NEP	-	Net Earned Premium
NPW	-	Net Premium Written
O/S Claims	-	Outstanding Claims
ROA	-	Return on Assets
ROE	-	Return on Equity
UCR	-	Unearned Commission Reserve
UPR	-	Unearned Premium Reserve

Note: Unless stated otherwise, all monetary figures are in United States Dollars.

Executive Summary

This report details the performance of the non-life insurance sector during the quarter ended 31 March 2016. There were 609 registered players, including insurance agents and loss assessors, as at 31 March 2016 the same number reported as at 31 December 2015. Total gross premium written (GPW) by non-life insurers for the quarter ended 31 March 2016 amounted to \$66.59 million which compares unfavorably with \$70.89 million reported in the comparative period in 2015. Gross premium written amounting to \$24.59 million was generated through insurance brokers. On the other hand, total gross premium written by non-life reinsurers increased from \$28.82 million for the quarter ended 31 March 2015 to \$35.52 million for the quarter under review. The business generated by reinsurance brokers during the quarter under review amounted to \$19.46 million. Motor and fire insurance remained the dominant classes of insurance in the non-life insurance sector. All operating underwriters reported capital positions which were compliant with the regulatory minimum of \$1.5 million as at 31 March 2016. Total assets for the insurance industry amounted to \$390.30 million reflecting a 5.17% increase from \$371.12 million reported as at 31 December 2015. The industry average prescribed assets ratios for non-life insurers and reinsurers were 10.96% and 8.18% as at 31 March 2016 which were above the minimum requirement of 5%. Notwithstanding the foregoing observation, only seven (7) direct non-life insurers and five (5) non-life reinsurers out of the twenty (20) and eight (8) operating entities respectively were compliant with the minimum prescribed asset ratio. Owing mainly to the decrease in volume of business written, total profit after tax for non-life insurers decreased from \$3.92 million for the quarter ended 31 March 2015 to \$2.39 million for the quarter under review. On the other hand, non-life reinsurers report total profit after tax of \$3.82 million for the quarter ended 31 March 2016 compared to \$2.34 million reported for the comparative period in 2015. The increase in profit after tax for reinsurers was mainly buoyed by increased business volume coupled with a decrease in net incurred claims.

1. Architecture of the Non-Life Insurance Industry

There were six hundred and nine (609) registered entities/persons in the non-life insurance industry as at 31 March 2016. The architecture of the industry is shown in Table 1 below.

Table 1: Architecture of the Non-life Insurance Industry

Type of Institution	Number of Registered Entities/Persons			Number of Suspended/ Non-Operating Entities
	30 Sep 15	31 Dec 15	31 Mar 16	31 Mar 16
Insurance Companies	24	24	23	3
Reinsurance Companies	9	9	8	-
Insurance Brokers	32	31	29	-
Reinsurance Brokers	6	6	6	-
Loss Assessors	22	22	24	-
Corporate Agents	122	128	129	-
Sole Agents	382	389	390	-
Total	597	609	609	3

Global Insurance Company, New Reinsurance Company, Navistar Insurance Brokers and Revival Insurance Brokers were deregistered during the quarter under review. The three insurance companies that were under suspension from initiating and renewing business are Excellence Insurance Company, Heritage Insurance Company and KMFS Insurance Company. The Commission will provide the market with updates on the companies under suspension as and when any notable developments are reported.

SECTION A

2. SHORT-TERM (NON-LIFE) INSURANCE COMPANIES

Please note that the analysis of performance of the non-life insurance sector does not include statistics for companies which were under suspension as at the reporting date. Appendix 1A-C has detailed statistics for all the non-life insurers.

2.1. Performance in Terms of Business Written

The volume of business written by the non-life insurance industry shrunk as evidenced by the 6.06% decrease in Gross Premium Written (GPW) from \$70.89 million for the quarter ended 31 March 2015 to \$66.59 million for the quarter ended 31 March 2016. The shrinkage in the volume of business was mainly driven by declining business generated from fire and motor insurance. The decrease in business written could generally be attributable to the slowing down economy since the insurance industry performance usually follows the fortunes of the economy. Figure 1 below shows the trend in volume of business generated by the non-life insurance sector during the first quarter since 2010.

Figure 1: Trend in Business Written Since 2010

Generally the major classes of business reported decreases in gross premium written during the quarter under review as shown in Table 2 below. The Commission however, noted significant discrepancies between the volume of business written by insurer under bonds/guarantees and the figures reported by non-life reinsurers under the same business class.

Whilst non-life insurers reported GPW of \$4.16 million and reinsurance premium of \$2.54 million, reinsurers reported GPW of only \$156,802. The Commission established that the discrepancies are mainly due to differences in business classification wherein some insurers are classifying all financial lines such as directors' and officers' liability, professional indemnity, credit Insurance and fidelity guarantee under bonds/guarantees. Insurers and reinsurers are urged to ensure consistency in the classification of business.

Table 2: Non-life Insurers' Gross Premium Written by Class of Business

Class of Business	Gross Premium Written (\$)		Percentage Change
	31 Mar 2015	31 Mar 2016	
Aviation	558,623	558,366	-0.05%
Bonds/Guarantee	4,816,226	4,155,583	-13.72%
Engineering	6,241,090	5,745,920	-7.93%
Farming	474,477	918,549	93.59%
Fire	17,851,290	15,380,624	-13.84%
Hail	443,381	25,047	-94.35%
Health	13,950	15,123	8.41%
Hire Purchase	425,073	360,402	-15.21%
Marine	1,267,558	1,838,611	45.05%
Miscellaneous Accident	5,807,449	5,993,890	3.21%
Motor	26,648,906	24,731,960	-7.19%
Personal Accident	5,990,848	6,074,851	1.40%
Personal Liability	791,597	793,862	0.29%
Total	70,887,087	66,592,788	-6.06%

Notwithstanding significant decreases in gross premium written under motor and fire insurance, the two major classes remained the dominant sources of business contributing a total of 60.24% of total GPW for the quarter ended 31 March 2016. The distribution of business across other classes of business remained largely unchanged. Figure 2 below shows the distribution of total gross premium written by non-life insurers during the quarter ended 31 March 2016.

Figure 2: Distribution of Insurers' Gross Premium Written by Business Class

2.2. Capitalization

All the operating non-life insurance companies reported capital positions which were above \$1.5 million as at 31 March 2016. However, the capital positions reported do not account for non-admissible assets. The Commission will be issuing a Statutory Instrument that operationalizes the recently increased minimum capital requirements of \$2.5 million and deals with admissibility of assets in due course.

There was no significant change in the industry average solvency margin for direct non-life insurers as evidenced by negligible improvement from 70.36% as at 31 December 2015 to 71.77% as at 31 March 2016. All non-life insurance companies reported solvency margins which were above the prescribed minimum of 25% as at 31 March 2016. See Appendix 1C for the solvency margin for each insurer as well as other performance indicators in respect of capital for all insurance companies.

Table 3: Reported Capital Positions for Non-life Insurers

Name of Insurance Company	Reported Capital Position (\$)			
	30-Jun-15	30-Sep-15	31 Dec-15	31-Mar-16
1. Alliance Insurance Company	5,024,055	4,964,481	5,284,413	5,462,628
2. Allied Insurance Company	1,742,192	1,681,491	1,656,247	1,513,297
3. C.B.Z Insurance Company	3,640,069	3,965,527	4,210,147	4,580,373
4. Cell Insurance Company	850,638	1,543,467	1,501,238	1,576,265

8. Eagle Insurance Company	5,080,612	3,297,739	5,799,232	5,875,302
9. Evolution Insurance Company	1,668,492	1,650,819	1,755,713	1,812,156
10. ECGC	-	2,246,894	2,391,326	2,779,005
11. Hamilton Insurance Company	2,203,848	2,315,205	2,174,021	1,731,100
12. Nicoz Diamond Insurance Company	10,898,000	10,914,000	11,149,430	10,922,150
13. Old Mutual Insurance Company	16,393,889	18,009,265	18,060,853	19,480,169
14. Quality Insurance Company	1,327,000	1,178,000	1,675,000	1,518,000
15. Regal Insurance Company	2,979,842	2,752,143	2,818,931	2,907,921
16. Safel Insurance Company	1,736,989	1,645,492	1,753,874	1,823,493
17. Sanctuary Insurance Company	1,806,175	1,726,699	1,665,088	1,566,526
18. THI Insurance (Pvt) Ltd	3,931,315	1,781,034	1,830,717	2,002,317
19. Tristar Insurance Company	1,032,741	734,056	2,549,386	2,435,622
20. Zimnat Lion Insurance Company	5,237,314	5,330,414	6,668,371	7,112,916

Key:

	The insurer reported a capital position that was compliant with the minimum capital requirement of \$1.5 million for non-life insurers.
	The insurer reported a capital position which was not compliant with the minimum capital requirement of \$1.5 million.

2.3. Asset Quality

Total assets for non-life insurers increased from \$193.95 million as at 31 December 2015 to \$196.13 million as at 31 March 2016 on the back of a rise in premium debtors and increased uptake of prescribed assets. The increase in total assets buoyed by an upsurge in premium debtors may not be sustainable given that some of the policyholders end up defaulting.

Figure 3: Trend in Total Assets

The non-life insurance industry reported an industry average prescribed assets ratio of 10.96% as at 31 March 2016, which was compliant with the minimum requirement of 5%. Although the industry average prescribed assets ratio was compliant with the minimum requirement, only seven (7) out of the twenty (20) operating insurers were compliant with the minimum prescribed assets ratio. A total of five (5) insurers did not have any investments in prescribed assets. Insurers are urged to comply with required investments in prescribed assets.

The distribution of total assets for non-life insurers remained largely unchanged with cash and cash equivalents as well as premium debtors remaining the major asset classes as at 31 March 2016 as shown in Figure 4 below.

The Commission notes with concern the significant proportion of total assets of 23.68% that was tied in premium debtors as at 31 March 2016. This compromises asset quality given that potential investment income is lost and the money tied in premium debtors is not readily available to support day to day operations.

Figure 4: Distribution Non-life Insurers' Total Assets

NB: Technical assets refer to reinsurers' share of outstanding claims and deferred acquisition cost.

2.4. Reinsurance

The risk appetite of the non-life insurers remained largely unchanged as evidenced by the industry average risk retention ratio of 53.90% reported for the quarter ended 31 March 2016. This is a marginal increase from 53.33% reported for the comparative period in 2015. The retention ratio for individual insurers for the period under review ranged from 15.13% to 100% as shown in Figure 5 below.

The industry's reinsurance premium remittances improved significantly as evidenced by the decrease in the industry average reinsurance creditors to reinsurance premium ratio from 96.70% for the quarter ended 31 March 2016 to 79.91% for the quarter ended 31 March 2016.

Notwithstanding the improvement, the Commission noted with concern cases where a number of insurers had high ratios of reinsurance creditors to reinsurance premiums indicating that the same insurers are not up to date with their premium remittances. (See Appendix 1C).

Figure 5: Retention Ratios for Short Term Insurance Companies

2.5. Actuarial Matters

The non-life insurance industry reported total technical liabilities amounting to \$57.82 million as at 31 March 2016, which reflect an increase from \$51.84 million reported as at 31 December 2015. The increase was mainly driven by a growth in Unearned Premium Reserves (UPR), which is a usually observed trend given that most annual policy anniversaries coincide with the calendar year.

The industry average liquid assets to total technical reserves decreased from 123.37% as at 31 December 2015 to 117.63% as at 31 March 2016. Notwithstanding the decrease the non-life insurance industry was still considered to be having adequate assets to match technical liabilities. However, some insurers reported low liquid assets to total technical liabilities implying that they do not have readily liquid assets to cover technical liabilities. (See Appendix 1C).

2.6. Earnings

Total profit after tax amounted to \$2.39 million for the quarter ended 31 March 2016, reflecting a 38.95% decrease from \$3.92 million that was reported in the comparative period in 2015. The decrease in the profit after tax was mainly attributable to decrease in business volumes. In addition investment income which was considered low to supplement underwriting income was shrinking. The decrease in the volume of business translated into a deterioration in the industry average return on assets (ROA) and return on equity of (ROE) from 2.16% and 5.05% for the quarter ended 31 March 2015 to 1.25% and 2.89% respectively, for the quarter under review.

The sector reported no significant changes in underwriting profitability during the quarter under review. This is evidenced by a negligible change in the combined ratio from 87.79% for the quarter ended 31 March 2015 to 87.75% for the quarter under review. The highest loss plus commission ratios were reported under health and personal accident insurance as shown below.

Table 4: Loss and Commission Ratios by Class of Business for Short Term Insurers

Business Class	Loss Ratio	Net Commission Ratio	Loss + Commission Ratio
Hire Purchase	56.59%	15.42%	72.01%
Personal Accident	52.78%	14.55%	67.33%
Marine	38.53%	19.40%	57.93%
Motor	49.24%	7.11%	56.35%
Engineering	69.48%	-19.65%	49.83%
Fire	47.09%	1.42%	48.51%
Personal Liability	17.50%	24.70%	42.20%
Farming	40.16%	0.14%	40.30%
Bonds/Guarantees	18.97%	6.72%	25.69%
Miscellaneous Accident	18.51%	3.67%	22.18%
Health	0.00%	4.73%	4.73%
Industry Average	43.52%	5.88%	49.40%

2.7. Liquidity

Total cash and near cash assets increased by 6.35% during the quarter under review from \$63.95 million as at 31 December 2015 to \$68.01 million as at 31 March 2016. The growth in cash and near cash assets was mainly driven by an increased uptake of prescribed assets which amounted to \$5.20 million.

The industry average acid test ratio for non-life insurers was 69.80% as at 31 March 2016 indicating a deterioration from 76.70% reported as at 31 December 2015. The acid test ratio indicates the proportion of current assets that can be covered by available readily liquid assets. The acid test ratio for individual insurers as at 31 March 2016 ranged from 2.58% to 893.14%. See Appendix 1C for the liquidity indicators of each insurer.

2.8. Market Share for Non-life Insurers

The market for non-life insurance recorded Herfindahl Indices of 0.12 and 0.14 in terms of Gross Premium Written (GPW) and Net Premium Written (NPW) respectively. As such, the market was considered moderately concentrated. The market leaders in terms of gross premium written were Old Mutual Insurance Company, Cell Insurance Company and Zimnat Insurance Company with a combined market share of 48.29%. On the other hand Old Mutual Insurance Company, Nicos Diamond Insurance Company and Zimnat Lion Insurance Company were the market leaders in terms of Net Premium Written (NPW) during the quarter under review. Figure 6 below shows market shares of insurers in terms of both GPW and NPW.

On the other hand, the market leaders in terms of total assets as at 31 March 2016 were Old Mutual Insurance Company, Alliance Insurance Company and Nicos Diamond Insurance Company with a combined market share of 45.55%. Figure 7 below and Appendix 1C show the market shares in terms of total assets for insurers.

Figure 6: Market Share for Insurers in Terms of GPW and NPW

Figure 7: Market Share for Insurers in Terms of Total Assets

IPEC/2016/01

SECTION B

3. REINSURANCE COMPANIES

Please note that the figures for PTA Reinsurance Company (Zep-Re) contained in this report are only for the institution's Regional Hub Office located in Zimbabwe and not for the company as a whole. The Regional Hub Office writes business in Zimbabwe, Swaziland, Botswana, Namibia, and South Africa among others. PTA Reinsurance Company was formed under the auspices of COMESA and writes business in all COMESA member states. The Regional Hub Office is supported by the balance sheet of Zep-Re as a whole. Detailed statistics for all reinsurers are shown in Appendix 2A-C.

3.1. Performance in Terms of Business Written

Non-life reinsurers reported a 23.26% growth in total gross premium written (GPW) from \$28.82 million for the quarter ended 31 March 2015 to \$35.52 million for the quarter ended 31 March 2016 as shown in Figure 8 below. A detailed enquiry into the growth of the GPW revealed that, out of the \$6.70 million total premium increase, approximately \$4 million, was mainly attributable to a significant portion of one major account that ceased to be reinsured by a certain reinsurer during the period under review. As a matter of company policy, the said reinsurer used to account for this account only upon receipt of premiums during the second quarter. This was owing to the size of the account which was going to reflect a very huge value of premium debtors had it been reported in the first quarter. As opposed to the treatment mentioned above the reinsurer currently reinsuring the account has a different accounting treatment of the account wherein the account is reported in the first quarter at policy inception. The different treatment of the account mentioned above, therefore implies that over the years the said major account was not being reported in the first quarter returns hence the growth during the quarter under review.

Figure 8: Trend in Business Written Since 2010

I P E C / 2 0 1 6 / 0 1

The balance of the \$6.70 million growth was attributable to an increase in business generated from outside Zimbabwe from \$2.52 million for the quarter ended 31 March 2015 to \$4.59 million for the quarter under review.

Fire and motor insurance recorded the highest growth in monetary terms during the period under review, which growth amounted to \$2.83 million and \$1.16 million respectively. In terms of percentage growth aviation and engineering are the classes that recorded the highest growth rates as shown in Table 5 below.

Table 5: Reinsurers' Gross Premium Written by Class of Business

Class of Business	Gross Premium Written (\$)		Percentage Change
	31 March 2015	31 March 2016	
Aviation	180,769	822,625	355.07%
Bonds/Guarantee	421,476	156,802	-62.80%
Engineering	1,035,556	1,871,883	80.76%
Farming	1,991,207	2,909,562	46.12%
Fire	13,356,822	16,185,345	21.18%
Hail	184,590	105,350	-42.93%
Health	184,092	255,045	38.54%
Hire Purchase	30,139	47,016	56.00%
Marine	574,958	675,127	17.42%
Miscellaneous Accident	2,979,123	3,930,445	31.93%
Motor	5,308,315	6,464,911	21.79%
Personal Accident	1,960,660	1,065,462	-45.66%
Personal Liability	607,796	1,027,247	69.01%
Total	28,815,503	35,516,820	23.26%

There were no notable changes in the distribution of business generated by reinsurers with fire and motor insurance remaining the dominant classes of business as shown in Figure 9 below. The two business classes accounted for a total of 63.77% of total gross premium written during the quarter under review compared to 64.77% reported in the comparative period in 2015.

Figure 9: Distribution of Reinsurers' GPW by Business Class

3.2. Capitalization

All registered non-life reinsurers reported capital positions which were above \$1.5 million as at 31 March 2016. The reported capital positions, however, do not account for the guidelines on admissibility of assets which shall be promulgated by way of a statutory instrument, which shall also operationalize the new minimum capital requirements for reinsurers of \$5 million.

Table 6: Capital Positions for Non-life Reinsurers

Name of Company	Reported Capital Position (\$)			
	30 Jun 15	30 Sep 15	31 Dec 15	31 Mar 16
1. Baobab Reinsurance Company	30,617,357	32,409,344	30,798,757	32,434,261
2. Colonnade Reinsurance Company	2,078,059	2,121,168	1,715,446	1,617,922
3. FBC Reinsurance Company	11,080,697	11,022,630	11,843,893	12,286,986

7. ZB Reinsurance Company	9,240,360	9,269,310	9,474,645	9,657,160
8. PTA Reinsurance Company (Zep Re)	2,898,862	3,530,448	3,504,129	4,852,037

3.3. Asset Quality

Total assets for non-life reinsurers increased by 6.54% from \$134.43 million as at 31 December 2015 to \$143.23 million as at 31 March 2016. The increase in total assets for reinsurers was mainly attributable to the growth in premium debtors as well as cash and cash equivalents which amounted to \$8.46 million and \$2.91 million respectively. The sustainability of asset growth driven by premium debtors may be questionable since some premiums may not eventually be remitted to reinsurers resulting in the same premiums being written off. The trend in total assets since 2009 is as shown in Figure 10 below.

Figure 10: Trend in Total Assets

The distribution of total assets for non-life reinsurers remained skewed towards cash and cash equivalents as well as investments in associated companies which accounted for a total of 45.24% of the asset base. Having a significant portion of assets tied up in premium debtors and investments in associated companies compromises the asset quality for non-life reinsurers since these asset classes are not usually readily available to support the day to day operations of the reinsurers or to be invested. More so given that non-life reinsurers' liabilities are generally short term in nature. Figure 11 below, shows the distribution of assets as at 31 March 2016.

Figure 11: Breakdown of Non-life Reinsurers' Total Assets

The industry average prescribed asset ratio was 8.18% as at 31 March 2016. Only three reinsurers were not compliant with the minimum prescribed asset ratio of 5%. See Appendix 2C for more information.

3.4. Retrocession

The industry average retention ratio decreased significantly from 76.79% reported for the quarter ended 31 March 2015 to 63.85% for the quarter under review. The change in the retention ratio was mainly attributable to the treatment of one of the major accounts which has been alluded to in section 3.1 above. The reinsurer who now handling the said account did not retain much risk on the same hence the significant change in the retention ratio. The retention ratios for individual reinsurers for the quarter under review ranged from 41.65% to 81.71% as shown in Figure 12 below.

The non-life reinsurance sector witnessed an improvement in retrocession premium remittances as indicated by the decrease in the industry average retrocession premiums to retrocession premiums ratio from 121.50% for the quarter ended 31 March 2015 to 82.39% for the quarter under review. The same ratio for the sector ranged from nil to 651.91% as at 31 March 2016. (See Appendix 2C).

Figure 12: Retention Ratios for Reinsurers

3.5. Actuarial Matters

Total technical liabilities for non-life reinsurers amounted to \$32.22 million as at 31 March 2016, compared to \$29.75 million that was reported as at 30 December 2015. The increase in total reserves was on the back of the growth in unearned premium reserves from \$14.28 million as at 31 December 2015 to \$18.87 million as at 31 March 2015.

The non-life reinsurance industry was generally considered to be having adequate assets to match their technical liabilities as at 31 March 2016. This is shown by the industry average total liquid investments to technical liabilities ratio of 142.64% that was reported as at 31 March 2016. This ratio implies that the reinsurers' industry had approximately \$1.43 in readily liquid assets to match every dollar of technical liabilities as at 31 March 2016. The ratio of liquid technical liabilities to total technical liabilities for individual reinsurers ranged from 51.90% to 305.21%. See Appendix 2C for key performance indicators.

3.6. Earnings

The non-life reinsurance industry reported total profit after tax of \$3.82 million for the quarter ended 31 March 2016 compared to \$2.34 million reported for the comparative period in 2015. The increase in total profit after tax was on the back of a surge in the volume of business coupled with a decrease in net incurred claims which amounted to \$6.70 million and \$1.62 million respectively. The increase in profit after tax translated into an increase in the industry average return on equity (ROE) and return on assets (ROA) from 3.11% and 1.83% for the quarter ended 31 March 2015 to 4.59% and 2.75%, for the quarter under review. The major income driver was underwriting with investment income accounting for only 0.03% of net premium written during the quarter under review. This shows that reinsurers generate income from their core business which makes the same income more sustainable compared to situations where the income is generated from non-core activities. However, the investment income was considered too low to supplement underwriting income.

Owing to the decrease in net incurred claims, alluded to above, the industry average loss ratio improved from 31.46% for the quarter ended 31 March 2015 to 21.44% for the quarter under review. The industry average combined ratio also improved from 85.91% for the quarter ended 31 March 2015 to 76.39% for the quarter under review.

Bonds/guarantees as well as farming insurance reported the highest loss plus commission ratios during the quarter under review as shown in Table 7 below. Although, these classes of business contributed a negligible proportion of total gross premium written, bonds/guarantees insurance is characterized by high severity of claims though the same claims may be of low severity. On the other hand, personal liability, marine and health insurance were the most profitable classes of business in terms of the loss plus commission ratios during the quarter under review.

Table 7: Loss Ratios by Class of Business for Reinsurers

Business Class	Loss Ratio	Net Commission Ratio	Loss + Commission Ratio
Bonds/Guarantees	32.05%	112.16%	144.21%
Farming	56.18%	28.46%	84.64%
Motor	41.24%	23.17%	64.41%
Miscellaneous Accident	21.24%	34.28%	55.52%
Personal Accident	28.45%	27.05%	55.50%
Hail	19.11%	35.90%	55.01%
Hire Purchase	11.32%	39.36%	50.68%
Fire	6.02%	42.09%	48.11%
Engineering	23.57%	21.36%	44.93%
Health	37.11%	2.84%	39.95%
Personal Liability	-13.98%	10.62%	-3.36%
Industry Average	21.44%	30.66%	52.10%

3.7. Liquidity

Total liquid assets increased from \$43.66 million as at 31 December 2015 to \$45.96 million as at 31 March 2016. The increase was on the back of an upsurge in cash and cash equivalents. The non-life reinsurance industry was considered to be having adequate liquidity to meet all obligations as evidenced by the industry average acid test ratio of 94.46% which was reported as at 31 March 2016. However, some reinsurers reported low acid test ratios indicating that they may not be able to meet their obligation timely as they fall due. The acid test ratio for individual reinsurers ranged from 25.50% to 184.06% (see Appendix 2C under Liquidity).

3.8. Market Share for Reinsurers

The non-life reinsurance industry remained moderately concentrated as indicated by Herfindahl Indices of 0.14 and 0.15 recorded in terms of gross premium written (GPW) and net premium written (NPW) for the quarter ended 31 March 2016 respectively. ZB Reinsurance Company, Zep Re, and FBC Reinsurance Company were the market leaders in terms of GPW with a combined market share of 51.31%. Figure 13 and shows the market shares for reinsurers.

Figure 13: Market Share for Reinsurers in Terms of GPW and NPW

Baobab Reinsurance Company, Grand Reinsurance Company and FBC Reinsurance Company remained the market leaders, in terms of total assets with a combined market share of 63.62%.

Figure 14 below shows the market share of all reinsurers in terms of total assets.

Figure 14: Market Share for Reinsurers in Terms of Total Assets

SECTION C

4. INSURANCE BROKERS

Please note that Alexander Forbes Risk Zimbabwe changed its name to WFDR Risk Services.

4.1 Business Written

The volume of business written by insurance brokers amounted to \$24.59 million for the quarter ended 31 March 2016, reflecting an 8.01% decrease from \$26.73 million reported for the comparative period in 2015. The decrease in business generated is in tandem with the trend observed for non-life insurers and could be attributable to harsh economic conditions. Insurance brokers were not the major producers of business for non-life insurers since the business they generated for insurers accounted for only 36.93% of gross premium written by direct non-life insurers.

Total net brokerage commission for insurance brokers decreased from \$4.26 million for the quarter ended 31 March 2015 to \$4.12 million for the quarter under review. The net brokerage commission realized translated into an industry average net brokerage commission of 16.76% which compared favorably to 15.94% reported for the comparative period in 2015. Table 8 below shows the indicators of the business written by the insurance brokers.

Table 8: Indicators of Business Written for Insurance Brokers (\$)

Indicator	31 Mar 2015	31 Mar 2016	Percentage Change
Premium Written	26,730,275	24,590,085	-8.01%

Taxation	110,483	144,246	30.56%
Profit After Tax	248,503	385,014	54.93%

4.2 Capitalization

All the registered insurance brokers, except Ambassador and Rainbow Insurance Brokers reported capital positions which were above \$100,000 as at 31 March 2016. The capital positions for the individual insurance brokers ranged from \$14,514 to \$1.1 million as shown in Table 9 below.

29. Zimbabwe Insurance Brokers	209,370	202,858	222,636	178,782

Key:

	The insurance broker reported a capital position that was above \$100,000.
	The insurance broker reported a capital position that was below \$100,000.

4.3 Asset Quality

The asset base for insurance brokers amounted to \$27.14 million as at 31 March 2016, reflecting a 6.50% growth from \$25.48 million that was reported as at 31 December 2015. The increase in total assets was on the back of growing cash and cash equivalents as well as commission receivable from \$4.00 million and \$3.21 million as at 31 December 2015 to \$5.63 million and \$3.65 million as at 31 March 2016 respectively.

The asset base for insurance brokers remained skewed towards properties as well as cash and cash equivalents as shown in Figure 16 below.

Figure 15: Distribution of Insurance Brokers' Total Assets

4.4 Earnings

Notwithstanding the decrease in the volume of business written, total profit after tax for insurance brokers amounted to \$385,014 for the quarter ended 31 March 2016 which compared favorably with \$248,503 which was reported for the comparative period in 2015. The increase in total profit after tax was mainly driven by a decrease in operating expenses from \$4.18 million for the quarter ended 31 March 2015 to \$3.89 million for the quarter under review. The industry average return on equity (ROE) and return on assets (ROA) for the year under review were 4.18% and 1.42% respectively.

4.5 Market Share for Insurance Brokers

The sector for insurance brokers recorded a Herfindahl index of 0.08 in terms of net brokerage commission for the quarter ended 31 March 2016. On that basis, the sector was considered to be unconcentrated. Minerva Risk Solutions, Marsh Insurance Brokers Zimbabwe and HRIB remained the market leaders in terms of both business written as well as brokerage income as shown in Figure 16 below, with combined market shares of 39.61% and 43.58% respectively.

Figure 16: Market Share in Terms of Net Brokerage Income and Premium Written

On the other hand, Minerva Risk Solutions, Progressive Insurance Brokers and Marsh Insurance Brokers were the market leaders in terms of total assets as shown in Figure 17 below.

Figure 17: Market Share for Insurance Brokers in Terms of Total Assets

SECTION D

5. REINSURANCE BROKERS

5.1 Business Written

The volume of business written by reinsurance brokers increased by 2.94% from \$18.91 million for the quarter ended 31 March 2015 to 19.46 million for the quarter ended 31 March 2016. The business generated by local reinsurance brokers accounted for 54.80% of total gross premium written by non-life reinsurers. Reinsurance brokers reported an industry average commission ratio of 25.02% for the quarter ended 31 March 2016. Table 10 below shows the indicators of the business written by the reinsurance brokers.

Table 10: Indicators of Business Written for Reinsurance Brokers (\$)

Indicator	31 Mar 2015	31 Mar 2016	Percentage Change
Premium Written	18,906,448	19,462,453	2.94%
Brokerage Commission	3,222,576	4,868,758	51.08%
Premium Written Less Commission	15,683,873	14,593,695	-6.95%
Commission Paid	2,377,637	3,903,058	64.16%
Net Brokerage Commission	844,939	965,700	14.29%
Other Income	26,091	11,063	-57.60%
Operating Expenses	517,338	631,596	22.09%
Profit Before Tax	353,692	345,167	-2.41%
Taxation	99,723	83,904	-15.86%
Profit After Tax	253,969	261,263	2.87%

5.2 Capitalization

As at 31 March 2016, all the registered reinsurance brokers, except Marsh Insurance Brokers reported capital positions which were above \$100,000. The reported capital positions ranged from \$54,539 to \$1.92 million as shown in Table 11 below.

Table 11: Capital Levels for Reinsurance Brokers

Name of Company	Reported Capital Position (\$)			
	30 Jun 2015	30 Sep 2015	31 Dec 2015	31 Mar 2016
1. Afro-Asian Reinsurance Brokers	2,822	139,857	118,087	120,494
2. Classic Reinsurance Brokers	122,172	121,699	122,172	119,182
3. Marsh Insurance Brokers		11,896	(3,448)	54,539
4. Minerva Re (Private) Limited	1,574,836	1,753,749	1,745,965	1,922,268
5. Pan African Re	576,814	567,131	609,776	616,238
6. Reinsurance Brokers International	176,948	140,829	139,087	154,063

5.3 Asset Quality

Total assets for reinsurance brokers increased from \$17.26 million as at 31 December 2015 to \$25.98 million as at 31 March 2016. The increase in total assets was mainly driven by an upsurge in premium debtors from \$13.30 million as at 31 December 2015 to \$21.43 million as at 31 March 2016. This trend is expected given that most reinsurance programmes have a tenure which coincide with the calendar year. The asset base for reinsurers remained skewed towards premium debtors which constituted 82.47% of total assets as at 31 March 2016.

5.4 Earnings for Reinsurance Brokers

Total profit after tax for reinsurance brokers increased by 2.87% from \$253,969 for the quarter ended 31 March 2015 to \$261,263 for the quarter ended 31 March 2016. Notwithstanding the increase in profit after tax the industry average return on equity (ROE) and return on assets (ROA) deteriorated from 12.19% and 1.56% for the for the quarter ended 31 March 2015 to 8.75% and 1.01% respectively for the quarter ended 31 March 2016.

5.5 Market Share for Reinsurance Brokers

The largest reinsurance broker in terms of business written, commission generated as well as asset base remained Minerva Re (Private) Limited. Table 12 below shows the market shares for all reinsurance brokers as at 31 March 2016.

Table 12: Market Share for Reinsurance Brokers

Name of Reinsurance Broker	Premium Written	Net Brokerage Commission	Total Assets
1. Minerva Re (Private) Limited	69.54%	72.85%	86.74%
2. Pan African Reinsurance Brokers	14.91%	11.38%	6.89%
