

Insurance and Pensions Commission (IPEC)

Pensions Report

Quarter ended 31 March 2017

Disclaimer

This report does not cover the public-sector pension scheme, National Social Security Authority (NSSA). The report is based on unaudited financial statements of insured, stand-alone self-administered funds as well as self-administered funds under insurers and professional fund administrators. This report, including any enclosures and attachments, has been prepared by the Insurance and Pensions Commission solely for informative purposes to the pensions industry stakeholders, and may not be reproduced, redistributed, communicated to a third party or relied upon by any other person or for any other purpose without the Commission's prior written consent. The Commission does not accept any liability if this report is used for any other purpose other than for the abovementioned intended purpose.

Definition of Terms

Insured Funds – A fund whose contributions are used to buy assets which are registered in the name of the insurer and not the fund.

Self-Administered Funds – For the purposes of this report self-administered funds are those under fund administrators and insurers but their assets are registered in the respective names of the funds.

Stand Alone Funds – These are self-administered funds which own and control their administration structures (having own employees) for the purpose of operating the fund.

Overview of the Pensions Industry

The key performance indicators for the pensions industry as at 31 March 2017 are as shown in Table 1 below.

Table 1: Key Highlights of the Pensions Industry

Indicator	Insured Funds	Self-Administered Funds	Stand-Alone Self-Administered Funds	Total
Number of Funds	1,106	175	16	1,297
Members	126,925	110,090	323,513	560,528
Share of total membership	22.64%	19.64%	57.72%	100%
Total Income (\$)	20,534,782	43,363,358	48,228,947	112,127,087
Total Contributions (\$)	19,892,701	26,442,737	29,774,692	76,110,130
Rental Income (\$)	167,661	8,223,449	9,687,740	18,078,849
Investment Income	1,165,161	6,497,666	3,797,337	11,460,165
Total Expenditure (\$)¹	21,159,237	26,176,873	33,832,387	81,168,497
Total Benefits Incurred (\$)	19,455,658	19,426,181	19,486,786	58,368,625
Expenses/Contributions²	8.54%	18.62%	27.21%	19.35%
Expenses/Total Income	8.27%	11.35%	16.80%	14.75%
Income Surplus(Deficit)	(624,455)	17,186,485	14,396,560	30,958,590
Total Assets (\$)	837,993,253	1,021,119,585	1,495,525,223	3,354,638,061
Percentage of Total Assets	24.98%	30.44%	44.58%	100%
Prescribed Assets (\$)	275,250,152	122,796,443	61,791,905	459,838,500
Prescribed Assets Ratio	32.85%	12.03%	4.13%	13.71%
Contribution Arrears (\$)	13,145,423	41,890,981	407,958,129	462,994,532

Notes on table:

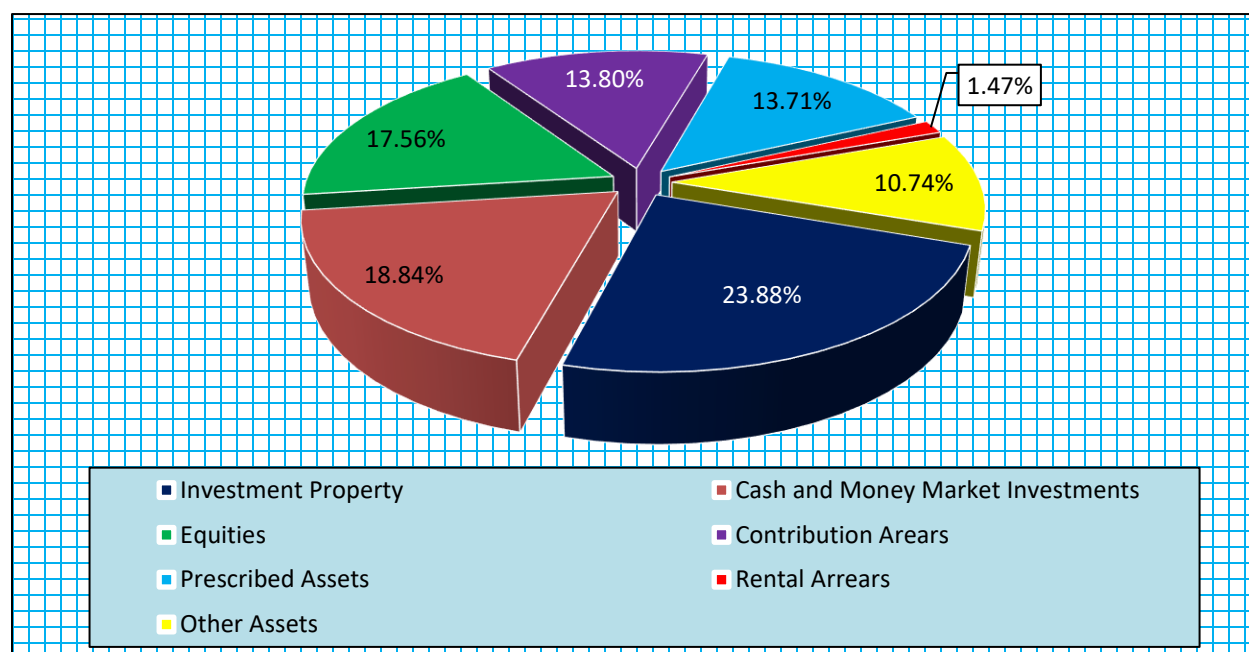

1. Total Expenditure for the industry includes benefits incurred.
2. Expenses are calculated as total expenditure excluding items such as expenditure on benefits, transfers to reserves and revaluation reserves.

The pensions industry had 1,297 registered private occupational pension funds with total membership of 560,528 as at the 31st of March 2017. Total income for pensions industry amounted to \$112.53 million for the quarter ended 31 March 2017. The income for the pensions industry was mainly attributable to contributions, rental income and investments income which totalled \$105.65 million and accounted for 94.22% of the total income. Total expenditure amounted to \$89.13 million resulting in a net surplus of \$30.96 million for the quarter under review.

Total benefits incurred amounted to \$59.47 million and accounted for 66.72% of total expenditure incurred during the quarter ended 31 March 2017. On the other hand, the pensions industry reported average expense ratios of 19.35% and 14.75% based on total contributions and total income respectively (please note that the calculations exclude benefits incurred). As shown in Table 1 above, expense ratios were relatively higher for stand-alone self-administered funds. The Commission expects industry players to devise effective cost containment measures in a bid to reduce expense ratios to figures below 5% given the low investment returns in the market.

Total assets for the pensions industry amounted to \$3.35 billion at the 31st of March 2017. It is commendable that 73.99% of the assets base was made up of assets which are suitable to match pension funds liabilities namely investment properties, cash and money market investments, equities, and prescribed assets. However, the Commission noted, with concern, a significant proportion of total assets totalling 15.27% of the asset base that was tied up in contribution and rental arrears. These two asset classes amounted to \$462.99 million and \$49.41 million respectively as at 31 March 2017. The high level of contribution and rental arrears compromises the asset quality, especially when recoverability of the same is doubtful under the existing operating environment. The challenge in respect of contribution arrears was mainly prevalent in stand-alone self-administered funds with a total of \$407,96 million arrears.

Figure 1: Distribution of Total Assets for the Pensions Industry

The pensions industry reported an industry average prescribed assets ratio of 13.71% as at 31 March 2017 which was compliant with the regulatory minimum requirement of 10%. All subsectors, except stand-alone self-administered funds subsector, reported average prescribed assets ratios which were above 10% as shown in Table 1 above. The Commission calls for all pension funds to ensure compliance with minimum prescribed assets ratio failure of which necessary regulatory measures will be taken.

Stand-alone self-administered funds subsector is considered to be of more systemic importance based on its market share of membership and total assets, which were 57.72% and 44.58% respectively as at 31 March 2017, as shown in Table 1 above. The subsector for stand-alone self-administered pension funds however, exhibited higher contribution arrears and expense ratios compared to the other subsectors of the pensions industry. The subsector's systemic importance coupled with challenges relating to contribution arrears and high expense ratios is a situation which calls for more regulatory attention.

The consolidated financial statements for the industry are shown on Annexures 1 and 2.

1 SECTION A: INSURED SCHEMES

1.1 Industry Architecture

As at 31st of March 2017, there were five (5) life assurers with insured pension funds, out of eleven (11) registered and operational life assurers. The total number of insured pension funds as at that date was 1,106 as shown in Table 2 below:

Table 2: Breakdown of Insured Schemes by Insurer

Life Assurer	Number of Insured Schemes
1. Fidelity Life	71
2. First Mutual Life	198
3. Old Mutual Life	528
4. ZB Life	143
5. Zimnat Life	166
Total	1,106

1.2 Membership

The total membership for insured schemes as at the 31st of March 2017 was 126,925. The distribution according to membership class is as shown in Table 3 below.

Table 3: Insured Funds Membership

Membership Class	Number
New Entrants	649
Active Members (Excluding New Entrants)	113,014
Deferred Pensioners	7,884
Members with Unclaimed Benefits	4,640
Number of Exits for Whom Pensions Were Bought Outside Fund	707
Others	31
Total Membership	126,925

1.3 Earnings

Total income reported by insured schemes for the quarter ended the 31st of March 2017 amounted to \$20.53 million against a total expenditure of \$21.16 million resulting in a deficit position of \$0.62 million. The major income driver for insured schemes was contribution income which amounted to \$19.89 million and accounted for 96.87% of total income for the period under review.

The total benefits paid to members in the form of pensions, full and part commutations, death and withdrawal benefits, as well as Group Life Assurance (GLA) benefits totaling \$19.45 million were the major expenditure item. The benefits paid out were 94.76% of total income generated by insured funds. Such a scenario indicates that the bulk of expenditure was in respect of member benefits which is the primary objective of the pension funds.

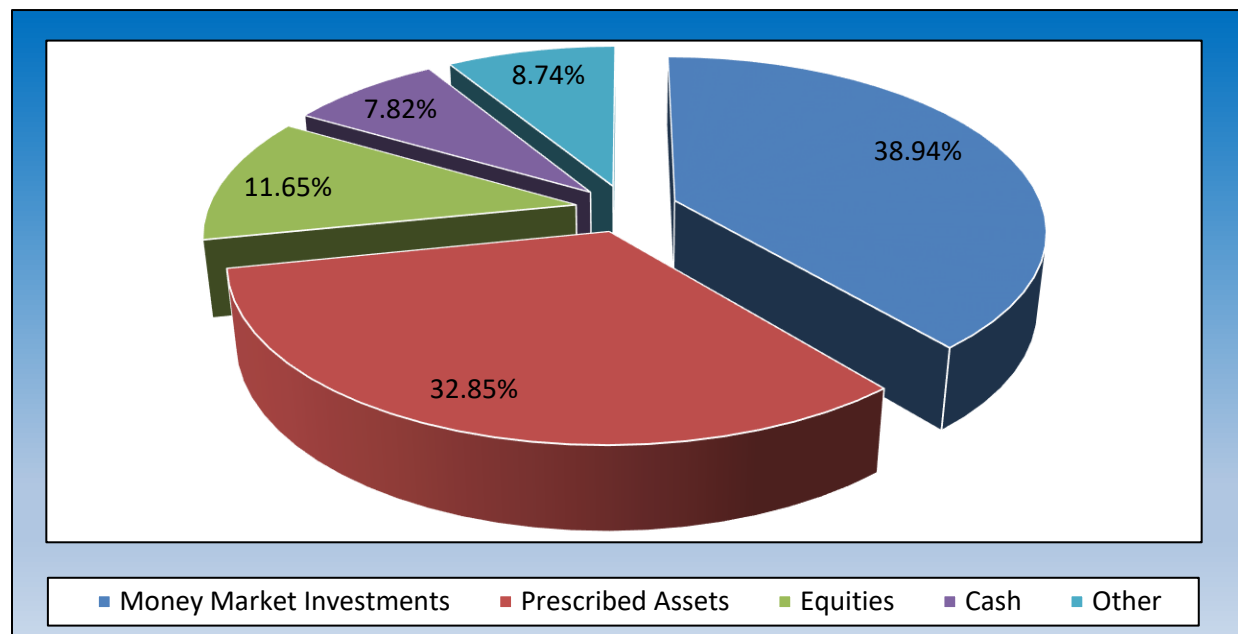

Insured funds reported an average expense ratio of 8.54% during the quarter under review, implying that out of every dollar of pension contribution about 9 cents was dedicated towards meeting expenses of running the fund. The average expense ratio for insured funds compared favourably with that of self-administered funds and stand-alone self-administered funds. Notwithstanding this position, the Commission implores insurers to devise strategies to contain the expenses to levels below 5%. The Income Statements for Insured Schemes are shown on Annexure 3.

1.4 Asset Quality

Insured schemes reported total assets amounting to \$837.99 million as at the 31st of March 2017. The asset base for insured schemes was skewed towards money market investments as well as prescribed assets which amounted to \$326.31 million and \$275.25 million respectively and accounted for a total of 71.79% of total assets as at 31 March 2017. The remaining \$238.7 million was invested in various asset classes as shown in Figure 2 below. The investment of significant amounts in prescribed assets by insured schemes is quite commendable as it contributes towards projects of national importance.

The Balance Sheets for Insured schemes are shown on Annexure 4.

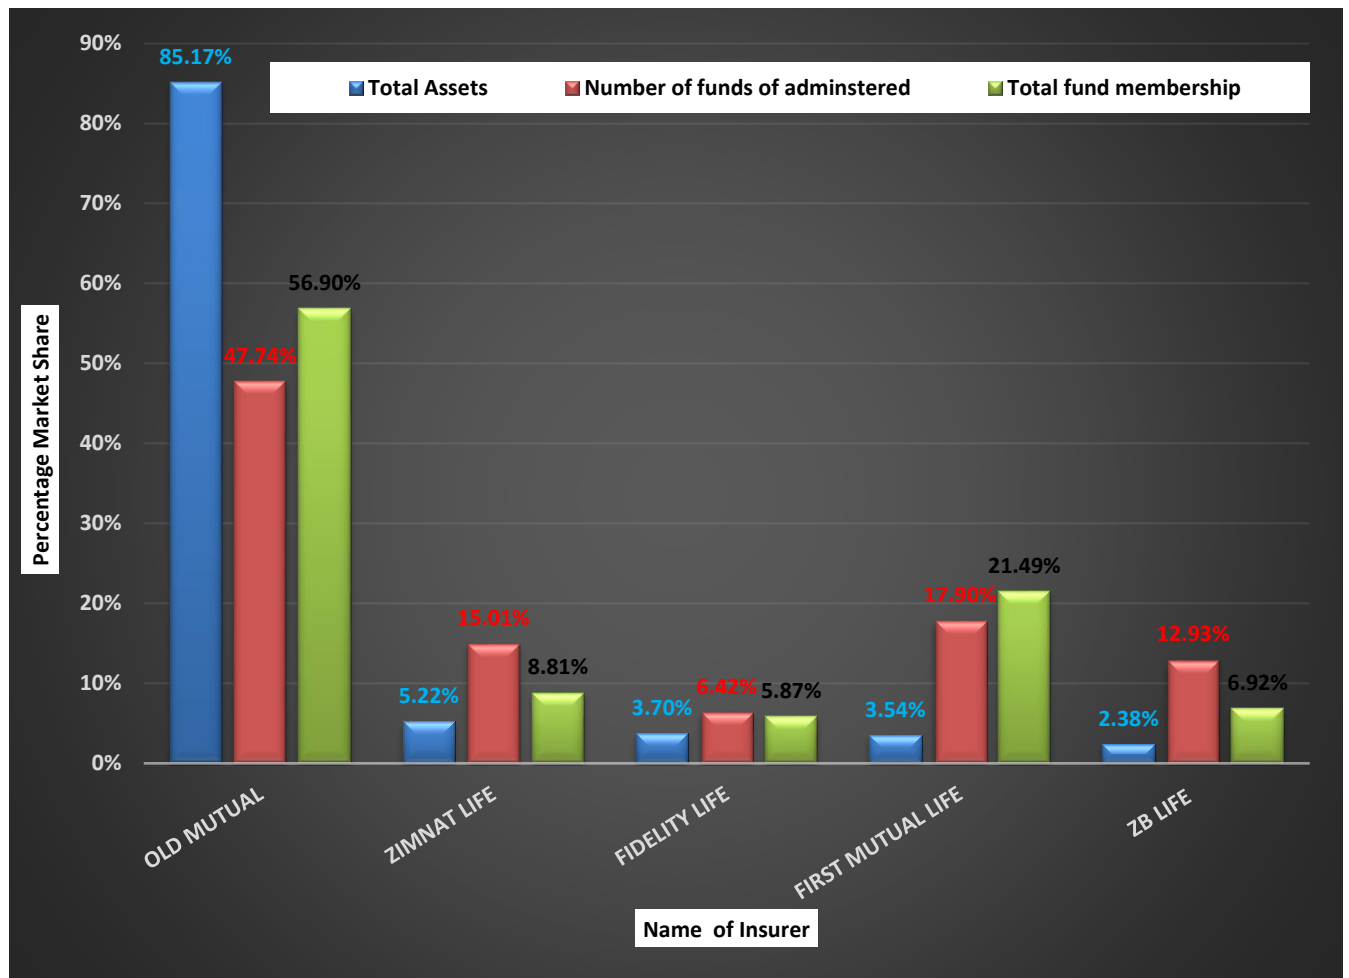

Figure 2: Distribution of Total Assets for Insured Funds

1.5 Market Share

Old Mutual Life Assurance Company was dominant in the subsector for insured pension funds in terms of number of total assets, number of funds administered and total fund membership with market shares of 85%, 48% and 57% respectively. The market share for insured pension funds as at 31 March 2017 according to total assets, number of funds administered and total fund membership are depicted on Figure 3 below.

Figure 3: Market Share for Insured Funds

2 SECTION B - SELF-ADMINISTERED FUNDS

2.1 Industry Architecture

There were of six (6) registered administrators and eleven (11) registered life assurers permitted to administer pension funds as at 31 March 2017. The said life offices and administrators reported a total of 176 registered self-administered funds as at 31 March 2017. The number of funds administered by each administrator and insurer as at 31 March 2017 is shown in Table 4 below.

Table 4: Number of Self-Administered Funds

Name of Insurer/Administrator*	Number of Funds Administered
Professional Administrators	
1. Capitol Insurance Brokers	1
2. Comarton Consultants	30
3. Marsh Employee Benefits	45
4. Minerva Benefits Consulting	59
5. Zimbabwe Insurance Brokers	5
Sub-total	140
Life Companies	
1. Fidelity Life Assurance Company	1
2. First Mutual Life Assurance Life Company	5
3. Old Mutual Life Assurance Company	25
4. Nyaradzo Life Assurance Company	2
5. Zimnat Life Assurance Company	2
Sub-total	35
Grant Total	175

*Life offices and administrators not shown in this table were not administering any self-administered pension funds although the scope of their licenses permits the same.

2.2 Membership

The total membership for self-administered funds was 110,090 members as at 31 March 2017.

The distribution according to membership class is as detailed in table 5 below.

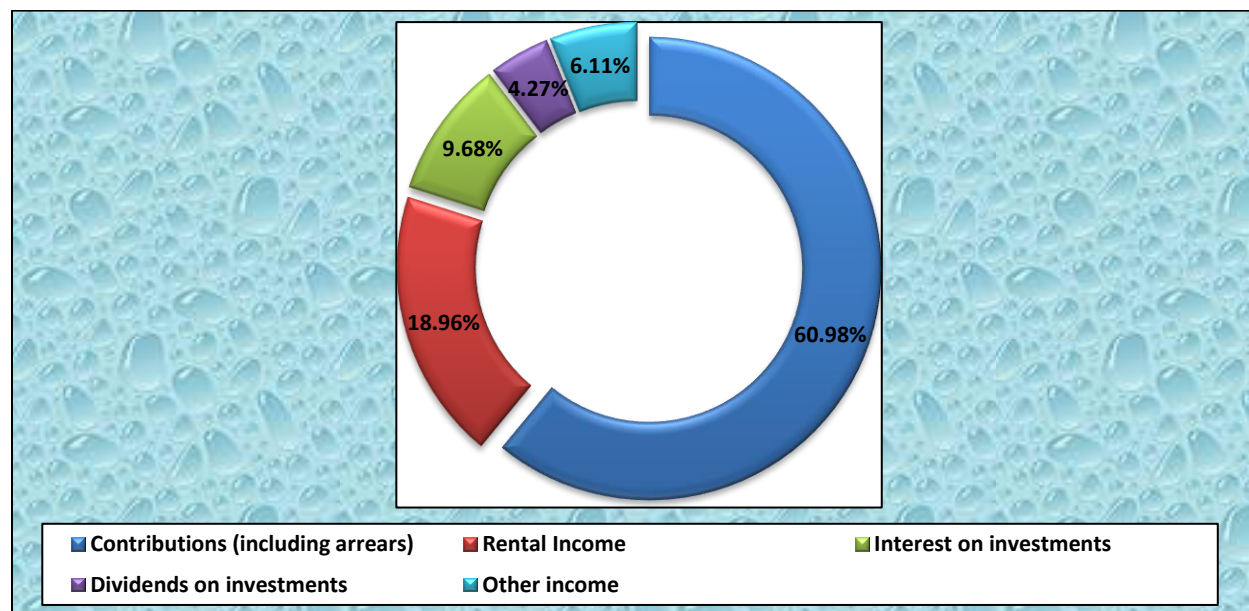

Table 5: Self-Administered Funds Membership

Membership Class	Number
New entrants	1,446
Active members(excluding new entrants)	72,723
Pensioners	8,580
Deferred Pensioners	10,857
Suspended pensioners	4,019
Unclaimed benefits(number)	7,678
Number of exits for whom pensions were bought outside fund	103
Number of members with annuity benefits outside fund	4,684
Total Membership	110,090

2.3 Earnings

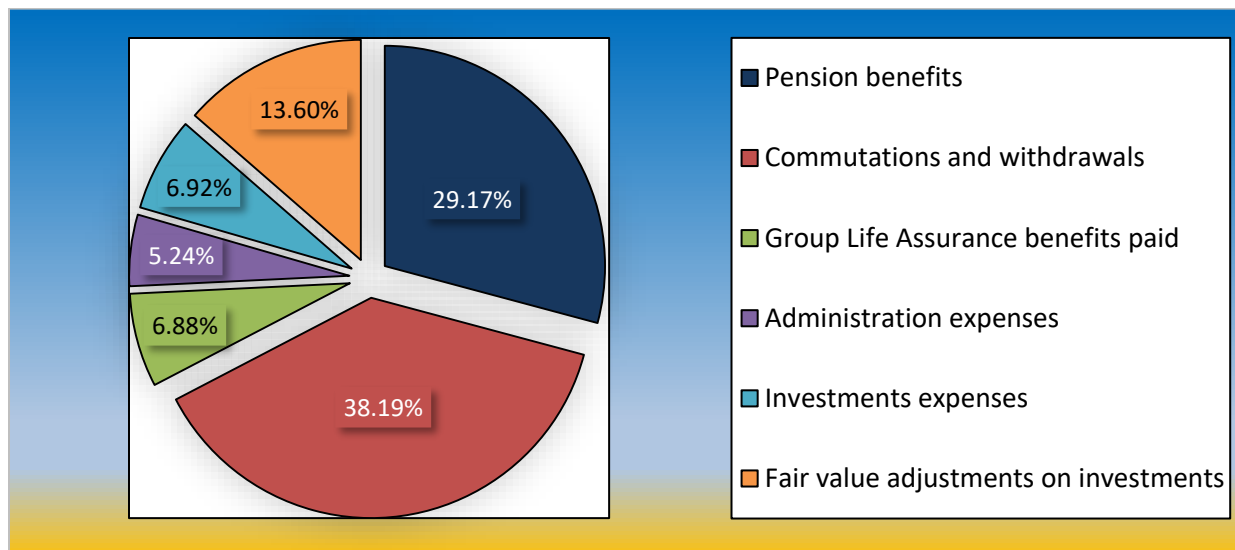

Self-administered funds reported a total income of \$43.36 million for the quarter ended 31 March 2017. The total income was mainly composed of pension contributions and rental income which amounted to a total of \$34.66 million, and accounted for 79.94% of total income. The composition of the total income for the quarter ended 31 March 2017 is shown in Figure 4 below.

Figure 4: Composition of Total Income for Self-Administered Funds

Total expenditure for self-administered pension funds amounted to \$26.18 million resulting in surplus income of \$17.19 million for the quarter ended 31 March 2017. A total of \$19.43 million was incurred in respect of benefits to members. Total benefits incurred were 44.80% to total income for self-administered funds. On the other hand, total expenses excluding benefits incurred amounted to \$4.92 million for the quarter ended 31 March 2017. This accounted for 12.16% of the total expenses and translated to 18.62% and 11.53% of total contributions and total income respectively. The breakdown of the total expenditure for the quarter ended 31 March 2017 is shown in Figure 5 below. See Annexure 5 for more details.

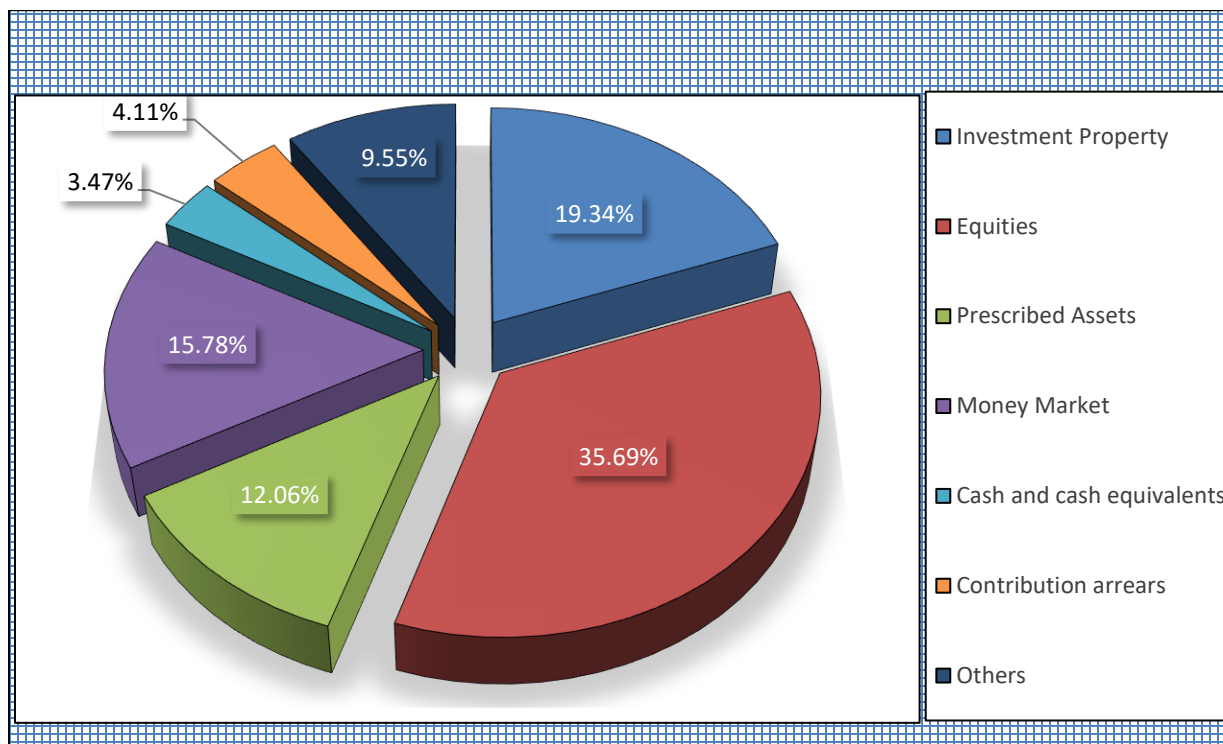

Figure 5: Self-Administered Funds Expenditure Breakdown

2.4 Asset Quality

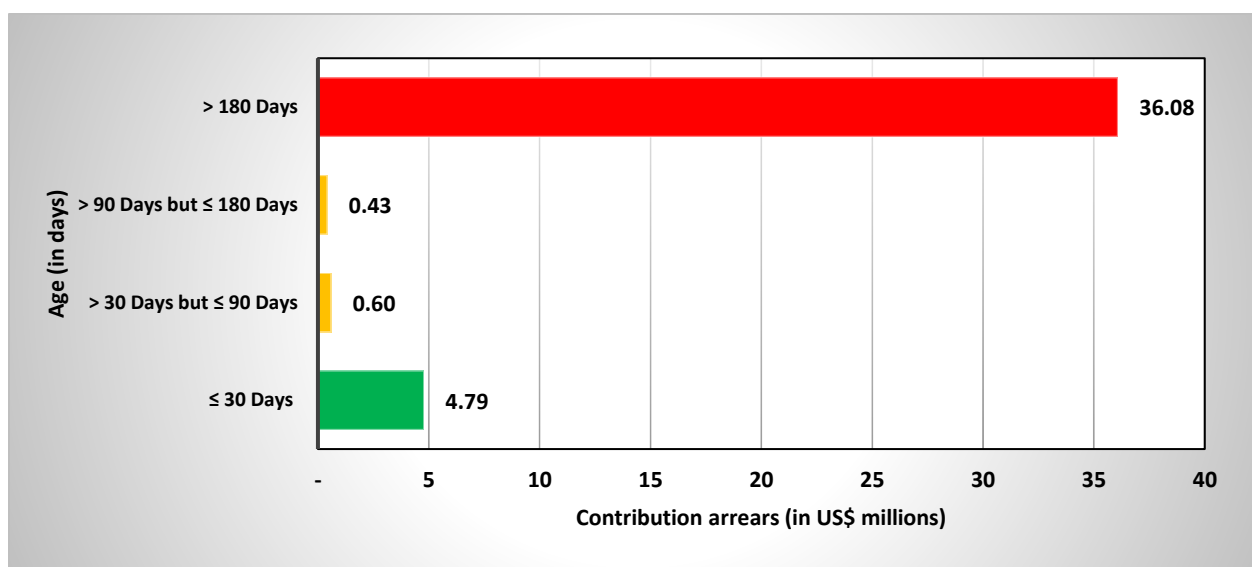

The total assets for self-administered pension funds amounted to \$1.02 billion as at 31 March 2017. The asset base for self-administered funds was skewed towards equities and investment properties which totaled \$560.41 million and accounted for a total of 55.03% of the total assets as at the reporting date. The skewing towards long term investment classes is a fair reflection of the long-term nature of the pensions industry. Self-administered funds reported an average prescribed asset ratio of 12.06% which was compliant with the regulatory minimum of 10%. Figure 6 below shows the distribution of total self-administered funds' assets as at 31 March 2017. See Annexure 6, the Consolidated Statement of Financial Position for more details.

Figure 6: Distribution of Total Self-Administered Fund Assets

Of the total sector assets as at 31 March 2017, 4.11%, amounting to \$41.89 million was attributable to contribution arrears. The age analysis of the contribution arrears is as indicated in Figure 7 below.

Figure 7: Age Analysis of Contribution Arrears for Self-Administered Funds

As indicated in Figure 7 above the bulk of contribution arrears amounting to \$36.08 million and accounting for 86.13% of the same arrears as at 31 March 2017, were aged above 180 days, while a total of \$5.81 million was aged at or below 180 days. The high percentage of contribution arrears aged above 180 days indicates a high level of credit risk for self-administered pension funds.

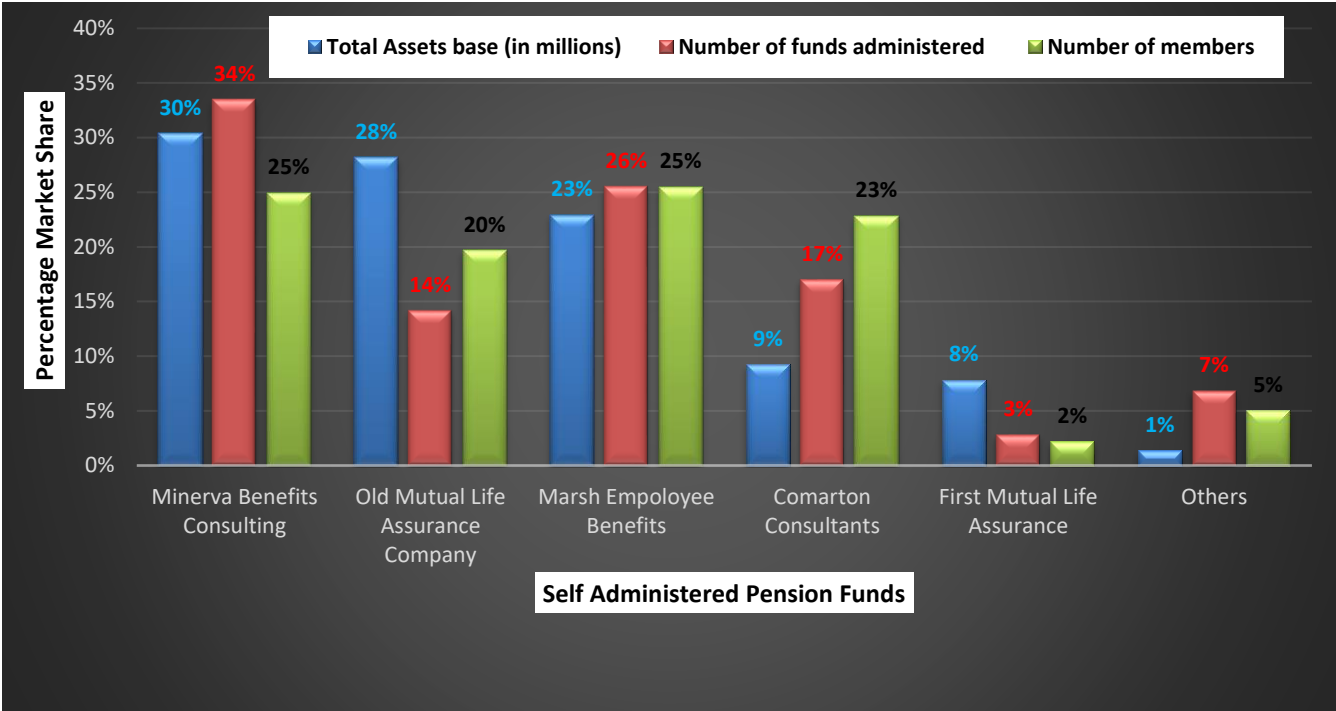

2.5 Market Share

Of the total assets base for self-administered pension funds amounting to \$1.021 billion as at 31 March 2017, \$832.5 million, accounting for 81.5% of total assets were owned by funds administered by Minerva Benefits Consultants, Old Mutual Life Assurance Company and Marsh Employee Benefits. The other \$188.5 million which accounted for 18.5% of total assets was attributable to self-administered funds administered by the 7 other administrators.

Of the 176 self-administered funds administered by administrators and assurers, 134 funds, accounting for 77% of all the funds, were administered by Minerva Benefits Consulting, Marsh Employee Benefits, and Comarton Consultants. Old Mutual Life Assurance Company administers 25 self-administered funds, accounting for 14% of all self-administered pension funds. The other administrators and assurers administer 17 of the 176 self-administered pension funds, accounting for 7% of the total number of self-administered pension funds.

Of the total membership of 110,090 members for self-administered pension funds, 80,703 members accounting for 73 % of the total membership were members of funds administered by Minerva Benefits Consultants, Marsh Employee Benefits and Comarton Consultants. The distribution of assets, number of funds administered, and total membership amongst funds administered by the administrators and life companies are as shown in Figure 8 below.

Figure 8: Market Share for Self-Administered Funds

3 SECTION D: STAND ALONE PENSION FUNDS

3.1 Industry Architecture

There was a total of 16 Self-administered stand-alone pension funds as at 31 March 2017.

3.2 Membership

There were 323,513 members as at the 31st of March 2017. The total number of suspended pensioners and members with unclaimed benefits was 17,253, accounting for 5% of the total membership of the funds. The funds are urged to improve their communication with all members on an ongoing basis so as to reduce incidences of unclaimed benefits as well as suspended pensioners. The breakdown of the total membership is shown in table 6 below;

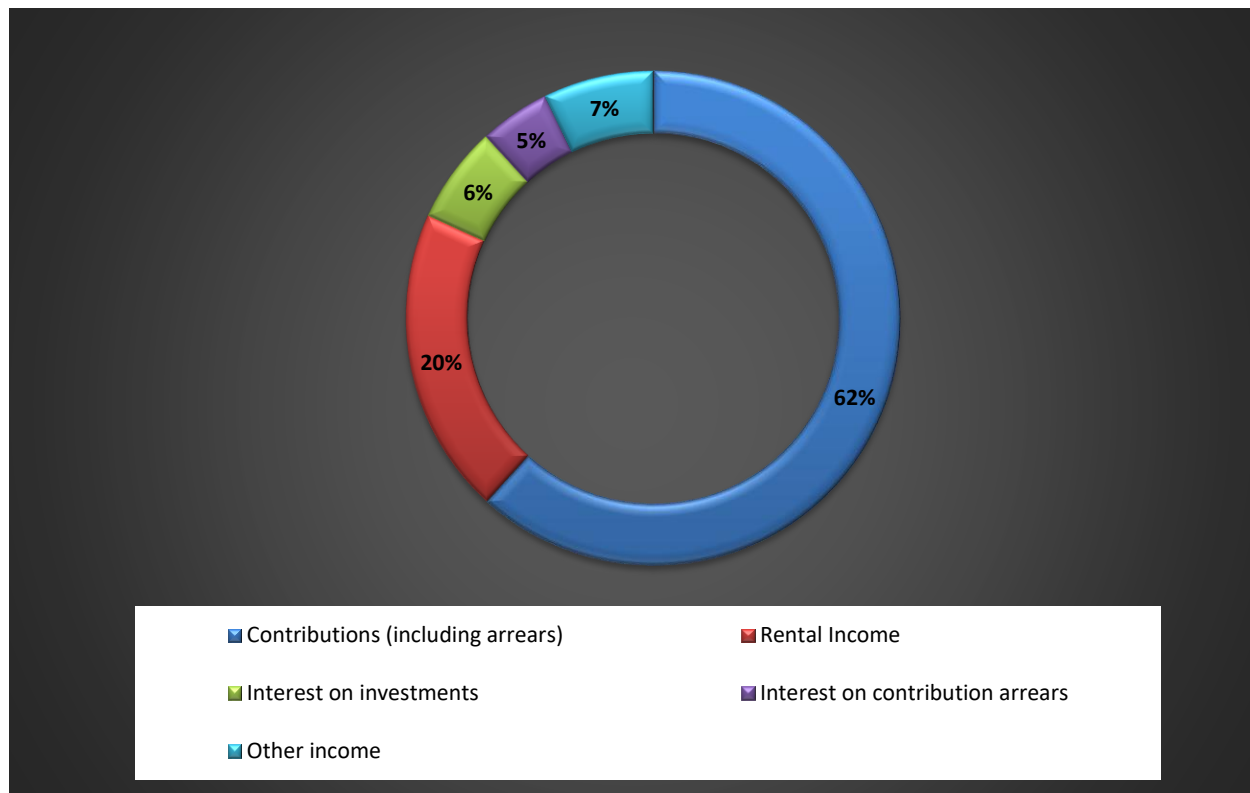

Table 6: Membership Statistics for Stand-Alone Pension Funds

Membership Category	Number	Percentage (%)
New entrants	1,539	1%
Active members	175,465	54%
Pensioners	31,599	10%
Deferred Pensioners	97,399	30%
Suspended Pensioners	7,799	2%
Unclaimed benefits	9,454	3%
Exits with annuities outside fund	258	0%
Totals	323,513	100%

3.3 Earnings

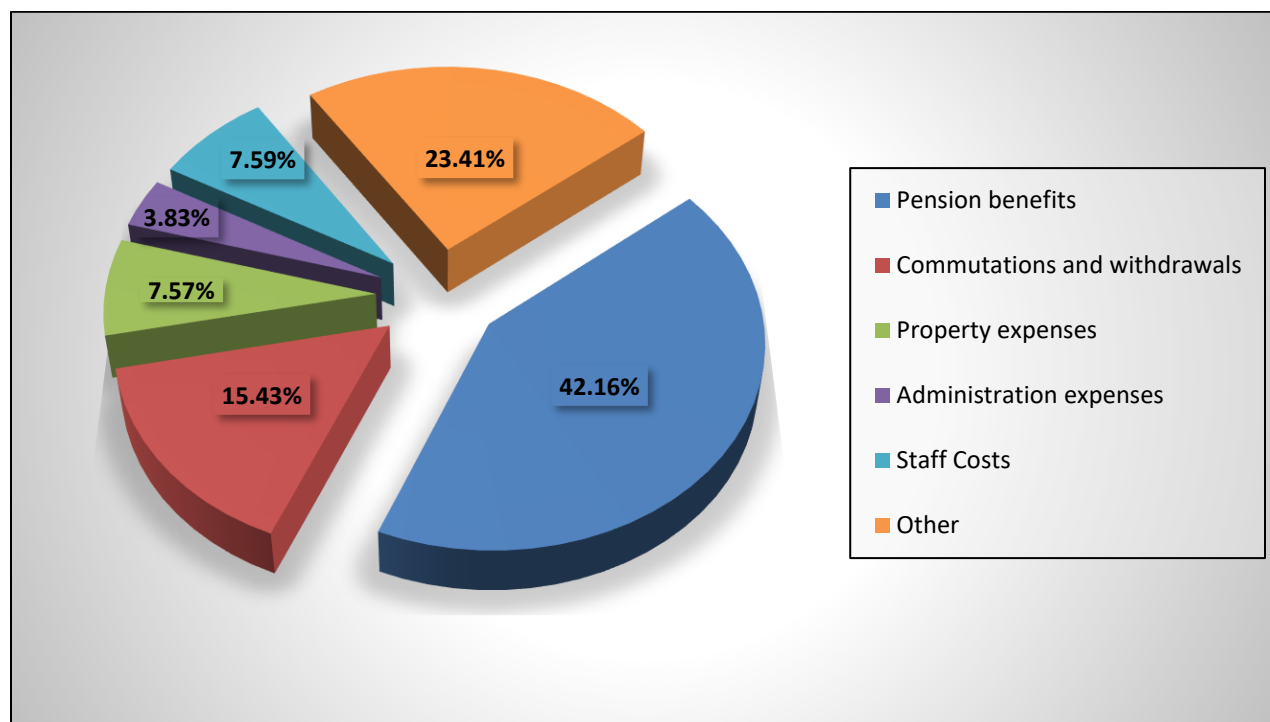

Stand-alone self-administered funds reported total income of \$48.23 million for the 3 months ending 31 March 2017. The total income was mainly composed of \$29.77 million contributions and \$9.69 million rental income, which accounted for 82% of the total income. The composition of the total income for the quarter ended 31 March 2017 is shown in Figure 9 below. See Annexure 7 for further details.

Figure 9 : Income Distribution for Stand Alone Funds

Of the \$48.23 million income reported by stand-alone self-administered pension funds for the 3 months ended 31 March 2017, a total of \$33.83 million, translating to 70.14% of the total income, was used to meet fund expenses. The remaining \$14.40 million was reserved for future fund expenses. Of the \$33.83 million used to meet fund expenses for the quarter ended 31 March 2017, \$14.27 million was incurred for payment of pension benefits, commutations and withdrawals. Other expenditure totaling US\$5.978 million, and constituting 23.41% of total expenditure was mainly composed of provision for bad debts of US\$5.01 million for one fund. The breakdown of the total expenditure for stand-alone pension funds for the quarter ended 31 March 2017 is shown in Figure 10 below. The detailed Statements of comprehensive Income are shown on annexure 7.

Figure 10 : Expenditure Distribution for Stand-Alone Self-Administered Funds

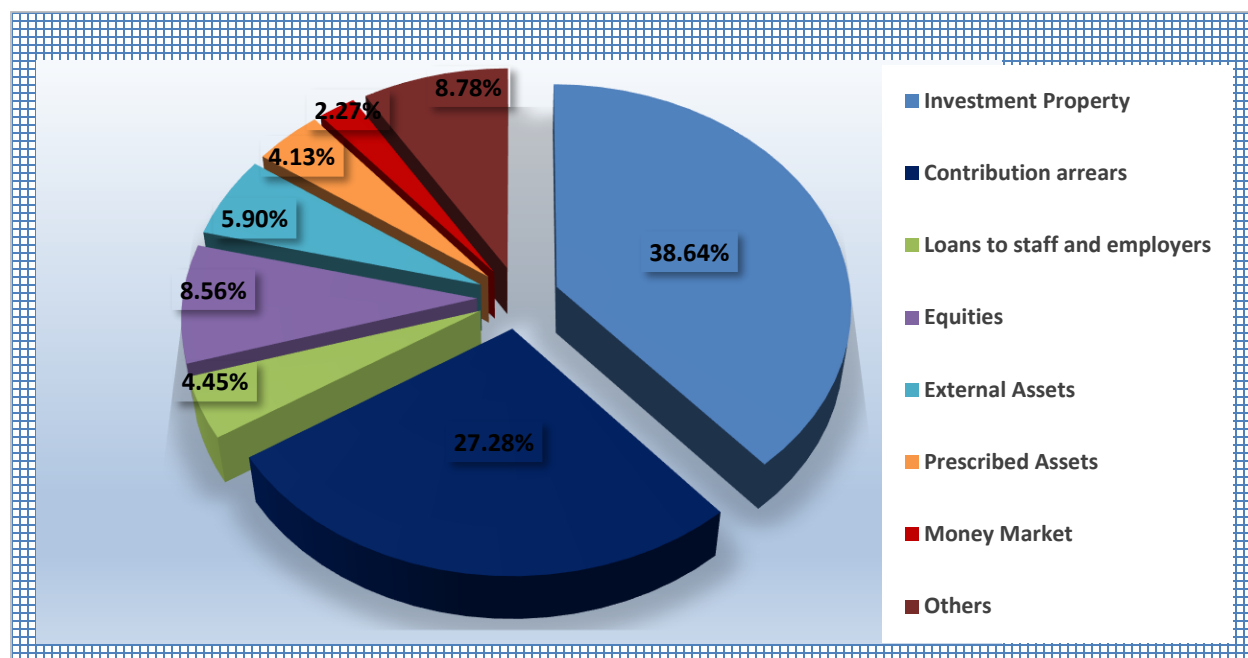

3.4 Asset Quality

Total assets of the stand-alone pension funds as at the end quarter ending 31 March 2017 amounted to \$1,496 billion indicating an improvement of \$0.22 billion from the \$1.275 billion reported as at the 31st of December 2016. A breakdown of the total assets based on investment horizon indicated that about 63% of the total assets were invested in long term investments and about 5% of the assets were in short term investments maturing within twelve (12) months from the reporting date.

This is considered ideal in view of the long-term nature of the liabilities of pension funds. However, pension funds are urged to develop investment policy statements that matches their assets to the nature of their liabilities.

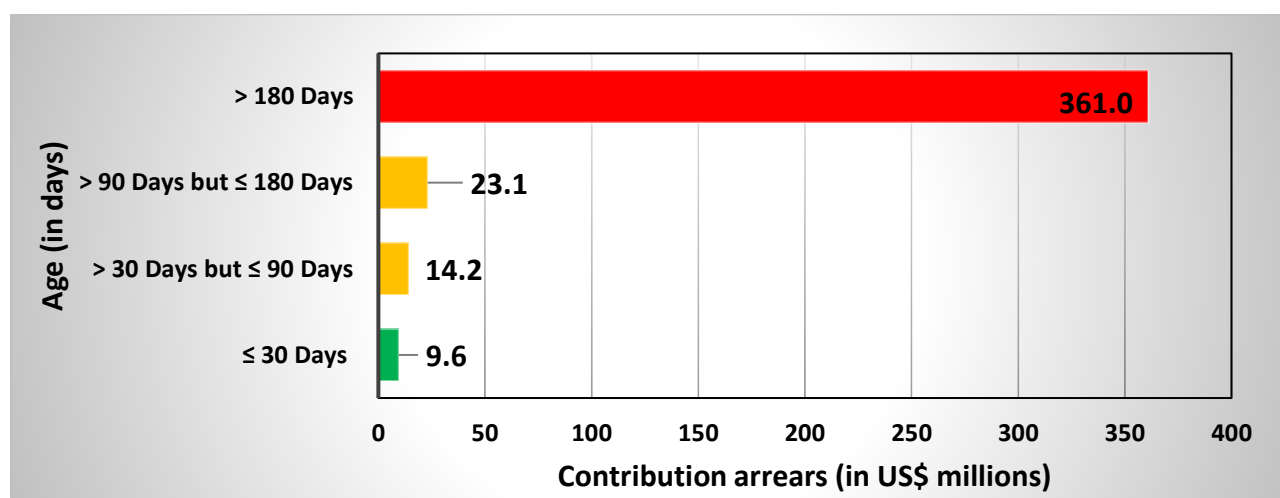

This distribution of investment assets is illustrated in Figure 11 below. See Annexure 8 for further details.

Figure 11: Distribution of Assets for Stand Alone Funds

However, the quality of assets as at the reporting date was greatly compromised owing to a significant proportion of unpaid contributions amounting to \$407.958 million, constituting 27.28% of the total assets as at 31 March 2017. It is of concern that \$361.00 million of the outstanding contributions are aged more than 180 days and rentals arrears which totaled \$46.95 million. The aged analysis for contribution arrears is shown in figure 11 below.

Figure 11 : Contribution arrears aged analysis

Funds are urged to explore alternative ways of recovering unpaid pension contributions as well as rental payments in order to bring down the total.

As at 31 March 2017, Stand-alone funds had \$61.79 million invested in prescribed assets, translating to 4.13% of the total assets. This is below the regulatory requirement of 10%. The Commission urges all funds to comply with the regulations, failure of which will result in regulatory action.

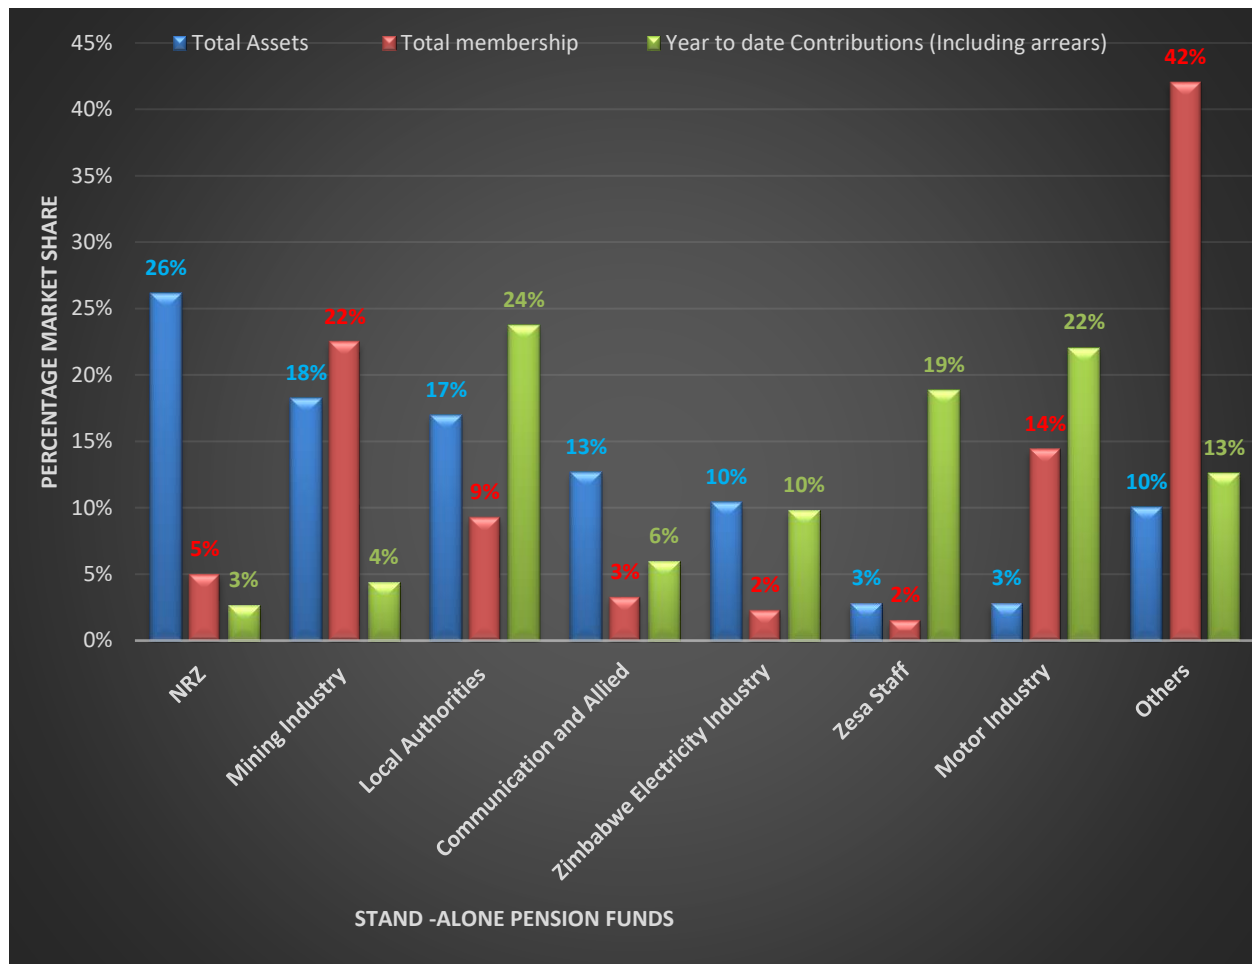

3.5 Market Share

National Railways of Zimbabwe Pension Fund, Mining Industry Pension Fund and Local Authorities Pension Fund were the largest funds in terms of total assets as at 31 March 2017 as shown in Figure 12 below. The funds had a combined share of 61% of total assets.

Local Authorities pension fund had the largest concentration of membership for Stand-alone self-administered pension funds with 24% of the total membership as at 31 March 2017.

Local Authorities Pension Fund, Motor Industry Pension Fund and ZESA Staff Pension Fund were the market leaders in terms of contributions (including arrears) for the quarter ended 31 March 2017. The three funds had market shares of 24%, 22% and 19% respectively. The distribution of assets, membership and contributions (including arrears) reported for the quarter are as depicted in Figure 12 below.

Figure 12 : Market Share for Self-Administered Stand-Alone Pension Funds

4 SECTION D: ANNEXURES

Annexure 1: Consolidated Industry Statement of Comprehensive Income for the Quarter ended 31 March 2017

	INSURED	SELF ADMINSTERED	STAND ALONE	TOTAL
