SECTION B

Economic Overview

SECTION B: ECONOMIC OVERVIEW

2 ECONOMIC OVERVIEW

2.1 Introduction

2.1.1 The Zimbabwe economic landscape in the first quarter of 2025 was characterized by a notable stabilization of both inflation and the exchange rate, following an initial inflationary uptick in January. This stability is largely attributed to the resolute, tight monetary policy implemented by the Reserve Bank of Zimbabwe (RBZ). While this policy stance resulted in temporary liquidity constraints, its primary objectives of price and exchange rate stability were achieved. The RBZ proactively addressed liquidity concerns through targeted interventions. Furthermore, the central bank continued its efforts to enhance the efficiency of the Willing-Buyer Willing-Seller (WBWS) foreign exchange market and augment national foreign currency reserves, building on the foundational work of the preceding quarter to underpin sustained economic growth prospects for the remainder of the year.

2.2 Domestic Macro-Prudential Analysis

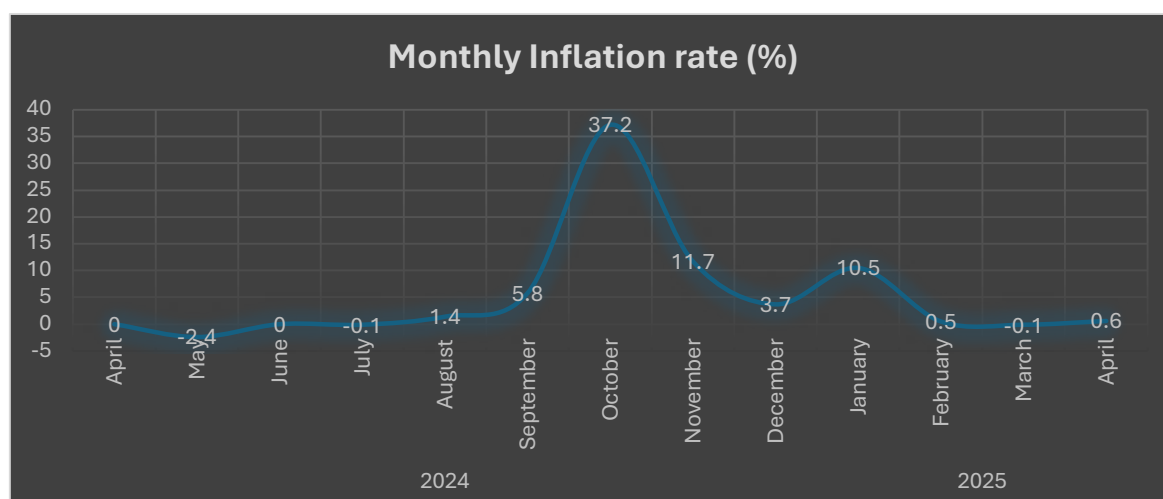

2.2.1 During the first quarter of 2025, the Zimbabwean economy experienced a period of relative stability in both inflation and exchange rate dynamics. This outcome is directly correlated with the stringent monetary policy framework maintained by the Reserve Bank of Zimbabwe throughout the quarter. Key measures included upward adjustments to the Bank Policy Rate and statutory reserve requirements. Increased exchange rate flexibility within the interbank market, operating within the context of these tight monetary conditions, further contributed to the observed stability. Strategic foreign exchange market interventions by the Reserve Bank facilitated efficient market clearing and ensured a consistent flow of foreign currency. It is important to note that this restrictive monetary policy did lead to transient liquidity challenges within the banking sector. The Reserve Bank responded to these

challenges through the provision of an intra-day liquidity facility for banks and the planned disbursement of funds under the Targeted Finance Facility (TFF).

2.3 Inflation Developments

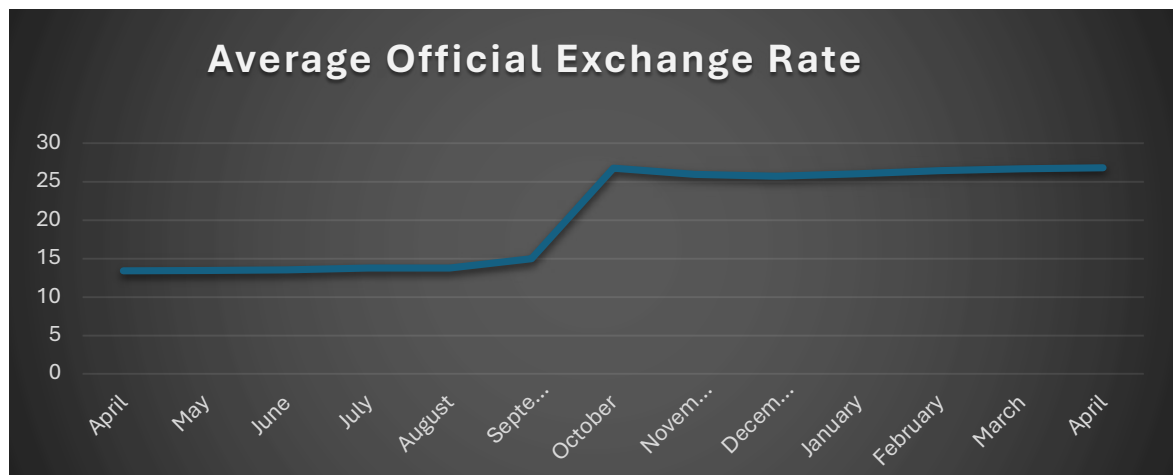

2.3.1 Monthly inflation, denominated in ZWG, exhibited a downward trend in January 2025. Subsequently, a period of stability was observed for the remainder of the first quarter. This stabilization is a direct consequence of the prevailing tight monetary policy stance adopted by the Reserve Bank of Zimbabwe.

Figure 2-1: Monthly Inflation Trends

2.4 Exchange Rate Developments

2.4.1 The exchange rate demonstrated stability throughout the first quarter of 2025. This stability is a direct outcome of the monetary policy measures implemented in the latter part of the preceding year. Further evidence of this stability is the observed compression of exchange rate premiums. The Reserve Bank of Zimbabwe continued to deepen the Willing-Buyer Willing-Seller (WBWS) interbank market for foreign exchange, a strategic initiative aimed at enhancing price discovery mechanisms and overall market efficiency.

Figure 2-2: Monthly Exchange Rates

2.5 Stock Market Performance

(a) Zimbabwe Stock Exchange (ZSE):

The introduction of the ZWG currency in 2024 had a discernible influence on the performance of the Zimbabwe Stock Exchange (ZSE) during the period spanning January to March 2025, resulting in the aggregate market capitalization of the ZSE registering a gradual increase from ZWG 58.96 billion in January to ZWG 62.96 billion in March 2025.

(b) Victoria Falls Stock Exchange Market (VFEX)

The performance of the Victoria Falls Stock Exchange Market (VFEX) in the first quarter of 2025 recorded a market capitalization of US\$1.33 billion, representing a 4.27 percent increase compared to the US\$1.27 billion recorded in the corresponding period of the previous year.

SECTION D

Short-Term Insurance Companies

SECTION D: DIRECT INSURANCE COMPANIES

4 DIRECT INSURANCE COMPANIES

4.1 Introduction

4.1.1 The following analysis is based on 19 direct insurers who submitted their first-quarter 2025 returns out of 20 registered players.

4.2 Performance in Terms of Consolidated Insurance Revenue

4.2.1 During the period under review, short-term insurers reported total insurance revenue amounting to ZWG1.78 billion, equivalent to US\$67.31 million at the average exchange rate of US\$1: ZWG26.42 for the three months. This represents a 6% increase from the US\$63.21 million reported during the same period in 2024.

4.2.2 A detailed breakdown of the consolidated Insurance Revenue by line of business is shown in Table 4-1 below.

Table 4-1: Short-term Insurers' Insurance Revenue by Line of Business

Line of Business	Q1 2025 Insurance Revenue (ZWG millions)	Q1 2025 Insurance Revenue (US\$ millions)	Q1 2024 Insurance Revenue (US\$ millions)	% Change	Q1 2025 Contribution to Total Insurance Revenue

Total	1,778.39	67.31	63.21	6%	100%

Other comprises Credit, Director's Liability, Goods in Transit, Health, Legal Aid and Travel.*

- 4.2.3 As shown in Table 4-1 above, revenue from the marine insurance business recorded a significant increase of 139%, while public liability insurance also experienced substantial growth of 105%.
- 4.2.4 In contrast, both aviation and hail insurance classes experienced notable declines during the reporting period. Aviation insurance revenue dropped sharply by 73%, while hail insurance revenue fell by 54%.
- 4.2.5 These substantial declines may be attributed to timing discrepancies in revenue recognition following the transition from IFRS 4 to IFRS 17 reporting. Although IFRS 17 became effective in January 2024, implementation by some sector players was delayed due to high cost of system upgrades and shortage of technical expertise. As entities fine-tuned their reporting systems during the transition period, the changes negatively impacted some revenue lines, particularly in the hail and aviation segments.
- 4.2.6 Regarding aviation insurance, it is important to note that most of the business is generated from a few key players, including Air Zimbabwe. The recent announcement of the sale of two Air Zimbabwe B777-200ER passenger planes may partially explain the decline in aviation insurance revenue.
- 4.2.7 For hail insurance, the decline is likely due to some insurers choosing not to underwrite this line of business after experiencing some poor underwriting results during the previous agricultural season. These insurers have shifted their focus to core, more profitable segments, resulting in reduced coverage in high-risk areas such as hail. This strategic move is likely aimed at improving profitability and better managing risk, particularly in light of rising claim frequencies and the increasing impact of climate change.
- 4.2.8 During the reporting period, motor and fire classes of business have remained the primary drivers of insurance revenue, collectively contributing 62% of the total revenue, as shown in Table 4-1.

4.3 Foreign Currency-Denominated Insurance Revenue

4.3.1 Short-term insurers reported foreign currency-denominated insurance revenue of US\$54.71 million for the quarter ended 31 March 2025, representing a 3% increase from US\$53.18 million reported in March 2024. Foreign currency business accounted for 76% of total insurance revenue reported in the first quarter of 2025.

4.3.2 A detailed breakdown of the foreign currency-denominated insurance revenue per line of business is shown in Table 4-2 below:

Table 4-2: Short-Term Insurers' Foreign Currency Denominated Insurance Revenue by Line of Business.

4.3.3 As shown in Table 4-2, insurance revenue from the public liability, engineering, and marine classes of business increased significantly by 192%, 102% and 102%, respectively. In contrast, revenue from aviation, miscellaneous accident, hail, farming and fire classes declined by 55%, 50%, 36%, 7% and 5%, respectively.

4.3.4 Also reflected in Table 4-2, the major sources of foreign currency-denominated insurance revenue for short-term insurers were the motor and fire classes, which together accounted for 59% of the total insurance revenue.

4.4 Number of Policies

4.4.1 As at 31 March 2025, direct insurers recorded 501,458 policies, a 6% increase from the 474,727 policies reported as at 31 December 2024. During the period under review, 152,190 new policies, including renewals, were underwritten, while 125,459 exits were recorded. The exits included cancellations as well as expired or matured risks.

4.4.2 Most of the policies reported during the quarter ended 31 March 2025 were under the motor line of business, totalling 449,185 and accounting for 90% of all policies.

4.4.3 For more information on policyholder statistics, see Appendix 1E.

4.5 Insurance Contracts Performance and Earnings

4.5.1 For the period under review, short-term insurers reported an insurance service result of ZWG207.50 million (US\$7.85 million). Incurred service expenses from insurance contracts issued amounted to ZWG1.35 billion (US\$51.14 million), while other expenditures not directly attributable to insurance contracts totalled ZWG177.95 million (US\$6.73 million).

4.5.2 Net income from reinsurance contracts held amounted to ZWG219.51 million (US\$8.31 million) during the period under review.

4.5.3 Twenty-one percent (21%) of short-term insurers reported losses on onerous contracts amounting to ZWG5.75 million (US\$217.64 thousand).

4.5.4 The sector recorded total investment income of ZWG163.67 million (US\$6.19 million) for the period under review. Only two (2) short-term insurers reported negative investment income. The net investment result stood at ZWG371.17 million (US\$14.05 million).

- 4.5.5 Total investment income was mainly attributable to property fair value adjustments and net foreign exchange gains, which accounted for 13% and 47% of the total, respectively.
- 4.5.6 The average combined ratio for short-term insurers was 88%. Three (3) entities recorded losses due to high combined ratios exceeding 100%, primarily driven by elevated expenses. The sector's average claims and expense ratios were 36% and 52%, respectively.
- 4.5.7 Profit before and after tax reported for the period under review amounted to ZWG193.22 million (US\$7.31 million) and ZWG172.31 million (US\$6.52 million), respectively. Seven (7) short-term insurers reported losses before and after tax.
- 4.5.8 For more information regarding the performance, financial positions, and key performance indicators for the short-term insurers, refer to Appendix 1B, 1C, and 1D, respectively.

4.6 Capitalisation

- 4.6.1 As shown in Table 4-3 below, 89% of short-term insurers complied with the approved US\$-indexed MCR of US\$750,000 as at 31 March 2025. This reflects strong adherence to regulatory capital standards, indicating financial stability and sound risk management practices among most insurers.
- 4.6.2 The sector's capital position recorded a 24% year-to-date increase, primarily driven by a 435% rise in share capital from US\$295,000 to US\$1.58 million and a 185% increase in retained earnings from prior years, which grew from US\$20.30 million to US\$57.81 million.

4.6.3 This variation in performance underscores the diverse financial health and stability across the sector. It highlights that while some insurers were better positioned to withstand market fluctuations and operational challenges, others remained vulnerable. These contrasting outcomes reinforce the importance of robust risk management practices and maintaining adequate capital buffers to ensure long-term sustainability.

4.7 Asset Quality

4.7.1 As at 31 March 2025, short-term insurers reported total assets of ZWG6.36 billion (US\$237.74 million), a 1% decrease from ZWG 6.18 billion (US\$239.43 million) reported as at 31 December 2024. Table 4-4 below provides a breakdown of total assets by class.

Other include Deferred tax assets, Deferred acquisition cost assets*

4.7.2 The decrease in total assets was primarily driven by declines in cash and bank balances, reinsurance assets, intangible assets, and other receivables, which fell by 38%, 19%, 18% and 12%, respectively.

4.7.3 Insurance assets and reinsurance assets amounted to ZWG660.67 million (US\$24.68 million) and ZWG1.40 billion (US\$52.37 million), respectively.

4.7.4 Reinsurance assets and investment property were the two largest asset classes, collectively accounting for 39% of total assets.

4.7.5 Reinsurance Assets constituted 22% of total assets, posing counterparty credit risk. In the event of defaults, delay payments, or face insolvency, the insurers may struggle to meet their obligations.

4.7.6 Investment property alone constituted 17% of total assets, which is within the 25% limit set by the IPEC Investment Guidelines issued in terms of Circular 3 of 2025.

4.7.7 Cash and bank balances accounted for 4% of total assets, falling below the 20% upper limit. Insurers must maintain sufficient liquidity buffers to manage unexpected claims or adverse market developments.

4.7.8 The sector also held other liquid assets such as money market and short-term investments. However, these remained well below the 50% upper threshold, suggesting vulnerability to liquidity risk in the event of large claim payouts or unforeseen financial shocks.

4.8 Prescribed Assets

4.8.1 Total investments in prescribed assets by short-term insurers amounted to ZWG422 million (US\$15.77 million), reflecting an average compliance level of 10%.

4.8.2 Prescribed assets constituted 7% of total assets. Only six (6) out of the 19 insurers met the minimum prescribed asset ratio of 10%.

4.9 Insurance Liabilities

4.9.1 Insurance liabilities decreased by 15% from US\$111.09 million in December 2024 to ZWG2.48 billion (US\$94.63 million) as at 31 March 2025

4.9.2 Reinsurance liabilities increased slightly by 1% from US\$38.52 million to ZWG1.04 billion (US\$38.83 million) over the same period.

4.10 Liquidity

4.10.1 As at 31 March 2025, liquid assets amounted to ZWG852.94 million (US\$31.87 million), accounting for 13% of total assets. Liquid financial instruments are essential for short-term insurers to meet claims as they fall due.

4.10.2 Eleven (11) out of the 19 short-term insurers reported negative working capital and current ratios below 1, indicating potential difficulties in meeting short-term financial obligations.

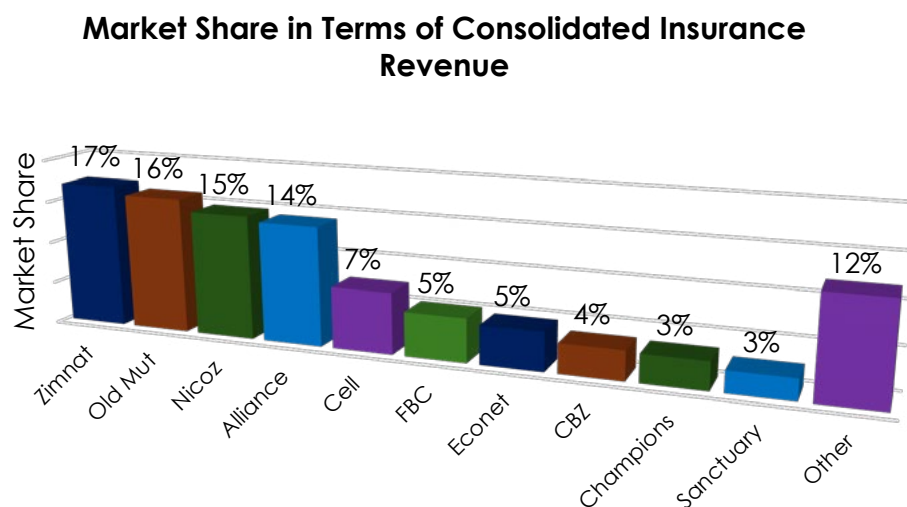

4.10.3 Current assets amounted to ZWG3.58 billion (US\$133.93 million), representing 56% of total sector assets. This indicates that a significant portion of assets held in liquid form to facilitate timely claims settlement and meet other short-term obligations.

Reinsurance Companies

SECTION E: REINSURANCE COMPANIES

5 REINSURANCE COMPANIES

5.1 This section provides an analysis of the performance of the ten (10) registered short-term reinsurers.

5.2 Consolidated Insurance Revenue

5.2.1 The short-term reinsurance sector reported consolidated insurance revenue amounting to ZWG1.16 billion (US\$43.79 million) for the period under review. This reflects a significant increase of 26% from the US\$34.77 million reported during the first quarter of 2024.

5.2.2 A detailed breakdown of the consolidated insurance revenue per class of business is shown in Table 5-1 below.

Table 5-1: Short-term Reinsurers' Insurance Revenue by Class of Business.

Class of Business	Insurance Revenue (ZWG Million) 31 Mar 25	Insurance Revenue (US\$ Million) 31 Mar 25	Insurance Revenue (US\$ Million) 31 Mar 24	Change	Contribution
Fire	482.94	18.28	17.57	4%	42%
Casualty	181.38	6.86	0.86	698%	16%

Others*	36.46	1.38	0.69	100%	3%
Total	1,157.12	43.79	34.77	26%	100%

- 5.2.3 As shown in Table 5-1, the casualty, miscellaneous accident, motor, aviation, and bonds/guarantees classes of business recorded a significant increase in insurance revenue. This growth was likely driven by a combination of new business acquisitions, reinsurance renewals, and the restructuring of reinsurance contracts, with direct insurers ceding more risk. The fire and farming classes maintained steady growth of 4% and 7% in insurance revenue, respectively.
- 5.2.4 The hail class of business insurance experienced a sharp decline in insurance revenue, decreasing by 72% to US\$0.45 million, compared to US\$1.58 million recorded in the first quarter of 2024. The decrease may be attributed to reinsurers shifting focus toward managing exposure and prioritising more profitable business lines.
- 5.2.5 Insurance revenue from the engineering class of business declined by 17% to US\$1.77 million during the period under review, down from US\$2.12 million recorded in the first quarter of 2024. The decline is likely due to the cyclical and project-based nature of the engineering business, which often leads to fluctuations.
- 5.2.6 The fire class of business remained the leading contributor to total insurance revenue, accounting for 42% and 51% during the first quarters of 2025 and 2024, respectively. Additionally, the top three (3) insurance revenue-generating business classes, fire, casualty and miscellaneous accident, collectively contributed 79% of the market share.

5.3 Foreign Currency-Denominated Business

- 5.3.1 During the period under review, short-term reinsurers reported foreign currency-denominated insurance revenue of US\$42.27 million, up from US\$32.75 million reported in the same period in 2024, representing a 29% increase.
- 5.3.2 Ninety-seven percent (97%) of the reinsurance business was underwritten exclusively in foreign currency. This trend indicates a shift whereby

reinsurers are increasingly focused on foreign currency-denominated business, while direct insurers retain most of their business written in local currency.

5.3.3 Table 5-2 below shows the insurance revenue by line of business for the period under review.

Table 5-2: Short-Term Reinsurers' Foreign Currency Denominated Insurance Revenue by Line of Business.

Class of Business	Insurance Revenue (US\$ Million) 31 Mar 25	Insurance Revenue (US\$ Million) 31 Mar 24	Change	Contribution 31 Mar 25
Fire	17.41	16.12	8%	41%
Casualty	6.74	1.00	574%	16%
Motor	4.34	2.88	51%	10%
Miscellaneous Accident	4.75	2.40	98%	11%
Engineering	1.77	1.88	-6%	4%
Aviation	1.73	1.25	38%	4%

Total	42.27	32.75	29%	100%

Other* include Personal Accident, Credit, Health, Political Violence, Terrorism, Pecuniary, Oil and Gas, and Public Liability.

5.3.4 As illustrated in Table 5-2, foreign currency-denominated insurance revenue followed trends similar to those shown in Table 5-1 above. Revenue from fire, casualty, motor, miscellaneous accident, aviation, farming, and bonds/guarantee classes of business increased compared to the insurance revenue reported in the comparative period in 2024.

5.3.5 In contrast, the engineering, marine and hail classes of business, recorded declines in insurance revenue compared to the first quarter of 2024.

5.3.6 The fire, casualty, and miscellaneous classes were the top contributors to insurance revenue, collectively accounting for 68% of the market share.

5.4 Number of Policies

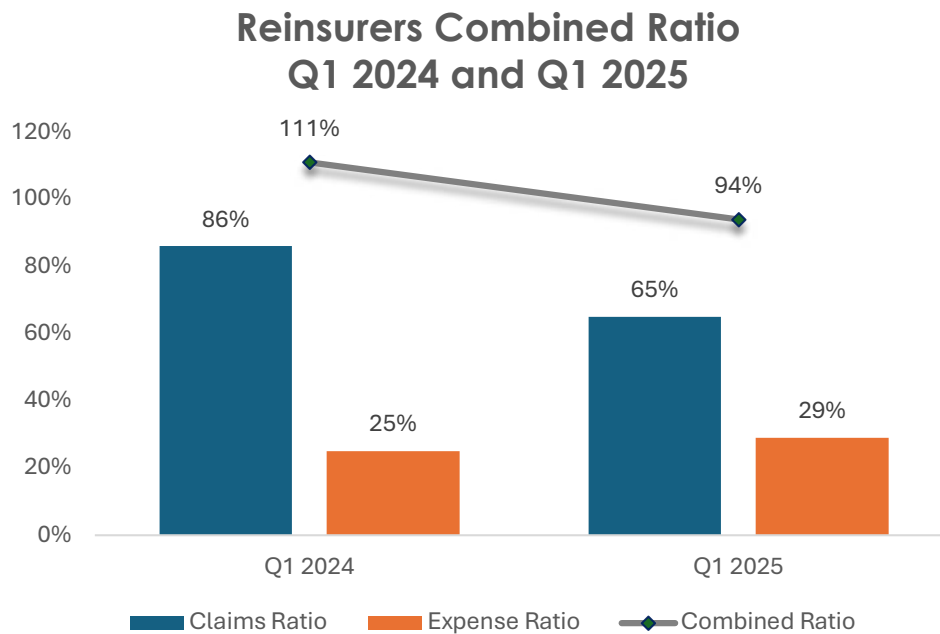

5.4.1 Under facultative reinsurance arrangements, reinsurers had 10,455 active policies as at 31 March 2025. During the quarter under review, 3,580 new policies were underwritten, while 2,319 policy exits, comprising cancellations and matured/expired risks were recorded.

5.4.2 Under treaty reinsurance arrangements, reinsurers reported 1,434 active policies at the end of the quarter. During the same period, 802 new policies were underwritten, and 143 exits were reported.

5.4.3 For a detailed breakdown of policy movements by class of business, refer to Appendix 2D.

5.5 Short-term Reinsurers' Performance and Earnings

5.5.1 For the period under review, short-term reinsurers reported an insurance service result of ZWG78.45 million (US\$2.97 million). The sector's underwriting profitability improved, as reflected by a combined ratio of 94%, compared to 111% reported in the comparative period of 2024. Figure 5-1 illustrates the comparative combined ratios for Q1 2024 and Q1 2025.

Figure 5-1: Short-Term Reinsurers' Combined Ratio

5.5.2 As depicted in Figure 5-1, the high combined ratio reported in the first quarter of 2024 was characterised by high inflation, which resulted in fluctuating and higher cost of claims compared to the period under review, which was characterised by a stable macroeconomic environment.

5.5.3 The sector claims and expense ratios for the quarter under review were 65% and 29%, respectively.

5.5.4 The sector reported service expenses from reinsurance contracts issued amounting to ZWG985.54 million (US\$37.3 million), with claims accounting for 66% of these expenses. Other expenditures not directly attributable to insurance contracts amounted to ZWG84.22 million (US\$3.19 million).

5.5.5 Net expenses from reinsurance contracts held amounted to ZWG93.12 million (US\$ 3.52 million) during the review period.

5.5.6 Fifty percent (50%) of reinsurers reported losses on onerous insurance contracts amounting to ZWG5.86 million (US\$222,000).

5.5.7 The sector recorded a positive total investment income of ZWG18.57 million (US\$703,000), although 20% of reinsurers reported negative investment returns during the review period.

5.5.8 Total investment income was primarily driven by interest income (67%), net foreign exchange income gains (31%), and rental income (19%).

5.5.9 The sector recorded total income of ZWG1.18 billion (US\$ 44.5 million), of which 98% was generated from insurance activities and 2% from investment activities.

5.5.10 For the period under review, two (2) reinsurers reported losses before tax, culminating in an overall sector loss position of ZWG2.54 million (US\$96,000).

5.5.11 For detailed information on performance metrics, financial positions, and key performance indicators of short-term reinsurers, refer to Appendices 2A, 2B, and 2C, respectively.

5.6 Capitalisation

5.6.1 As at 31 March 2025, 80% of registered short-term reinsurers reported capital positions above the approved minimum capital required of US\$2 million. These reported figures, however, were computed without adjusting for the non-admissibility of certain assets, as stipulated in Statutory Instrument 95 of 2017.

5.6.2 The reported capital positions are shown in Table 5-3 below.

- 5.7.3 As illustrated in Table 5-4, and excluding reinsurance and insurance-related assets, reinsurers' sector assets were relatively evenly distributed between short and long-term asset classes.
- 5.7.4 Investments in prescribed assets increased by 12%, rising to US\$21.56 million from US\$19.24 million reported as at 31 December 2024. This growth reflects the Commission's ongoing efforts to enforce compliance.
- 5.7.5 The sector's average prescribed asset ratio continued to improve, rising marginally by 0.82% to 16.01% as at 31 March 2025, up from 15.19% reported as at 31 December 2024.
- 5.7.6 Seventy percent (70%) of reinsurers were compliant with the minimum prescribed asset ratio of 10%. To support ongoing compliance, the Commission encourages entities to regularly self-assess their prescribed asset ratios.
- 5.7.7 Additionally, the Commission will continue engaging with non-compliant entities to enforce compliance.
- 5.7.8 Only 40% of reinsurers were compliant with the investment limits outlined in Circular 3 of 2025 (Investment Guidelines for Short-Term Insurance Companies). Most investments were concentrated in investment property, money market investments, investments in subsidiaries, and prescribed asset classes.
- 5.7.9 The Commission urges non-compliant reinsurers to realign their investment portfolios in accordance with the stipulated guidelines.

5.8 Reinsurance Liabilities

- 5.8.1 Insurance liabilities for the period under review increased by 26% to ZWG1.65 billion (US\$61.78 million) from US\$48.94 million reported as at 31 December 2024.

5.8.2 The reinsurance liabilities decreased significantly by 21% to ZWG721.44 million (US\$26.95 million) from US\$34.02 million reported as at 31 December 2024.

5.9 Liquidity

5.9.1 As at 31 March 2025, liquid assets held by short-term reinsurers amounted to ZWG1.52 billion (US\$56.95 million), representing 30% of total assets. Liquid financial instruments are important for reinsurers to meet claims as they fall due.

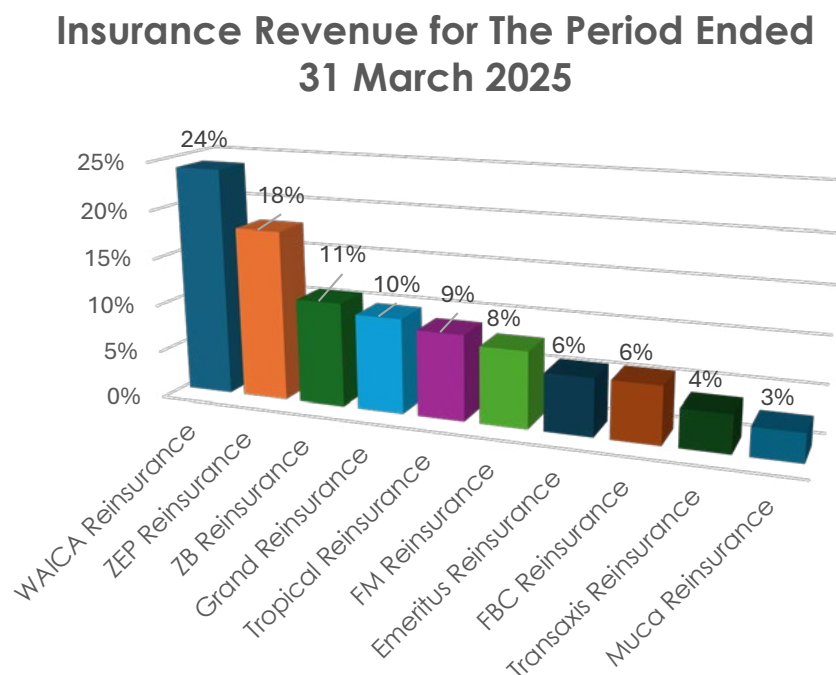

5.9.2 The sector's average current ratio stood at 1.31 times, indicating a generally sound ability to meet short-term obligations. However, one (1) short-term reinsurer reported a negative working capital position and a current ratio below 1, signalling potential liquidity challenges.

5.9.3 Current assets amounted to ZWG3.55 billion (US\$132.63 million), accounting for 69% of the total sector assets. Thus, reinsurers held most of their assets in liquid form to facilitate the timely settlement of claims and other short-term obligation.

5.10 Market Share for Reinsurers

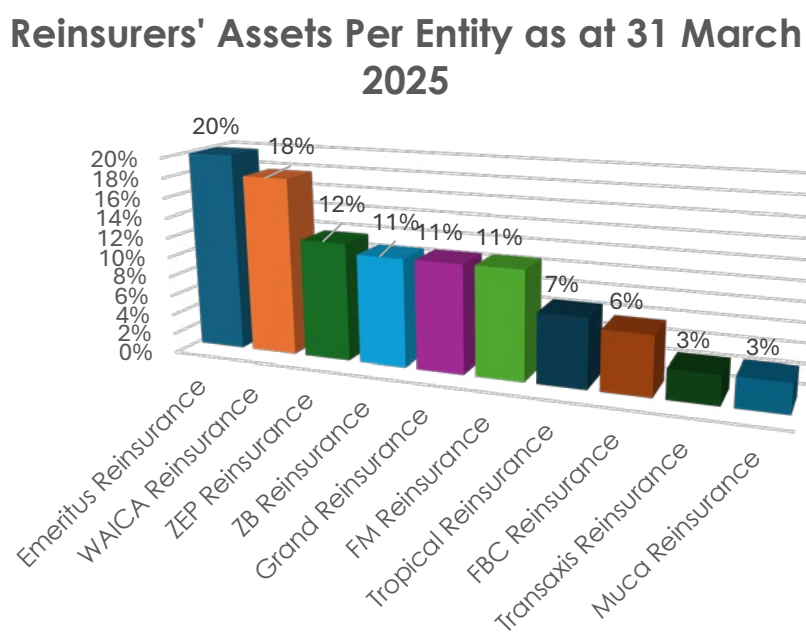

5.10.1 As illustrated in Figure 5-1 below, the market leaders in terms of insurance revenue for the period under review were WAICA Reinsurance, ZEP Reinsurance, and ZB Reinsurance. Collectively, these reinsurers accounted for 53% of the total market share.

Figure 5-2: Market Share for Short-term Reinsurers in Terms of Consolidated Insurance Revenue.

5.10.2 In terms of total assets, Emeritus Reinsurance, WAICA Reinsurance, and ZEP Reinsurance were the market leaders with a combined market share of 50% as depicted in Figure 5-3.

9.2 Complaint Ratio

9.2.1 The complaint ratio serves as an indicator of how fairly an insurance entity treats its customers. A lower ratio, signifies fewer complaints relative to the insurer's market share and suggest better customer service. Conversely, a ratio above 100% indicates that policyholders may have been unfairly treated, which is a cause for concern to the Commission.

9.2.2 The complaint ratio is calculated by dividing an insurer's market share of complaints by its market share of insurance revenue.

9.2.3 Table 9-3 below shows the complaints ratio per entity for the short-term sector.

Table 9-3: Complaints Ratio Per Entity
