reporting by some pension fund administrators in the prior year.

The diagram below illustrates the trend of unclaimed benefits from 30 September 2023 to 30 September 2024.

Figure 9: Trend of Unclaimed Benefits in US\$ Equivalent

Figure 10: Distribution of Membership with Unclaimed Benefits per Model

13.4. Stand-alone funds had the highest value of unclaimed benefits, accounting for 85% of total industry.

Figure 11: Unclaimed Benefits Age Analysis

13.5. The age analysis for unclaimed benefits revealed that unclaimed benefits aged over 10 years constituted 68% of the total liability for unclaimed benefits.

13.6. According to the Administration of Estates Act [Chapter 6:01], administrators are required to remit all unclaimed benefits that are over 5 years to the Guardian Fund.

13.7. The Commission continues to encourage the industry to comply with the above requirements by ensuring that all unclaimed benefits that are in the over 5 years category are remitted to the Guardian fund as expected.

14. Suspended Pensioners

14.1. The benefits liability for suspended pensioners stood at US\$1.7 million (ZWG43.2 million) as at 30 September 2024, a 55% monetary decrease from US\$3.8 million recorded in September 2023.

14.2. There was a decrease in the total number of suspended pensioners from 14,887 on 30 September 2023 to 13,782 as at 30 September 2024. The 7% decrease is the expected trend as the Commission continues fostering efforts to conscientize pensioners to present proof of existence certificates on an annual basis.

Suspended Membership by Administration Models

14.3. Despite having the least membership amongst all administration models, the Stand-alone funds had the largest number of suspended pensioners with 6,662 for the third quarter of 2024 followed by the Insured Funds with 4,506 and lastly the Self-Admin funds had the least number of 3,719.

Figure 12: Distribution of Suspended Pensioners by Administration Model

14.4. Stand-alone funds had the largest share of suspended pensioners, as well as the greatest suspended benefit liability amounting to ZWG29.1 million in the period under review, followed by insured funds which had ZWG13.2 million and lastly self-administered with a suspended benefit liability of ZWG0.9 million.

14.5. The Commission expects all administrators to have the essential skills to locate every member and ensure the submission of Certificates of Existence, aiming to decrease the number of suspended pensioners.

15. Non-Residents Pensioners

15.1. As at 30 September 2024 the total cumulative amount due to non-resident Pensioners was US\$0.25 million (ZWG6.32 million) owed to 3,175 non-resident pensioners. This was a decrease from US\$0.60 million owed to 3,055 members as at 30 September 2023 which translated to a 58% decrease in the US\$ amount owed to non-resident pensioners. The liabilities declined due to the currency conversion as well as the devaluation of the ZWG in September 2024.

15.2. The figure below shows the cumulative outstanding non-resident amounts as at 30 September 2024.

Figure 13: Cumulative Benefits due to Non-Resident Pensioners

16. Commutations

16.1. The total amount commuted during the period under review was ZWG25.0 million, the bulk being full commutations, amounting to ZWG22.2 million (89%). One-third commutations, part commutations and exit top-ups amounted to a combined total of ZWG2.8 million.

Figure 14: Commutations by Type

16.2. The total commutations approved for the quarter were 609. The top three reasons for commutation for the period under review were retrenchments, the capital accumulations being below the statutory minimum allowable to

purchase an annuity, as well as school fees, with these constituting 29%, 28% and 16%, respectively.

Figure 15: Approved Commutations by Type

16.3. Of the 609 pensions commuted during the period under review, 148 were approved by the Commission and these were distributed as follows, medical expenses 23, education fees 93 and property expenses 32.

17. Complaints

17.1. In the third quarter of 2024, the Commission saw a drop in pension-related complaints, totalling 83 compared to 98 in the previous quarter. The complaints were distributed as follows: 33 in July, 35 in August and 15 in September.

17.2. For the period under review, 81% of the complaints related to either unpaid pension benefits (46%) or low pension benefits (35%).

Figure 16: Nature of the Complaints Received.

17.3. The most common complaints are delays in payments of pension benefits, low monthly pension benefits as well as low full commutation values under the defined contribution schemes.

17.4. Fourteen complex complaints (17%) were received during the quarter, mainly pertaining to the pre-2009 compensation, non-remittance of contributions as well as the 2019 currency conversion.

17.5. Non-complex complaints continue to constitute the greater proportion (83%) of the complaints received. 94% of the non-complex complaints, were resolved during the period, and only 6% (4 complaints) remained unresolved at the end of Q3 as shown in the graph below:

Figure 17: Non-complex Complaints Resolution Rate

17.6. FML, Zimnat and OMLAC complaints constituted 38% of all non-complex complaints, all 31 complaints from the three insured funds were completely resolved.

Table 16: Breakdown of Non-complex Complaints by Entity

Entity	No. Complaints received	No. Complaints resolved	Resolution rate
FML	13	13	100%
Bright	5	5	100%
CAIPF	1	1	100%
Clothing	1	1	100%
Cormaton	5	5	100%
GMB	2	2	100%
LAPF	5	5	100%
Nhaka life	1	1	100%
NRZCPF	2	2	100%
Nyaradzo	1	1	100%
OMLAC	9	9	100%
ZB Life	1	1	100%
ZEIPF	1	1	100%
Zimnat	9	9	100%
Fidelity	7	6	86%
MIPF	3	2	67%
Minerva	2	1	50%
ZESA	1	0	0%
Total	69	65	

17.7. The overall resolution rate for complaints this quarter was 94% an improvement from a resolution rate of 74% the previous quarter.

18. Anti-Money Laundering and Combating the Financing of Terrorism and Proliferation Financing

18.1. In the third quarter of 2024, all fourteen stand-alone pension funds and three independent fund administrators submitted their AML/CFT/CPF quarterly returns.

The key issues identified were as follows:

18.2. Inherent Risks and Associated Controls

18.2.1. Customer risk

- Four stand-alone pension funds conducted customer risk profiling and identified politically exposed persons (PEPs). However, no fund administrators risk profiled their pension fund members.
- Risk profiling of customers assists pension funds in applying appropriate customer due diligence measures and ongoing monitoring. Simplified due diligence measures should be applied for low-risk customers.
- Maintaining detailed records of transactions and client information is critical. Records must be kept for at least 5 years after termination of a business relationship and should be readily available upon request.

18.2.2. Product Risk

- Pension funds generally present low money laundering (ML) risk given that contributions are direct deductions from salaries.
- The risk of ML may occur in cases where contributions are not derived directly from the payroll.
- Four pension funds reported the existence of members with additional voluntary contributions. However, these were based on salary deductions and, therefore did not pose any ML risk.
- Of concern are pension schemes operated by fund administrators that pool individual clients and allow members to top up transfers from previous pension accumulations. Enhanced due diligence should be applied under such schemes of a risk-based basis to understand the source of funds.

18.3. Reporting Obligations

- **Suspicious Transaction Reports:** One pension fund filed an STR with the Financial Intelligence Unit during the quarter under review.
- **Cash Transaction Reports:** A total of 12 CTRs was reported during the quarter from 2 pension funds.
- It is important to note both the STR and CTR filed emanated from investment income transactions such as rentals and not pension contributions.

18.4. Implementation of Targeted Financial Sanctions against Terrorism and Proliferation Financing.

- Industry submissions for the third quarter of 2024 revealed that 12 pension funds and 3 fund administrators only conduct sanctions screening when new updates are issued by the FIU to the United Nations Security Resolutions Sanctions Lists.
- Only 2 pension funds conduct sanctions screening on an ongoing basis. Pension funds and fund administrators should subject new clients to sanctions screening before onboarding as required in terms of the FIU CFT/CPF Directive No. PFIU3/09/24 on Implementation of Targeted Financial Sanctions, issued 3 September 2024.
- Records of screenings performed should be maintained. Failure to demonstrate customer sanctions screening on an ongoing may result in penalties being levied on non-compliant funds and administrators.

19. Conclusion

- 19.1. The Commission continues to emphasize the importance of timely submission of financial returns by pension funds.
- 19.2. A significant concern persists regarding the timely remittance of contributions by sponsoring employers, which has led to substantial contribution arrears.
- 19.3. The Commission remains committed to addressing this issue, among others, to ensure that member benefits improve and align with the reasonable expectations of pension fund members.

20. Annexures

Annexure 1: Consolidated Industry Statement of Comprehensive Income for the nine months ended 30 September 2024

	Insured Funds	Self-Administered Funds	Stand Alone Funds	Total Q3 2024
Income				
Year to date Contributions (Including arrears)	416,071,085	954,009,338	782,466,811	2,152,547,235
