Q1	First Quarter
Q3	Third Quarter
'16	2016
'17	2017
H1	Half year
Var	Variance
F.Funeral	First Funeral

This report is based on direct funeral insurers and funeral business underwritten by life companies.

2. Introduction

Acknowledgement

The information contained in this report has been extracted from the quarterly unaudited returns submitted to the Commission in line with Section 30 of the Insurance Act (Chapter 24:07). No adjustments have been made to the returns' data except where necessary and this was done in consultation with the insurer(s) or reinsurer(s).

This report is based on the operational statistics of 9 funeral assurance companies namely Orchid, Doves, First Funeral, Moonlight, Foundation Mutual Society, Passion, Ruvimbo, Sunset and Vineyard.

3. Economic Overview

The growth of the economy remains subdued. The economy is characterized by high trade and current account deficits, low foreign direct investments, depressed production, low commodity prices and a high cost of capital. The fragile global financial environment has also negatively affected the growth of the Zimbabwean economy. Despite all these negative factors militating against economic growth, the economy remains on course to achieve the projected growth rate of 1.7 percent for 2017. Inflation stood at 0,2 percent as at the end of March. Funeral Assurers are encouraged to position themselves to benefit from this positive growth trajectory and opportunities associated with financial inclusion.

4. Industry Overview

The number of Funeral Assurers remained at 9 by the end of the quarter with no new registrations or cancellations. Gross written premium grew by 10 percent for the first quarter of 2017 as compared to the first quarter of 2016 (from USD36,26 million to USD39,812 million). This strong growth demonstrates a lot of resilience of the funeral assurance industry and growing market confidence.

Claims reported decreased by 6 percent for the first quarter of 2017 as compared to 2016 first quarter. Players are urged to settle claims early to avoid inconveniencing the bereaved families. Technical profits increased by 56 percent (from \$1.627 million to \$2.538 million) for the first quarter of 2017 compared to the first quarter of 2016.

Total assets for the funeral assurance industry increased by 15 percent (from US\$53.04 million for first quarter 2016 to US\$60.82 million for first quarter 2017). The industry however remains non-compliant with the required minimum prescribed asset ratio of 7.5 percent, having an average ratio of 0.79 percent as at 31st March 2017. There is need for the industry players to ensure compliance with regulatory requirements.

As at 31st March 2017 the capitalisation of the funeral assurance industry stood at US\$38.530 million which is an increase of 23 percent from a figure of US\$31.406 million as at 31 March 2016. This growth in capital reflects a strengthening of the funeral assurance industry in general.

Compliance with regulatory requirements is key and players are encouraged to adhere to both the spirit and intention of the regulations and minimize violations of the law. The main areas of weakness in compliance in the funeral assurance industry are the prescribed assets ratio, timely payment of levies, timely submission of returns and the structure of investments. Some players are not meeting minimum capital requirements by set deadlines.

The table below shows a summary of key performance indicators for the funeral assurance industry for the quarter ended 31st March 2017.

Table1: Summary of business performance by funeral assurance Industry for the quarter ended 31 March 2017.

Financial Aspect	Funeral Assurers		
	Mar-16	Mar-17	Growth
Net Premiums Written (\$000)*	36,262	39,812	10%
Retention Ratio	100%	100%	0%
Total Gross Claims (\$000)	2,490	2,339	-6%
Management Expenses (\$000)	4,284	4,692	10%
Commissions (\$000)	868	769	-11%
Total Costs(\$000)	7,642	7,800	2%

Capital to liability Ratio	145%	173%	28%
Prescribed Assets (\$000)	152	481	216%
Prescribed Asset Ratio (%)**	0.5%	0.79%	58%

*The figure includes funeral business of US\$30,09 million written by Life assurers.

** Is calculated as prescribed assets/Total assets

Retention

The funeral assurance industry players continue to retain 100 percent of the risks that they underwrite and are yet to embrace reinsurance as a risk management tool. There is need for the players to utilize reinsurance to protect their pools in the event of an unfavorable claims experience.

5. Update on Operations

IPEC requires all personnel dealing with, or transacting insurance business to be registered in terms of Section 15 of Statutory Instrument 49 of 1989. In that regard players are urged to register all their agents.

Table 2: Registered agents and operational staff

Name Of Company	Corporate Agents	Sole Agents	Staff	Branches
Orchid	0	0	13	2
Doves	0	259	99	24
First Funeral	0	19	46	10
Foundation	0	18	26	8
Moonlight	0	70	104	35
Passion	0	4	4	3
Ruvimbo	0	6	50	15
Sunset	1	8	8	2
Vineyard	3	11	61	5
Total	4	395	411	104

Net Premium Written

For the quarter under review funeral business written by both the funeral assurance players and the life assurance players amounted to US\$39.81 million compared to US\$36.26 million of the same period in 2016, registering a 10 percent increase. Much of the growth was driven by 5 funeral assurance players and life assurers who registered positive growth varying from 2 to 25 percent. Going forward all funeral assurance business written by life assurers will be reported under the funeral assurance sector. The table below shows net premium written for industry player by player.

Table 3: Net written premium distribution by company for the quarter ended 31 March 2017

Name Of Company	Mar 2016 (000)	Mar 2017(000)	Growth
Orchid	53	21	-60%
Doves	3,215	4,014	25%
First Funeral	1,787	1,728	-3%
Foundation	247	256	4%
Moonlight	3,226	3,032	-6%
Passion	312	231	-26%
Ruvimbo	117	121	3%
Sunset	28	29	4%
Vineyard	282	289	2%
Life assurers Funeral business	26,995	30,091	11%
Total	36,262	39,812	10%

**The total NPW figure above includes funeral business of US\$30,09 million written by Life assurers.*

For the quarter under review 76 percent of the funeral business was written by life assurers while 22 percent on the remaining 34 percent was written by 3 funeral assurers. Competition from life assurers writing funeral assurance business is growing every quarter and appears to suggest that life assurers now concentrate on funeral assurance business. The funeral assurance industry players should take advantage of the Micro-insurance framework which was implemented on 1 May 2017 to enter into untapped markets and develop innovative products targeted at low income members of the society. The Commission will offer technical support to market players who are keen to offer micro-insurance products as part of a broader micro-insurance strategy.

Figure 1: Market Share for Funeral assurers by Net Written Premium

6. Business Composition

For the quarter under review 63 percent of gross written premium came from individual lines while 37 percent came from Corporate lines. This underscores the relative importance of Individual line business in the funeral assurance industry. In order to increase funeral assurance product penetration, the funeral assurers are encouraged to explore opportunities in micro-insurance, consider information technology and mobile based distribution channels and previously excluded market segments. New business was low during the first quarter, constituting only 5 percent of the total net premium written while recurring business constituted the remaining 95 percent. This may be attributable to most policies renewal anniversary being at the beginning of the year.

For the period under review recurring premiums for Doves Funeral Assurance doubled while recurring premiums for Foundations Mutual Society increased three folds. This may be as a result of endorsements on existing policies as clients upgrade their policies.

Table 4 and figure 2 below shows business composition.

Table 4: Net Written Premium for the quarter ended 31 March 2017.

Co. Name	Individual Life (000)						Corporate Business (000)						Total Gross Premiums (000)

Figure 2: Net Written Premium Composition for the Quarter ended 31 March 2017

7. Not Taken-Up policies

The ratio for not taken up policies for the funeral assurance industry ranged from 0 percent to 15.56 percent for the period under review. Despite the ratios being low players are encouraged to give full information of their products to clients at initiation to further reduce not taken up policies.

Table 5: Not Taken-Up Policies

	Not Taken Up Policies
Orchid	9.78%
Doves	0
First Funeral	15.56%
Foundation	0.38%
Moonlight	0
Passion	0
Ruvimbo	0
Sunset	0
Vineyard	0
Total	N/A

8. Lapse ratios

Lapse ratios ranged from 0 percent to 18.46 percent for the quarter. The current liquidity problem that the economy is facing may be attributable to lapse ratios as high as 18 percent.

Table 6 Lapse ratios.

	Lapse Ratios	
	Individual (%)	Group Bus (%)

Vineyard	9.51%	0%
Total	N/A	N/A

9. Claims Aged Analysis

Outstanding claims aged more than 30 days amounted to US\$17,000.00 as at 31st March 2017. The Commission expects claims to be settled immediately so that bereaved families are given the

necessary assistance during their time of loss. Table 7 below shows the debtors aged analysis as at 31 March 2017.

Table 7: Claims Aged Analysis as at 31 March 2017

Name of Company	Orchid	Doves	First Funeral	Foundation	Moonlight	Passion	Ruvimbo	Sunset	Vineyard	Total

Total	0	0	26	0	0	0	2	0	0	28

10. Debtors Aged Analysis

Debtors aged above 90 days are considered as inadmissible assets in the calculation of capital and other issues in terms of Subsection (f) of section 5.1 of Circular 4 of 2014. The industry players are therefore encouraged to work on reducing their debtors and find sustainable premium collection methods. Table 8 below shows the debtors aged analysis of the funeral assurance industry.

Table 8: Debtors Aged Analysis as at 31 March 2017

Name of Company	Orchid	Doves	First Funeral	Foundation	Moonlight	Passion	Ruvimbo	Sunset	Vineyard	Total

11. Earnings

For the period under review the technical profits for the funeral assurance industry were US\$2.538 million, an increase of 56 percent from US\$1.627 reported for the same period in 2016.

Management expenses increased by 10 percent (from US\$4.28 million to US\$4.69 million) and constituted 60 percent of total costs. However IPEC notes the effort by many companies who are working on reducing the management costs as shown on table 9 on the next page. Claims contributed 30 percent while commission contributed 10 percent of the total cost. Table 9 and figure 4 below show key earning indicators for the funeral assurance industry.

Table 9: Key earnings indicators for the quarter ended 31 March 2017

Co. Name	NPW			Claims (000)			Commissions (000)			Management Expenses			Total Costs(000)			Combined Ratio

*Other investments comprise of premium receivables, furniture and fittings, motor vehicles, computer equipment, staff debtors, intercompany investments and funeral services current account.

Figure 5: Asset base as at 31 March 2017 (000)

**Other investments comprise of premium receivables, furniture and fittings, motor vehicles, computer equipment, staff debtors, intercompany investments and funeral services current account.*

Funeral Assurance Industry assets were mainly concentrated in in fixed property (42 percent) and other investments (55 percent) as at 31 March 2017. Despite double digits growth in cash and money markets (43 and 55 percent respectively) the current liquidity profile of the industry's assets impairs its ability to settle claims on time. Players are therefore encouraged to balance assets with a more liquid to semi-liquid profile that supports claims payment given the usual urgent need to settle funeral assurance claims.

Fig 6 below shows the breakdown of assets as at 31 March 2017.

Figure 6: Breakdown of assets

**Other investments comprise of premium receivables, furniture and fittings, motor vehicles, computer equipment, staff debtors, intercompany investments and funeral services current account.*

13. Prescribed assets

For the period under review the average prescribed asset ratio of the industry was 0.79 percent which is way below the minimum required ratio of 7.5 percent. The Commission takes a great exception when players do not adhere to compliance issues and funeral assurance industry players will be engaged with a view of regularizing their compliance before the end of the year. Table below shows the prescribed asset ratios for the players.

Table 11: Prescribed asset ratios for funeral assurance industry player as at 31 March 2017

Company	Prescribed asset Investments	Total assets	Prescribed asset ratio	Amount required to be compliant	Variance in compliance
				Actual	%
Orchid	US\$-	US\$1,268,976.00	0.00%	US\$95,173.20	7.5%

Vineyard	US\$68,000.00	US\$2,355,560.00	2.89%	US\$176,667.00	4.6%
Total	US\$480,274.00	US\$60,823,461.28	0.79%	US\$4,562,209.60	6.7%

14. Capitalisation and Solvency

As at 31 March 2017, 3 funeral assurance industry players' capitalization levels remain below the minimum required capitalization. The Commission is engaging these players to comply with the required capitalization or to opt for microinsurance which require less capital. The funeral assurance industry capital remain concentrated in 3 players namely Doves, First Funeral and Moonlight who contribute 80.1 percent of the industry's capital. Table 10 below shows capitalization levels for the industry.

Table 12: levels of Capitalisation, Liquidity and Solvency indicators as at 31 March 2017

Company	Current Assets			Current Liabilities			Total Assets		Total Liabilities			Capital (Net Assets)			Capital to liability Ratio (%)			Liquidity (Current) Ratio (%)

Minimum capital requirement for Funeral assurance players in terms of Statutory Instrument 21 of 2013 is U\$1.5 million. As at 31 March 2017, 3 funeral players had capital levels below the minimum required level. A liquidity ratio of not less than 100 percent as measured by the current ratio is considered adequate. Players are advised to have sufficient liquidity to cover their liabilities as recommended by their actuaries. IPEC requires funeral assurance industry players to maintain a solvency ratio of not less than 25 percent in line with international best practice.

Figure 7: Levels of Capitalisation, Liquidity and solvency indicators as at 31 March 2017

15. Conclusion

The Funeral assurance industry is poised for growth if players are able to improve their business models in areas such as cost structure, pricing and product development to take advantage of opportunities. However, challenges relating to non-compliance in areas such as prescribed asset ratio, minimum capital requirements and timeous submission of returns among other issues should occupy a greater part of the industry's strategies.

16. Appendix

Appendix 1: Statutory Instruments and Circulars issued during the quarter
