Disclaimer

- i. This report has been prepared by the Insurance and Pensions Commission (IPEC) solely for informative purposes to the pension sector stakeholders and may not be reproduced, redistributed, communicated to a third party, or relied upon by any other person for any other purpose without the Commission's prior written consent.
- ii. The Commission does not accept any liability if this report is used for any purposes other than the above-mentioned intended purpose.
- iii. This report relates to the operations of private occupational pension funds as reported to IPEC in the first quarter of 2025, and the figures are based on unaudited accounts submitted by pension funds and pension fund administrators.
- iv. The statistics in this report were based on the International Accounting Standard 26 (IAS 26)-Accounting and Reporting by Retirement Benefit Plans.
- v. All ZWG amounts are expressed in nominal terms, except where specifically stated to be in real terms.
- vi. All monetary figures are in ZWG unless stated otherwise.
- vii. The income and expenses figures were compared to the same period in the previous year, as the transactions are cumulative and not directly comparable every quarter. In contrast, assets and liabilities are compared to the previous quarter, as this provides a clearer indication of the sector's performance over the two quarters.
- viii. There are no March 2024 ZWG comparatives since there was a currency change from ZWL to ZWG on 5 April 2024. For March 2024 comparatives, the Commission converted the ZWL reported amounts to US\$ using the official average exchange rate and the closing rate for that period. Consequently, these amounts may be prone to exchange rate distortions.
- ix. The conversion of ZWG income and expenses was done using the average exchange rate of ZWG 26.4226 for the review period, and the assets and liabilities were converted to United States Dollars (US\$) using the closing interbank rate of ZWG 26.7654. The exchange rate during the quarter under review remained stable. However, this was not the case for the same period

last year. During that time, the closing rate was significantly higher than the average rate, leading to a notable discrepancy. Income and expenses were converted at the lower average rate, while assets and liabilities were converted at the higher closing rate.

- x. Apart from the foreign currency business section, the amounts in this report are presented as US dollar equivalents, meaning they are not purely in US\$.

1. Executive Summary

- 1.1. The pensions sector was composed of 967 registered occupational pension funds as at 31 March 2025, the same number reported on 31 December 2024.
- 1.2. Of the 967 registered funds, half of them were inactive. Notably, 78% of these inactive funds (372 funds) were earmarked for dissolution.
- 1.3. The sector's total membership, excluding beneficiaries, stood at 990,801, up from 977,423 registered as at 31 December 2024. The 1.37% increase was attributed to new entrants.
- 1.4. The pensions sector's total assets increased to ZWG 66.391 billion, equivalent to US\$2.48 billion at the official exchange rate. This represents a 10% growth from the US\$2.26 billion recorded as at 31 December 2024, largely driven by revaluation gains, new investments, and positive fair value adjustments in investment properties and equity instruments.
- 1.5. As at 31 March 2025, the value of investment properties increased by 8% to US\$1.14 billion (ZWG 30.5 billion), up from US\$1.06 billion. Whilst the value of investment properties increased, the proportion of this asset class to total assets marginally decreased to 46%, from 47% reported in the last quarter.
- 1.6. Quoted equity investments marginally increased by 0.40%, from US\$463.70 million in the last quarter to US\$465.56 million as at 31 March 2025, while unquoted equity investments increased by 33% from US\$79 million to US\$ 105 million.
- 1.7. Prescribed asset investments rose by 5%, from US\$264 million as at 31 December 2024 to US\$280 million (ZWG 2.7 billion) as at the reporting date. The increase was driven by revaluation gains and new acquisitions. The Commission continues to enforce compliance with approved instruments to ensure the sector meets the minimum regulatory threshold of 20%.
- 1.8. Pension contributions during the review period amounted to an equivalent of US\$76 million, up from US\$70 million in March 2024.
- 1.9. Pension contribution arrears increased by 37%, from US\$68 million in the last quarter to US\$93 million as at 31 March 2025. The Commission is engaging sponsoring employers with long-standing contribution arrears.

1.10. The total income for the year ended 31 March 2024 was US\$180 million (ZWG 4.8 billion), a decrease of 88% from US\$1.50 billion recorded during the same period last year. The sharp decrease in fair value gains and other income is attributed to the exchange rate stability during the reporting period.

1.11. Total expenditure amounted to US\$47.99 million (ZWG1.27 billion), with 33% allocated to administrative expenses and 67% directed towards member benefits. In the comparative period, total expenditure was US\$25.09 million, with 62% directed towards benefit payments.

2. About the Commission

Overview

2.1. The Insurance and Pensions Commission (IPEC) is a statutory body mandated to regulate, supervise, and develop the insurance and pensions sector for the protection of policyholders and pension scheme members in Zimbabwe.

2.2. This report outlines pensions sector developments and IPEC's supervisory activities in the pensions sector for the year ended 31 March 2025, consistent with its statutory mandate.

2.3. The activities of the Commission are guided by the following Acts and their respective regulations:

- Insurance and Pensions Commission Act [*Chapter 24:21*]
- Pensions and Provident Fund Act [*Chapter 24:32*]
- Insurance Act [*Chapter 24:07*]
- Money Laundering and Proceeds of Crime Act [*Chapter 09:24*]
- Finance Act [*Chapter 23:04*]
- Public Entities and Corporate Governance Act [*Chapter 10:31*]
- Public Finance Management Act [*Chapter 22:19;*] and
- Public Procurement and Disposal of Public Assets Act [*Chapter 22:23*]
- Administration of Estates Act [*Chapter 6:01*].

3. Key Performance Indicators

3.1. The key performance indicators for the pensions sector as at 31 March 2025 are shown in the table below: -

Table 1: Key Performance Indicators

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Self-Administered Funds	Total Q1 2025
Number of Funds	798	155	14	967

Prescribed Assets Ratio	11.01%	14.53%	9.24%	11.27%
Contribution Arrears (Million ZWG)	334	449	1,704	2,487

Notes:

**Total investment income is made up of rental income, dividends, interest on investments, profit on disposal of assets and fair value gains.*

***Total expenditure for the sector includes benefits paid, transfer to reserves, revaluation losses and provisions.*

****Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation losses.*

4. Economic Overview

- 4.1. The Zimbabwe economic landscape was characterised by a notable stabilisation of both inflation and the exchange rate, following an initial inflationary uptick in January. This stability is largely attributed to the tight monetary policy implemented by the Reserve Bank of Zimbabwe (RBZ).
- 4.2. While this policy stance resulted in temporary liquidity constraints, its primary objectives of price and exchange rate stability were achieved. RBZ proactively addressed liquidity concerns through targeted interventions. Furthermore, the central bank continued its efforts to enhance the efficiency of the Willing-Buyer Willing-Seller (WBWS) foreign exchange market and augment national foreign currency reserves, building on the foundational work of the preceding quarter to underpin sustained economic growth prospects for the remainder of the year.
- 4.3. During the first quarter of 2025, the economy experienced a period of relative stability in both inflation and exchange rate dynamics. This outcome is directly correlated with the stringent monetary policy framework maintained by the Reserve Bank of Zimbabwe throughout the quarter.
- 4.4. Key measures included upward adjustments to the Bank Policy Rate and statutory reserve requirements. Increased exchange rate flexibility within the interbank market, operating within the context of these tight monetary conditions, further contributed to the observed stability.
- 4.5. Strategic foreign exchange market interventions by the Reserve Bank facilitated efficient market clearing and ensured a consistent flow of foreign currency. It is important to note that this restrictive monetary policy did lead to transient liquidity challenges within the banking sector.
- 4.6. The Reserve Bank responded to these challenges through the provision of an intra-day liquidity facility for banks and the planned disbursement of funds under the Targeted Finance Facility (TFF).

Inflation Developments:

4.7. Monthly inflation, denominated in ZWG, exhibited a downward trend in January 2025. Subsequently, a period of stability was observed for the remainder of the first quarter. This stabilisation is a direct consequence of the prevailing tight monetary policy stance adopted by the Reserve Bank of Zimbabwe.

Figure 1: Inflation Rate (Monthly Percentage)

Exchange Rate Developments:

4.8. The exchange rate demonstrated stability throughout the first quarter of 2025. This stability is a direct outcome of the monetary policy measures implemented in the latter part of the preceding year. Further evidence of this stability is the observed compression of exchange rate premiums. The Reserve Bank of Zimbabwe continued to deepen the Willing-Buyer Willing-Seller (WBWS) interbank market for foreign exchange, a strategic initiative aimed at enhancing price discovery mechanisms and overall market efficiency.

Figure 2: Official Exchange Rate

Stock Market Performance:

(a) Zimbabwe Stock Exchange (ZSE):

4.9. The introduction of the ZWG currency in 2024 had a discernible impact on the performance of the Zimbabwe Stock Exchange (ZSE) during the period from January to March 2025, resulting in an aggregate market capitalisation of ZWG62.96 billion in March 2025, a gradual increase from ZWG58.96 billion in January 2025.

(b) Victoria Falls Stock Exchange Market (VFEX):

4.10. The performance of the Victoria Falls Stock Exchange Market (VFEX) in the first quarter of 2025 recorded a market capitalisation of US\$1.33 billion, representing a 4.27% increase compared to the US\$1.27 billion recorded in the corresponding period of the previous year.

5. Regulatory Developments

5.1. The Insurance and Pensions Commission issued eight (8) circulars to the pensions sector during the quarter ended 31 March 2025. These circulars were intended to disseminate information and provide guidance to the sector.

5.2. The table below shows the circulars issued to the pensions sector during the first quarter of 2025.

Table 2: Circulars Issued for the quarter ended 31 March 2025

Circular	Issue date	Content
Circular 1 of 2025	1 February 2025	Pension Funds Reporting Requirements.
Circular 2 of 2025	15 February 2025	Submission of Quarterly Levy Computations and Due Dates.
Circular 4 of 2025	7 February 2025	2025 IPEC AML/CFT/CPF Industry Training Calendar.
Circular 6 of 2025	24 February 2025	Engagement with the Consultant on Financial Sector Development Policy.
Circular 7 of 2025	07 March 2025	Invitation to Participate in Digital Transformation Assessment.
Circular 8 of 2025	27 March 2025	2024 Financial Reporting.
Circular 9 of 2025	28 March 2025	Directive on Revised Statutory Reporting Deadlines.
Circular 10 of 2025	28 March 2025	Market Conduct Framework for The Insurance and Pensions Industry.

Prescribed Assets Applications

5.3. During the quarter, the Minister of Finance, Economic Development, and Investment Promotion accorded prescribed asset status to eight (8) applications.

5.4. The table below lists the instruments that were approved during the quarter ended 31 March 2025.

Table 3: Approved Prescribed Asset Instruments for the Review Period

Issuer	Amount (millions)	Currency	Purpose	Date Approved
AFC Agrobills	33.6	US\$	Agriculture-Winter Cropping	15 January 2025
Zimgold Commercial Paper	10.0	US\$	Working Capital	17 January 2025
Willowmead Bio Pvt Ltd	2.0	US\$	Establishment of a Cannabidiol Extraction and Processing Plant	4 February 2025
Agrowth Debenture	7.5	US\$	Agriculture	20 February 2025
OMLAC DREIT	109.3	US\$	Developmental REIT	13 March 2025
Vakayi Capital	10.0	US\$	Private Equity Fund	17 March 2025
Zimbabwe Women Microfinance Bank	10.0	US\$	Bank Recapitalisation	24 March 2025
Empower Bank Housing bills	14.4	US\$	Housing Bills	24 March 2025

5.5. Approved prescribed assets offer an investment opportunity for portfolio diversification while promoting investments in projects that support national growth and align with the National Development Strategy 1 (NDS1). Consequently, the Commission continues to encourage pension funds to invest in projects or products with prescribed assets status to meet the regulatory minimum requirement of 20% of total assets.

5.6. While due diligence is conducted during the appraisal of prescribed asset applications, the ultimate responsibility lies with pension funds to carry out thorough due diligence before investing pensioners' funds in such projects. Ongoing monitoring of project performance in line with agreed investment terms remains crucial.

6. Registered Pension Funds

6.1. There were 967 registered occupational pension funds, the same as in the prior quarter.

6.2. Of the 967 funds, 479 were active, accounting for about 50% of the sector's funds. The remaining 488 funds were inactive as they were either paid up or earmarked for dissolution. Of the total funds, 34 were defined benefit

schemes, whilst three (3) were hybrid schemes and 930 were defined contribution schemes.

6.3. As at the date of reporting, the sector had 954 funds, which outsourced fund administration services, of which 798 were insured funds and 155 self-administered funds. The other 14 were self-managed, standalone funds.

6.4. As at 31 March 2025, there were 14 registered fund administrators. Of these, five (5) were independent, while the remaining nine (9) were registered life assurance companies engaged in fund administration.

6.5. The table below shows the distribution of pension funds managed by the respective administrators: -

Table 4: Distribution of Funds Administered by Type of Administration Model

Name of Administrator	31-March-25		31- December-24	
	Insured funds	Self-Administered funds	Insured funds	Self-Administered funds

Capitol Insurance Broker	-	1	-	1
Zimbabwe Insurance Brokers	-	4	-	4
Stand-alone ¹	-	14	-	14
Total	798	169	799	168

Fund Registrations

6.6. One pension fund, namely, ZBC Pension and Provident Fund, was registered as a self-administered fund during the quarter under review.

6.7. Pension scheme sponsors and administrators are required to ensure that funds are duly registered with the Insurance and Pensions Commission and that a valid registration certificate is obtained. The registration of the fund must precede the remittance of any contributions and the commencement of fund administration activities or operations. The fund must be reported on, irrespective of the fund's status or position.

Membership

6.8. The table below shows the sector's membership as at 31 March 2025 and 31 December 2024, respectively.

Table 5: Membership Categories as at 31 March 2025 and 31 December 2024

Membership Class	Insured Funds	Self -Self-Administered Funds	Stand-Alone Funds	Total	Total
				Q1 2025	Q4 2024
New Entrants	2,635	3,921	1,486	8,042	7,105
Active members (excl. new entrants)	97,314	105,986	150,307	353,607	357,513
Pensioners (excl. beneficiaries)	6,850	5,252	23,297	35,399	34,620
Deferred Pensioners	245,270	46,421	187,779	479,470	468,764
Suspended Pensioners (excl. beneficiaries)	4,295	4,351	6,022	14,668	14,719
Unclaimed benefits (number)	11,508	5,601	82,506	99,615	94,702
Total Members excluding beneficiaries	367,872	171,532	451,397	990,801	977,423
Total Number of beneficiaries	1,606	4,364	20,440	26,410	23,428
Total members, including beneficiaries	369,478	175,896	471,837	1,017,211	1,000,851
Total Number of Exits	3,715	2,311	1,905	7,931	10,278

6.9. There was a marginal increase of 1.63% in total membership (including beneficiaries) from 1,000,851 to 1,017,211. This increase was mainly attributed to new entrants.

6.10. The membership trend for the past five years is shown below.

Figure 3: Trend in Membership

6.11. The Commission has noted a gradual increase in pension fund membership over the past few years. This is attributed to new entrants and, to some extent, double counting as some sponsoring employers are exiting umbrella funds to establish standalone self-managed pension schemes. The Commission is considering issuing a guideline on the reporting of members who move from one administrator to another before their assets are transferred. This is crucial to address the double-counting of members belonging to the same fund under two different administrators.

7. Assets

7.1. Total assets increased by 10% to US\$2.48 billion (ZWG66.40 billion), up from US\$2.26 billion reported as at 31 December 2024. The growth was primarily driven by fair value gains.

7.2. Contribution arrears amounted to US\$92.92 million (ZWG2.49 billion), representing 3.75% of the sector's total assets. This reflects a 37% increase from US\$67.99 million in the prior quarter, when arrears constituted 3% of total sector assets.

7.3. The increase, though affected by exchange rate distortions, is indicative of a growing challenge of non-remittance of contributions by fund sponsors as they fall due. Section 16(8) of the Pensions and Provident Act [Chapter 24:32]

gave the Commission powers to garnish the bank accounts of sponsoring employers who are not remitting contributions to the fund. The Commission has since commenced instituting processes to garnish the accounts of defaulting employers as required by the Act.

7.4. The asset composition of the sector is as shown in the figure below.

Figure 4: Asset Composition

7.5. The pension sector's assets were concentrated in investment properties, quoted equities, and prescribed assets, which together made up 76% of the total asset portfolio.

7.6. As at 31 March 2025, investment properties were valued at US\$1.14 billion (ZWG 30.50 billion), representing 46% of total assets. This reflects a 47% increase from US\$1.06 billion in the previous quarter.

7.7. Quoted equities marginally increased by 0.40% in US\$ terms, from US\$463.70 million as at 31 December 2024 to US\$465.56 million (ZWG 112.46 billion) as at 31 March 2025. The share of quoted equities to total assets declined, with the proportion of total assets falling to 19% from 21% in the prior quarter.

7.8. Investments in unquoted equities increased by 33% to US\$105.06 million (ZWG 2.81 billion) during the quarter under review from US\$79.22 million reported in the last quarter. This resulted in a marginal increase in the proportion of unquoted equities to total assets from 3.51% to 4.24%.

7.9. The five-year asset trend is depicted in the diagram below.

Figure 5: Trend in Assets (US\$ Equivalent)

7.10. The figure above highlights fluctuations in assets over the five-year period, with notable peaks and troughs. The highest value, US\$3.43 billion, was recorded in 2022, compared to US\$2.48 billion as at the reporting period.

7.11. The sharp increase in the asset values in 2022 was attributed to the suppressed official exchange rate used to convert local currency values to US\$. This rate remained fixed for an extended period, despite not reflecting prevailing economic conditions.

7.12. Prescribed assets increased by 6%, rising from US\$264.4 million as at 31 December 2024 to US\$280 million as at the reporting date. The growth was driven by revaluation gains and new investments in the approved assets. Notwithstanding the surge, prescribed assets accounted for only 11.27% of total sector assets as at 31 March 2025, still below the minimum regulatory requirements of 20%, though up from 11% in the previous quarter.

7.13. To meet the required minimum threshold, the sector is encouraged to invest in a range of instruments granted prescribed asset status.

7.14. The number of gold coins of various denominations held by the pensions sector remained unchanged from the last quarter. However, the value of these coins increased by 22%, rising from ZWG134.73 million as at 31 December 2024 to ZWG164.55 million as at 31 March 2025, up. The increase was driven by gains in the price of gold. The tables below illustrate the gold-backed investments by the sector.

Table 6: Gold Coin Investments

Denomination	Insured	Self Admin	Standalone	Total
0.1Oz	0	2	18	20
0.25Oz	0	1	32	33
0.5Oz	9	35	2	46
1Oz	55	1,406	412	1,873
Number of coins	64	1,444	464	1,972
Value (ZWG millions)	5.14	122.92	36.50	164.55

Table 7: Gold Backed Digital Tokens

Sector	Value (ZWG millions)	Tokens held (MG in millions)
Insured	0.85	0.34
Self-Admin	27.74	11.05
Standalone	3.82	1.52
Total	32.40	12.92

8. Income

8.1. Total income for the quarter ended 31 March 2025 was ZWG4.76 billion, equivalent to US\$180.13 million. This represents an 88% decrease from the US\$1.50 billion reported during the same period last year. The sharp decline in fair value gains and other income categories was largely attributed to the stable exchange rate during the reporting quarter. Of the total income, US\$95.36 million was earned in foreign currency, accounting for 53% of the sector's total income.

8.2. The major sources of income were contributions and fair value gains, constituting 72% of total income, amounting to US\$130.27 million (ZWG 3.44 billion).

8.3. Contributions constituted 42% of total income with a total of US\$76 million (ZWG2.01 billion).

8.4. The general trend in contributions is shown in the figure below.

Figure 6: Five-Year Trend in Contributions (US\$ Equivalent)

9. Expenditure

9.1. Total expenditure for the period under review was US\$47.99 million (ZWG1.27 billion), down from US\$159 million in the prior year. Of this amount, US\$32.23 million (ZWG851.67 million), representing 67% of total expenditure, was incurred on benefits payments.

9.2. Total administrative expenses amounted to US\$15.75 million (ZWG416.27 billion), primarily driven by administration fees, investment management fees, administration fees and staff costs, which collectively accounted for 55% of total administrative expenditure. The Commission will continue to enforce compliance with the Expenses Framework.

9.3. The trend for expenses is shown in the figure below: -

Figure 7: Trend in Expenditure in US\$ Equivalent

9.4. Expenditure increased steadily, as indicated by the gradient of the trendline, although there was a decline in 2023 to align with the Expenses Framework.

9.5. Sector expense ratios for all funds are presented in Annexure 5, as assessed against the prescribed caps in the Expense Framework. Funds with ratios that do not comply, as indicated in Annexure 5, are required to operate within the defined expense thresholds.

10. Foreign Currency Denominated Assets

- 10.1. Foreign currency-denominated assets increased by 17%, from US\$555 million reported in the previous quarter to US\$653.82 million as at 31 March 2025, representing 27% of the total sector assets. The increase arose from new acquisitions of operating and investment assets.
- 10.2. The major asset classes were quoted equities, prescribed assets and investment property, which constituted 30%, 19% and 14%, respectively. These asset classes constituted 62.65% of the total forex assets in the period.
- 10.3. The table below shows the asset composition in foreign currency business.

Figure 8: Foreign Currency Assets

- 10.4. The holding of foreign currency-denominated assets has helped to preserve and create value for members.
- 10.5. Pension funds must ensure that the income from foreign currency-denominated assets is fairly distributed among members to enhance their benefits and savings.
- 10.6. Contribution arrears as at 31 March 2025 stood at US\$56.19 million, representing 8.59% of the sector's foreign currency-denominated assets.
- 10.7. Contribution arrears increased by 24% from US\$45.3 million compared to the previous quarter. Members of the Boards of Funds are urged to collaborate with sponsoring employers to address these arrears, which adversely impact members' reasonable expectations.
- 10.8. The increase in contribution arrears is attributable to the accrual of interest on outstanding amounts and the continued non-remittance by

some employers. To safeguard the security of pension fund assets, the Commission is actively engaging defaulting sponsoring employers to ensure remittance of outstanding contributions. Garnishee orders will be considered as a last resort in cases where employers fail to cooperate.

- 10.9. Boards of Funds are encouraged to establish clear contribution guidelines and work collaboratively with sponsoring employers to ensure the consistent and timely remittance of contributions, thereby safeguarding the interests of fund members.

11. Foreign Currency Income and Expenditure

- 11.1. Total foreign currency income for the quarter reached US\$95.36 million, a 93% increase from the US\$49.52 million reported on 31 March 2024.
- 11.2. Total foreign exchange contributions reached US\$39.69 million, an increase from US\$26 million. During the review period, these contributions represented 43% of the total foreign income.
- 11.3. For the quarter ended 31 March 2025, total foreign currency benefits expenditure reached US\$12.40 million, marking a 79% increase from US\$6.91 million in the previous year.
- 11.4. Administrative expenditure accounted for 39.45% of the total expenditure, with 60.55% of foreign currency resources allocated to the payment of benefits, the core function of the sector.
- 11.5. The table below shows key forex business matrices.

Table 8: Key Indicators for Forex Business

Indicator	US\$ (Millions)
Total contributions	39.69
Total income	95.36
Total benefits expenditure	12.40
Total administrative expenditure	8.08
Total expenditure	20.48
Total assets	653.82

12. Pension Fund Administrators

12.1. Total income earned by fund administrators from fund administration business was ZWG113.5 million (US\$4.3 million) compared to US\$5.5 million as at 31 March 2024.

12.2. Of the total income earned, foreign currency income amounted to US\$1.92 million, representing 44.72%. During the period under review, 11 out of the 14 administrators recorded US\$-denominated business.

12.3. Income from fund administration fees earned by administrators for services rendered was ZWG66.0 million (US\$2.5 million), constituting 58.17% of the total income. The table below shows the sources of income earned by administrators for the period under review.

Table 9: Sources of Income for Administrators

Source of income	ZWG 'millions'	US\$ - (ZWG Equivalent in millions)	Combined ZWG & US\$	Percentage of total income
			(ZWG millions)	
Admin fees	28.91	37.14	66.05	58.17%
Investment Income	17.70	6.01	23.71	20.88%
Cost of Guarantee	11.21	-	11.21	9.88%
Other Income	1.75	5.24	7.00	6.16%
Fair Value Gains	1.36	0.25	1.62	1.42%
Consultancy Fees	1.11	-	1.11	0.98%
Commission	0.60	1.93	2.53	2.23%
Rent Receivable	0.11	0.04	0.15	0.13%
Ill Health Fees	0.01	0.16	0.17	0.15%
Total	62.77	50.77	113.54	100%

12.4. As at 31 March 2025, the total expenditure amounted to ZWG165 million (US\$2.95 million), resulting in a loss of US\$1.03 million. This expenditure primarily included salaries, staff costs, general office expenses and commissions.

12.5. The table below outlines the main cost drivers and their respective proportions of the total expenses.

Table 10: Major Cost Drivers for Fund Administrator

Expense Item	Amount (ZWG)	% of Total Expenses
Salaries	67,048,626	41%
Other staff costs	22,857,891	14%
Other operating expenses	15,507,614	9%
Commission	11,478,748	7%
Rent payable	6,490,400	4%

12.6. Administrators are urged to align their expenditures with prevailing revenue levels to ensure long-term financial sustainability. Notably, 56% of administration fees are collected in foreign currency, despite foreign currency contributions accounting for only 35% of total contributions, highlighting a mismatch that requires attention.

12.7. The following table outlines the administration fees as a percentage of each administrator's total income and specifies the proportion of these fees received in foreign currency.

Table 11: Administrators' Administration Fees

Administrator	Administration Fees			Proportion of Forex Component to Total Admin Fees
	Combined	US\$	US\$ Converted	
	US\$ + ZWG			
Old Mutual	19,341,828	304,819	8,054,100	42%
Zimnat	1,233,307	27,243	719,841	58%
Minerva	19,259,989	508,976	13,448,469	70%
Fidelity	866,865	10,017	264,675	31%
First Mutual Life	13,884,473	345,475	9,128,348	66%

Comarton	5,951,812	97,059	2,564,551	43%
ZB Life	546,440	13,310	351,680	64%
CBZ	96,809	1,533	40,517	42%
Nyaradzo	403,652	10,248	270,778	67%
Zimbabwe Insurance Brokers	51,394	0	0	0%
Econet	243,549	4,630	122,342	50%
Totals	66,047,120	1,405,457	37,135,831	

Table 12: Administrators' Forex Income

Administrator	Total Income (ZWG + US\$)	Total Income (US\$)	US\$ Converted	Proportion of Forex Component to Total Income
Old Mutual	48,579,543	452,464	8,054,100	17%
Zimnat	7,530,053	192,686	719,841	10%
Minerva	24,006,488	627,796	13,448,469	56%
Fidelity	1,163,249	10,017	264,675	23%
First Mutual Life	16,639,387	345,475	9,128,348	55%
Bright Employee Benefits	6,880,412	161,408	2,170,529	32%
Comarton	7,104,417	98,418	2,564,551	36%
ZB Life	807,149	15,847	351,680	44%
CBZ	130,823	2,460	40,517	31%
Nyaradzo	403,652	10,248	270,778	67%
Zimbabwe Insurance Brokers	51,394	-	-	0%
Econet	243,549	4,630	122,342	50%
Total	113,540,116	1,921,450	37,135,831	

12.8. Total assets for independent administrators, excluding life assurers and brokers, amounted to ZWG53.25 million and US\$6.88 million. The US\$ denominated assets primarily comprised property, debtors, cash, and prepayments.

12.9. The breakdown of assets for independent administrators is as shown in the following table.

Table 13: Independent Administrators' Asset Distribution

Asset class	ZWG	USD(Converted)	% of Total assets
Property and equipment	25,493,183.00	2,976,678.10	47.35%
Equities	9,057,387.00	-	15.06%
Debtors	9,161,157.80	1,079,059.28	17.03%
Money market investments	3,627,310.17	-	6.03%
Bank and cash balances	2,937,409.65	2,357,388.57	8.81%
Intergroup receivables	1,871,114.00	- 130,775.74	2.89%
Staff loans	26,597.00	229,208.18	0.43%
Prepayments	71,442.47	368,487.56	0.73%
Other receivables	1,000,212.00	-	1.66%
Total	53,245,813.10	6,880,045.94	100%

12.10. For independent administrators, property and equipment constituted the most significant asset class, representing 47% of their total assets. This substantial allocation to property suggests a strong emphasis on real estate holdings within their investment portfolios.

12.11. Debtors, the second-largest asset class, accounted for 17% of total assets, indicating that a significant portion of assets is tied up in outstanding payments owed to the administrators. Equities comprised 15% of total assets.

13. Unclaimed Benefits

13.1. As at 31 March 2025, the total value of unclaimed benefits stood at ZWG268 million, equivalent to approximately US\$10 million. This reflects a 30% decrease from US\$14.25 million (ZWG368 million) recorded in December 2024.

13.2. The decline is primarily attributed to efforts by administrators to trace and compensate members with unclaimed benefits. A total of ZWG1,141,322 (US\$42,641), affecting 75 members, was remitted to the Guardian Fund in terms of the Administration of Estates Act [Chapter 6:01].

13.3. During the quarter under review, unclaimed benefits experienced a membership increase of 5% to 99,615 from 94,702 in December 2024. The increase in membership was primarily attributed to new retirees who left employment but were yet to claim their benefits, as well as data sanitisation by certain administrators who had previously failed to report the unclaimed benefits.

13.4. The figure below shows the unclaimed benefits classified by age.

Figure 9: Unclaimed Benefits Age Analysis

13.5. Below is a table showing unclaimed membership and amounts by administration model.

Table 14: Unclaimed Benefits Age Analysis by Administration Model

Unclaimed Benefits	Q1 2025 Membership	Q1 2025 Amount ZWG	Q4 2024 Membership	Q4 2024 Amount ZWG
Insured	11,508	76,956,894	11,598	112,047,835
Self-Admin	5,601	117,034,836	2,370	175,270,430
Stand-Alone	82,506	73,823,572	80,734	80,408,010
Total	99,615	267,815,302	94,702	367,726,275

13.6. Notably, there were 77,233 members with unclaimed benefits outstanding for more than 10 years. Over 90% of these members belonged to one fund—Clothing Industry Pension Fund—which is experiencing data challenges. The Commission is actively following up to ensure the proper classification of these members.

13.7. The figure below shows the trend in unclaimed membership over the past 12 months.

Figure 10: 1-Year Trend in Unclaimed Membership

13.8. In addition, the Commission will continue to enforce the provisions of Section 99 of the Administration of Estate Act [Chapter 6:01], which requires such unclaimed benefits to be transferred to the Guardian Fund.

Unclaimed Benefits by Administrative Model

13.9. An analysis of unclaimed benefits by administration model reveals key insights. The Self-Administration model holds the largest share, accounting for 43% of total unclaimed benefits. In contrast, the Stand-Alone and Insured models account for 28% and 29%, respectively, as illustrated below.

Figure 11: Unclaimed Membership by Administration Model

13.10. The Commission urges administrators to improve communication, education, and administrative processes across the administration models to ensure that members are able to claim their rightful benefits in a timely manner.

14. Non-Resident Pensioners

- 14.1. During the quarter under review, the cumulative amount owed to non-resident pensioners stood at ZWG12,767,173 (approximately US\$477,002), reflecting a decrease from US\$520,000 recorded in the previous quarter.
- 14.2. The number of non-resident pensioners declined by 40%, from 5,071 reported as at 31 December 2024 to 3,612 members as at 31 March 2025.
- 14.3. This reduction is attributed to benefits payments made to these members, some of whom have returned to Zimbabwe, thereby facilitating easier access to their benefits.
- 14.4. The accompanying table provides an overview of the cumulative amounts and membership for non-resident pensioners by administration model.

Table 15: Non-Resident Pensioners Amount & Membership by Model

Type of Administration	Amount (ZWG) Q1 2025	Membership Q1 2025	Amount (ZWG) Q4 2024	Membership Q4 2024
Insured	3,007,512.46	1,030	3,874,102.81	1,056
Self-Admin	31,587.60	98	202,973.08	370
Stand alone	9,728,073.11	2,484	9,345,769	3,645
Total	12,767,173.17	3,612	13,420,000	5,071

- 14.5. As indicated above, the Stand-Alone model accounts for the highest proportion of non-resident pensioners at 69%, followed by the Insured and Self-Administered models at 28% and 3%, respectively.
- 14.6. Funds are urged to expedite payments to these members, leveraging available forex income to ensure that members receive the benefit due to them.

15. Suspended Pensioners

- 15.1. For the quarter under review, the liability for suspended pensioners' benefits, excluding beneficiaries, amounted to ZWG39 million (approximately US\$ 1.5 million).
- 15.2. The number of suspended members declined slightly to 14,668, down from 14,719 reported in the previous quarter.
- 15.3. The decline in the number of suspended pensioners is commendable. Pension funds are encouraged to continue efforts to trace suspended

members and ensure that they receive their monthly benefits in a timely manner.

15.4. An analysis of suspended membership by pension model is as shown below.

Table 16: Suspended Pensioners Amount & Membership by Model

Suspended members by Model	ZWG	Membership
Insured	13,748,982.10	4,295
Self-Admin	4,799,031.52	4,351
Stand alone	20,207,329.15	6,022
Total	38,755,342.77	14,668

15.5. There is a concerning concentration of suspended benefits within the Stand-Alone model, which accounts for the highest total at ZWG43 million (approximately US\$1.6 million). This compares to ZWG15 million (US\$0.6 million) under the Insured model and ZWG8 million (US\$0.3 million) under the Self-Administered model.,

15.6. The figure below shows the trend in suspended members over the past 12 months.

Figure 12: 1- Year Trend in Suspended Membership

15.7. The Commission urges fund administrators to actively sensitise members on the importance of submitting their certificates of existence on time, in order to prevent an increase in the number of suspended pensioners.

16. Commutations

16.1. During the period under review, the total amount commuted was ZWG47 million, equivalent to US\$1.78 million. This reflects a growing preference to utilise the commutation options by members.

16.2. The bulk of the commuted amounts were full commutations, amounting to ZWG45 million (US\$1.70 million), which represents 96% of the total, with one-third and partial commutations making up the remaining 4%.

Commutations By Purpose

16.3. The main reasons for commutations during the period under review were retirement, retrenchment, and medical fees.

16.4. The figure below shows the breakdown of commutations by purpose.

Figure 13: Commutations by Purpose

17. Complaints Handling

17.1. The Commission received a total of 56 complaints from pension scheme members during the quarter under review. Of these complaints, 43 were resolved, translating to a resolution rate of 77%.

17.2. The outstanding complaints mainly related to pre-2009 compensation, which the Commission is engaging respective stakeholders to ensure the resolution of such complaints.

17.3. The figure below shows the nature of the complaints received.

Figure 14: Nature of Complaints

17.4. As indicated above, 39% of complaints related to low benefits while 29% related to unpaid benefits.

17.5. The Commission remains concerned about the low benefits paid to members and continues to monitor the performance of the underlying assets to ensure that members benefit from the returns.

17.6. Regarding unpaid benefits, the main reason was communication gaps between the fund and the members, where some members were not aware of the claim procedures and the required documents to be submitted to the fund to facilitate payment of benefits.

17.7. The Commission will continue to enforce improved communication by pension funds, which includes the holding of Annual General Meetings by pension funds, which is a requirement of the Pensions and Provident Funds Act.

18. Anti-Money Laundering and Combating the Financing of Terrorism and Proliferation Financing

18.1. All 14 stand-alone pension funds and three (3) independent fund administrators submitted their Q1 2025 AML/CFT/CPF returns in compliance with the reporting requirements.

Assessment of ML, TF and PF Inherent Risks and Controls

18.2. **Customer Risk:** Only four (4) stand-alone pension funds identified high-risk clients, including politically exposed persons (PEPs). The pensions sector remains low risk to money laundering as contributions are deducted directly from salaries. Simplified customer due diligence (CDD) should be applied, and in cases of identified high-risk customers, enhanced due diligence measures should be enforced.

18.3. Fund administrators managing in-house products like, preservation funds and income drawdown schemes must have sufficient CDD information.

18.4. Accurate and up to-date records of all members and pensioners should be maintained as part of ongoing due diligence obligations.

18.5. **Geographic Risk:** No clients were reported from the Financial Action Task Force sanctioned jurisdictions.

18.6. **Product Risk:** Only six (6) pension funds reported additional voluntary contributions apart from the normal contributions. The additional voluntary contributions were payroll-deducted and are subject to cap limits as per the fund rules, therefore, mitigating the fund against ML risks.

AML/CFT/CPF Controls

18.7. Despite the low ML risk exposure, pension funds and administrators should continuously implement appropriate general controls. Pension funds may be vulnerable to terrorist and proliferation financing, which are financed from both legitimate and illegitimate income sources. The Commission noted the following good practices:

18.8. **AML/CFT/CPF Awareness:** Several funds conducted training for staff, management, and trustees to enhance understanding of regulatory obligations.

- 18.9. **Risk Understanding:** Some entities identified high-risk clients and applied enhanced monitoring.
- 18.10. **Sanctions Screening:** United Nations Security Council Resolution (UNSCR) screening is being performed continuously.
- 18.11. **Policy Frameworks:** Funds reported having documented AML/CFT/CPF policies and procedures.
- 18.12. Two pension funds showed limited understanding of their AML/CFT/CPF obligations due to their small size and limited capacity. The entities are being encouraged to take advantage of the free trainings being conducted by the Commission, as indicated on the 2025 IPEC industry training calendar.

Suspicious and Cash Transaction Reports

- 18.13. No Suspicious Transaction Reports (STRs) were filed by pension funds or administrators during the quarter.
- 18.14. Two pension funds submitted seven large Cash Transaction Reports (CTRs), amounting to US\$25,308.
- 18.15. Pension funds and administrators are being reminded of the requirement to file nil returns as per the FIU AML/CFT Directive 01/05/2023 issued in terms of section 30(6) of the Money Laundering and Proceeds of Crime Act (MLPC) Act.
- 18.16. To improve their quarterly reporting and strengthen their risk mitigation systems going forward, pension entities are being urged to:
- Report ML/TF/PF risks from pension business separately from those arising from investment activities.
 - Establish internal escalation procedures for suspicious activities.
 - Ensure integration of AML/CFT/CPF considerations into enterprise risk management frameworks.
- 18.17. Overall, notable positive AML/CFT/CPF practices were observed from the quarterly return submissions. The Commission will continue to provide guidance and monitor the sub-sector level of compliance with the AML/CFT/CPF requirements.

19. Conclusion

- 19.1. In 2025, the economy faces a complex mix of challenges and opportunities. Key sectors like agriculture and mining continue to drive growth, but persistent inflation and currency volatility remain significant obstacles.
- 19.2. A major challenge facing the pensions sector is the widespread failure by many employers to remit pension contributions, leading to a serious shortfall in funds available for pensioners. This problem threatens the financial security of pensioners and demands urgent corrective action from sponsoring employers.
- 19.3. The Commission urges all stakeholders within the pensions delivery chain to actively contribute to improving outcomes for pension scheme members, particularly by ensuring the timely payment of benefits that align with members' reasonable expectations. The importance of comprehensive pension reforms, driven by a collaborative, multi-stakeholder approach, cannot be overstated.
- 19.4. Persistent data inconsistencies remain a concern. The Commission is committed to resolving these and other related issues to enable accurate reporting and ensure the correct calculation of member benefits.
- 19.5. Going forward, the sector must prioritise improving contribution remittances by ensuring that employers consistently meet their obligations. This is essential to securing meaningful and sustainable benefits for pensioners.

20. Annexures

Annexure 1: Consolidated Industry Statement of Comprehensive Income for the Quarter Ended 31 March 2025 - ZWG

	Insured Funds	Self-Administered Funds	Stand-Alone Funds	Total Q1 2025
Income				
Year to date Contributions (Including arrears)	569,559,749	693,086,173	752,272,328	2,014,918,249
