

Life Assurance Sector Report

for the 12 Months Ended 31 December 2025

Email: enquiry@ipec.co.zw

Protecting The Interests Of Insurance And Pension Consumers

Disclaimer

- i. The Insurance and Pensions Commission (IPEC) has prepared this report exclusively for informational purposes of stakeholders in the insurance sector. It may not be reproduced, redistributed, communicated to a third party, or relied upon by any other person for any other purpose without the Commission's prior written consent.
- ii. The Commission is not liable for any use of this report beyond the purposes stated above.
- iii. This report covers the life assurance and life reinsurance business for the twelve months ended 31 December 2025, with figures drawn from unaudited accounts submitted by regulated life assurers and reinsurers.
- iv. The data in this report is based on the International Financial Reporting Standard (IFRS) 17 – Insurance Contracts.
- v. Kindly note that all financial figures are in ZWG unless otherwise indicated.
- vi. The ZWG amounts are presented in nominal terms unless specified as absolute terms.
- vii. The Statement of Profit and Loss figures are compared to the same period in the previous year, as the transactions are cumulative and not directly comparable on a quarterly basis. In contrast, the Statement of Financial Position is compared to the previous quarter, as this provides a clearer indication of the industry's performance over the two quarters.
- viii. The conversion of ZWG revenue and assets to US dollars was done using the average exchange rate of ZWG 26.6016 for the review period and the closing interbank rate of ZWG 25.9807, respectively.
- ix. The data in this report is based on 12 direct life assurers and five (5) reinsurers that are in the life reinsurance business.
- x. Except for the foreign currency business section, the amounts in this report are presented as US\$ equivalents, meaning they are not strictly in US\$.

SECTION A

1. Executive Summary

- 1.1 As at 31 December 2025, the life assurance industry was composed of 12 direct life insurers, five reinsurers actively underwriting life business, and 1,757 registered life insurance agents. The number of agents decreased slightly from the 1,760 recorded in the previous quarter.
- 1.2 Life assurers recorded total insurance revenue of ZWG7.57 billion, equivalent to about US\$284.40 million. This represents a 63% increase compared to the US\$175.00 million recorded during the same period in the previous year.
- 1.3 The revenue composition shows a strong reliance on renewals, with recurring business contributing 94% of total insurance revenue. By contrast, new business accounted for only 6%.
- 1.4 Funeral and group life assurance remained the leading contributors to the life assurance sector, together accounting for 85% of total revenue. In the corresponding period last year, these two product lines accounted for 87% of revenue, a 2% decrease from the previous year.
- 1.5 One direct life insurer and two reinsurers did not comply with the Minimum Capital Requirement (MCR) of US\$2 million.
- 1.6 The total asset base of direct life insurers increased by 14%, rising from US\$644.43 million (ZWG17.17 billion) as at 30 September 2025 to US\$733.68 million (ZWG19.06 billion) as at 31 December 2025. This growth was driven mainly by new asset acquisitions, revaluation gains, and fair value adjustments.
- 1.7 Life reinsurers reported total assets of approximately US\$17.19 million (ZWG446.60 million), reflecting a 5% increase from US\$16.41 million (ZWG437.16 million) as at 30 September 2025. The increase was largely attributable to new asset purchases, revaluation gains, and fair value adjustments.
- 1.8 The average prescribed asset compliance ratio for life insurers stood at 8%, below the statutory minimum of 15%, and slightly lower than the 9% recorded in the previous quarter. Only four direct life insurers met the 15% requirement. Meanwhile, reinsurers posted an average compliance ratio of 25%, a decline from 26% in the prior quarter, with all reinsurers achieving the stipulated threshold.

- 1.9 During the period under review, the life assurance sector generated a nominal Profit Before Tax (PBT) of ZWG3.58 billion, equivalent to US\$134.41 million. This reflects a marked decline from the US\$196.14 million achieved in the corresponding period last year. The decrease was primarily driven by lower fair value adjustments, consistent with the relatively stable operating environment during the period.
- 1.10 Included in the PBT are fair value adjustments totalling ZWG256.76 million (US\$9.65 million) from both quoted and unquoted equity investments. This corresponds to unrealised gains of 7%, compared to the 27% unrealised gain reported in the comparative period.
- 1.11 During the review period, life reinsurers recorded a nominal PBT of ZWG58.49 million, equivalent to US\$2.20 million. This reflects an 8% decline compared to the US\$2.40 million reported in the corresponding period last year.
- 1.12 Shown below are Tables 1 and 2, which present the key financial indicators for life assurance and reinsurance companies.

Table 1: Summary of Key Financial Indicators for Life Assurers

SECTION B

ABOUT THE COMMISSION

2 Overview of the Insurance and Pensions Commission

2.1 The Insurance and Pensions Commission (IPEC) is a statutory body mandated to regulate, supervise, and develop the insurance and pensions business for the protection of policyholders and pension scheme members in Zimbabwe.

Terms of Reference

2.2 The activities of the Commission are guided by the following Acts and their respective regulations:

- Insurance and Pensions Commission Act [Chapter 24:21]
- Pensions and Provident Funds Act [Chapter 24:32]
- Insurance Act [Chapter 24:07]
- Money Laundering and Proceeds of Crime Act [Chapter 09:24]
- Finance Act [Chapter 23:04]
- Public Entities and Corporate Governance Act [Chapter 10:31]
- Public Finance Management Act [Chapter 22:19] and
- Public Procurement and Disposal of Public Assets Act [Chapter 22:23]
- Administration of Estates Act [Chapter 6:01].

2.3. Regulatory Developments

2.3.1. Circulars

The Commission issued the following Circulars during the year.

Table 3: Circulars issued during the twelve months ended 31 December 2025

Circular	Issue Date	Content
Circular 1 of 2025	1 February 2025	Pension Funds Reporting Requirements.
Circular 2 of 2025	15 February 2025	Submission of Quarterly Levy Computations and Due Dates.
Circular 4 of 2025	7 February 2025	2025 IPEC AML/CFT/CPF Industry Training Calendar.
Circular 6 of 2025	24 February 2025	Engagement with the Consultant on Financial Sector Development Policy.
Circular 7 of 2025	07 March 2025	Invitation to Participate in Digital Transformation Assessment.
Circular 8 of 2025	27 March 2025	2024 Financial Reporting.
Circular 9 of 2025	28 March 2025	Directive on Revised Statutory Reporting Deadlines.
Circular 10 of 2025	28 March 2025	Market Conduct Framework for the Insurance and Pensions Industry.
Circular 11 of 2025	3 April 2025	2024 Annual Reporting.
Circular 12 of 2025	1 April 2025	Clarity on Application of "No Premium No Cover" on Ceding of Insurance Business to Reinsurers.
Circular 13 of 2025	11 April 2025	Insurance Product Approval Framework
Circular 14 of 2025	8 April 2025	Minimum Re Reinsurance Standards for the Insurance Industry
Circular 15 of 2025	20 April 2025	IFRS 17 Industry Feedback Session
Circular 17 of 2025	25 June 2025	Issuance of Statutory Instrument 67 of 2025 on Minimum Capital Requirements

Circular	Issue Date	Content
		- Insurance (Amendment) Regulations, 2025 (No. 28).
Circular 18 of 2025	27 June 2025	Reminder: 2024 Annual Reporting Submissions Due by 30 June 2025
Circular 19 of 2025	07 August 2025	Revised Quarterly Return Template for Pension and Provident Funds.
Circular 20 of 2025	15 August 2025	Registration of Financial Statement Preparers with the Public Accountants and Auditors Board (PAAB)
Circular 21 of 2025	15 August 2025	Urgent Request for Comprehensive Annuitants' Data
Circular 22 of 2025	4 September 2025	Guideline on Administrative Framework for Offshore Investments
Circular 23 of 2025	10 September 2025	Request for Comments and Input into the Guideline on Preservation Funds
Circular 24 of 2025	10 September 2025	Guideline on Revised Reporting Requirements for Pension Funds
Circular 25 of 2025	16 September 2025	Board of Fund Members (Trustee) Toolkit
Circular 26 of 2025	15 September 2025	Guideline on Self-Insurance and Underwriting of Annuities by Dc Funds
Circular 27 of 2025	07 October 2025	Request for Inputs into the National Annual Budget.
Circular 28 of 2025	18 September 2025	Issuance of the Regulatory Sandbox Guidelines for the Industry.
Circular 29 of 2025	28 October 2025	Regulatory Sandbox Application Window for Cohort One.
Circular 30 of 2025	30 October 2025	Invitation to Participate in Stakeholder Consultants for the Tobacco Value

Circular	Issue Date	Content
		Chain Transformation Plan 11 Strategy Formulation (2026-2030).
Circular 32 of 2025	18 November 2025	Client Satisfaction Survey: 21 November -10 December 2025.
Circular 34 of 2025	23 December 2025	Guideline on Governance and Reporting Requirements for Preservation Funds.
Circular 35 of 2025	31 December 2025	Review Insurance and Pensions Cybersecurity and Data Protection Framework.
Circular 36 of 2025	31 December 2025	Amendment to Circular 14 of 2025: Reissue of the Minimum Reinsurance Standards Framework.

SECTION C

3. Economic Overview

3.1. Domestic Outlook

- 3.1.1. The fourth quarter of 2025 marked a consolidation phase for Zimbabwe's macroeconomic stabilisation agenda, with gains achieved earlier in the year in inflation and exchange rate stability largely sustained. The Reserve Bank of Zimbabwe (RBZ) maintained a disciplined and tight monetary policy stance throughout the quarter, reinforcing confidence in the domestic currency and anchoring inflation expectations.
- 3.1.2. Economic activity in Q4 2025 was supported by resilient performance in the mining sector, particularly gold and platinum, alongside steady agricultural output following favourable seasonal conditions earlier in the year.
- 3.1.3. Real GDP growth for 2025 is projected to remain strong at around 6%, consistent with the broad-based recovery observed across primary, manufacturing, and service sectors.

3.2. Global Outlook

- 3.2.1. In the fourth quarter of 2025, global economic activity settled into a "lower-growth equilibrium," following the fading of temporary early-year boosts and adjustments to a more fragmented trade environment.
- 3.2.2. The IMF revised the global growth forecast for 2025 slightly upward to 3.2%, up from 3% in July, reflecting resilient activity in the first half of the year. Growth is projected to ease to 3% in 2026, indicating steady but moderate expansion below pre-pandemic averages.

3.3. Inflation Developments

3.3.1. According to ZIMSTAT, month-on-month inflation remained subdued during the fourth quarter of 2025, reflecting continued price stability under the prevailing tight monetary policy environment.

Figure 1: Inflation Rate (% Monthly)

Exchange Rate Developments

3.3.2. In December 2025, the Zimbabwe Gold closed at approximately ZWG26.60:US\$1 on the willing-buyer willing-seller interbank market. This represents a depreciation relative to December 2024, when the exchange rate stood at about ZWG25.60:US\$1. Overall, the ZWG weakened by 4% year-on-year.

3.3.3. Despite the year-on-year depreciation, exchange rate movements in Q4 2025 were characterised by relative stability, with only modest adjustments compared to earlier periods.

Figure 2: Average Official Exchange Rate

3.4. Zimbabwe Stock Exchange (ZSE)

- 3.4.1. The ZSE sustained its positive momentum into the fourth quarter of 2025, with market capitalisation remaining elevated, despite a moderation in trading activity. This performance reflects continued investor reliance on equities as a store of value, alongside emerging signs of liquidity tightening toward year-end.
- 3.4.2. ZSE market capitalisation increased to ZWG 87.26 billion in December 2025, representing a 32% growth from ZWG 66.24 billion in 2024.
- 3.4.3. Total turnover value increased to ZWG 5.43 billion in Q4 2025, translating to a +147% growth from ZWG 2.28 billion in Q4 2024.

3.5. Victoria Falls Stock Exchange Market (VFEX)

- 3.5.1. The VFEX maintained a positive performance trajectory during the fourth quarter of 2025, supported by continued foreign currency-denominated listings and sustained investor interest in offshore-facing assets. Market outcomes reflect the VFEX's growing role as a platform for value preservation and capital inflows.
- 3.5.2. VFEX market capitalisation increased to US\$2.1 billion, marking a 64% increase from US\$1.28 billion in Q4 2024, underpinned by price gains in key counters and sustained investor demand for foreign currency-denominated assets.
- 3.5.3. Turnover value on the VFEX increased to US\$111.05 million over the 2025 period, reflecting a 95% growth from US\$56.94 million in Q4 2024. Turnover volume surged to 1.46 billion shares, indicating broader market participation and improved depth.

SECTION D

PERFORMANCE OF LIFE ASSURANCE COMPANIES

4. Architecture of the Life Assurance Sector

- 4.1. During the period under review, the life assurance sector was composed of 12 registered life insurers. Collectively, these entities reported 1,757 agents, comprising both corporate and individual representatives, reflecting a decrease from 1,760 agents recorded in Q3 2025.

Performance in Terms of Insurance Revenue

- 4.2. Over the period under review, direct life insurers recorded insurance revenue of ZWG7.57 billion, equivalent to approximately US\$284.40 million based on the average official exchange rate. This represents a 63% increase from the US\$175.00 million reported in the corresponding period of 2024. Revenue denominated in foreign currency accounted for 50% of the total insurance revenue, a 15% decline from 65% in the previous year, largely due to exchange rate stability. Notwithstanding the decline in proportion of forex business, the life insurance industry reported US\$142.46 million in foreign currency revenue, representing a 26% increase from the US\$113.30 million recorded in the corresponding period of 2024.
- 4.3. Funeral and group life assurance remained the main revenue drivers for the life insurance sector, together accounting for 85% of total income.
- 4.4. Despite a 2% year-on-year decrease from 87%, funeral and group life assurance continue to dominate the sector with a combined revenue share of 85%. These lines remain the primary drivers of the industry, maintaining significant pressure on the market share of traditional life assurance products.
- 4.5. A notable change in the life insurance sector is the move from traditional long-term policies to mainly renewable annual ones. This trend is especially clear in funeral assurance and group life insurance products available today. The industry is strongly urged to comply fully with the Funeral Directive.
- 4.6. Presented below is a table showing the insurance revenue and net premium written for each life insurance company.

Table 4: Insurance Revenue and Net Premium Written Per Company

Company	Insurance Revenue December 2025 (ZWG Million)	Market Share (Insurance Revenue)	Net Premium Written December 2025 (ZWG Million)	Market Share (Net Premium Written)
Nyaradzo Life	3,648.87	48.23%	3,786.44	47.74%
Doves Life	992.04	13.11%	1,022.16	12.89%
Old Mutual Life	991.04	13.10%	1,017.61	12.83%
First Mutual Life	416.84	5.51%	322.37	4.06%
Econet Life	417.82	5.52%	393.25	4.96%
Zimnat Life	413.83	5.47%	394.32	4.97%
Fidelity Life	262.99	3.48%	465.74	5.87%
CBZ Life	200.85	2.65%	186.73	2.35%
ZB Life	169.19	2.24%	289.68	3.65%
Nhaka Life	40.73	0.54%	40.73	0.51%
Evolution Life	10.11	0.13%	10.05	0.13%
Heritage Life	1.15	0.02%	2.52	0.03%
Total	7,565.45	100.00%	7,931.59	100.00%

- 4.7. Nyaradzo Life Assurance Company remains the market leader in the life assurance sector, holding a 48% market share, primarily supported by its substantial revenue from funeral assurance policies.
- 4.8. The top five companies in the sector generated total insurance revenue of ZWG6.47 billion, equivalent to US\$243.09 million.
- 4.9. Revenue from the five leading life insurers represents 85% of the sector's total, highlighting a significant concentration of revenue among the major market players.
- 4.10. Measured by the Herfindahl-Hirschman Index (HHI) of 2,784.96, the life assurance industry is highly concentrated. This shows that a few dominant firms control a large portion of the market, potentially reducing competition.

Insurance Revenue by Product

- 4.11. Currently, funeral assurance remains the primary contributor to the life assurance sector, representing 73% of total revenue, with group life assurance as the second-largest segment at 12%.
- 4.12. Among the remaining products, credit assurance accounted for the largest portion at 7% of total revenue, followed by term assurance at 3% and endowment assurance at 3%. The categories, other, whole life, and pure endowment, held smaller shares of 1.43%, 0.52%, and 0.12%, respectively.
- 4.13. The figure below depicts the distribution of revenue across various life assurance product lines, while the accompanying table provides a detailed breakdown of insurance revenue by product line for each company.

Figure 3: Distribution of Insurance Revenue by Product Line

Table 5: Distribution of Insurance Revenue by Product Line Per Company

Company	Term insurance	Endowment	Pure endowment	Whole life	Funeral	GLA	Credit assurance	Other	Total
ZWG Million									
CBZ Life	56.33	0.00	-	0.00	79.81	64.68	-	0.02	200.85
Doves Life	-	-	-	-	992.04	-	-	-	992.04
Econet Life	-	-	-	-	390.86	15.32	-	11.64	417.82
Evolution Life	-	-	-	0.00	10.10	-	-	-	10.11
Fidelity Life	1.59	193.95	9.43	1.75	19.39	36.87	-	-	262.99
First Mutual Life	151.06	-	-	-	46.87	153.87	-	65.05	416.84

Company	Term insurance	Endowment	Pure endowment	Whole life	Funeral	GLA	Credit assurance	Other	Total
ZWG Million									
Heritage Life	-	-	-	-	-	0.00	-	1.15	1.15
Nhaka Life	9.67	-	-	-	4.28	0.47	-	26.31	40.73
Nyaradzo Life	-	-	-	-	3,648.87	-	-	-	3,648.87
Old Mutual Life	-	-	-	-	114.06	359.71	517.26	-	991.04
ZB Life	5.53	15.42	-	0.12	105.00	39.07	-	4.05	169.19
Zimnat Life	31.99	25.40	-	37.54	119.24	199.67	-	-	413.83
Total	256.18	234.77	9.43	39.41	5,530.52	869.67	517.26	108.21	7,565.45
Percentage	3.39%	3.10%	0.12%	0.52%	73.10%	11.50%	6.84%	1.43%	100%

4.14. The top five life assurance companies have a product focus largely concentrated on funeral assurance and group life assurance products. Nyaradzo Life, Doves Life, and Econet Life focus exclusively on funeral assurance. In contrast, Old Mutual maintains a specialised portfolio that includes both credit life assurance, where it holds a niche, and group life assurance, a segment that is also a primary focus for Zimnat and First Mutual.

5. Not Taken Up Policies

5.1. In the quarter under review, the life assurance sector recorded 24,846 Not Taken Up (NTU) policies, leading to a probable revenue loss of ZWG4.72 million, equivalent to US\$0.18 million.

5.2. Shown below is a table detailing the Not Taken Up (NTU) policies.

Table 6: Not Taken Up Policies

Name of Company	Number of Policies	Insurance Revenue - ZWG Million
Econet Life	22,070	2.65
Zimnat Life	1,665	1.34
Doves Life	849	0.49
Old Mutual Life	168	0.07
ZB Life	55	0.11
Fidelity Life	39	0.05
Total	24,846	4.72

- 5.3. It is strongly recommended that Econet Life, Zimnat Life, and Doves Life promptly investigate the underlying reasons for their high NTU rates. This may involve conducting surveys to pinpoint issues such as affordability, limited product understanding, or dissatisfaction with the onboarding process.
- 5.4. To get ahead of potential misrepresentation, life insurers should tighten their oversight of how agents present products to potential customers. By prioritising consumer education at both the company and industry levels, we create a robust defence that empowers clients to make well-informed financial choices.

Lapsable Policies

- 5.5. At the start of Q4 2025, the life assurance sector had 2,422,176 active policies. During this period, 663,478 policies lapsed, resulting in a lapse ratio of 27%, up from 19% recorded in the same quarter of the previous year.
- 5.6. Policy lapses are largely driven by affordability challenges and changes in policyholders' circumstances. The Commission expects insurers to engage proactively and effectively with policyholders prior to lapses, exploring possible measures to prevent policy cancellations.
- 5.7. The table below provides the lapse ratio for each individual entity.

Table 7: Lapse Ratios

Name of Company	No. of Lapsable Policies at the Beginning of the Quarter	Lapsed Policies (Individual Life)	Lapsed Policies (Group Business)	Lapse Ratio
Econet Life	1,284,091	607,786	3,475	47.60%
Nhaka Life	67	11	-	16.42%
Old Mutual Life	87,654	6,167	-	7.04%
Doves Life	199,301	4,373	9,564	6.99%
Zimnat Life	61,472	2,936	-	4.78%
Nyaradzo Life	602,210	19,335	6,303	4.26%
First Mutual Life	81,233	2,171	-	2.67%
CBZ Life	44,320	891	-	2.01%

Name of Company	No. of Lapsable Policies at the Beginning of the Quarter	Lapsed Policies (Individual Life)	Lapsed Policies (Group Business)	Lapse Ratio
Fidelity Life	59,986	466	-	0.78%
Evolution Life	-	-	-	0%
Heritage Life	1,842	-	-	0%
ZB Life	-	-	-	0%
Total/ Average	2,422,176	644,136	19,342	27.39%

5.8. In the review period, Econet Life and Nhaka Life recorded lapse ratios above 10%, mainly due to policyholders experiencing financial challenges and changing their insurance preferences, which led to numerous policy cancellations. Econet and Nhaka Life are strongly advised to conduct detailed experience analyses to identify the key factors driving these high lapse rates. The treatment of savings policies lapsing is receiving the Commission's attention from a market conduct perspective.

5.9. Based on the findings, the two companies should develop and implement targeted, data-driven strategies aimed at reducing lapse rates and improving policyholder retention.

Market Share

5.10. With respect to revenue, Nyaradzo Life, Doves Life, and Old Mutual Life are the top performers in the life insurance sector, together controlling a substantial market share of 74%, while the remaining insurers make up 26%.

5.11. The market share of the sector, based on revenue, is illustrated below.

Figure 4: Market Share in Terms of Insurance Revenue

5.12. For sustainable growth in the insurance industry, market participants should prioritise developing innovative products that align with current market trends and evolving consumer needs. They are encouraged to utilise the Regulatory Sandbox Guideline to support the introduction of new products. Expanding into a wider array of value-driven insurance solutions is crucial to remain resilient and relevant amid changing economic and demographic conditions.

Market Share Based on Total Assets

5.13. Nyaradzo Life and Old Mutual Life Assurance dominate the life assurance market, jointly holding 52% of total assets, while the remaining 48% is shared among all other companies.

5.14. Displayed below is a chart showing the distribution of market share by entity according to assets.

Figure 5: Market Share Based on Total Assets

5.15. Life insurance companies need to maintain a robust and resilient asset base, emphasising proper asset-liability matching in terms of duration and liquidity. This strategy is essential to enable entities to promptly meet policyholder obligations, safeguard financial stability, and strengthen stakeholder confidence.

6. Foreign Currency Business

- 6.1. Over the review period, the life insurance industry generated US\$142.46 million in foreign currency revenue, representing a 26% increase from the US\$113.30 million recorded in the corresponding period of 2024.
- 6.2. The increase in foreign currency business is primarily driven by policyholders switching from local to foreign currency policies, with a smaller contribution from new business acquisition, reflecting the sector's largely recurring revenue pattern.
- 6.3. Foreign currency transactions accounted for 50% of total revenue during the review period, reflecting a 15% decline from 65% in the same period of 2024.

- 6.4. Life insurers are required to fully comply with Statutory Instrument 280 of 2020, which mandates asset-liability matching for foreign currency business. This requires that foreign currency premiums be invested in foreign currency-denominated assets and that related claims be settled in the same currency.
- 6.5. Shown below is a figure depicting the breakdown of foreign currency business written by each life assurance company.

Figure 6: Market Share by US\$ Insurance Revenue

- 6.6. Holding the largest share of the foreign currency market, Nyaradzo Life accounts for 35%, supported by its dominant position in the life assurance industry.

7. Reassurance

- 7.1. During the review period, the life assurance industry ceded ZWG95.07 million (US\$3.57 million) out of total insurance revenue amounting to ZWG7.57 billion (US\$284.40 million) to reinsurers, resulting in a reinsurance ratio of 1%.
- 7.2. The relatively low reinsurance ratio is largely attributable to two structural characteristics of the sector. Firstly, the predominance of funeral assurance products, which typically provide benefits in kind rather than cash and are generally not reinsured. Secondly, the widespread issuance of annually renewable policies, many of which do not incorporate reinsurance arrangements, thereby limiting overall reinsurance uptake within the industry.

7.3. Reassurance functions as a critical risk management tool by transferring underwritten liabilities to reinsurers. This allows primary assurers to optimise capital utilisation and reinforce their financial stability. Furthermore, it supports improved monitoring and management of overall risk exposure.

7.4. Life insurance companies are encouraged to thoroughly evaluate their risk retention capacity, particularly in relation to GLA policies, and secure appropriate reinsurance arrangements in line with their risk management frameworks.

Asset Quality

7.5. As at the end of the review period, the life assurance sector's total assets amounted to ZWG19.06 billion (approximately US\$733.68 million), reflecting a 14% increase from the US\$644.43 million recorded on 30 September 2025.

7.6. Investment portfolios of life assurance companies are primarily composed of investment properties and listed equities, which together constitute 47% of total assets. These asset classes are intended to drive long-term growth, hedge against inflation, and support sound asset-liability matching.

7.7. Presented below is a figure depicting the distribution of assets within the life assurance sector by asset class.

Figure 7: Assets Breakdown by Class

7.8. Insurers are encouraged to maintain prudent alignment between their assets and the nature and duration of their liabilities. This practice is essential for sound asset-liability management and supports sustained long-term financial stability.

8. Prescribed Assets

- 8.1. Total investments in prescribed assets by the life assurance sector amounted to ZWG1.60 billion (US\$61.61 million), translating to an average compliance ratio of 8% for the review period, which falls short of the statutory minimum of 15%.
- 8.2. Only four entities, Nhaka Life, CBZ Life, Fidelity Life, and Econet Life, met the required minimum prescribed asset ratio of 15% of total assets. The Commission expects the sector to increase investments in prescribed assets as more investment instruments become available to meet the stipulated thresholds.

9. Liquidity and Earnings

- 9.1. The life assurance sector recorded a positive insurance service result of ZWG3.30 billion (US\$124.23 million), reflecting an underwriting profit generated from its core insurance operations.
- 9.2. The sector's current ratio stands at 1.64:1, indicating that the industry holds sufficient liquid assets to comfortably meet its short-term liabilities.
- 9.3. Life insurers posted an average combined ratio of 56%, demonstrating solid profitability from primary operations. This comprises a claims ratio of 33% and an insurance expense ratio of 23%.
- 9.4. PBT for the review period totalled ZWG3.58 billion, largely supported by investment income, dividend income, and fair value gains on quoted equities. At the average official exchange rate, this equates to US\$134.41 million. The figure represents a 31% decline from the US\$196.14 million recorded in the corresponding period last year, mainly due to market adjustments following the introduction of the ZWG currency and the subsequent stabilisation of the operating environment.
- 9.5. Presented below is a table summarising the life sector's expenses, claims, and combined ratio.

Table 8: Expense Ratios

Company	Insurance Expense Ratio	Claims Ratio	Combined Ratio
CBZ Life	59%	33%	92%
Fidelity Life	39%	45%	84%
Econet Life	33%	51%	83%
Doves Life	40%	29%	69%
Evolution Life	46%	15%	61%
ZB Life	35%	25%	60%
First Mutual Life	28%	28%	56%
Old Mutual Life	27%	23%	50%
Nyaradzo Life	14%	35%	49%
Heritage Life	2%	34%	35%
Zimnat Life	7%	25%	33%
Nhaka Life	17%	10%	28%
Total	23%	33%	56%

9.6. Combined ratios for all life insurance companies remained below 100%, highlighting strong underwriting performance across the sector. Nonetheless, CBZ Life (92%), Fidelity Life (84%), and Econet Life (83%) recorded ratios near 100%, indicating relatively narrower underwriting margins compared to the industry average.

9.7. The figure below shows the distribution of income for the sector.

Figure 8: Composition of Income for Life Companies

9.8. Income during the review period was largely driven by insurance income, which made up 80% of the total, while investment income accounted for the remaining 20%. This represents a significant shift from the previous year, when

both insurance and investment income contributed equally at 50% each. The change is mainly due to a more stable exchange rate environment, resulting in a substantial decline in revaluation gains and fair value adjustments.

- 9.9. Insurance revenue in the industry is predominantly recognised under the General Measurement Model, which accounts for 62% of total revenue and remains the standard for all contracts. Revenue from simpler contracts measured under the Premium Allocation Approach accounted for 38%, while the Variable Fee Approach contributed only 0.37%, reflecting the limited availability of products with direct participation features.
- 9.10. The life assurance sector's investment income came from a variety of sources, including fair value adjustments on gold coins, contract fees, realised gains from equity sales, commission income, fund administration fees, and other miscellaneous streams.

Figure 9: Breakdown of Investment Income in Life Insurance Companies

10. Life Assurance Capitalisation

- 10.1. As of 31 December 2025, eleven life assurance companies met the US\$2 million Minimum Capital Requirement as outlined in S.I. 167 of 2025. The Commission has engaged Heritage Life Assurance Company to facilitate its recovery.

Should these efforts fail, the Commission will institute appropriate regulatory measures.

10.2. The table below shows the life assurance companies' current capitalisation levels.

Table 9: Capitalisation of Life Assurance Companies

Name of Company	Capital - ZWG Million	US\$2 Million Equivalent
Nyaradzo Life	4,155.82	159.96
Old Mutual Life	4,023.98	154.88
Doves Life	821.37	31.61
ZB Life	643.85	24.78
First Mutual Life	599	23.06
Fidelity Life	348.55	13.42
Zimnat Life	279.07	10.74
Econet Life	269.66	10.38
CBZ Life	183.21	7.05
Evolution Life	80.2	3.09
Nhaka Life	53.18	2.05
Heritage Life	18.97	0.73
Total	11,477	442

SECTION E

PERFORMANCE OF LIFE REASSURANCE COMPANIES

11. Nature of the Reassurance Business

11.1. Life reinsurers are permitted to underwrite both life and non-life insurance. However, this report concentrates solely on their life assurance operations.

Performance in Terms of Reassurance Revenue

11.2. During the review period, life reinsurers recorded insurance revenue of ZWG238.87 million, approximately US\$8.98 million based on the average interbank exchange rate.

11.3. This represents a 23% increase in reinsurers' insurance revenue, rising to US\$8.98 million from US\$7.28 million in the same period of 2024.

11.4. Group life assurance was the main contributor to reinsurers' income, accounting for 65% of total revenue. Overall, life reinsurers achieved a positive insurance service result of ZWG59.22 million, equivalent to roughly US\$2.23 million.

12. US\$ Business Revenue for Reassurers

12.1. As at 31 December 2025, life reassurers reported US\$8.14 million in foreign currency business, accounting for 91% of their total insurance revenue. This high share underscores the importance of foreign currency transactions in their underwriting operations.

12.2. Compared to the same period in 2024, insurance revenue rose by 30%, increasing from US\$6.26 million to 8.14 million reported during the year ended 31 December 2025.

12.3. The life reinsurance sector recorded an underwriting profit, with a total insurance service result of US\$1.75 million, representing a 17% increase from US\$1.49 million in December 2024.

12.4. PBT for the review period amounted to US\$1.75 million, reflecting a 51% increase from the US\$1.16 million reported as at 31 December 2024.

13. Reassurers' Asset Quality

13.1. Life reinsurers' total assets reached ZWG446.60 million (approximately US\$17.19 million), reflecting a 5% increase from US\$16.41 million as at 30 September 2025. This growth was primarily driven by favourable fair value adjustments and targeted new investments across various asset classes.

13.2. The figure below illustrates the distribution of assets for life reinsurers.

Figure 10: Life Reassurers' Total Assets

13.3. Of the total assets reported by reinsurers, prescribed assets accounted for the largest share, making up 22% of the sector's total assets. Investment property was the next largest allocation at 21%, followed by money market instruments and cash at 20%.

14. Prescribed Assets

14.1. By the end of the period, total investments in prescribed assets by the sector amounted to ZWG100.34 million (US\$3.86 million), resulting in an average compliance ratio of 25%, which exceeds the statutory minimum of 15%.

14.2. To support national development goals, life reinsurers continue to optimise their investment portfolios through projects that satisfy prescribed asset quotas. By prioritising these dual-purpose investments, the sector demonstrates its commitment to regulatory excellence and sustainable national development.

15. Earnings

15.1. For the review period, PBT reached ZWG58.49 million, or roughly US\$2.20 million, mainly driven by investment income. Notably, insurance operations now account for a larger share (90%) of revenue compared to previous periods, when investment income dominated, indicating a shift toward more balanced income streams.

15.2. Underwriting performance remained strong for reinsurers, with an average combined ratio of 72%, consisting of an average claims' ratio of 40% and an average insurance expense ratio of 32%.

16. Market Share

Market Share by Reassurance Revenue

16.1. Emeritus Re leads the sector in terms of market share by revenue, with 43%, followed by WAICA Re at 20% and FBC Re at 20%. The remaining business is held by FML Re (16%) and ZEP Re (1%).

16.2. The figure below illustrates the distribution of market share in the life reinsurance sector based on revenue.

Figure 11: Market Share by Reassurance Revenue

Market Share Based on Total Assets

16.3. Emeritus Re had the largest share of assets in the reinsurance sector at 42%, followed by WAICA Re with 27%. The remaining assets were distributed among First Mutual Re (16%), FBC Re (11%), and ZEP Re (5%).

16.4. The figure below presents the distribution of market share based on asset values.

Figure 12: Market Share Distribution in Terms of Total Assets

17. Life Reassurers Capitalisation

17.1. Emeritus Re, FML Re, and WAICA Re are among the life reinsurers that successfully met the US\$2 million Minimum Capital Requirement.

17.2. The other two reinsurers fell short of the minimum capital requirement, and the Commission has engaged them to comply with Statutory Instrument 67 of 2025.

17.3. The accompanying table below provides details of the current capitalisation levels for all life reinsurers.

Table 10: Capitalisation of Reassurance Companies

Name of Company	Capital - ZWG Million	US\$2 Million Equivalent
	Dec-25	Dec-25
Emeritus Reinsurance	120.37	4.63
WAICA Reinsurance	91.09	3.51
First Mutual Reinsurance	65.52	2.52
FBC Reinsurance	35.64	1.37
ZEP Reinsurance	7.73	0.3
Total	320.36	12.33

SECTION F

18. COMPLAINTS HANDLING

18.1. For the year ended 31 December 2025, the Commission received a total of 108 complaints relating to life and funeral business. Of these, 61 complaints (57%) pertained to life insurance and 47 complaints (43%) to funeral assurance.

Complaints by Category

18.2. An analysis of complaints by category reveals that unpaid benefits remained the predominant source of grievances, accounting for 46% of all complaints received during the period under review.

18.3. This is a matter of ongoing regulatory concern, as failure to timeously process and pay benefits constitutes a direct contravention of the statutory obligations imposed on administrators under the relevant legislation.

Figure 13: Complaints by Category

18.4. Information-related complaints accounted for the second-largest share at 23%, reflecting persistent gaps in member communication and disclosure practices across the industry.

18.5. Low benefit complaints followed at 16%, indicating continued member dissatisfaction with benefit values, an issue that may, in part, be attributable to inadequate benefit illustration at the point of sale and poor member education throughout the policy lifecycle.

18.6. Deduction-related complaints constituted 9% of total complaints, pointing to instances of unlawful, unauthorised, or insufficiently explained deductions. The remaining 6% comprised miscellaneous complaints not falling within the above categories.

Regulatory Observations and Directives

18.7. The Commission notes with concern that the complaints profile for the year under review is broadly consistent with trends observed in prior periods, suggesting that systemic remediation by industry participants has been inadequate.

18.8. The Commission accordingly directs all licensed insurers, funeral assurers, and administrators to take immediate and demonstrable steps to address the root causes of complaints, with particular emphasis on the following:

- Administrators are reminded of their statutory obligation to process and pay claims and benefits within the timeframes prescribed under applicable legislation and policy terms. Persistent delays in benefit payment will attract regulatory sanctions.
- All entities are required to provide members with accurate, complete, and timely information regarding their policies, benefits, and entitlements. Administrators must ensure that member-facing communication is clear, accessible, and compliant with the Commission's disclosure requirements.
- All deductions from member accounts or policy values must be lawful, transparently disclosed, and properly authorised in accordance with the underlying policy terms and applicable legislation. Any deduction that cannot be substantiated upon request will be treated as a regulatory violation.
- The Commission will continue to monitor complaint trends as a key indicator of market conduct and will take appropriate supervisory action where systemic or recurring failures are identified.

Complaints by Regulated Entity

18.9. The graph below records a total of 108 complaints across nine regulated entities for the year under review.

18.10. The distribution is highly skewed, with two entities, Fidelity (37) and First Mutual (20), accounting for approximately 53% of all complaints. This concentration warrants focused supervisory attention on these entities.

Figure 14: Complaint by Regulated Entity

18.11. Fidelity Life's complaint load of 37 is disproportionate relative to all other regulated entities and suggests systemic rather than isolated service failures. Whether this reflects claims processing delays, benefit disputes, or contribution-related grievances, the volume alone justifies a targeted compliance review and possible on-site inspection.

18.12. First Mutual's 20 complaints similarly place it in a category requiring structured engagement rather than routine monitoring.

18.13. Zimnat, Nhaka, and Doves each recorded 10 complaints — a moderate but non-trivial number that warrants review of complaint categories to determine whether patterns exist.

18.14. Old Mutual (7), Nyaradzo (6), and Econet (6) fall in a lower band, though for smaller or newer operators, even single-digit complaint volumes may indicate proportionally significant service issues.

Complaints Resolution Performance

18.15. Of the 108 complaints recorded for the year, 99 (92%) were classified as non-complex, of which 94 were successfully resolved, yielding a non-complex resolution rate of 95%.

18.16. The remaining 9 complaints were classified as complex and sit outside this resolution count, meaning the overall portfolio resolution rate across all 108 complaints stands at approximately 87% (94 resolved out of 108).

SECTION G

19. ANTI-MONEY LAUNDERING AND COMBATING THE FINANCING OF TERRORISM AND PROLIFERATION FINANCING

19.1. Eleven of the twelve life assurance companies submitted their AML/CFT/CPF returns for the fourth quarter of 2025. The industry continues to demonstrate improved understanding of key money-laundering risks associated with its business activities.

Assessment of ML/TF/PF Inherent Risk

19.2. Customer Risk

Figure 15: Proportion of US\$ and ZWG Revenue per High-Risk Clients

19.3. High-risk clients contributed 0.03% of total ZWG revenue and 2% of US\$ revenue in Q4 2025, a slight decline from 0.04% (ZWG) and 2.19% (US\$) recorded in the previous quarter.

ZWG Portfolio:

- Domestic PEPs accounted for 89% of the high-risk ZWG client base and generated 64% of high-risk ZWG revenue.
- Trusts, although less than 1% of clients, contributed 6% of high-risk revenue.

- NGOs composed 4% of high-risk clients but generated only 0.6% of high-risk revenue.
- High net worth individuals (HNWIs) represented 8% of high-risk clients and contributed a significant 30% of high-risk ZWG revenue.

US\$ Portfolio:

- Domestic PEPs made up 2% of the high-risk US\$ client base and contributed 2% of high-risk US\$ revenue.
 - Non-resident clients dominated the portfolio, representing 89% of high-risk clients and accounting for 62% of high-risk US\$ revenue.
 - NGOs formed 7% of high-risk US\$ clients and contributed 15% of revenue.
 - HNWIs, less than 1% of clients, contributed 4% of high-risk US\$ revenue.
- 19.4. Following the review of institutional risk assessments, the Commission expects life assurers to broaden their classification of high-risk clients in line with the findings of the Third National Money Laundering Risk Assessments. This includes giving due consideration to sectors such as real estate, dealers in precious metals and precious stones, and motor vehicle dealers, all of which exhibit elevated ML risk due to their high-value and cash-intensive operations.
- 19.5. Consideration should be given to the varying risk levels across different types of NGOs, as not all NGOs present a high terrorist-financing risk. Findings from the Risk Assessment for the Non-Profit Organisations Sector identified church-based organisations, international organisations and trusts as higher-risk categories.
- 19.6. **Product Risk:** The market remains concentrated in lower-risk funeral assurance products, which accounted for 73% of total revenue. Group Life Assurance (GLA) contributed 12%, while conventional life assurance products accounted for 6.64%. Conventional life products present a higher ML/TF risk compared to funeral and GLA products due to their investment and savings components. During the quarter, six life assurers offered Term Assurance and generated ZWG 256.18 million in revenue. Only three assurers were offering endowment products.

- 19.7. **Use of Intermediaries:** Life assurers continue to rely heavily on intermediaries for business acquisition. During the reporting period, the subsector engaged 1,742 sole agents and 15 corporate agents, who collectively generated 53% of ZWG revenue and 78% of US\$ revenue. Brokers contributed an additional 14% of ZWG and 18% of US\$ revenue, largely from corporate-linked policies. Direct clients accounted for a smaller share of business, generating 41% of ZWG and 11% of US\$ revenue. Given this significant dependence on intermediaries, both agents and brokers must receive continuous AML/CFT/CPF training and maintain full compliance with all regulatory obligations, particularly in onboarding, customer due diligence, and risk identification.
- 19.8. **Geographic Risk:** One life assurer reported exposure to diaspora clients residing in high-risk foreign jurisdictions. However, the associated risk remains limited due to the nature of the product, funeral cover only, and the small revenue earned, amounting to US\$11,165 from 291 clients. Two entities also reported exposure to domestic high-risk areas, particularly regions associated with small-scale gold mining. EDD should be applied to clients residing in high-risk areas to ensure appropriate risk mitigation.
- 19.9. **Source of Funds:** Premium funding continues to be dominated by salaried individuals, who contributed 77.3% of ZWG revenue and 72.7% of US\$ revenue during the period. Self-employed clients accounted for 19.2% of ZWG revenue and 8.3% of US\$ revenue. These clients present a moderate ML/TF risk, largely due to variable income patterns and less readily verifiable sources of funds. Formal trading businesses, 3.5% of ZWG revenue, and 8.9% of US\$ revenue.
- 19.10. **Mode of Payment:** Electronic payments accounted for 95% of ZWG premiums and 70% of US\$ premiums in the fourth quarter. However, US\$ cash premiums increased significantly, rising from 10% in the first quarter to 30% in the quarter under review. Cash premiums continue to present elevated money-laundering and fraud risks, particularly due to reduced traceability and higher susceptibility to manipulation.
- 19.11. Life assurers must therefore continue to implement robust internal controls, apply appropriate customer due diligence, and maintain effective transaction

monitoring to mitigate these risks and ensure compliance with AML/CFT/CPF requirements.

19.12. Suspicious Transactions and Large Cash Transactions: Life assurers demonstrated improved implementation of reporting obligations in 2025, largely driven by enhancements to transaction monitoring systems and ongoing staff training.

19.13. A total of 13 STRs were submitted to the Financial Intelligence Unit (FIU), an increase from 6 STRs recorded in 2024. One entity submitted 3 STRs during the quarter. Notably, several life assurance entities were now reporting STRs, compared to only a few in prior years.

19.14. During the quarter under review, two life assurance entities submitted CTRs amounting to US\$ 245,450.

IMPLEMENTATION OF CONTROL MEASURES

19.15. The Life Assurance sector continues to register notable improvements in the implementation of AML/CFT/CPF controls reported in 2025 compared to 2024, despite the existence of some gaps in some areas. An assessment controls across eleven (11) life assurance companies, and supporting documents revealed the following.

Table 11: AML/CFT/CPF Controls Implementation

Control Area	2024 Satisfactory or better	2025 Satisfactory or better	Movement
Board & Senior Oversight	6/11 (55%)	9/11 (82%)	↑ Significant Improvement
AML Policy Adequacy	7/11 (64%)	10/11 (91%)	↑ Significant Improvement
Institutional Risk Assessments	5/11 (45%)	8/11 (73%)	↑ Moderate Improvement
CDD & KYC Effectiveness	7/11 (64%)	8/11 (73%)	↑ Marginal Improvement
Customer Risk Profiling	6/11 (55%)	8/11 (73%)	↑ Moderate Improvement
Transaction Monitoring	4/11 (36%)	6/11 (55%)	↑ Limited Improvement
STR Escalation Framework	5/11 (45%)	7/11 (64%)	↑ Moderate Improvement

Control Area	2024 Satisfactory or better	2025 Satisfactory or better	Movement
Record Keeping	9/11 (82%)	10/11 (91%)	Stable
UN Sanctions & CPF Controls	4/11 (36%)	9/11 (82%)	↑ Substantial Improvement

19.16. **Governance and Board AML/CFT Oversight:** Board-level oversight improved, largely due to AML/CFT training targeting board members. AML/CFT policies were being approved at the board level, and board discussions were strengthened through more comprehensive compliance reports being submitted to board committees covering AML/CFT issues. Despite overall improvement, two small life insurers continue to exhibit weak board oversight due to underlying governance deficiencies. The Commission is actively engaging these entities to address the identified gaps.

19.17. **Adequacy of AML/CFT Policies:** Improvements in policy frameworks were driven largely by enhanced documentation and more frequent updates. However, it is essential that policy reviews are tailored to institution-specific risks for them to be effective. Policies that merely restate regulatory requirements, without reflecting the entity's unique products, distribution channels, and customer risk profiles, will not achieve the intended level of AML/CFT/CPF control effectiveness.

19.18. **Customer Due Diligence (CDD)/KYC:** Notable improvements were observed in customer identification and verification processes. Weaknesses persist in beneficial ownership identification and verification; only 4 entities reported implementing the requirement. Identification of high-risk clients is generally satisfactory; however, gaps remain in the documentation and consistent application of EDD measures for higher-risk customers.

19.19. **Transaction Monitoring and STR Reporting:** Transaction monitoring remains largely manual across the sector, although some entities have integrated automated processes, particularly for large life insurers. While STR reporting has improved and exceeded single-digit levels in the fourth quarter of 2025, overall volumes remain low relative to the sector's size and complexity.

- 19.20. **United Nations Security Council Resolutions Sanctions/ Targeted Financial Sanctions:** Improvements noted include sanctions screening, inclusion of both CTF and CPF policies, and clearer freezing procedures. However, post-onboarding screening, beneficiary screening, and sanctions-list update procedures remain inconsistent. Continued supervisory focus will be maintained due to heightened global CPF expectations.
- 19.21. **Recordkeeping:** Recordkeeping remains the strongest area of compliance across the sector. Most institutions demonstrated the existence of documented retention policies aligned to statutory requirements, including maintenance of customer identification records, transaction and records.
- 19.22. **AML/CFT/CPF Training:** The number of internal AML/CFT/CPF training sessions conducted has improved significantly. However, the frequency, depth, and focus of training must be risk-based, reflecting the specific risks identified by each institution rather than relying on generic content.
- 19.23. Life assurance entities should continue to review their risk assessments and update client risk-rating profiles to ensure alignment with institution-specific vulnerabilities and nationally identified risks. Entities must apply risk mitigation measures commensurate with the level of risk, ensuring that controls are both proportionate and effective.

SECTION H

20. Conclusion

- 20.1. The life assurance sector finds itself at a crucial inflexion point, transitioning from an environment where volatile market conditions heavily skewed financial results to one where operational resilience and strategic clarity are paramount.
- 20.2. While the industry demonstrates fundamental strength in its core underwriting activities and maintains adequate liquidity, its long-term viability faces two interconnected challenges: structural focus and public trust.
- 20.3. The heavy and long-standing reliance on traditional funeral assurance is not a sustainable path forward. Future growth depends entirely on the industry's willingness to strategically innovate and diversify its product portfolio.
- 20.4. Achieving market growth necessitates moving beyond just compliance and addressing the pervasive issue of low public confidence. This is especially highlighted by the need to investigate and eliminate the root causes of high Not Taken Up rates, which signal a breakdown in sales quality or customer comprehension.
- 20.5. In essence, the sector must embrace change, prioritising strategic adaptation and the rebuilding of stakeholder trust as the core mandates for securing its future relevance and contribution to the national economy.
