

Life Assurance Sector Report

for the Nine Months Ended 30 September 2025

Email: enquiry@ipec.co.zw

Protecting the Interests of Insurance and Pension Consumers

Disclaimer

- i. The Insurance and Pensions Commission (IPEC) has prepared this report exclusively for the informational purposes of stakeholders in the insurance sector. It may not be reproduced, redistributed, communicated to a third party, or relied upon by any other person for any other purpose without the Commission's prior written consent.
- ii. The Commission is not liable for any use of this report beyond the purposes stated above.
- iii. This report covers the life assurance and life reinsurance business for the nine months ended 30 September 2025, with figures drawn from unaudited accounts submitted by regulated life insurers and reinsurers.
- iv. The data in this report is based on the International Financial Reporting Standard (IFRS) 17 – Insurance Contracts.
- v. Kindly note that all financial figures are in ZWG unless otherwise indicated.
- vi. The ZWG amounts are presented in nominal terms unless specified as absolute terms.
- vii. The Statement of Profit and Loss figures are compared to the same period in the previous year, as the transactions are cumulative and not directly comparable on a quarterly basis. In contrast, the Statement of Financial Position is compared to the previous quarter, as this provides a clearer indication of the industry's performance over the two quarters.
- viii. The conversion of ZWG revenue and assets to US dollars was done using the average exchange rate of ZWG 26.6851 for the review period and the closing interbank rate of ZWG 26.6439, respectively.
- ix. The data in this report is based on 12 direct life insurers and five (5) reinsurers that are in the life reinsurance business.
- x. Except for the foreign currency business section, the amounts in this report are presented as US\$ equivalents, meaning they are not strictly in US\$.

Section A

Executive Summary

1. Executive Summary

- 1.1 As at 30 September 2025, the life assurance sector had 12 direct life assurance companies, five (5) reinsurers actively underwriting life business, and 1,760 registered life assurance agents. These agents' count shows a slight rise from the 1,746 reported in the previous quarter.
- 1.2 Direct life insurers reported a total insurance revenue of ZWG4.59 billion, which equates to approximately US\$172.05 million. This performance reflects a significant increase compared to the US\$123.77 million generated during the corresponding period in the prior year. Of the total revenue, US\$93.77 million (55%) was derived from foreign currency-denominated business.
- 1.3 The revenue breakdown indicates a heavy dependence on renewals, with recurring business making up 94% of the total insurance income. Meanwhile, new business accounted for a smaller share, at 6% of the total.
- 1.4 Funeral assurance and group life assurance were the primary business contributors to the life assurance sector, collectively contributing 82% of the total revenue. During the same period last year, these two products accounted for 87%, a 5% decline from the previous year.
- 1.5 Three direct life insurers and two reinsurers failed to meet the Minimum Capital Requirement (MCR), set at US\$2 million.
- 1.6 The total assets of direct life insurers grew by 9%, increasing from US\$590.01 million as of 30 June 2025 to US\$644.43 million (ZWG17.17 billion) as at 30 September 2025. New acquisitions, revaluation gains, and fair value adjustments mainly fuelled this increase.
- 1.7 The total assets reported by life reassurers reached approximately US\$16.41 million (ZWG437.16 million), an 8% increase from US\$15.17 million as of June 30, 2025. New acquisitions, revaluation gains, and fair value adjustments mainly drove this growth.
- 1.8 Life insurers' average compliance ratio for prescribed assets was 9.18%, which is below the statutory 15% minimum, though it slightly increased from 8.66% last quarter. Only four direct life insurers achieved the 15% minimum. Reinsurers had

an average compliance ratio of 25.86%, down from 26.31% in the previous quarter, with three reinsurers meeting the requirement.

- 1.9 The life assurance sector posted a nominal Profit Before Tax (PBT) of ZWG1.68 billion, or US\$63.09 million. This is a notable drop from the US\$309.82 million PBT recorded in the same period last year. The main reason for this decline is the reduction in fair value adjustments, which mirrors the stable operating environment during this period.
- 1.10 Profit Before Tax (PBT) includes fair value adjustments of ZWG380.65 million (US\$14.26 million) derived from both quoted and unquoted equity investments. This reflects an unrealised profit of 23%, which is a decline from the 50% unrealised profit reported in the comparative period.
- 1.11 Life reinsurers reported a nominal PBT of ZWG53.40 million, which is equivalent to US\$2 million for the review period. This represents a 32% decrease from the US\$2.95 million reported during the same period last year.
- 1.12 Shown below are Tables 1 and 2, which present the key financial indicators for life assurance and reinsurance companies.

Table 1: Summary of Key Financial Indicators for Life Assurers

Income Statement KPI	ZWG million September 2025	US\$ million (equivalent) September 2025	US\$ million (equivalent) September 2024	Percentage change

Section B

ABOUT THE COMMISSION

ABOUT THE COMMISSION

2. Overview of the Insurance and Pensions Commission

2.1. The Insurance and Pensions Commission (IPEC) is a statutory body mandated to regulate, supervise, and develop the insurance and pensions industry for the protection of policyholders and pension scheme members in Zimbabwe.

Terms of Reference

2.2. The activities of the Commission are guided by the following Acts and their respective regulations:

- Insurance and Pensions Commission Act [*Chapter 24:21*]
- Pensions and Provident Funds Act [*Chapter 24:32*]
- Insurance Act [*Chapter 24:07*]
- Money Laundering and Proceeds of Crime Act [*Chapter 09:24*]
- Finance Act [*Chapter 23:04*]
- Public Entities and Corporate Governance Act [*Chapter 10:31*]
- Public Finance Management Act [*Chapter 22:19*] and
- Public Procurement and Disposal of Public Assets Act [*Chapter 22:23*]
- Administration of Estates Act [*Chapter 6:01*].

2.3. Regulatory Developments

2.3.1. Circulars

The Commission released the following Circulars during the review period.

Table 3: Circulars issued during the nine months ended 30 September 2025

Circular	Issue date	Content
Circular 1 of 2025	2 January 2025	Pension Funds Reporting Requirements.
Circular 2 of 2025	15 February 2025	Submission of Quarterly Levy Computations and Due Dates.
Circular 4 of 2025	7 February 2025	2025 IPEC AML/CFT/CPF Industry Training Calendar.
Circular 6 of 2025	24 February 2025	Engagement with the Consultant on Financial Sector Development Policy.
Circular 7 of 2025	07 March 2025	Invitation to Participate in Digital Transformation Assessment.
Circular 8 of 2025	27 March 2025	2024 Financial Reporting.
Circular 9 of 2025	28 March 2025	Directive on Revised Statutory Reporting Deadlines.
Circular 10 of 2025	28 March 2025	Market Conduct Framework for The Insurance and Pensions Industry.
Circular 11 of 2025	3 April 2025	2024 Annual Reporting.
Circular 12 of 2025	1 April 2025	Clarity on Application of "No Premium No Cover" on Ceding of Insurance Business to Reinsurers.
Circular 13 of 2025	11 April 2025	Insurance Product Approval Framework.
Circular 14 of 2025	8 April 2025	Minimum Re Reinsurance Standards for the Insurance Industry.
Circular 15 of 2025	20 April 2025	IFRS 17 Industry Feedback Session.
Circular 17 of 2025	25 June 2025	Issuance of Statutory Instrument 67 of 2025 on Minimum Capital Requirements

Circular	Issue date	Content
		- Insurance (Amendment) Regulations, 2025 (No. 28).
Circular 18 of 2025	27 June 2025	Reminder: 2024 Annual Reporting Submissions Due by 30 June 2025.
Circular 19 of 2025	07 August 2025	Revised Quarterly Return Template for Pension and Provident Funds.
Circular 20 of 2025	15 August 2025	Registration of Financial Statement Preparers with the Public Accountants and Auditors Board (PAAB).
Circular 21 of 2025	15 August 2025	Urgent Request for Comprehensive Annuitants' Data.
Circular 22 of 2025	4 September 2025	Guideline on Administrative Framework for Offshore Investments.
Circular 23 of 2025	10 September 2025	Request for Comments and Input into the Guideline on Preservation Funds.
Circular 24 of 2025	10 September 2025	Guideline on Revised Reporting Requirements for Pension Funds.
Circular 25 of 2025	16 September 2025	Board of Fund Members (Trustee) Toolkit.
Circular 26 of 2025	15 September 2025	Guideline on Self Insurance and Underwriting of Annuities by DC Funds.

Section C

Economic Overview

ECONOMIC OVERVIEW

3. Economic Overview

- 3.1. The third quarter of 2025 marked a period of notable macroeconomic consolidation for Zimbabwe, characterised by declining inflationary pressures and exchange rate stability. The combination of tight monetary policy, prudent fiscal management, and favourable external developments contributed to a more stable operating environment. The Reserve Bank of Zimbabwe (RBZ) has successfully entrenched price stability, with the local currency (ZWG) month-on-month inflation turning negative at -0.25% in September 2025.
- 3.2. The economy is expected to record around 6.6 % real GDP growth in 2025, reflecting a broad-based recovery across both primary and value-added sectors. This performance is underpinned by robust agricultural output, favourable global commodity prices, particularly in gold and tobacco and continued implementation of structural reforms.
- 3.3. Following the GDP rebasing completed by ZIMSTAT in Q2, 2025, the national economy was recalibrated from US\$35.2 billion in 2024 to approximately US\$45.7 billion, raising per capita GDP above US\$3,000.

Inflation Developments

- 3.4. According to ZIMSTAT, the country recorded month-on-month deflation in September of -0.2%, down from 0.4% in August 2025.
- 3.5. The slowdown in inflation was driven mainly by falling prices in the food and non-alcoholic beverages category, which constitutes over 30% of the CPI basket.
- 3.6. On an annual basis, ZWG inflation slowed to 82.7% in September 2025, down from 92.5% in June 2025, signalling a continued moderation in price pressures.

Figure 1: Inflation Rate (% Monthly)

Exchange Rate Developments

- 3.7. In September 2025, the Zimbabwean dollar (ZWG) appreciated by 0.4% against the US dollar on the willing-buyer willing-seller (WBWS) interbank market, closing at ZWG26.64:US\$1.
- 3.8. This marked the third consecutive month of gains in the official market, with an average monthly appreciation of 0.4% from July to September.
- 3.9. On the parallel market, the ZWG also strengthened, gaining approximately against the US dollar, to close the month at an average of ZWG32:US\$1, compared to ZWG34:US\$1 in August.
- 3.10. This represented the tenth consecutive month of relative stability in the parallel market, leading to a decline in the average parallel market premium from around 27% in August 2025 to 20% in September 2025.
- 3.11. For the quarter, the ZWG recorded a cumulative gain of 1.1% against the US dollar in Q3, reversing losses of 0.7% and 3.7% observed in Q2 and Q1, respectively.

Figure 2: Official Month-on-Month Exchange Rates

Zimbabwe Stock Exchange (ZSE) Market Capitalisation

- 3.12. The market capitalisation of the ZSE increased by 7.73% from ZWG60.97 billion (US\$2.3 billion) in June to ZWG 65.68 billion (US\$2.5) in September 2025, indicating renewed interest in equities and improved confidence in local asset valuations from Q2.
- 3.13. Turnover on the ZSE continued its upward trajectory in the third quarter of 2025, reaching ZWG1.95 billion, up from ZWG1.40 billion in Q2. This growth in trading activity reflects improved investor sentiment, increased liquidity, and sectoral rotation among institutional investors.

Victoria Falls Stock Exchange Market (VFEX)

- 3.14. The VFEX recorded a substantial increase in market capitalisation to US\$1.798 billion by September 2025, up from the Q2 close of US\$1.250 billion. This aggressive movement reflects a strong reversal of the Q2 trends, signalling growing investor risk appetite and significant capital inflows back into the market, driving the VFEX All Share Index up by 40.69% over the quarter.
- 3.15. During the third quarter of 2025, total turnover on the VFEX amounted to US\$16.44 million, a moderate 10.86% increase from US\$14.83 million in Q2. Total volume traded stood at 65.49 million shares, down slightly but with higher-value trades rising significantly, consistent with the sharp rise in asset prices and overall market growth.

Section D

PERFORMANCE OF
LIFE ASSURANCE
COMPANIES

PERFORMANCE OF LIFE ASSURANCE COMPANIES

4. Architecture of the Life Assurance Sector

- 4.1. During the review period, the life assurance sector consisted of 12 registered life insurers. These companies reported a total of 1,760 agents, including both corporate and individual representatives, marking a slight rise from 1,746 agents in the previous quarter.

5. Performance in Terms of Insurance Revenue

- 5.1. During the review period, direct life insurers generated insurance revenue of ZWG4.59 billion, which converts to approximately US\$172.05 million using the average official exchange rate. This reflects a 39% change from the US\$123.77 million recorded in the same period of 2024. Foreign currency-denominated revenue accounted for 55% of total insurance income, down 7% from the previous period's 62%, mainly due to exchange rate stability. Heritage Life and Nhaka Life failed to submit their mandatory foreign currency reports. The Commission urges industry players to submit all required reports on time to avoid regulatory sanctions.
- 5.2. Funeral assurance and group life assurance continued to be the primary sources of income for the life insurance sector, together accounting for 82% of the total revenue.
- 5.3. The share of revenue generated from funeral assurance and group life assurance is steadily rising, affecting the market share of traditional life assurance products.
- 5.4. A notable trend in the life insurance industry is the shift from traditional long-term products towards predominantly renewable annual policies. This change is especially clear in funeral assurance and group life assurance policies currently available. This practice raises regulatory concerns about its compliance with the Funeral Directive's objectives, particularly regarding the level of policyholder protection. As a result, the industry is strongly encouraged to strictly follow the rules set out in the Funeral Directive.

5.5. The table below shows the insurance revenue and net premium written per life company.

Table 4: Insurance Revenue and Net Premium Written Per Company

Company	Insurance Revenue September 2025 (ZWG Million)	Market Share (Insurance Revenue)	Net Premium Written September 2025 (ZWG Million)	Market Share (Net Premium Written)
Nyaradzo Life	1,803.11	39.27%	2,754.97	48.16%
Doves Life	720.68	15.70%	762.37	13.33%
Old Mutual Life	715.03	15.57%	734.84	12.85%
First Mutual Life	311.36	6.78%	256.03	4.48%
Econet Life	301.19	6.56%	285.10	4.98%
Zimnat Life	238.37	5.19%	223.83	3.91%
Fidelity Life	200.55	4.37%	350.94	6.13%
CBZ Life	146.59	3.19%	131.52	2.30%
ZB Life	122.63	2.67%	189.19	3.31%
Nhaka Life	21.13	0.46%	21.13	0.37%
Evolution Life	8.32	0.18%	8.27	0.14%
Heritage Life	2.11	0.05%	2.52	0.04%
Total	4,591.06	100.00%	5,720.72	100.00%

5.6. Nyaradzo Life Assurance Company holds the leading position in the life assurance sector with a 39.27% market share, largely driven by its predominant revenue from funeral assurance policies.

5.7. The total revenue of the top five companies in the sector reached ZWG3.85 billion, equivalent to US\$144.33 million.

5.8. These five leading life insurers account for 84% of the sector's total revenue, underscoring significant revenue concentration among the major market participants.

5.9. The Herfindahl-Hirschman Index (HHI) for the life assurance industry is 2,184.10. This figure indicates a moderately concentrated market, featuring a few dominant firms but still maintaining competitive elements.

6. Insurance Revenue by Product

- 6.1. Funeral assurance remains the main driver of the life assurance sector, representing 68.04% of total revenue. Group life assurance is the second-largest segment, making up 14.27% of total revenue.
- 6.2. Outside of the leading products, credit assurance accounted for the largest segment at 7.90% of total revenue. Term insurance contributed 4.35%, followed by other life products at 4.3%. The remaining segments, endowment plans and whole life, represented marginal shares of 0.59% and 0.54%, respectively.
- 6.3. The Figure below illustrates the distribution of revenue across various life assurance product lines. Furthermore, the accompanying table provides a detailed breakdown of insurance revenue by product line for each company.

Figure 3: Distribution of Insurance Revenue by Product Line

Table 5: Distribution of Insurance Revenue by Product Line Per Company

Company	Term insurance	Endowment	Pure endowment	Whole life	Funeral	GLA	Credit assurance	Other	Total
ZWG Million									
Nyaradzo Life	-	-	-	-	1,803.11	-	-	-	1,803.11
Doves Life	-	-	-	-	720.68	-	-	-	720.68
Old Mutual Life	-	-	-	-	84.91	267.38	362.74	-	715.03
First Mutual Life	114.56	-	-	-	33.9	125.06	-	37.83	311.36
Econet Life	-	-	-	-	285.06	11.3	-	4.83	301.19
Zimnat Life	23.33	11.43	-	23.34	23.13	157.14	-	-	238.37

Company	Term insurance	Endowment	Pure endowment	Whole life	Funeral	GLA	Credit assurance	Other	Total
Fidelity Life	1.19	4.61	7.13	1.33	13.49	34.88	-	137.94	200.55
CBZ Life	47.23	0	-	0	54.28	45.05	-	0.02	146.59
ZB Life	6.01	4.08	-	0.09	92.64	13.82	-	5.98	122.63
Nhaka Life	7.42	-	-	-	4.45	0.39	-	8.86	21.13
Evolution Life	-	-	-	0	8.32	-	-	-	8.32
Heritage Life	-	-	-	-	-	0.01	-	2.1	2.11
Total	199.74	20.12	7.13	24.76	3,123.98	655.04	362.74	197.56	4,591.06
Percentage	4.35%	0.44%	0.16%	0.54%	68.04%	14.27%	7.90%	4.30%	100%

6.4. The product focus of the top five assurance companies is highly concentrated in funeral assurance and group life products. Specifically, Nyaradzo Life, Doves Life, and Econet Life exclusively concentrate on funeral assurance. Conversely, Old Mutual maintains a specialised portfolio that includes both credit assurance, where it holds a niche and group life assurance, the latter of which is also a core specialisation of First Mutual.

7. Not Taken Up Policies

7.1. During the quarter under review, the life assurance sector reported 19,493 Not Taken Up (NTU) policies, resulting in a loss of projected insurance revenue amounting to ZWG4.67 million (US\$0.18 million equivalent).

7.2. The table below shows the not taken up policies.

Table 6: Not Taken Up Policies

Name of Company	Number of Policies	Insurance Revenue - ZWG Million
Econet Life	15,051	1.81
Doves Life	2,267	0.02
Zimnat Life	1,880	2.41
Fidelity Life	94	0.16
Old Mutual Life	201	0.29
Total	19,493	4.67

7.3. Econet Life, Doves Life, and Zimnat Life are strongly advised to promptly initiate an investigation into the underlying causes of their high NTU rates. This may

include conducting surveys to identify specific issues such as affordability, poor product understanding, or dissatisfaction with the onboarding process.

- 7.4. Life assurers are encouraged to closely monitor how agents present their products to potential clients to prevent misrepresentation. This underscores the importance of consumer education programs, both within individual companies and throughout the life assurance industry.

8. Lapsable Policies

- 8.1. The life assurance sector started Q3 2025 with 2,122,824 active policies. In this period, 97,111 policies lapsed, resulting in a lapse ratio of 4.57%. This is a decline from the 4.83% lapse ratio observed in the same quarter of the previous year.
- 8.2. Policy lapses are mainly attributed to affordability issues and changes in policyholders' circumstances. The Commission expects insurers to maintain proactive and effective communication with policyholders before lapses, exploring potential solutions to prevent policy cancellations.
- 8.3. The table below shows the lapse ratio per entity.

Table 7: Lapse Ratios

Name of Company	No. of Lapsable Policies at the Beginning of the Quarter	Lapsed Policies (Individual Life)	Lapsed Policies (Group Business)	Lapse Ratio
CBZ Life	45,429	822	-	1.81%
Doves Life	191,476	4,667	8,701	6.98%
Econet Life	999,225	45,827	-	4.59%
Evolution Life	-	-	-	0.00%
Fidelity Life	58,018	417	-	0.72%
First Mutual Life	79,913	4,032	-	5.05%
Heritage Life	1,857	-	-	0.00%
Nhaka Life	58	16	-	27.59%
Nyaradzo Life	602,210	19,335	6,303	4.26%
Old Mutual Life	82,366	4,274	-	5.19%
ZB Life	-	-	-	0.00%
Zimnat Life	62,272	2,717	-	4.36%
Total/ Average	2,122,824	82,107	15,004	4.57%

- 8.4. During the review period, Nhaka Life reported a lapse ratio exceeding 10%, primarily because policyholders faced financial difficulties and altered their insurance preferences, resulting in numerous policy cancellations. It is strongly

recommended that Nhaka Life conduct detailed experience analyses to identify the main reasons for these elevated lapse rates.

8.5. Drawing on these insights, the company should craft and execute targeted, data-driven strategies to lower lapse rates and enhance policyholder retention.

9. Market Share by Revenue

9.1. In terms of revenue, Nyaradzo Life and Doves Life are the leading players in the life insurance sector, collectively holding a significant market share of 54.97%. In comparison, the other insurers account for the remaining 45.03%.

9.2. The Figure below shows the market share for the sector in terms of revenue.

Figure 4: Market Share in Terms of Insurance Revenue

9.3. To promote sustainable growth in the insurance industry, market players should focus on creating innovative products that meet current market trends and shifting consumer demands. They are urged to leverage the Guideline on Regulatory Sandbox to promote new products. Expanding into a broader range of value-based insurance solutions is essential to stay resilient and relevant as the economic and demographic environment evolves.

10. Market Share by Asset

10.1. Old Mutual Life Assurance and Nyaradzo Life lead the life assurance market, together controlling 52.16% of total assets. The remaining 47.84% share is held by all other entities combined.

10.2. The chart below presents the distribution of market share by entity based on assets.

Figure 5: Market Share by Assets

10.3. Life insurance companies must sustain a strong and resilient asset base, focusing on proper asset-liability matching in terms of duration and liquidity. This approach is crucial to ensure they can meet all policyholder obligations on time, protect financial stability, and enhance stakeholder confidence.

11. Foreign Currency Business

11.1. During the review period, the life insurance industry earned US\$93.77 million in foreign currency revenue, marking a 22% increase from the US\$76.91 million reported in the same period of 2024.

11.2. The rise in foreign currency business mainly results from policyholder migration from local to foreign currency policies, and marginally from new business acquisition, a trend consistent with the sector's high recurring nature.

11.3. During the review period, foreign currency transactions made up 55% of total revenue, reflecting a 7% decrease from 62% in the same period of 2024.

11.4. Notably, Nhaka Life and Heritage Life did not submit the US\$ return. The industry is reminded that partial or incorrect submissions may result in statutory sanctions.

11.5. Life insurers are advised to strictly adhere to Statutory Instrument 280 of 2020, which mandates the asset-liability matching of foreign currency business. This

involves investing foreign currency premiums in foreign currency-denominated assets and settling related claims in the original foreign currency.

11.6. The figure below presents a breakdown of foreign currency business written by each life assurance company.

Figure 6: Market Share by US\$ Insurance Revenue

11.7. Nyaradzo Life commands the largest portion of the foreign currency market at 30.69%, driven by its leading position in the life assurance industry.

12. Reassurance

12.1. The life assurance industry transferred ZWG66.64 million (US\$2.5 million) from a total written premium of ZWG4.59 billion (US\$172.05 million) to reinsurers, which corresponds to a reinsurance ratio of 1.45%.

12.2. The low reinsurance ratio mainly stems from two key structural aspects within the sector, first, the dominance of funeral assurance products that usually provide in-kind services instead of monetary benefits and are generally not reinsured; and second, the common practice of offering renewable policies each year, many of which do not include reinsurance, further reducing the sector's overall reinsurance participation.

12.3. Reinsurance serves as an essential risk management instrument by transferring underwritten liabilities to reinsurers. This enables primary insurers to enhance

capital efficiency and strengthen financial resilience. Additionally, it helps them maintain better oversight of overall risk exposure.

12.4. Life insurance companies should carefully assess their ability to retain risk, especially for GLAs, and obtain reinsurance coverage as recommended by their risk management policies.

13. Asset Quality

13.1. The life assurance sector reported total assets of ZWG17.17 billion (approximately US\$644.43 million), reflecting a 9.22% increase from the US\$590.01 million recorded on 30 June 2025.

13.2. Life assurance companies mainly invest in quoted equities and investment properties, making up 44.31% of their total assets. These investments are chosen to support long-term growth, hedge against inflation, and ensure strong asset-liability matching.

13.3. The figure below shows the distribution of assets for the life assurance sector by class.

Figure 7: Assets Breakdown by Class

13.4. Other assets include insurance assets (0.68%), reinsurance assets (0.06%), and premium debtors (2.14%).

13.5. Insurers are advised to keep a prudent match between their assets and liabilities' nature and duration. This approach is vital for effective asset-liability management and helps maintain long-term financial stability.

14. Prescribed Assets

14.1. The total investments in prescribed assets by the life assurance sector reached ZWG1.58 billion, or US\$59.13 million. This results in an average compliance level of 9.18% during the review period, which is below the statutory minimum of 15%.5%.

14.2. Only four entities, CBZ Life, Nhaka Life, Econet Life, and Fidelity Life, met the mandatory minimum asset ratio of 15% of their total assets. The Commission anticipates that the sector will boost its investments in prescribed assets as more options become accessible to meet the established minimum thresholds.

15. Liquidity and Earnings

15.1. The life assurance sector reported a positive insurance result of ZWG1.82 billion (US\$68.29 million), confirming an underwriting profit from core insurance activities.

15.2. The current life insurer ratio is 1.71:1, showing the industry has enough liquid assets to meet its short-term obligations effectively.

15.3. The average combined ratio for life insurers was 59.53%, indicating strong overall profitability from their primary operations. This ratio includes a claims ratio of 31.89% and an insurance expense ratio of 27.64%.

15.4. The PBT for the review period amounted to ZWG1.68 billion, primarily driven by investment income, dividends, and fair value gains on quoted equities. Converted at the average official exchange rate, this represents US\$63.09 million. This marks a substantial 79.64% decline from the US\$309.82 million reported in the same period last year, mainly due to market corrections following the introduction of the ZWG currency and the subsequent stabilisation of the operating environment.

15.5. The table below summarises the expenses, claims, and combined ratio for the life sector.

Table 8: Expense Ratios

Company	Expenses Ratio	Claims Ratio	Combined Ratio
CBZ Life	52%	36%	88%
Doves Life	7%	34%	41%
Econet Life	34%	52%	87%
Evolution Life	20%	16%	36%
Fidelity Life	38%	36%	75%
First Mutual Life	28%	28%	56%
Heritage Life	0%	13%	13%
Nhaka Life	41%	17%	58%
Nyaradzo Life	34%	32%	66%
Old Mutual Life	28%	20%	47%
ZB Life	31%	25%	56%
Zimnat Life	9%	37%	46%
Total	28%	32%	60%

15.6. All life insurance companies reported combined ratios under 100%, indicating robust overall underwriting performance across the sector. However, CBZ Life (88%) and Econet Life (87%) had ratios close to 100%, implying lower underwriting margins relative to the industry average.

15.7. The figure below shows the distribution of revenue for the sector.

Figure 8: Composition of Income for Life Companies

15.8. During the review period, total revenue was mainly generated by insurance income (75%), while investment income made up the remaining 25%. This marks a major change from the previous year, when investment income represented 69% of total revenue and insurance contributed 31%. The change

is largely due to the more stable exchange rate environment, leading to a significant drop in revaluation gains and fair value adjustments.

15.9. The industry predominantly recognises its insurance revenue using the General Measurement Model, which remains the standard accounting method for all contracts. Revenue from simpler contracts handled under the Premium Allocation Approach accounted for 42.39% of total insurance revenue. In contrast, the Variable Fee Approach contributed just 0.31%, reflecting a limited range of products with direct participation features.

15.10. Investment income was derived from multiple key sources such as fair value adjustments on gold coins, contract fees, realised gains from equity sales, commission income, fund administration fees, and various other income streams.

Figure 9: Composition of Investment Income in Life Companies

16. Capitalisation

16.1. As at 30 September 2025, nine life assurance companies had met the US\$2 million Minimum Capital Requirement (MCR) specified in S.I. 167 of 2025. The Commission will work collaboratively with those who do not meet the standard to support their recovery. If these efforts are unsuccessful, regulatory actions may

be taken, including restricting dividend payments, suspending the ability to write new business, and ultimately revoking operating licenses.

16.2. The table below displays the current capitalisation levels for the life assurance companies.

Table 9: Capitalisation of Life Assurance Companies

Name of Company	Capital - ZWG Million	US\$2 Million Equivalent
Old Mutual Life	3,624.00	136.02
Nyaradzo Life	2,528.03	94.88
Doves Life	874.60	32.83
First Mutual Life	586.96	22.03
Econet Life	235.09	8.82
Zimnat Life	226.00	8.48
CBZ Life	175.94	6.60
ZB Life	167.24	6.28
Evolution Life	164.62	6.18
Nhaka Life	50.96	1.91
Fidelity Life	17.27	0.65
Heritage Life	1.40	0.05
Total	8,652.11	324.73

Section E

PERFORMANCE OF LIFE REASSURANCE COMPANIES

PERFORMANCE OF LIFE REASSURANCE COMPANIES

17. Nature of the Reassurance Business

17.1. Life reinsurers are authorised to engage in both life and non-life underwriting. This report, however, restricts its focus to their life assurance business, except for the presented capital positions, which reflect the combined performance of both the life and non-life sectors.

18. Performance in Terms of Reassurance Revenue

18.1. During the review period, life reinsurers reported insurance revenue of ZWG182.20 million, roughly equivalent to US\$6.83 million at the average interbank exchange rate.

18.2. Reinsurers' insurance revenue increased by 22% to US\$6.83 million, from US\$5.61 million reported in the same period of 2024.

18.3. Group life assurance was the primary source of reassurance business revenue, contributing 55% of total reinsurer income. Overall, reassurance companies posted a positive insurance service result of ZWG49.99 million, roughly US\$1.87 million.

19. US\$ Business for Reassurers

19.1. For the period ending 30 September 2025, life reassurance companies reported US\$5.89 million in foreign currency-denominated business, which constitutes 86% of their total insurance revenue. This substantial proportion underscores the crucial role of foreign currency transactions in their underwriting activities and highlights their significant exposure to foreign currency markets.

19.2. Insurance revenue rose 24% to surpass US\$4.74 million in the same period of 2024.

19.3. The life reassurance sector posted an underwriting profit, with a total insurance service result of US\$1.58 million. This marks a substantial 35% increase from the US\$1.17 million recorded in September 2024.

19.4. Profit before tax for the review period was US\$1.48 million, marking a 164% increase from US\$0.56 million reported on 30 September 2024.

20. Life Reassurers' Asset Quality

20.1. Total assets for life reassurers stood at ZWG437.16 million, approximately US\$16.41 million, marking an 8% rise from US\$15.17 million as at 30 June 2025. This growth is mainly due to positive fair value adjustments and strategic new investments across multiple asset classes, including prescribed assets.

20.2. The figure below illustrates the distribution of assets for life reassurers.

Figure 10: Life Reassurers' Total Assets

20.3. Among the total assets reported by reinsurers, prescribed assets represented the largest single asset class, comprising 26% of the sector's total assets. The next most significant allocations were investment property at 22%, followed by money market and cash at 18%.

21. Prescribed Assets

21.1. Total sector investments in prescribed assets reached ZWG113.05 million (US\$4.24 million) by the period's end. This investment yields an average compliance ratio of 26%, well above the statutory minimum of 15%.

21.2. Despite the strong sector average, Emeritus Re, although marginally, and FML Re did not meet the mandatory minimum prescribed asset threshold of 15%.

21.3. Acknowledging that adherence to prescribed asset requirements remains a key national priority, reassurers are urged to stay actively engaged in development projects that meet both asset requirements and compliance standards.

22. Earnings

22.1. During the review period, PBT reached ZWG53.40 million, roughly US\$2 million.

The profit mainly came from investment income. Notably, insurance operations now contribute a larger share of income than in previous periods, when investment income was the most significant source, indicating a shift towards more balanced revenue streams.

22.2. Reassurers continued to generate substantial underwriting profits, with a combined ratio of 71%. This is based on a claims ratio of 41% and an expense ratio of 30%.

23. Market Share

Market Share by Reassurance Revenue

23.1. In terms of revenue market share, Emeritus Re holds the dominant position at 52%, followed by FBC Re (19%) and First Mutual (17%). The remaining market share is held by WAICA Re (8%) and ZEP Re (4%).

23.2. The distribution of market share within the reinsurance sector, based on reinsurance revenue, is depicted in the figure below.

Figure 11: Market Share by Reassurance Revenue

Market Share in Terms of Total Assets

23.3. Emeritus Re held the largest portion of assets in the reinsurance sector at 44%, with WAICA Re next at 22%. The remaining market share was divided among First Mutual Re at 16%, FBC Re at 13%, and ZEP Re at 5%.

23.4. The breakdown of market share by value of assets is shown in the figure below.

Figure 12: Market Share Distribution in Terms of Total Assets

24. Capitalisation

24.1. Emeritus Re, FML Re, and WAICA Re are among the reinsurance companies that successfully met the US\$2 million Minimum Capital Requirement.

24.2. The remaining two reinsurers did not meet the proposed minimum capital standards. These entities are now required to develop and implement compliance strategies to ensure conformity with the Statutory Instrument 67 of 2025.

24.3. The current capitalisation levels for all reinsurance companies are detailed in the accompanying table below.

Table 10: Capitalisation of Reinsurance Companies

Name of Company	Capital - ZWG Million	US\$2 Million Equivalent
	Sept-25	Sept-25
Emeritus Reinsurance	124.73	4.68
FBC Reinsurance	43.92	1.65

Name of Company	Capital - ZWG Million	US\$2 Million Equivalent
First Mutual Reinsurance	64.06	2.40
ZEP Reinsurance	8.45	0.32
WAICA Re	89.90	3.37
Total	331.05	12.43

Section F

COMPLAINTS HANDLING AND PENALTIES FOR REGULATORY BREACHES

25. COMPLAINTS HANDLING

25.1. The Commission received 86 complaints during the nine-month period under review. The overall resolution rate was 87%, with 75 complaints resolved.

25.2. Eleven (11) complaints remain pending. While non-complex cases are being resolved efficiently, the awaiting workload is significantly influenced by the complexity of the remaining cases, as detailed below.

Table 11: Complaints Received and Status

Complexity	Number of Complaints Received	Resolved	Outstanding
Complex	8	2	6
Non-Complex	78	73	5
Total	86	75	11

25.3. Five entities accounted for a significant 78% of the total complaints received.

Figure 13: Breakdown of Complaints by Entity

25.4. The companies with the highest number of complaints are Fidelity Life at 29%, followed by First Mutual Life at 15%, and Doves and Zimnat Life, each with 12%. Lastly, Nhaka Life accounts for 10%, bringing the total to 78% of the complaints received. In contrast, the entities with the least number of complaints were ZB Life and CBZ Life, each at 1%.

Nature of Complaints

25.5. The distribution reveals clear patterns about where the regulated entities are falling short. The two dominant complaint categories, unpaid benefits (30%) and lack of communication (16%), together account for nearly half of all complaints and point to a systemic issue: beneficiaries are not receiving their entitlements or are not being kept informed about their claim's status. These are weaknesses in service delivery rather than policy design problems.

Figure 14: Nature of Complaints

25.6. The third significant category, low benefits (13%), reflects dissatisfaction with benefit adequacy, which may involve legitimate disputes about coverage or calculation but suggests some beneficiaries feel undercompensated.

25.7. The prevalence of unpaid benefits is particularly concerning because it directly affects beneficiaries' financial security and is typically straightforward to resolve; either benefits are due, or they aren't.

Figure 15: Non-Complex Resolution Rate

- 25.8. This aligns with expectations for straightforward cases not involving legacy complexities like the 2009 currency reforms. The low outstanding volume (6% of non-complex cases) reflects effective prioritisation and resource allocation for standard complaints.
- 25.9. Life companies are encouraged to enhance communication by increasing transparency and responsiveness to customer enquiries. They should strictly adhere to policy agreements to avoid misunderstandings and focus on resolving unpaid benefits to rebuild customer trust.
- 25.10. The Commission urges entities to consider proactive engagement strategies, such as reaching out to customers who may be experiencing issues before they escalate into formal complaints and investing in staff training to enhance customer service skills, ensuring that employees are equipped to handle inquiries and complaints effectively.
- 25.11. Establishing effective feedback mechanisms will help identify areas for improvement, leading to fewer complaints and higher customer satisfaction.

26. ANTI-MONEY LAUNDERING AND COMBATING THE FINANCING OF TERRORISM AND PROLIFERATION FINANCING

26.1. Eleven of the twelve life assurance companies submitted their AML/CFT/CPF returns for the third quarter of 2025. Overall, the industry continues to demonstrate an improved understanding of the key money laundering risks associated with its business activities.

Assessment of ML/TF/PF Inherent Risk Factors and Controls

Customer Risk

Figure 16: Proportion of ZWG & US\$ Revenue per High-Risk Client Category

26.2. High-risk clients contributed 0.04% of total ZWG revenue and 2.19% of US\$ revenue during the quarter. An analysis of revenue distribution among high-risk clients revealed the following:

ZWG Portfolio

- Domestic PEPs: accounted for 91% of high-risk clients; 86% of ZWG revenue.
- Non-Governmental Organisations (NGOs): 6% of clients; 2% of revenue.
- High-net-worth individuals: 3% of clients; 4% of revenue.
- Trusts: Negligible but contributed 8% of ZWG revenue.

US\$ Portfolio

- Non-resident individuals: 91% of high-risk clients; 68% of US\$ revenue is driven by diaspora funeral products.
- NGOs: 6% of clients; 18% of revenue.
- Domestic PEPs: 2% of clients; 1% of revenue.
- High-net-worth individuals: 2% of revenue.

26.3. No foreign PEPs were reported in the quarter. Life assurers should assess the ML, TF and PF risk levels of domestic PEPs and NGOs and apply enhanced due diligence only to those posing high risk, in line with the risk-based approach.

26.4. Further, customer risk assessments should be enhanced by considering clients from high-risk sectors such as real estate, dealers in precious metals and precious stones and car dealers as per the findings of the third National Money Laundering Risk Assessment.

26.5. **Product Risk:** The market remains concentrated in lower-risk funeral assurance products, accounting for 68% of revenue. Group Life Assurance 14%, conventional life assurance products 5.49%.

26.6. **Use of Intermediaries:** The sector continues to rely heavily on agents for business acquisition, accounting for 61% of ZWG revenue and 96% of US\$ revenue during the quarter. Bancassurance contributed 26% of ZWG and 1% of US\$ revenue, while brokers accounted for 9% and 1%, respectively. Given this reliance on intermediaries, life assurers must ensure that agents, brokers, and bancassurance partners comply with AML/CFT/CPF requirements and are included in all relevant training programmes.

- 26.7. **High-Risk Jurisdictions:** Two life insurers reported exposure to clients in domestic high-risk areas associated with small-scale gold mining. The portfolio includes 7,553 ZWG clients (ZWG revenue of 6,192,491.05) and 4,186 US\$ clients (US\$ revenue of 57,795.22). Given the elevated risk in these regions, enhanced due diligence and ongoing monitoring are essential to verify the legitimacy of funds and mitigate risks of money laundering, terrorist financing, and proliferation financing.
- 26.8. **Source of Funds:** Premium funding is primarily driven by salaried individuals (42.2% of ZWL and 63.6% of US\$ collections), followed by self-employed clients (33.7% ZWL; 21.6% US\$) and formal businesses (24.1% ZWL; 14.8% US\$). This distribution underscores the importance of tailoring customer due diligence to client risk profiles, ensuring fund legitimacy and reducing exposure to AML/CFT risk.
- 26.9. **Mode of Payments:** Electronic payments accounted for 96.9% of ZWG premiums and 75.0% of US\$ premiums in the third quarter. US\$ cash payments declined from 27% in the previous quarter to 23%. While this trend is positive, foreign currency cash premiums continue to present elevated money laundering and fraud risks. Life assurers must implement robust internal controls, apply appropriate customer due diligence, and maintain effective transaction monitoring to mitigate these risks.
- 26.10. **Suspicious Transactions and Large Cash Transactions:** Eight suspicious transaction reports (STRs) and 51 large cash transaction reports (CTRs) were filed with the Financial Intelligence Unit (FIU) in the quarter, reflecting effective monitoring of clients.

United Nations Security Council Resolutions Sanctions Screening

- 26.11. Third-quarter submissions revealed that only six life assurers are effectively screening clients for sanctions related to terrorist financing and proliferation financing, and these entities provided evidence of their screening procedures. The remaining assurers limit their checks to Financial Intelligence Unit directives on updated sanctions lists and could not demonstrate how they implement

ongoing screening. Non-compliance with sanctions screening requirements will result in regulatory sanctions being imposed on the concerned entities.

26.12. While the sector demonstrates a solid compliance foundation, sustaining and strengthening risk-based controls, targeted monitoring, and intermediary oversight remain critical to mitigating ML, TF, and PF risks. The Commission will engage directly with entities that exhibited notable gaps in their AML/CFT/CPF frameworks. Life assurers should review the scope of their customer risk assessments to include individuals from sectors identified as high risk in the National Risk Assessment, including non-profit organisations, natural resources, and wildlife-related activities.

27. Conclusion

- 27.1. The life assurance sector finds itself at a crucial inflexion point, transitioning from an environment where volatile market conditions with heavily skewed financial results to one where operational resilience and strategic clarity are paramount.
- 27.2. While the industry demonstrates fundamental strength in its core underwriting activities and maintains adequate liquidity, its long-term viability faces two interconnected challenges: structural focus and public trust.
- 27.3. The heavy and long-standing reliance on traditional funeral assurance is not a sustainable path forward. Future growth depends entirely on the industry's willingness to innovate and diversify its product portfolio strategically.
- 27.4. Achieving market growth necessitates moving beyond just compliance and addressing the pervasive issue of low public confidence. This is especially highlighted by the need to investigate and eliminate the root causes of high Not Taken Up rates, which signal a breakdown in sales quality or customer comprehension.
- 27.5. In essence, the sector must embrace change, prioritising strategic adaptation and the rebuilding of stakeholder trust as the core mandates for securing its future relevance and contribution to the national economy.

Section G

APPENDICES

APPENDICES

APPENDIX A1. STATEMENT OF COMPREHENSIVE INCOME FOR LIFE ASSURERS FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2025 - ZWG
MILLION

	CBZ Life	Doves Life	Econet Life	Evolution Life	Fidelity Life	First Mutual Life	Heritage Life	Nhaka Life	Nyaradzo Life	Old Mutual Life	ZB Life	Zimnat Life	Total
